Nutritional Sciences Department

Nutritional Sciences

Nutritional sciences is available as a major on the BS degree and a minor on both the BS and BA degrees. The four degree options:

- Combined BS/MS in Dietetics
- Didactic Program in Dietetics
- Nutrition
- Food Management

All BS degrees in nutritional sciences follow the TCU Core Curriculum requirements for the College of Science & Engineering.

Honors College

Nutritional sciences majors who plan to pursue Departmental Honors must be members of the Honors College and should enroll in NTDT30001 Honors Seminar during their junior year and NTDT40001 Senior Honors Research their senior year.

Pass/No-Credit Option

See the Bachelor's Degree Definitions and Regulations in the Bachelor's Degree section of the University requirements.

Nutritional Sciences Affiliations

Students who demonstrate high scholarship are eligible for membership in the Beta Zeta chapter of Phi Upsilon Omicron, national honor society. The department also sponsors a chapter of the Texas Student Dietetic Association (SNDA). All NTDT majors are encouraged to join the Academy of Nutrition and Dietetics as well as the state and local chapters. The TCU Food Recovery Network (FRN) is a student organization housed in the Department of Nutritional Sciences. FRN membership is open to any student on campus. NTDT majors are encouraged to join.

Programs

CMDI - Combined Dietetics
CMDIMIN - Combined Dietetics Minor

Philosophy Department

Philosophy

Philosophy is available as a major on the BA and BS degrees and as a minor on both the BA and BS degrees. Philosophy is the systematic study of fundamental life issues. It deals with the application of logical reasoning to topics such as human nature, ethics, mind and knowledge. Students who study philosophy have the opportunity to acquire superior skills of logical analysis, argumentation, and written and oral expression. Although approaching these issues with the rigors of the philosophical method is both new and challenging to beginning students, most of those who study philosophy usually find the experience both interesting and rewarding. They also take with them numerous lessons from their studies that enable them to live in a way that is both more successful and fulfilling.

Honors College

Philosophy majors who plan to pursue Departmental Honors must be members of the Honors College and should enroll in PHIL 30003 during their junior year and PHIL 40000 the fall semester of their senior year. (PHIL 30003 may be included in the 24 semester hours required for the major, but PHIL 40000 may not.)

Physics Department

Physics & Astronomy

Physics and astronomy are available as a major or minor on both the BA and BS degrees.

Honors College

Physics and astronomy majors who plan to pursue Departmental Honors must be enrolled in the Honors College. Students should take PHYS30003 Junior Honors Research their junior year and PHYS40003 Senior Honors Resch their senior year.

Pass/No-Credit Option

See the Bachelor's Degree Definitions and Regulations in the Bachelor's Degree section of the University requirements.

Dual Credit

Students may not earn credit for PHYS20475 Physics I for Majors/PHYS20485 Physics II for Majors and PHYS20474 Physics I with Lab: Mechanics/PHYS20484 Physics II with Lab and/or PHYS10154 General Physics I with Lab/PHYS10164 General Physics II with Lab. Only one of these pairings will count as credit towards the degree.

Physics & Astronomy Honor Societies

The department sponsors Sigma Pi Sigma, the national honor society in physics.

Programs

Political Science Department

Political Science

Political science is available as a major and a minor on both the BA and BS degrees. The Department of Political Science offers course concentration in the following seven sub-fields:

- American Politics
- Political Theory
- International Politics
- Comparative Politics
- Public Law
- Research Methods
- Public Affairs Internships

Honors College

Political science majors seeking to achieve departmental honors must be members of the Honors College and complete the following courses:

POSC 20093

POSC 40001

POSC 40003

POSC 30003 (or POSC 40093)

Please note that students must complete POSC 20093 prior to enrolling in POSC 40001, which in turn must be completed prior to POSC 40003.

A suggested timeline for completing the sequence might be:

Spring of sophomore year or Fall of junior year: POSC 20093

Spring of junior year: POSC 30003 (or POSC 40093) AND POSC 40001

Fall of senior year: POSC 40003

Spring of senior year: Graduate with Departmental Honors

Political Science Honor Society

The department sponsors the Beta Lambda Chapter of Pi Sigma Alpha, national honor society in political science. Membership requires completion of a minimum of 10 semester hours of political science (at least 6 in regular classroom courses on TCU's campus and at least 3 advanced, i.e., 30000 level or above), at least a 3.0 GPA in political science courses and at least a 3.5 GPA overall. Applicants need not be a political science major or minor. Washington Internship Program

TCU is affiliated with the Washington Center, which provides placements, supervision and housing for students who seek a professional experience in a public or private organization in the nation's capital. Students selected for the program must have a minimum GPA of 3.0 and must return to TCU for at least one semester after the internship. Students apply each fall, a year in advance of their internship, and must attend a non-credit preparatory seminar in the spring. Up to 15 hours of credit may be earned through this program, which is multidisciplinary and available to students in any major field.

Psychology Department

Psychology

Psychology is available as a major and minor on both the BA and BS degrees.

Although the programs may be used to achieve a variety of objectives, they are designed to:

- Provide majors with a strong background for graduate or professional training in psychology or related fields;
- Educate intelligent consumers who can seek, evaluate and apply selected psychological services effectively; and
- Provide fundamental information for a critical understanding of psychological knowledge and problems.

In addition to basic coursework, the programs offer learning experiences that include research projects, individual career planning, special seminars and supervised off-campus activities. Such courses, primarily for juniors and seniors, require approval from the students' adviser or the instructor during the semester prior to the one in which the student intends to enroll. Students are encouraged to consult with their academic adviser at least once each semester to plan an appropriate selection of courses to meet their individual goals. Further information regarding the psychology curriculum may be obtained from the chair of the department.

Honors College

A student wishing to complete Departmental Honors in psychology must be enrolled in the Honors College and complete PSYC 30003 and PSYC 40003. It is recommended that students enroll in PSYC 40003 for the fall semester of the senior year.

Pass/No-Credit Option

See the Bachelor's Degree Definitions and Regulations in the Bachelor's Degree section of the University requirements.

Up to (but no more than) 3 hours earned in elective courses that are offered only on a pass/no-credit basis may be applied to meet major or minor requirements within the College of Science & Engineering. Additional hours in such courses may be used as free electives or for majors or minors in other colleges (as permitted by those colleges).

Psi Chi

The department sponsors the TCU Chapter of Psi Chi, the national honor society for psychology.

Ranch Management Department

Ranch Management

Ranch Management is available as a BS, certificate and minor. An application process is required for all Ranch Management programs.

Since 1956, students from 44 states and 22 nations have studied ranching at TCU through the certificate program. In addition to the certificate program, ranch management is available as a Bachelor of Science Degree and as a minor with a Bachelor of Science or Bachelor of Arts in another discipline.

*RAMA40101 Management Plan Capstone, Management Plan Capstone Course, must be completed with a grade of C of higher in order to earn the BS Degree/Certificate and/or Minor in Ranch Management.

Courses for the major (including Associated Requirements), the minor and the certificate may not be taken on a Pass/No Credit basis.

**RAMA courses are only available to students admitted to the Ranch Management program

Programs

RAMA - Ranch Management
RAMA-BS - Ranch Management
RAMA-RM - Ranch Management
RAMAGCRT - Graduate Certificate in Ranch Management
RAMAMIN - Ranch Management Minor
RMPM - Ranch Management Pre-major

Courses

RAMA10200 - General Transfer Credit
RAMA10323 - Animal Health&Reproductn
RAMA10613 - Ranch Business Managemnt
RAMA20103 - Challenges of Global Food Production
RAMA30102 - Ranch Operations and Development
RAMA30212 - Ranch Jobs and Development
RAMA30403 - Soil and Water Conservation
RAMA30413 - Conservation and Development
RAMA30703 - Animal Nutrition and Feeding
RAMA30713 - Animal Nutrition and Feeding
RAMA40101 - Management Plan Capstone Course
RAMA40103 - Beef Cattle Production
RAMA40112 - Sheep and Goat Production
RAMA40113 - Beef Cattle Production
RAMA40303 - Animal Health Management
RAMA40313 - Animal Health and Reproduction
RAMA40323 - Animal Health and Reproduction
RAMA40513 - Grassland Management
RAMA40613 - Ranch Business Management
RAMA40813 - Marketing of Livestock and Meats
RAMA40903 - Forage Production and Use
RAMA40970 - Special Topics in Ranch Management
RAMA50213 - Ranch Business Management
RAMA50503 - Range Management
RAMA50603 - Ranch Records and Finance
RAMA50603 - Ranch Records and Finance
RAMA50803 - Marketing of Livestock and Meats
RAMA50803 - Marketing of Livestock and Meats

Religion Department

Religion

Religion is available as a major on the BA degree and as a minor on the BA, BS and BBA degrees.

Committed to the liberal arts and its diverse disciplinary perspectives, the Religion Department fosters an inquiring, critical, and intersectional approach to the study of religion, enabling students to become informed and engaged interpreters of religious communities, texts, ideas, artifacts, and practices in their cultural and historical contexts. The Department supports the ethical and global aims of the University's mission in its commitment to prioritize diversity, equity, and inclusion and aims to equip students to understand different worldviews expressed in and beyond the world's religions.

Courses in the department approach religious traditions historically, textually, aesthetically, philosophically and comparatively, and consider the role of religion in society, culture and individual life. These courses introduce students to various methods and issues in the study of religion; familiarize them with the beliefs and practices of

various religious traditions; develop their critical thinking, reading and writing skills; and encourage them to explore and evaluate their own culturally conditioned self-understandings and ultimate commitments. Students will find the multidimensional study of religion to be fertile ground for developing habits of mind that are excellent foundations for professional life. Those planning for seminary, graduate study in religion or other disciplines, or church-related vocations will be well prepared by department courses and well supported by faculty advisement.

Writing Proficiency

The development of writing proficiency is a vital component of the educational process. Both majors and minors are encouraged to utilize faculty assistance and the resources of the Writing Center to achieve that goal.

Honors College

Religion majors who plan to pursue Departmental Honors must be members of the Honors College and should enroll in RELI 30003 during their junior year, and RELI 40003 during the fall semester of their senior year. Note: RELI 30003 substitutes in the major for the required Senior Seminar, RELI 40603.

Programs

RELI - Religion
RELI-BA - Religion
RELIMIN - Religion Minor

Courses

GREE10053 - First Semester College Greek (Hellenistic)
GREE10063 - Second Semester College Greek (Hellenistic)
GREE20053 - Third Semester College Greek (Hellenistic)
GREE20063 - Fourth Semester College Greek (Hellenistic)

School of Art Department

Studio Art, Art Education, & Art History

The School of Art administers the Bachelor of Fine Arts (BFA) degree with a major in studio art or art education, as well as the Bachelor of Arts (BA) degree with a major in art history or studio art.

The BFA in studio art has available coursework in ceramics, new media, painting, photography, printmaking, or sculpture a minimum of 78 semester hours in art is required for studio majors. The BFA in art education requires a minimum of 66 hours of art. The degree plans are outlined below.

- Bachelor of Arts (BA): Art History, Studio Art
- Bachelor of Fine Arts (BFA): Art Education, Studio Art
- Minors: Art History, Studio Art

Minimum Grade Requirement

All are courses take in the major or minor sequences must be passed with a grade of "C" or better to fulfill graduation requirements.

Departmental Requirements

The School of Art requires a minimum of 2.5 cumulative GPA as a prerequisite to junior and senior-level studio art and art education courses. After entrance into upper-division courses, a minimum of 2.5 GPA must be maintained as a prerequisite to further advanced enrollment.

Field Trips

Field trips may be required by instructors as a part of the content of any course. Every effort will be made to ensure that these trips do not conflict with other portions of the student's schedule.

Honors College

School of Art majors who plan to pursue Departmental Honors must be members of the Honors College and should enroll in ARED, ARHI or ARST30003 Junior Honors Seminar during their junior year and ARED, ARHI or ARST40003 Senior Honors Researchduring the fall semester of their senior year.

Transfer Students

To declare a major in Studio Art, transfer students must present a portfolio of their work for evaluation by the School of Art during their advising and/or prior to registration.

Declaration of a Major

The school requires students to declare a major during or before the second semester of their sophomore year. Students majoring in studio art must also declare a concentration. Once a concentration is declared, a faculty adviser from that area will be assigned, and an appropriate sequence of courses will be formulated.

Major/Minor Shared Requirements

Students majoring in studio art (BFA or BA) must complete an additional 12.0 credit hours of art history courses to complete the requirements for an Art History Minor.

Students majoring in art education (BFA) must complete an additional 12.0 credit hours of art history courses to complete the requirements for an Art History Minor.

Students majoring in art history (BA) must complete an additional 9.0 credit hours of studio art courses to complete the requirements for a Studio Art Minor.

Student Exhibitions

Both graduate and undergraduate student exhibitions take place at various times during the year in the Art Galleries at TCU. No work may be removed from exhibitions without school approval. Students must claim their work at the end of each exhibition. The school cannot accept responsibility for the care, storage or distribution of student work.

Social Work Department

Social Work

Social work is one of the human service professions. Social workers help individuals, groups and communities solve or relieve life problems using a variety of professional skills. The educational program integrates liberal arts courses with preparation for professional practice. The primary objective of the department is to prepare students as generalist practitioners for entry to beginning social work practice. An additional objective is to prepare students for admission to graduate schools of social work (eligible for advanced standing in most master's degree programs).

The curriculum includes content in social welfare policy and services, human behavior and the social environment, social work practice, research and field education. It focuses on values and ethics, populations at risk and diversity. Concurrent with their academic work, students are provided service-learning opportunities in several classes. During the senior year, students complete a concurrent placement (12 academic hours) of field education (internship) in two semesters in a public or private social agency selected in accord with the student's area of social work interest and educational needs.) Graduation with a BSW requires a "C" or better in all social work courses.

The Department of Social Work and the social work major (not the minor) are fully accredited at the baccalaureate level by the Council on Social Work Education (CSWE).

TCU's Department of Social Work does not discriminate on the basis of age, gender, race, color, ethnicity, national origin, handicap, veteran status, political beliefs or sexual orientation.

Gatekeeping

The social work profession has the legal and ethical responsibility to protect both society and the profession by assessing students' readiness to work with clients. This gatekeeping responsibility is outlined in the BSW Handbook and is based on adherence to the NASW Code of Ethics. The faculty discusses students' professional development and readiness to interact with clients during the field application process, which reinforces the gatekeeping process.

Admission to BSW Field Education

Students may declare the social work major at any time. Admission to BSW Field Education requires that students:

- Have attained junior status;
- Have a 2.25 or higher overall GPA;

- Complete or be enrolled in SOWO10833 Intro to Social Work, SOWO30833 Macro Social Work Practice, SOWO30843 Human Behav&Soc Envir I, SOWO30853 Human Behav&Soc Envir II, SOWO30863 Social Welfare Policy, SOWO30883 Micro Social Work Practice, SOWO40863 Social Work wth Groups&Fam, and SOWO40833 Field Seminar 2.
- Have a 2.5 GPA in social work and a "C" or better in all SOWO courses; and
- Make written application and receive faculty approval based on the application to evaluate readiness for field education. Field Education may be postponed or denied if the faculty finds the student insufficiently prepared or lacking required knowledge, skills or values.

Honors College

Social Work majors who plan to pursue Departmental Honors must be members of the Honors College and should enroll in SOWO30003 Honors Tutorial In Sowo during the spring semester of their junior year and SOWO40003 Senior Honors Res Proj during the fall semester of their senior year.

Interdisciplinary Studies

Students may undertake an interdisciplinary program with a double major in Social Work and another major, even when different degrees are involved (BA and BS). Programs such as Social Work and Religion Studies, Social Work and Psychology, and others require faculty advisers in both fields to coordinate course and degree planning.

Transfer Credit

Most core curriculum and related coursework from accredited universities will transfer. However, all courses used to satisfy the cultural awareness, global awareness, or citizenship and social values components of the TCU Core Curriculum must be taken at TCU. Social work courses from CSWE- accredited social work programs may be accepted toward the social work degree upon review of the syllabi from the transfer college/university.

Study Abroad

Students are encouraged to study abroad. The Department of Social Work expects that students take specific SOWO courses during junior and senior year, as well as internship during senior year, therefore it is recommended that study abroad occurs prior to junior year. Students should schedule study abroad accordingly.

Social Work Honor Society

The department sponsors the Iota Xi chapter of Phi Alpha, the national Social Work Honor Society. In accordance with the criteria set by the Phi Alpha Honor Society, invitation is extended to students in the top 35% of their class at the end of their junior year.

Social Work Licensing

BSW students have the option to take Texas State Licensing Examination in their final semester in order to be licensed as LBSWs in Texas. Licensing may be transferable to other states. Additional information can be found about licensure at the Texas Behavioral Health Executive Council site for the Texas State Board of Social Work Examiners https://www.bhec.texas.gov/texas-state-board-of-social-worker-examiners/index.html

Student Association of Social Workers (SASW)

The Student Association of Social Workers (SASW) is a recognized organization of the University with membership open to all TCU students who are interested in social work. SASW offers an opportunity for BSW, MSW and other students to get involved in activities around campus and in the community. The organization began in the spring of 1978 in order to: Promote knowledge about social work at TCU, facilitate communication among students and between students and faculty, provide mutual support among students, and promote social action and community service.

Sociology and Anthropology Department

Sociology and Anthropology

The anthropology major is administered by the Department of Sociology and Anthropology. It is available as a major on the BA degree and a minor on both the BA and BS degrees.

Anthropology is the holistic description and analysis of human beings in all their diversity. Anthropology emphasizes a cross-cultural and global perspective, and seeks to understand our species, *Homo sapiens* , both throughout time and in many different geographical regions. Anthropology is divided into four fields: sociocultural anthropology, archaeology, physical anthropology and linguistic anthropology. Anthropologists study a wide range of topics, including gender and ethnicity, race, material artifacts, human evolution, genetic diversity, medicine and healing, globalization, economic systems and social change, violence and social suffering, sociocultural systems of past societies, the rise of complex civilizations, language and culture, urbanization, religion and ritual, and the effect of the mass media. Anthropologists conduct their research in many different places throughout the world, including Mexico, Brazil, Germany, Japan and the United States.

Anthropology is an important component of a liberal arts education, as it complements a wide variety of other disciplines, encourages analytical thinking and fosters a holistic approach to learning. The undergraduate program in anthropology can provide a foundation for the pursuit of advanced degrees in anthropology and other disciplines such as law, medicine, social work, public health, education and history. Anthropology's focus on understanding different cultures makes it a particularly good preparation for work related to international and global issues,

public policy and cultural diversity. Anthropology graduates use their degrees in a wide range of fields such as government service, museums, international organizations, business, education, advocacy, public policy analysis, market research and healthcare.

Sociology is available as a major on the BA and BS degrees and as a minor on both the BA and BS degrees.

CLEP

The Department of Sociology and Anthropology approves the awarding of three semester hours of credit for a score of 55 on the CLEP Subject Exam in Introductory Sociology, equivalent to SOCI 20213.

Honors College

Sociology majors who plan to pursue Departmental Honors must be members of the Honors College and should enroll in SOCI 30003 during their junior year and SOCI 40003 during the fall semester of their senior year.

Sociology Honor Society

The department sponsors Lambda Chapter of Alpha Kappa Delta, International Sociology Honor Society.

Spanish and Hispanic Studies Department

Spanish and Hispanic Studies

Spanish and Hispanic Studies is available as a major and a minor on the BA degree.

Placement

Students have several options for finding the appropriate level to start their language studies at TCU. Various means of determining proper placement, as well as obtaining credit for previous language study, are outlined below.

1. To determine proper placement level, students should consult the level descriptions on the department's website and take the CAPE examination. Details concerning the CAPE placement exam are provided to incoming students prior to orientation and registration. To access, click on the CAPE (link) which will lead you to a page where you will register and create an account to gain access to the exam.
2. Students with academic or life experience in a foreign language are urged to enroll at a level appropriate to their skills. As an incentive for students to enroll at their actual level of ability, TCU offers the opportunity to earn advanced placement credits through one of two ways:

- By means of exams administered by the College Board (AP or CLEP).

Suggested placement for students with AP credit is as follows:

AP	TCU Equivalent	Credit	Placement
3	10103, 10203	6 hr	20103
4	10103, 10203, 20103, 20203	12 hr	30503, 30603, 31703
5	10103, 10203, 20103, 20203	12 hr	30503, 30603, 31703

- By entering at an appropriate level in accordance with the guidelines provided below. (For details, please consult the department web site at www.Span.tcu.edu . Whenever uncertain, students should consult with an adviser in the Department of Spanish and Hispanic Studies.)

SPAN 10103: for students who have never studied Spanish.

SPAN 10203: for students who have minimal formal study and very limited knowledge of Spanish grammar and culture.

SPAN 20103: for students who know basic Spanish grammar and need to learn more complex structures and practice writing.

This is also the entry point into the Spanish major.

SPAN 20203: for students who have a good grasp of Spanish grammar but are not quite ready for advanced language courses.

SPAN 30503, SPAN 30603, or SPAN 31703 (for Heritage Speakers): for students who are ready to begin at an advanced level. This is also the entry point into the Spanish major.

Earning Advanced Placement Credits According to Entrance Level

Students whose first foreign language class at TCU is beyond the first-semester level may earn additional language credit (if credit has not already been awarded for transfer, CLEP or AP work) as follows:

- If the first foreign language class is at the *second-semester level* (SPAN 10203) and a grade of "B-" or higher is earned, 3 semester hours credit will also be awarded for the first-semester course. That is, the student will earn 6 hours of credits for taking a 3-credit course.
- If the first foreign language class is at the *third-semester level* (SPAN 20103) and a grade of "B-" or higher is earned, 6 semester hours credit will also be awarded for the first- and second-semester courses. That is, the student will earn 9 hours of credits for taking a 3-credit course.
- If the first foreign language class is at the *fourth-semester level* (SPAN 20203) and a grade of "B-" or higher is earned, 9 semester hours credit will also be awarded for the first-, second- and third-semester courses. That is, the student will earn 12 hours of credits for taking a 3-credit course.
- If the first foreign language class is above SPAN 20203 and a grade of "B-" or higher is earned, 9 semester hours credit will also be awarded for the second-, third- and fourth-semester courses. That is, the student will earn 12 hours of credits for taking a 3-credit course.

Notes: Spanish for Beginners 1 is designed and reserved for students with no previous study of the language.

Students entering the program at a certain level may not receive credit for coursework taken below that level.

Sigma Delta Pi Honor Society

The department annually recognizes its outstanding students by inviting them to join Sigma Delta Pi, the national honor society for Spanish scholars.

Strategic Communication Department

Strategic Communication

The Department of Strategic Communication is **TCU's home for advertising and public relations**. Strategic communication students learn to think strategically and create effective, innovative, and responsible stories about brands and organizations, solving real-world communication challenges. In learning the theories and methods of advertising, public relations, and new media to meet the strategic goals of organizations, strategic communication students gain the tools and skills they need to succeed in the job market and in life.

The strategic communication major emphasizes experiential learning. Students learn to conduct research; write and create content for print, broadcast, online and mobile platforms; design; choose channels to place messages; and evaluate effectiveness. They have various opportunities to apply what they learn with real-world corporate, public, and nonprofit clients in classes and through dedicated experiential opportunities, including:

- Roxo, the vibrant student-run strategic communication agency, which services real-world clients through paid and pro bono work;
- National advertising and public relations campaign competitions, including the American Advertising Federation (AAF) National Student Advertising Competition (NSAC) and the Public Relations Student Society of American (PRSSA) Bateman Competition;
- internships; and
- American Advertising Federation (AAF) and Public Relations Student Society of America (PRSSA) chapters affiliated with the Department of Strategic Communication.

Individual students, teams, and Roxo — the student-run advertising and public relations agency — regularly earn recognition in national, regional, and local competitions, including Greater Fort Worth PRSA's Worthy Awards, the AAF Fort Worth Addy Awards, the National Student Advertising Competition, and the Bateman Competition.

Most strategic communication graduates pursue careers in advertising or with public relations agencies, corporations, government agencies, nonprofit groups, health care groups, sports teams or consulting firms. Others enter graduate school or specialized, pre-professional programs.

Admission to the major

Students may declare a major in strategic communication as an incoming first-year or transfer student prior to orientation. Any students wishing to join strategic communication after their first-year or transfer orientation must apply to the major.

Admission to the strategic communication major requires multiple steps.

Entering first-year students who declare strategic communication as their major prior to the start of orientation sessions (typically the end of May), are automatically admitted to the major. They must complete the application process during summer orientation sessions (step 4 in the process). Once orientation sessions begin, all students, including first-year students, must apply to the major. Admission to the strategic communication major is competitive.As a result, students may be admitted to TCU but not to strategic communication if they are not

accepted to the major through the application process. Students with more than 80 college credits will not be admitted to the major, whether internal or external transfers, because course sequencing in the major requires at least five long semesters to complete the major.

To be considered for admission to the Department of Strategic Communication, students must complete all of the following:

1. Based on type of student
   a. INCOMING FIRST-YEAR STUDENTS: Entering first-year students, once admitted to TCU, may declare strategic communication as their major prior to the start of the orientation sessions (typically the end of May) and be directly admitted to the major in only the fall semester if they meet the following requirements: They must have completed no hours at TCU (except for hours awarded for AP or IB courses, or dual-credit hours awarded in high school through another university or college), and they must complete step 4 of the application process. Once TCU orientation sessions begin, first-year students must wait to apply to the major until the spring semester.
   b. INTERNAL TRANSFER STUDENTS: An internal transfer student is one who is currently enrolled in another degree program at TCU. These students must have a 2.5 minimum overall TCU GPA (and should have a 3.0 GPA to be competitive).
   c. EXTERNAL TRANSFER STUDENTS: The TCU Office of Admissions makes the decision on all transfer applicants. To be considered for provisional admission to the strategic communication major during the first semester after admission to TCU, students should have at least a 3.0 transfer GPA from a four-year institution and a 3.25 GPA from a two-year institution. If this GPA is in place and spaces are open in the gateway courses (STCO 23113 or STCO 23123) in the first semester, students may enroll in these courses after they have met with an academic adviser in the department and have completed step 4 of the process.
2. Applications to the major open within the first six weeks of each long semester. To receive dates and instructions for completing the application, please contact the department's main office at stratcomm@tcu.edu or visit its website at https://schieffercollege.tcu.edu/stratcomm/.
   Applicants will be required to:
   1. Independently complete a personal narrative about reasons for selecting the strategic communication major and another creative assignment
   2. Read and sign the Ethics and Professionalism Statement for the Department of Strategic Communication and provide basic information for departmental advising records

   c. Submit a resume and transcripts verifying the GPA (for internal and external transfer students only)

   Completed applications will be evaluated by an application committee. Applicants will be notified by the Department once admission decisions have been rendered.
   In the event of a formal appeal concerning the application process, the chair of the Department of Strategic Communication will appoint three faculty members in the department to review the appeal and report to the chair.
   After admittance to the major, students must earn a C or higher and a combined 2.5 GPA in the two introductory courses, STCO 23113 and STCO 23123, before enrolling in additional strategic communication courses. Additionally, students must also complete MATH 10043 Statistics or INSC 20153 (or equivalent) with a C- or higher before enrolling in many of the advanced courses requiring this prerequisite. Students must earn a C or higher in each strategic communication course counted toward major degree requirements.

Strategic Communication Degrees

The Department of Strategic Communication offers the Bachelor of Science degree and the Master of Science degree.

Programs

ADPR-BS - Advertising/Public Relations
ICAD-BA - International Communication - Advertising Public Relations

TCU Global Department

TCU Global

TCU Global serves as a catalyst for students to become exceptional global citizens through active engagement. TCU Global promotes international and domestic programming and structures, including summer study abroad programs led by TCU faculty members, semester-long study abroad programs, and the Global Scholars program. TCU Global also supports domestic travel. For more information, visit https://studyabroad.tcu.edu/

Semester and Year Long Opportunities – International

The *TCU-In Athens Program* allows students to spend a semester abroad in one of the oldest cities in the world. TCU-In Athens students attend the American College of Greece (ACG), where they will take a full slate of courses in far-ranging subjects. Courses are taught by Greek professors in English and students take classes with other study abroad students. The American College of Greece is located on a hillside on the edge of Athens. Students are housed in a residence hall complex a short walk from campus.

The *TCU-In Barcelona Program* offers students the chance to enroll in a wide range of courses, participate in internships, and take part in activities and excursions, all while living in the international, culturally rich city of Barcelona. TCU-In Barcelona students are allowed to choose a variety of academic options for their semester abroad. They take classes through the CEA-CAPA center and can add in courses from the Universitat Pompeu Fabra (UPF), Universitat Autònoma de Barcelona (UA), and Universitat de Barcelona (UB). Courses at these institutions are taught by Spanish professors in English and Spanish, and students take classes with other study abroad students and Spanish students. Barcelona is the country's second-largest city located in the northern region of Spain. This city offers an ideal blend of historic and modern, combining Gothic charm with thriving immigrant cultures, and Gaudí's quirky architecture with world-class dining and shopping. Students are housed in shared apartments with other TCU and CEA-CAPA study abroad students.

The *TCU-In Dublin Program* offers students the option to spend a semester at one of Ireland's largest and most international universities, University College Dublin, while living in the culturally-rich and friendly city of Dublin, Ireland. Students can take courses in Arts & Humanities; Business, Engineering, and Architecture; Health and Agricultural Sciences; Science; and Social Sciences. They live on a 330-acre campus in UCD Residences and have access to all the modern campus amenities, including a multilevel gymnasium, library, green spaces, and student unions. The Dublin City Center, home to Temple Bar and Dublin Castle, is a short bus ride from campus.

The *TCU-In Florence Program* a wide variety of disciplines, but specializes in Fine Arts and Liberal Arts. Students take classes at Scuola Lorenzo de' Medici (LdM), an international school in Florence, alongside other international students. TCU students live in apartments throughout the city center. Florence, itself, is a stunning Renaissance city and an artistic and cultural capital. TCU-In Florence features a strong Fine Arts program, including art history, fashion, graphic design, interior design, and studio art. No prior Italian language is required in order to apply.

The *TCU-In London Program* provides a unique opportunity for TCU students to study in one of the major capitals of the world, drawing on the immense intellectual, cultural and human resources of London. TCU partners with the University of Westminster and the University of Roehampton to provide opportunities to take courses in a wide range of disciplines. Students also have the option of choosing an internship for academic credit.

The *TCU-In Madrid Program* is an extraordinary opportunity to attend a preeminent private university in Spain, while living in the city center of this vibrant international city.The cost of living makes this an affordable European destination. Students attend classes at Universidad Nebrija, where they can study business, economics, communication, psychology, cultural studies, or Spanish language. With the main campus located one mile north of the center of Madrid, Nebrija offers students an urban campus with state-of-the-art facilities, including computer labs, libraries, and public spaces. Students are also housed near the city center, commuting to class and the Accent Center taking anywhere from 15 to 30 minutes.

The *TCU-In Oxford* Program is a prestigious opportunity to study at St. Catherine's College, one of nearly 40 colleges that make up the University of Oxford. TCU juniors and seniors with high academic qualifications can study at St. Catherine's College through its Visiting Students Programme. Visiting Students have the opportunity to choose from the widest variety of tutorial courses offered by any college at Oxford. Visiting Students live in residence halls on the St. Catherine's campus.

The *TCU-In Paris* program allows students to live and study in one of the most historically and culturally rich cities in the world. A prime location for the Fine Arts, the TCU-In Paris program has strong offerings in Interior Design, Fashion Merchandising, and Studio Art, among others. Students take classes at Paris College of Art, an international college of art and design in Paris, alongside other international students. All TCU-In Paris students are required to take one course at the Accent Study Center, centrally located in Paris. TCU students live together in apartments throughout the city. No prior French language is required in order to apply.

The *TCU-In Paris – Dance* program allows dance students to live and study in one of the most historically and culturally rich cities in the world. A prime location for the Fine Arts, the TCU-In Paris program has students take a full load of studio dance classes at the Paris Marais Dance School, alongside other French and international students. All TCU-In Paris students are required to take one course at the Accent Study Center, centrally located in Paris. TCU students live together in apartments throughout the city. No prior French language is required in order to apply. This program is only available to Dance majors during the spring semester of their junior year.

The *TCU-In Prague* program offers students the option to spend a semester at AEP, the undergraduate study abroad program of Charles University, one of the oldest and most prestigious universities in Europe, while living in Prague, the political, cultural, and economic hub of Central Europe. Open to a limited number of participants, this program focuses on economics and political science while also offering courses in art history, communications, psychology, and liberal arts. Students are required to take one Czech language course as part of their course load. Students attend classes in the historic Schebek Palace, only blocks from the center of Prague, and are housed in shared apartments throughout the city center.

The *TCU-In Rome Program* allows students to experience an international and historically rich environment while studying at the American University of Rome (AUR), an American-style university in the heart of Rome. AUR is home to a highly diverse student body representing over 60 countries on campus. 28 native languages are spoken amongst their faculty and students, although all programs are conducted in English. Students study in Monteverde, a quiet neighborhood adjacent to Trastevere. TCU in Rome offers many types of courses, with strengths in Business, Communication, Fine Arts, and Liberal Arts. No prior language is required to be accepted to the program.

The *TCU-In Seville Program* is one of TCU's flagship semester programs, where students immerse themselves into the culturally rich city of Seville. TCU-In Seville students take classes through the International Center at Universidad Pablo de Olavide (UPO), a Spanish university, and the CEA-CAPA Study Center. Courses are taught by Spanish professors in English and Spanish, and students take classes with other study abroad students.TCU-In Seville offers courses in a wide range of disciplines and is open to any student. They have a strong focus on Spanish language and culture and represent a great option for those interested in furthering their Spanish language skills. Many Spanish majors and minors at TCU choose to study abroad in Seville. Seville is the capital of Andalusia, a southern region of Spain renowned for its beauty, history, spectacular festivals, and cultural legacies: tapas, bullfighting, and flamenco all originate from Andalusia.

The *TCU-In Stellenbosch Program* offers students the opportunity to study in Stellenbosch, South Africa, a charming college town outside of Cape Town, surrounded by breathtaking mountain and ocean views. Students live on campus and may take courses across a wide range of disciplines at Stellenbosch University including science, business and the liberal arts.

The *TCU-In Sydney Program* allows students to take classes at University of Sydney, a global top 20 university, leading the way in addressing environmental, social, and governance challenges. TCU students generally live together in residence hall-style apartments near campus. Set around the world's largest natural harbor, Sydney is home to beautiful golden beaches, world-class museums and art galleries, delicious fresh food, and a calendar of exciting events and festivals. Students can take classes from a wide variety of subjects, including health sciences, education, and music.

Other special study abroad opportunities include:

TCU Affiliated Programs. TCU Affiliated Programs are select study abroad programs offering additional semester- and year-long experiences for students in locations throughout Australia, Asia, Europe, Latin America and Africa.

Bilateral Exchange: Students have the ability to exchange for a semester with prestigious universities throughout the world—for example WHU - Otto Beisheim School of Management in Germany, Sciences Po and EDHEC Business School in France, and Meiji University in Japan. These programs are academically rigorous and require a high level of independence.

Semester Opportunities – Domestic

The *Washington Internship Program - TCU Department of Journalism* allows a select group of students to spend the fall semester interning at powerful political, social, government and media organizations in Washington, D.C. In the past, students have interned for the CBS Washington bureau, POLITICO, USA Today, the ONE Campaign, McClatchy Washington bureau and communications offices in the U.S. Congress. Internships are co-supervised by the employer and a TCU professor who visits students in Washington during the semester. The Washington Center (TWC) houses its interns in its own building, a new, secure facility with furnished apartments and 24-hour residence staff assistance, only two blocks from a Metro subway station and within walking distance of downtown Washington. TWC arranges for instructors to teach classes at night so students can continue to make progress towards graduation.

For more than 40 years, the *Washington Internship Program - TCU Department of Political Science* has placed interns in a wide variety of DC internships. As a TCU Washington intern, students work four days a week at their internship site, from late-August through December. They also take an evening class once a week and attend programming on Fridays. Recent internship placements include Congress, the White House, executive agencies such as the departments of State, Justice and Commerce, advocacy groups, think tanks, non-government organizations, news

media outlets, lobbying firms and U.S. attorneys. The Washington Center (TWC) houses its interns in its own building - a new, secure facility with furnished apartments and 24-hour residence staff assistance, only two blocks from a Metro subway station and within walking distance of downtown Washington.

TCU Summer Programs

TCU Summer programs are broken down into two categories:

TCU Faculty-Led Programs are intensive study abroad courses developed and directed by TCU faculty members from such disciplines as biology, business, environmental science, communication science disorders, strategic communication, history, journalism, literature, nursing, social work, political science, religion, Spanish, and theatre. Generally taking place from 2-4 weeks, these programs are highly experiential and can take place around the globe, including Argentina, Australia, Costa Rica, England, France, Germany, Italy, Japan, Scotland, South Africa and Spain.

TCU Summer Semester Programs allow students to enroll in a local university during the summer for 4 – 8 weeks, taking a number of courses. Students have the ability to participate in international internships. These programs allow for more cultural immersion as students are based in one location for several weeks. These programs are held in Rome, Florence, Barcelona, London, Dublin, and Sydney.

Student Conduct and Academic Issues:

TCU Global serves as an academic unit for purposes of administering Study Abroad and Study Away programs, as well as courses assigned INTL designation. For academic issues related to INTL courses, semester study abroad and study away programs administered through TCU Global, the Chair of the TCU Global Academic and Curricular Advisory Committee serves as the Department Chair and the Vice Provost serves as the Dean. The Chair of the TCU Global Academic and Curricular Advisory Committee will coordinate with the academic dean of the student's major. For conduct issues, the Senior International Officer will coordinate with the Dean of Students and the academic dean of the student's major to ensure consistency with TCU policies and processes. For more information, visit https://studyabroad.tcu.edu/

SABD30120 - Study Abroad-TCU in programs
SABD32120 - Study Abroad-Partner Program
SAWY30120 - TCU Study Away

Theatre Department

Theatre

The Department of Theatre offers two degrees in theatre: the Bachelor of Fine Arts (BFA) with a major in theatre and an emphasis chosen from acting, design & technology, musical theatre, or theatre studies; and the Bachelor of Arts (BA) with a major in theatre that permits the student to choose an additional major or minor and fulfill the Foreign Language requirement which is the completion of six hours at the sophomore-level or fourth semester demonstrated competency. An audition or portfolio review is required for entrance into any of the BFA degree programs. Contact the Theatre Department at TCU for audition information. Admission to the BA program is available to any TCU student.

THEATRE TCU MISSION STATEMENT: To develop in our students' artistic excellence, intellectual growth, and a spirit of empathy through professional theatre training within a liberal arts education.

THEATRE TCU Core Values:

- Artistic and academic excellence and achievement
- Individual and collaborative artistic expression
- Inclusion and diversity of people, ideas, perspectives, and cultures
- Active study of the past to help us form the future
- Value and power of the theatre for social growth
- Self-discipline and an optimal work ethic
- Mentorship and commitment to personal development

The Department of Theatre functions within the context of a liberal arts university and sincerely believes that the student experience should include areas of investigation beyond the narrowly focused instruction that characterizes most non-university affiliated professional training programs.

The department requires a core of courses in all aspects of the theatre. These courses provide an overall view of the discipline, including acting, analysis, history, dramatic literature, design, and technical production. The core provides a strong background for both the liberal arts and pre-professional student.

Honors College

Theatre majors who plan to pursue Departmental Honors must be members of the John V. Roach Honors College and must complete THEA31000 Junior Honors Seminar and THEA41000 Senior Honors Seminar prior to graduation. Both courses cannot be taken during the same semester.

Departmental Facilities

The Department of Theatre is housed in Ed Landreth Hall and the Walsh Center for the Performing Arts at TCU. Facilities include the Jerita Foley Buschman Theatre, a 175-seat proscenium arch theatre and the 200-seat Spencer and Marlene Hays Theatre, with a thrust stage. The flexible Studio Theatre (75-100 seats) is in constant use by students involved in producing shows to test the skills they are developing in the classroom. All theatre spaces have state-of-the-art equipment for teaching theatre technology. Theatre productions are supported by a large Scenic Studio in the Walsh Center with a counterweighted paint frame and spray booth for painting scenery and stage properties. A fully equipped Costume Studio for theatre is located at 2900 W. Berry Street. A computer lab is available for students' use and for teaching various software programs specific to the theatre. Additional classrooms for theatre graphics, acting and academic courses are located in Ed Landreth Hall.

Departmental Requirements

The department requires majors to participate in departmental productions. Participation in performance and production broadens students' backgrounds and prepares them for the profession and for advanced study. Any student on academic probation is not permitted to perform in public productions. Additional department policies are explained in a departmental student handbook. All majors are responsible for securing and reading this handbook.

Minimum Grade Requirement

Courses in the theatre major or minor must be taken for a letter grade, and must be completed with a grade of "C" or better to fulfill graduation requirements. Students with a GPA of less than 2.0 in the previous semester will not be cast in roles, given design or directing assignments, or placed in leadership positions.

Musical Theatre Theory Placement and Credit-by-Exam Policy

Students wishing to test out of THEA 31503 Musical Theatre Theory I and receive the credits for the course have two options:

1) The student should have scored a 4 or 5 on the College Board Advanced Placement Program (AP) Music Theory exam
or

2) The student must take *The Placement Exam for Musical Theatre Theory I* in the Department of Theatre and receive a score of 80% or higher, qualifying them to move directly into THEA 31513 Musical Theatre Theory II.

Students wishing to test out of THEA 31513 Musical Theatre Theory II and receive credits for the course must take *The Placement Exam for Musical Theatre Theory II* in the Department of Theatre and receive a score of 80% or higher, confirming they possess the required outcomes of the class and should be given credit for the course.

Women & Gender Studies Department

Women & Gender Studies

Women and Gender Studies puts women, gender, and sexuality at the center of academic investigation. The major promotes inquiry into the intersections of gender with other identity categories; the workings of power in society; and the means of advancing social justice and equality. Through research, teaching and learning, and collaboration, the department fosters feminist and interdisciplinary analysis across social, historical, cultural and global contexts, products and practices.

Women and Gender Studies has a B.A., and B.S., as well as a minor and an emphasis.

Departmental Honors

Women and Gender Studies majors, minors, or emphasis students who plan to pursue departmental honors must be members of the Honors College and should contact the chair of the WGST to register for WGST 31003 (junior honors seminar) or WGST 41003 (senior honors seminar).

Programs

WGSA - Women and Gender Studies
WGST - Women and Gender Studies
WGST-BA - Women and Gender Studies
WGST-BS - Women and Gender Studies
WOSTCERT - Women and Gender Studies Graduate Certificate

Catalog Description
Accounting is the international language of business and more. Managers of nearly all organizations, whether business, nonprofit or governmental, require accounting information to operate successfully. Financial statements prepared by accountants are used by individuals outside these organizations to evaluate management performance and to make investing, lending, regulatory and other decisions. Accounting majors are well versed in the preparation, use and limitations of accounting information, and they understand business at a fundamental level. Moreover, they offer knowledge and skills that successful organizations require.

A major objective of the BBA program is to provide basic conceptual accounting and business knowledge as a foundation for accounting and business career development. Candidates for the Uniform CPA Examination in Texas must fulfill additional educational requirements.

Those students wishing to pursue a career in accounting are encouraged to apply to the Professional Program in Accounting (PPA) offered by the Department of Accounting. To be a candidate for the MAc degree, students must be accepted into the PPA. This program seamlessly integrates the BBA program with the Neeley School's Master of Accountancy (MAc) degree. The PPA program and the MAc degree complement the educational experience of the BBA accounting major by providing the additional accounting and business knowledge as well as professional development needed by successful public accounting professionals.

Students completing both the BBA and MAc degrees fulfill all the educational requirements to sit for the Uniform CPA Examination in Texas.

Requirements

Free Form Requirements
The accounting major requires 21 semester hours.

Catalog Description
Organizations increasingly seek to recognize the opportunities and risks of what has been called the next industrial revolution - digital transformation. How can executives understand and leverage the rapidly changing technologies of social media, the internet of things, mixed reality, blockchain and analytics tools? With the collaborative insight and support of IT executives, we have designed our curriculum to prepare our BIS students to successfully participate in and ultimately lead the projects designed to engage customers, enhance products, streamline processes, and provide new services enabled by new technologies. Students learn to analyze the business, to design and develop techniques, and to analyze data, leading to the capstone where students combine their experiences to take a real-world project. Our BIS graduates then apply this experience in joining consulting practices, technology firms, and technology departments to start their careers.

Requirements

Simple Requisites

Subplan
The BIS major requires 21 semester hours

No Requirement Level

Specific Course Requirements (18 semester hours)

INSC 30723

INSC 30823

INSC 30833

INSC 30853

INSC 40813

INSC 40843

Note: INSC 30273 Machine Learning for Fintech may be substituted for INSC 40843. INSC 30283 Artificial Intelligence for Fintech may be substituted for INSC 30833

In addition, students must complete 3 semester hours from the following:

INSC 30863

INSC 40383

Free Electives: Students should consult their academic advisor in the Neeley Academic Advising Center to determine the number of elective hours needed to reach 120 total hours

Elective Criminal Justice & Criminology Courses (9 semester hours)

Although taught regularly, not all required courses are scheduled every semester. It is the students' responsibility to complete the major requirements for graduation as early in their tenure as possible. Exemptions to the major requirements will not be made because of student failure to complete coursework in a timely fashion.

CUCS-MED - Curriculum and Instruction-Curriculum Studies Emphasis

Overview

Program Code
CUCS-MED

Department(s)
Counseling, Societal Chng, Inq, Education

Career
Graduate

Degree Designation
MED - Master of Education awarded by TCU

CIP Code
13.0301

CULL-MED - Curriculum and Instruction-Language and Literacy Emphasis

Overview

Program Code
CULL-MED

Department(s)
DTLS, Education

Career
Graduate

Degree Designation
MED - Master of Education awarded by TCU

CIP Code
13.0301

CUMA-MED - Curriculum and Instruction-Mathematics Education Emphasis

Overview

Program Code
CUMA-MED

Department(s)
DTLS, Education

Career
Graduate

Degree Designation
MED - Master of Education awarded by TCU

CIP Code
13.0301

CUSC-MED - Curriculum and Instruction-Science Education Emphasis

Overview

Program Code
CUSC-MED

Department(s)
DTLS, Education

Career
Graduate

Degree Designation
MED - Master of Education awarded by TCU

CIP Code
13.0301

DASC - Data Science

Overview

Program Code
DASC

Department(s)
Computer Science, Mathematics, College of Science & Engineer

Career
Undergraduate

CIP Code
30.0801

DASC-BS - Data Science

Overview

Program Code
DASC-BS

Department(s)
Computer Science, Mathematics, College of Science & Engineer

Career
Undergraduate

Degree Designation
BS - Bachelor of Science awarded by TCU

CIP Code
30.0801

DASCMIN - Data Science Minor

Overview

Program Code
DASCMIN

Department(s)
Computer Science, Mathematics, College of Science & Engineer

Career
Undergraduate

CIP Code
11.0101

DBENMIN - Design of the Built Environment Minor

Overview

Program Code
DBENMIN

Department(s)
Design, Fine Arts

Career
Undergraduate

CIP Code
50.0408

DCDA - Interdisciplinary Major in Digital Culture and Data Analytics

Overview

Program Code
DCDA

Department(s)
AddRan, AS ASPM, Interdisciplinary

Career
Undergraduate

Degree Designation
BS - Bachelor of Science awarded by TCU

CIP Code
30.9999

DCDA-BS - Interdisciplinary Major in Digital Culture and Data Analytics

Overview

Program Code
DCDA-BS

Department(s)
AddRan, AS ASPM, Interdisciplinary

Career
Undergraduate

Degree Designation
BS - Bachelor of Science awarded by TCU

CIP Code
30.9999

DCDAMIN - Interdisciplinary Minor in Digital Culture and Data Analytics

Overview

Program Code
DCDAMIN

Department(s)
AddRan, AS ASPM, Interdisciplinary

Career
Undergraduate

CIP Code

DETR-MS - Developmental Trauma

Overview

Program Code
DETR-MS

Department(s)
Psychology, College of Science & Engineer

Career
Graduate

Degree Designation
MS - Master of Science awarded by TCU

CIP Code
42.2703

DHHS - Deaf and Hard of Hearing Studies

Overview

Program Code
DHHS

Department(s)
Comm Science & Disorders, Health & Human Sciences

Career
Undergraduate

CIP Code
13.1003

DHHS-BS - Deaf and Hard of Hearing Studies

Overview

Program Code
DHHS-BS

Department(s)
Comm Science & Disorders, Health & Human Sciences

Career
Undergraduate

Degree Designation
BS - Bachelor of Science awarded by TCU

CIP Code
13.1003

DIET-BS - Dietetics

Overview

Program Code
DIET-BS

Department(s)
Nutritional Sciences, College of Science & Engineer

Career
Undergraduate

Degree Designation
BS - Bachelor of Science awarded by TCU

CIP Code
30.1901

DIET-MS - Dietetics

Overview

Program Code
DIET-MS

Department(s)
Nutritional Sciences, College of Science & Engineer

Career
Graduate

Degree Designation
MS - Master of Science awarded by TCU

CIP Code
30.1901

DOCH-DMI - Ministry Chaplaincy

Overview

Program Code
DOCH-DMI

Department(s)
Brite, Brite Non-Departmental Program

Career
Brite

Degree Designation
DMI - Doctor of Ministry awarded by Brite

CIP Code
39.0602

DOLJ-DMI - Ministry Leadership for Justice

Overview

Program Code
DOLJ-DMI

Department(s)
Brite, Brite Non-Departmental Program

Career
Brite

Degree Designation
DMI - Doctor of Ministry awarded by Brite

CIP Code
39.0602

DOMI-DMI - Ministry

Overview

Program Code
DOMI-DMI

Department(s)
Brite, Brite Non-Departmental Program

Career
Brite

Degree Designation
DMI - Doctor of Ministry awarded by Brite

CIP Code
39.0602

DOSP-DMI - Ministry Spirituality

Overview

Program Code
DOSP-DMI

Department(s)
Brite, Brite Non-Departmental Program

Career
Brite

Degree Designation
DMI - Doctor of Ministry awarded by Brite

CIP Code
39.0602

DPDI - Didactic Program in Dietetics

Overview

Program Code
DPDI

Department(s)
Nutritional Sciences, College of Science & Engineer

Career
Undergraduate

CIP Code
30.1901

DPDI-BS - Didactic Program in Dietetics

Overview

Program Code
DPDI-BS

Department(s)
Nutritional Sciences, College of Science & Engineer

Career
Undergraduate

Degree Designation
BS - Bachelor of Science awarded by TCU

CIP Code
30.1901

EBIE - Electronic Business - International Emphasis

Overview

Program Code
EBIE

Department(s)
Neeley School of Business, Info Systems & Supply Chain

Career
Undergraduate

CIP Code
52.0208

EBIE-BBA - Electronic Business - International Emphasis

Overview

Program Code
EBIE-BBA

Department(s)
Neeley School of Business, Info Systems & Supply Chain

Career
Undergraduate

Degree Designation
BBA - Bachelor of Business Administration awarded by TCU

CIP Code
52.0208

EBUS - Electronic Business

Overview

Program Code
EBUS

Department(s)

Catalog Description
The entrepreneurship and innovation major offers a unique combination of specialization and generalization in the study of entrepreneurship and innovation. To remain viable, nearly all new and established organizations require some degree of innovation, and most demand both an entrepreneurial perspective and a skill set for success. Whether it be assembling resources, recruiting and retaining top talent, designing a business model, developing new products or services, generating and communicating a compelling vision, managing relationships within the company and throughout the value chain, transitioning the business through various stages of growth, or navigating an uncertain future, effective leadership entails a combination of entrepreneurial thinking and innovative action. The entrepreneurship and innovation major prepares students to identify and exploit business opportunities, launch their own business, grow an existing business, assist others in starting or running a business, or contribute to

entrepreneurial and innovative activities in an established organization. Career opportunities for those with strong skills in entrepreneurship and innovation are diverse since most for-profit and not-for-profit organizations require entrepreneurial and innovative capabilities. Career possibilities include business owner, manager of a family business or entrepreneurial company, member of an innovation team, analyst for a venture capital or private equity firm, team leader within a research and development unit of an organization, management consultant, economic development officer, and director of a not-for-profit business.

Requirements

Free Form Requirements

The entrepreneurship and innovation major requires 21 semester hours

Specific course requirements (12 semester hours)

ENTR 30303

ENTR 30533

ENTR 40143

ENTR 40243

ENTR 30533 and ENTR 40143 have a writing emphasis

In addition, the student must complete a minimum of 9 semester hours from the following electives with at least 3 semester hours from entrepreneurship and innovation and no more than 6 semester hours from another department.

ENTR 30543

ENTR 40233

ENTR 40313

ENTR 40333

Catalog Description
A finance major concentrates on the management of financial resources for the firm or the investment portfolio. The field of finance integrates concepts from economics, accounting and a number of other areas. The central focus of finance is the relationship of risk and return.

Financial managers attempt to achieve wealth maximization through daily activities such as credit and inventory management and longer-term decisions related to raising funds and allocating capital.

Investment specialists evaluate and select securities, manage investment portfolios and raise capital to finance business, government and private needs.

TCU students may apply for a position on the Educational Investment Fund and, if selected, gain valuable investment experience working with approximately 18 fellow students to manage a $1 million stock and bond portfolio.

The trend toward the securitization of financial assets and real estate, international financial transactions and derivative products; such as options and futures, continues to generate job opportunities in finance. Finance careers include corporate financial management, commercial banking, investment brokerage, portfolio management, investment banking and insurance.

Requirements

Free Form Requirements

The finance major requires 24 semester hours

FINA 30203	Money and Banking	3
FINA 30213	Investments I	3
FINA 30233	Investments II	3
FINA 40153	Advanced Financial Management	3
ACCT 30153	Financial Reporting I	3
ACCT 30253	Financial Reporting II	3

FINA 30203 and FINA 30213 have a Writing Emphasis.

In addition, the student must complete 6 semester hours from the following:

FINA 30223	Financial Modeling	3
FINA 30303	Insurance	3
FINA 30313	Real Estate Principles	3
FINA 30623	Real Estate Valuation	3
FINA 40183	Educational Investment Fund	3
FINA 40193	Educational Investment Fund	3
FINA 40313	Management of Financial Institutions	3
FINA 40533	Topics in Applied Financial Analysis	3
FINA 40603	Real Estate Law	3
FINA 40613	Real Estate Finance and Investment Analysis	3
FINA 40623	International Finance	3
FINA 40703	International Finance Study Abroad	3
ACCT 30303	Principles of Taxation	3

Free electives: Students should consult their academic adviser in the Neeley Academic Advising Center to determine the number of elective hours needed to reach 120 total hours.

Catalog Description
Diverse corporations in the telecommunications, financial, food service and manufacturing industries all have at least one thing in common. These sellers want to exchange their goods, services or ideas for something of value from buyers. Marketing begins at the moment an organization perceives an unmet need and progresses through productive development, promotion, distribution and pricing. Marketing research suggests that half the cost of most products and services can be attributed to marketing.

Requirements

Free Form Requirements
The marketing major requires 21 semester hours.

MASC-BSE

Department(s)
Education, Education Non-Department Prog

Career
Undergraduate

Degree Designation
BSE - Bachelor of Science in Education awarded by TCU

CIP Code
13.1312

MATA - Mathematics

Overview

Program Code
MATA

Department(s)
Mathematics, College of Science & Engineer

Career
Undergraduate

CIP Code
27.0101

MATH - Mathematics

Overview

Program Code
MATH

Department(s)
Mathematics, College of Science & Engineer

Career
Undergraduate

CIP Code
27.0101

MATH-BA - Mathematics

Overview

Program Code
MATH-BA

Department(s)
Mathematics, College of Science & Engineer

Career
Undergraduate

Degree Designation
BA - Bachelor of Arts awarded by TCU

CIP Code
27.0101

MATH-BA2 - Mathematics

Overview

Program Code
MATH-BA2

Department(s)
Mathematics, College of Science & Engineer

Career
Undergraduate

Degree Designation
BA-2ND - Bachelor of Arts awarded by TCU

CIP Code
27.0101

MATH-BS - Mathematics

Overview

Program Code
MATH-BS

Department(s)
Mathematics, College of Science & Engineer

Career
Undergraduate

Degree Designation
BS - Bachelor of Science awarded by TCU

CIP Code
27.0101

MATH-BS2 - Mathematics

Overview

Program Code
MATH-BS2

Department(s)
Mathematics, College of Science & Engineer

Career
Undergraduate

Degree Designation
BS-2ND - Bachelor of Science awarded by TCU

CIP Code
27.0101

MATH-MAT - Mathematics

Overview

Program Code
MATH-MAT

Department(s)
Mathematics, College of Science & Engineer

Career
Graduate

Degree Designation
MAT - Master of Arts in Teaching awarded by TCU

CIP Code
13.1311

MATH-MS - Mathematics

Overview

Program Code
MATH-MS

Department(s)
Mathematics, College of Science & Engineer

Career
Graduate

Degree Designation
MS - Master of Science awarded by TCU

CIP Code
27.0101

MATH-PHD - Mathematics

Overview

Program Code
MATH-PHD

Department(s)
Mathematics, College of Science & Engineer

Career
Graduate

Degree Designation
PHD - Doctor of Philosophy awarded by TCU

CIP Code
27.0101

MATHMIN - Mathematics Minor

Overview

Program Code
MATHMIN

Department(s)
Mathematics, College of Science & Engineer

Career
Undergraduate

CIP Code
27.0101

MATM-MA - Theology and Ministry

Overview

Program Code
MATM-MA

Department(s)
Brite, Brite Non-Departmental Program

Career
Brite

Degree Designation
MA - Master of Arts awarded by TCU

CIP Code
39.9999

MATM-MTM - Theology and Ministry

Overview

Program Code
MATM-MTM

Department(s)
Brite, Brite Non-Departmental Program

Career
Brite

Degree Designation
MTM - Master of Arts in Theology and Ministry

CIP Code
39.9999

MATMB-MTM - Theology and Ministry

Overview

Program Code
MATMB-MTM

Department(s)
Brite, Brite Non-Departmental Program

Career
Brite

Degree Designation
MTM - Master of Arts in Theology and Ministry

CIP Code
39.9999

MATMS-MTM - Theology and Ministry

Overview

Program Code
MATMS-MTM

Department(s)
Brite, Brite Non-Departmental Program

Career
Brite

Degree Designation
MTM - Master of Arts in Theology and Ministry

CIP Code
39.9999

MATS - Mathematics

Overview

Program Code
MATS

Department(s)
Mathematics, College of Science & Engineer

Career
Undergraduate

CIP Code
27.0101

MATS-MTS - Theological Studies

Overview

Program Code
MATS-MTS

Department(s)
Brite, Brite Non-Departmental Program

Career
Brite

Degree Designation
MTS - Master of Theological Studies awarded by Brite

CIP Code
39.0601

MCOL-BM - Musicology

Overview

Program Code
MCOL-BM

Department(s)
Fine Arts, Music

Career
Undergraduate

Degree Designation
BM - Bachelor of Music awarded by TCU

CIP Code
50.0905

MCOL-MM - Musicology

Overview

Program Code
MCOL-MM

Department(s)
Fine Arts, Music

Career
Graduate

Degree Designation
MM - Master of Music awarded by TCU

CIP Code
50.0905

MDIV-MDV - Master of Divinity

Overview

Program Code
MDIV-MDV

Department(s)
Brite, Brite Non-Departmental Program

Career
Brite

Degree Designation
MDV - Master of Divinity awarded by Brite

CIP Code
39.0602

MDIVB-MDV - Master of Divinity

Overview

Program Code
MDIVB-MDV

Department(s)
Brite, Brite Non-Departmental Program

Career
Brite

Degree Designation
MDV - Master of Divinity awarded by Brite

CIP Code
39.0602

MDIVS-MDV - Master of Divinity

Overview

Program Code
MDIVS-MDV

Department(s)
Brite, Brite Non-Departmental Program

Career
Brite

Degree Designation
MDV - Master of Divinity awarded by Brite

CIP Code
39.0602

MDMS-MS - Masters in Medical Science

Overview

Program Code
MDMS-MS

Department(s)
Medical School Acad Dept, Burnett School of Medicine

Career
Graduate

CIP Code
51.9999

MDSHCERT - Medical Social Sciences and Health Humanities Certificate

Overview

Program Code
MDSHCERT

Department(s)
AddRan, Sociology and Anthropology

Career
Undergraduate

Degree Designation
CRT - Certification Program

CIP Code
51.2212

MDVB-MDV - Master of Divinity - Baptist

Overview

Program Code
MDVB-MDV

Department(s)
Brite, Brite Non-Departmental Program

Career
Brite

Degree Designation
MDV - Master of Divinity awarded by Brite

CIP Code
39.0602

MDVD-MDV - Master of Divinity - Disciples

Overview

Program Code
MDVD-MDV

Department(s)
Brite, Brite Non-Departmental Program

Career
Brite

Degree Designation
MDV - Master of Divinity awarded by Brite

CIP Code
39.0602

MDVM-MDV - Master of Divinity

Overview

Program Code
MDVM-MDV

Department(s)
Brite, Brite Non-Departmental Program

Career
Brite

Degree Designation
MDV - Master of Divinity awarded by Brite

CIP Code
39.0602

MECO - Medicine - Combined

Overview

Program Code
MECO

Department(s)
College of Science & Engineer, SE Non-Departmental Programs

Career
Undergraduate

CIP Code
26.0101

MECO-BS - Medicine - Combined

Overview

Program Code
MECO-BS

Department(s)
College of Science & Engineer, SE Non-Departmental Programs

Career
Undergraduate

Degree Designation
BS - Bachelor of Science awarded by TCU

CIP Code
26.0101

MEDS-MD - Doctor of Medicine

Overview

Program Code
MEDS-MD

Department(s)
Medical School Acad Dept, Burnett School of Medicine

Career
Medical School

Degree Designation
MD - Doctor of Medicine

CIP Code
51.1201

MERE-MER - Elementary Education of the Mentally Retarded Certification

Overview

Program Code
MERE-MER

Department(s)
Education, Education Non-Department Prog

Career
Undergraduate

CIP Code
13.1202

MERTMIN - Merchandising and Textiles Minor

Overview

Program Code
MERTMIN

Department(s)
Design, Merch & Textiles, Fine Arts

Career
Undergraduate

CIP Code
52.1902

METE - Medical Technology

Overview

Program Code
METE

Department(s)
Biology, College of Science & Engineer

Career
Undergraduate

Degree Designation
BMT - BS in Medical Technology awarded by TCU

CIP Code
51.1005

METE-BMT - Medical Technology

Overview

Program Code
METE-BMT

Department(s)
Biology, College of Science & Engineer

Career
Undergraduate

Degree Designation
BMT - BS in Medical Technology awarded by TCU

CIP Code
51.1005

METE-BS - Medical Technology

Overview

Program Code
METE-BS

Department(s)
Biology, College of Science & Engineer

Career
Undergraduate

Degree Designation
BS - Bachelor of Science awarded by TCU

CIP Code
51.1005

MGMT - Management

Overview

Program Code
MGMT

Department(s)
Neeley School of Business, Management

Career
Undergraduate

CIP Code
52.0201

MGMT-BBA - Management

Overview

Program Code
MGMT-BBA

Department(s)
Neeley School of Business, Management

Career
Undergraduate

Degree Designation
BBA - Bachelor of Business Administration awarded by TCU

CIP Code
52.0201

MHSC-MHS - Health Science

Overview

Program Code
MHSC-MHS

Department(s)
Health & Human Sciences, Nurse Anesthesia

Career
Graduate

Degree Designation
MHS - Master of Health Science awarded by TCU

CIP Code
51.0000

MIESEMP - Middle East Studies Emphasis

Overview

Program Code
MIESEMP

Department(s)
AddRan, AS ASPM, Interdisciplinary

Career
Undergraduate

CIP Code
05.0108

MIESMIN - Middle East Studies Minor

Overview

Program Code
MIESMIN

Department(s)
AddRan, AS ASPM, Interdisciplinary

Career
Undergraduate

CIP Code
05.0108

MILSMIN - Military Science Minor

Overview

Program Code
MILSMIN

Department(s)
AddRan, Military Science

Career
Undergraduate

CIP Code
28.0399

MIS - Management Information Systems

Overview

Program Code
MIS

Department(s)
Neeley School of Business, Management

Career
Undergraduate

CIP Code
52.1201

MIS-BBA - Management Information Systems

Overview

Program Code
MIS-BBA

Department(s)
Neeley School of Business, Management

Career
Undergraduate

Degree Designation
BBA - Bachelor of Business Administration awarded by TCU

CIP Code
52.1201

MLCHAPCERT - Military Chaplaincy Certificate

Overview

Program Code
MLCHAPCERT

Department(s)
Brite, Brite Non-Departmental Program

Career
Brite

Degree Designation
CRT - Certification Program

CIP Code
39.0799

MLCHNDCERT - Military Chaplaincy Certificate

Overview

Program Code
MLCHNDCERT

Department(s)
Brite, Brite Non-Departmental Program

Career
Brite - Non Degree

Degree Designation
CRT - Certification Program

CIP Code
39.0701

MNIE - Entrepreneurial Management - International Emphasis

Overview

Program Code
MNIE

Department(s)
Neeley School of Business, Management

Career
Undergraduate

CIP Code
52.1101

MNIE-BBA - Entrepreneurial Management - International Emphasis

Overview

Program Code
MNIE-BBA

Department(s)
Neeley School of Business, Management

Career
Undergraduate

Degree Designation
BBA - Bachelor of Business Administration awarded by TCU

CIP Code
52.1101

MNPO - Managing People and Organizations

Overview

Program Code
MNPO

Department(s)
Neeley School of Business, Management

Career
Undergraduate

CIP Code
52.0201

MNPO-BBA - Managing People and Organizations

Overview

Program Code
MNPO-BBA

Department(s)
Neeley School of Business, Management

Career
Undergraduate

Degree Designation
BBA - Bachelor of Business Administration awarded by TCU

CIP Code
52.0201

MO32-BS - Movement Science

Overview

Program Code
MO32-BS

Department(s)
Health & Human Sciences, Kinesiology

Career
Undergraduate

Degree Designation
BS - Bachelor of Science awarded by TCU

CIP Code
51.3601

MODA - Modern Dance

Overview

Program Code
MODA

Department(s)
Classical & Contemporary Dance, Fine Arts

Career
Undergraduate

CIP Code
50.0301

MODA-BA - Modern Dance

Overview

Program Code
MODA-BA

Department(s)
Ballet & Modern Dance, Fine Arts

Career
Undergraduate

Degree Designation
BA - Bachelor of Arts awarded by TCU

CIP Code
50.0301

MODA-BFA - Modern Dance

Overview

Program Code
MODA-BFA

Department(s)
Classical & Contemporary Dance, Fine Arts

Career
Undergraduate

Degree Designation
BFA - Bachelor of Fine Arts awarded by TCU

CIP Code
50.0301

MODAMIN - Modern Dance Minor

Overview

Program Code
MODAMIN

Department(s)
Ballet & Modern Dance, Fine Arts

Career
Undergraduate

CIP Code
50.0301

MOLAMIN - Modern Language Studies Minor

Overview

Program Code
MOLAMIN

Department(s)
AddRan, Modern Languages

Career
Undergraduate

MORG - Performance - Organ

Overview

Program Code
MORG

Department(s)
Fine Arts, Music

Career
Undergraduate

CIP Code
50.0907

MORG-BM - Performance - Organ

Overview

Program Code
MORG-BM

Department(s)
Fine Arts, Music

Career
Undergraduate

Degree Designation
BM - Bachelor of Music awarded by TCU

CIP Code
50.0907

MOSC - Movement Science

Overview

Program Code
MOSC

Department(s)
Health & Human Sciences, Kinesiology

Career
Undergraduate

CIP Code
51.3601

MOSC-BPE - Movement Science

Overview

Program Code
MOSC-BPE

Department(s)
Education, Kinesiology

Career
Undergraduate

Degree Designation
BPE - Bachelor of Science in Physical Education

CIP Code
51.3601

MOSC-BS - Movement Science

Overview

Program Code
MOSC-BS

Department(s)
Health & Human Sciences, Kinesiology

Career
Undergraduate

Degree Designation
BS - Bachelor of Science awarded by TCU

CIP Code
51.3601

MOSC-BS2 - Movement Science

Overview

Program Code
MOSC-BS2

Department(s)
Health & Human Sciences, Kinesiology

Career
Undergraduate

Degree Designation
BS-2ND - Bachelor of Science awarded by TCU

CIP Code
51.3601

MOSC-BSE - Movement Science

Overview

Program Code
MOSC-BSE

Department(s)
Education, Kinesiology

Career
Undergraduate

Degree Designation
BSE - Bachelor of Science in Education awarded by TCU

CIP Code
51.3601

MOSCMIN - Movement Science Minor

Overview

Program Code
MOSCMIN

Department(s)
Health & Human Sciences, Kinesiology

Career
Undergraduate

CIP Code
51.3601

MPAS-MMS - Physician Assistant/Associate Studies

Overview

Program Code
MPAS-MMS

Department(s)
Health & Human Sciences, Nursing

Career
Graduate

Degree Designation
MS - Master of Science awarded by TCU

CIP Code
51.3813

MPIA - Performance Piano

Overview

Program Code
MPIA

Department(s)
Fine Arts, Music

Career
Undergraduate

CIP Code
50.0907

MPIA-BM - Performance - Piano

Overview

Program Code
MPIA-BM

Department(s)
Fine Arts, Music

Career
Undergraduate

Degree Designation
BM - Bachelor of Music awarded by TCU

CIP Code
50.0907

MRIE - Marketing - International Emphasis

Overview

Program Code
MRIE

Department(s)
Neeley School of Business, Marketing

Career
Undergraduate

CIP Code
52.1403

MRIE-BBA - Marketing - International Emphasis

Overview

Program Code
MRIE-BBA

Department(s)
Neeley School of Business, Marketing

Career
Undergraduate

Degree Designation
BBA - Bachelor of Business Administration awarded by TCU

CIP Code
52.1403

MSIE-BBA - Management Information Systems - International Emphasis

Overview

Program Code
MSIE-BBA

Department(s)
Neeley School of Business, Management

Career
Undergraduate

Degree Designation
BBA - Bachelor of Business Administration awarded by TCU

CIP Code
52.1201

MTHE-MTH - Master of Theology

Overview

Program Code
MTHE-MTH

Department(s)
Brite, Brite Non-Departmental Program

Career
Brite

Degree Designation
MTH - Master of Theology awarded by Brite

CIP Code
39.0699

MUCO - Composition

Overview

Program Code
MUCO

Department(s)
Fine Arts, Music

Career
Undergraduate

CIP Code
50.0904

MUCO-BM - Composition

Overview

Program Code
MUCO-BM

Department(s)
Fine Arts, Music

Career
Undergraduate

Degree Designation
BM - Bachelor of Music awarded by TCU

CIP Code
50.0904

MUCO-DMA - Composition

Overview

Program Code
MUCO-DMA

Department(s)
Fine Arts, Music

Career
Graduate

Degree Designation
DMA - Doctor of Musical Arts awarded by TCU

CIP Code
50.0904

MUCO-MM - Composition

Overview

Program Code
MUCO-MM

Department(s)
Fine Arts, Music

Career
Graduate

Degree Designation
MM - Master of Music awarded by TCU

CIP Code
50.0904

MUED - Music Education

Overview

Program Code
MUED

Department(s)
Fine Arts, Music

Career
Undergraduate

CIP Code
13.1312

MUED-BME - Music Education

Overview

Program Code
MUED-BME

Department(s)
Fine Arts, Music

Career
Undergraduate

Degree Designation
BME - Bachelor of Music Education awarded by TCU

CIP Code
13.1312

MUED-MME - Music Education

Overview

Program Code
MUED-MME

Department(s)
Fine Arts, Music

Career
Graduate

Degree Designation
MME - Master of Music Education awarded by TCU

CIP Code
13.1312

MUEDMIN - Music Education Minor

Overview

Program Code
MUEDMIN

Department(s)
Fine Arts, Music

Career
Undergraduate

CIP Code
13.1312

MUEI - Music Education - Instrumental Concentration

Overview

Program Code
MUEI

Department(s)
Fine Arts, Music

Career
Undergraduate

CIP Code
13.1312

MUEI-BME - Music Education - Instrumental Concentration

Overview

Program Code
MUEI-BME

Department(s)
Fine Arts, Music

Career
Undergraduate

Degree Designation
BME - Bachelor of Music Education awarded by TCU

CIP Code
13.1312

MUEV - Music Education - Vocal Concentration

Overview

Program Code
MUEV

Department(s)
Fine Arts, Music

Career
Undergraduate

CIP Code
13.1312

MUEV-BME - Music Education - Vocal Concentration

Overview

Program Code
MUEV-BME

Department(s)
Fine Arts, Music

Career
Undergraduate

Degree Designation
BME - Bachelor of Music Education awarded by TCU

CIP Code
13.1312

MUHI - Music History

Overview

Program Code
MUHI

Department(s)
Fine Arts, Music

Career
Undergraduate

CIP Code
50.0902

MUHI-BM - Music History

Overview

Program Code
MUHI-BM

Department(s)
Fine Arts, Music

Career
Undergraduate

Degree Designation
BM - Bachelor of Music awarded by TCU

CIP Code
50.0902

MUPM - Music Pre-major

Overview

Program Code
MUPM

Department(s)
Fine Arts, Music

Career
Undergraduate

CIP Code
50.0901

MUSI - Music

Overview

Program Code
MUSI

Department(s)
Fine Arts, Music

Career
Undergraduate

CIP Code
50.0901

MUSI-BA - Music

Overview

Program Code
MUSI-BA

Department(s)
Fine Arts, Music

Career
Undergraduate

Degree Designation
BA - Bachelor of Arts awarded by TCU

CIP Code
50.0901

MUSI-BFA - Music

Overview

Program Code
MUSI-BFA

Department(s)
Fine Arts, Music

Career
Undergraduate

Degree Designation
BFA - Bachelor of Fine Arts awarded by TCU

CIP Code
50.0901

MUSI-BM - Music

Overview

Program Code
MUSI-BM

Department(s)
Fine Arts, Music

Career
Undergraduate

Degree Designation
BM - Bachelor of Music awarded by TCU

CIP Code
50.0901

MUSI-BME - Music

Overview

Program Code
MUSI-BME

Department(s)
Fine Arts, Music

Career
Undergraduate

Degree Designation
BME - Bachelor of Music Education awarded by TCU

CIP Code
50.0901

MUSI-BS - Music

Overview

Program Code
MUSI-BS

Department(s)
Fine Arts, Music

Career
Undergraduate

Degree Designation
BS - Bachelor of Science awarded by TCU

CIP Code
50.0901

MUSIMIN - Music Minor

Overview

Program Code
MUSIMIN

Department(s)
Fine Arts, Music

Career
Undergraduate

CIP Code
50.0901

MUST - Performance - String

Overview

Program Code
MUST

Department(s)
Fine Arts, Music

Career
Undergraduate

CIP Code
50.0901

MUST-BM - Performance - String

Overview

Program Code
MUST-BM

Department(s)
Fine Arts, Music

Career
Undergraduate

Degree Designation
BM - Bachelor of Music awarded by TCU

CIP Code
50.0911

MUTH - Music Theory

Overview

Program Code
MUTH

Department(s)
Fine Arts, Music

Career
Undergraduate

CIP Code
50.0904

MUTH-BFA - Music Theory

Overview

Program Code
MUTH-BFA

Department(s)
Fine Arts, Music

Career
Undergraduate

Degree Designation
BFA - Bachelor of Fine Arts awarded by TCU

CIP Code
50.0904

MUTH-BM - Music Theory

Overview

Program Code
MUTH-BM

Department(s)
Fine Arts, Music

Career
Undergraduate

Degree Designation
BM - Bachelor of Music awarded by TCU

CIP Code
50.0904

MUTH-MM - Music Theory

Overview

Program Code
MUTH-MM

Department(s)
Fine Arts, Music

Career
Graduate

Degree Designation
MM - Master of Music awarded by TCU

CIP Code
50.0904

MWCSCONC - Military, War, and Conflict Studies Concentration

Overview

Program Code
MWCSCONC

Department(s)
AddRan, History

Career
Undergraduate

CIP Code
54.0108

MWCSMIN - Military, War, and Conflict Studies Minor

Overview

Program Code
MWCSMIN

Department(s)
AddRan, History

Career
Undergraduate

CIP Code
54.0108

NAAC-DNAP - Anesthesiologist Assistant to DNAP

Overview

Program Code
NAAC-DNAP

Department(s)
Health & Human Sciences, Nurse Anesthesia

Career
Graduate

Degree Designation
DNAP - Doctor of Nurse Anesthesia Practice

CIP Code
51.3804

NAAC-DNPA - Nursing Practice Anesthesia

Overview

Program Code
NAAC-DNPA

Department(s)
Health & Human Sciences, Nurse Anesthesia

Career
Graduate

Degree Designation
DNPA - Doctor of Nursing Practice Anesthesia

CIP Code
51.3804

NADM-DNP - Nursing Administration

Overview

Program Code
NADM-DNP

Department(s)
Health & Human Sciences, Nursing

Career
Graduate

Degree Designation
DNP - Doctor of Nursing Practice awarded by TCU

CIP Code
51.3802

NAPMCERT - Advanced Pain Management Fellowship

Overview

Program Code
NAPMCERT

Department(s)
Health & Human Sciences, Nurse Anesthesia

Career
Graduate - Non Degree

Degree Designation
CRT - Certification Program

CIP Code
51.3804

NCNL-MSN - Clinical Nurse Leader

Overview

Program Code
NCNL-MSN

Department(s)
Health & Human Sciences, Nursing

Career
Graduate

Degree Designation
MSN - Master of Science in Nursing awarded by TCU

CIP Code
51.3820

NCNPCERT - Clinical Nurse Specialist - Pediatric

Overview

Program Code
NCNPCERT

Department(s)
Health & Human Sciences, Nursing

Career
Graduate - Non Degree

Degree Designation
CRT - Certification Program

CIP Code
51.3813

NCNLCERT - Clinical Nurse Leader

Overview

Program Code
NCNLCERT

Department(s)
Health & Human Sciences, Nursing

Career
Graduate - Non Degree

Degree Designation
CRT - Certification Program

CIP Code
51.3820

NDNA-DNAP - Nurse Anesthesia Practice

Overview

Program Code
NDNA-DNAP

Department(s)
Health & Human Sciences, Nurse Anesthesia

Career
Graduate

Degree Designation
DNAP - Doctor of Nurse Anesthesia Practice

CIP Code
51.3804

NCNP-DNP - Clinical Nurse Specialist - Pediatric

Overview

Program Code
NCNP-DNP

Department(s)
Health & Human Sciences, Nursing

Career
Graduate

Degree Designation
DNP - Doctor of Nursing Practice awarded by TCU

CIP Code
51.3813

NDNA-DNP - Nurse Anesthesia

Overview

Program Code
NDNA-DNP

Department(s)
Health & Human Sciences, Nurse Anesthesia

Career
Graduate

Degree Designation
DNP - Doctor of Nursing Practice awarded by TCU

CIP Code
51.3804

NDNP-DNP - Advanced Practice (post masters)

Overview

Program Code
NDNP-DNP

Department(s)
Health & Human Sciences, Nursing

Career
Graduate

Degree Designation
DNP - Doctor of Nursing Practice awarded by TCU

CIP Code
51.3818

NEPD - News Editorial - Periodical Design Emphasis

Overview

Program Code
NEPD

Department(s)
College of Communications, Journalism

Career
Undergraduate

CIP Code
09.0401

NEPD-BA - News Editorial - Periodical Design Emphasis

Overview

Program Code
NEPD-BA

Department(s)
College of Communications, Journalism

Career
Undergraduate

Degree Designation
BA - Bachelor of Arts awarded by TCU

CIP Code
09.0401

NEPD-BS - News Editorial - Periodical Design Emphasis

Overview

Program Code
NEPD-BS

Department(s)
College of Communications, Journalism

Career
Undergraduate

Degree Designation
BS - Bachelor of Science awarded by TCU

CIP Code
09.0401

Requirements

Free Form Requirements
Students must meet the following requirements to enroll in the first semester of nursing coursework.

The following prerequisites must be completed with a grade of "C" or higher before entering the first nursing courses:

BIOL 20204

BIOL 20214

BIOL 20234

NURS 10303

PSYC 10213

SOCI 20213

MATH 10043

NTDT 20403

- Enrollment in all nursing courses limited to the nursing major requires at least a 2.5 TCU cumulative GPA. Students who are repeatedly unable to achieve or maintain a 2.5 GPA prior to enrollment in nursing courses will be discontinued from the major.
- Prerequisite sciences must be completed within five (5) years of application to the program. Sciences include A&P 1 and 2, and Microbiology.
- Current American Heart Association cardiopulmonary resuscitation (CPR) for health care providers card. (Online CPR courses do not meet this requirement.)
- Documentation of required immunizations (contact TCU Nursing for list).
- CPR, TB tests or other immunization documentation that will expire during a semester must be updated and documentation submitted to the nursing office by August 1 and January 1.

- Cannot have more than 12 hours of TCU Core incomplete.
- Completion of the Test of Essential Academic Skills (TEAS) entrance exam.
- Documentation of health insurance.
- Drug screen and criminal background check as required by health care agencies and BON.
- Transfer students must take a 3-credit hour cultural awareness (CA) course to fulfill TCU Core requirements.

Nursing Curriculum Plan

TCU Nursing, has an innovative curriculum designed to prepare graduates to work in a wide variety of agencies, clinics, home care agencies, and other community facilities in addition to hospitals and extended-care facilities. Emphasis in classrooms and patient care settings is on the development of critical thinking, clinical reasoning and decision-making. Students are expected to assume considerable responsibility for their own learning. They are expected to become increasingly independent in the exercise of clinical judgment and in application of nursing process to a variety of nursing problems and situations.

Nursing courses constitute approximately one-half of the four-year program. The sequence of nursing courses provides learning experiences in all major practice areas and in a variety of institutions and agencies in and around the Fort Worth-Dallas Metroplex.

Courses within the program and the sequence are designed to promote student success. Once enrolled in TCU Nursing clinical coursework, classes must be taken and retaken at TCU. As such, transfer credit will only be allowed for NURS 10303 and NURS 20363 after syllabus review indicates the course is equivalent to the TCU course.

Typical Schedule

Schedules for TCU Core Curriculum courses may vary for individual students.

First-year

Semester 1

BIOL 20204	Anatomy and Physiology	4
ENGL 10803	Introductory Composition: Writing as Inquiry	3
	Fine Arts Elective	3
	Oral Communication	3
PSYC 10213	Introduction to Psychology	3
Total Credit Hours:		16

Semester 2

BIOL 20214	Anatomy and Physiology	4
NTDT 20403	Nutrition	3
SOCI 20213	Introductory Sociology	3
	Historical Traditions	3
	Humanities Elective	3
Total Credit Hours:		16

Sophomore Year

Semester 1

BIOL 20234	Microbiology of Human Disease	4
ENGL 20803	Intermediate Composition: Writing Argument	3
MATH 10043	Elementary Statistics	3
	Religious Traditions	3
NURS 10303	Human Development	3
Total Credit Hours:		16

Semester 2

NURS 20043	Professional Role I: Member of the Profession	3
NURS 20263	Health Assessment: Concepts	3
NURS 20271	Health Assessment: Lab	1
NURS 20363	Pathophysiology	3
	Literary Traditions/Humanities	3
	Elective	
Total Credit Hours:		16

Choice of elective will depend on other choices made within the HMVV and HEE

Junior Year

Summer work in non-nursing courses is recommended prior to junior year

.

Semester 1

NURS 30163	Pharmacotherapeutics	3
NURS 30263	Foundations of Nursing Care: Concepts	3
NURS 30182	Foundations of Nursing Care: Clinical	2
NURS 30171	Foundations of Nursing Care: Lab	1
NURS 30243	Professional Role II: Member of the Healthcare Team	3
	Elective	3
Total Credit Hours:		15

Semester 2

NURS 30563	Care of Adults with Health Alterations I: Concepts	3
NURS 30582	Adults with Health Alterations I: Clinical	2
NURS 30663	Behavioral Health Nursing: Concepts	3
NURS 30682	Behavioral Health Nursing: Clinical	2
NURS 30633	Professional Role III: Member of the Research and Evidence Based Practice Community	3
NURS 30671	Clinical Reasoning and Simulation I	1
Total Credit Hours:		14

Senior Year

.

Semester 1

NURS 40563	Care of Adults with Health Alterations II: Concepts	3
NURS 40582	Adults with Health Alterations II: Clinical	2
NURS 40663	Maternal, Child and Family Nursing Concepts	3
NURS 40682	Maternal, Child and Family Nursing: Clinical	2
NURS 40672	Clinical Reasoning in Simulation II	2
	Elective	3
Total Credit Hours:		15

Semester 2

NURS 40763	Leadership in Nursing Practice: Concepts	3
NURS 40783	Transition into Practice: Clinical	3
NURS 40863	Public Health Nursing: Concepts (CSV)	3
NURS 40882	Public Health Nursing: Clinical	2
NURS 40871	Clinical Reasoning in Simulation	1
NURS 40001	NCLEX (National Council Licensure Examination in Nursing) Review	1
Total Credit Hours:		13

All Courses

AAAS10103 - Engaging Community and Culture

Department(s)
Comparative Race and Ethnic St

Long Description (Catalog Description)
This course introduces students to topics animating the interdisciplinary field of comparative race and ethnic studies. Students will examine the interconnections between race, ethnicity, and social, political, and cultural frameworks and attitudes that inform community formation and sustaining it.

Course Typically Offered
Fall and Spring

Career
Undergraduate

Cross Listed Courses
CRES10103 Engaging Community and Culture

AAAS20103 - Introduction to Black Studies

Department(s)
Comparative Race and Ethnic St

Long Description (Catalog Description)
Introduction to Black Studies surveys global Black life and culture. Grounded in formative histories uniting Black people across the world - namely the Trans-Atlantic Slave trade, colonialism, contemporary migrations and cultural developments - this course is guided by these questions - How is blackness both a dynamic concept and one that has been constituted across time through various political events, rebellions, forced and voluntary migrations, and cultural forms? How has Black studies evolved in the academy and what are its futures? Through their engagement with various texts, writing, research and presentations, students will explore such questions and more.

CRES20103 Intro to Black Studies

AADM20970 - Experimental Course

Department(s)
Fine Arts

Long Description (Catalog Description)
Prerequisites: Vary according to nature of material. For use when instructor has new material or new teaching strategies which are not appropriate to existing courses.

Course Typically Offered
Contact Department For Details

Career
Undergraduate

AADM30103 - The Arts Organization

Department(s)
Fine Arts

Long Description (Catalog Description)
This course begins with a historic overview of the non-profit organization, and continues with an exploration of non-profit structure and governance, and the variety of careers and organizations found within the nonprofit sector. Students will analyze the various factors that influence arts organizations, and how arts organizations, in turn, affect the world around us.

Career
Undergraduate

AADM40103 - Management in the Arts

Department(s)
Fine Arts

Long Description (Catalog Description)
This course introduces students to the practical skills needed to successfully manage an arts organization. Students will explore internal processes, such as budgeting and accountability, and the external relationships that the arts manager must navigate, such as development and fundraising, marketing and audience development, and education and outreach.

Graduate

ACCT70510 - Valuation in Accounting Context I

Department(s)
Accounting

Long Description (Catalog Description)
1.5 credit hours. Prerequisites: Enrollment in the MAc degree program or department permission. Business valuation theory, approaches, and methodology and their application to account settings where valuation is needed such as in applying tax laws, financial reporting standards, and auditing standards.

Career
Graduate

ACCT70520 - Valuation in Accounting Context II

Department(s)
Accounting

Long Description (Catalog Description)
1.5 credit hours. Prerequisite: Enrollment in the MAc degree program or department permission. ACCT 70510 recommended but not required as preparation. Putting foundational business valuation concepts into practice. Coverage of more specific valuation applications common in financial reporting and other areas.

Career
Graduate

ACCT70550 - Seminar in Current Advisory Topics in Accounting

Department(s)
Accounting

Long Description (Catalog Description)
1.5 credit hours. Prerequisites: Enrollment in the MAc Degree or department permission. This course examines current topics in the professional services of advisory and valuation. Specifically, we discuss valuation of business and the contributing factors to business valuation including market reactions, economic changes, and financial reporting requirements. Emphasis is placed in developing students' ability to synthesize information and effectively communicate decisions in writing.

Career
Graduate

ACCT70560 - Mergers & Acquisitions Accounting

Department(s)
Accounting

Long Description (Catalog Description)
1.5 credits. Prerequisites: Enrollment in MAc or department permission. The course focuses on valuation within the context of mergers and acquisitions (for buyer and seller), accounting for transactions, developing tax efficient deals, appreciating the strategic goals of a merger or acquisition, and understanding the process involved in the deal.

Career
Graduate

ACCT70610 - Energy Accounting

Department(s)
Accounting

Long Description (Catalog Description)
1.5 credit hours. Prerequisites: ACCT 60010 or a Masters in Accounting student. This course focuses on accounting and reporting issues affecting the energy industry. The material covered includes a review of how accounting information impacts finance and operations from the local to the global level. Uniquely energy related topics include intangible development cost law, accounting for oil and gas exploration, reserve estimation, accounting for unproved property, accounting for development stages of wells, accounting for joint operations, and production and volume measurement. Capitalization and the impact of the depletion model on taxes, current and projected income, and cash flows are also covered. Other topics covered include environmental liabilities are discussed along with revenue accounting structures.

ADRN20203 - Mindfulness and Modern Life

Department(s)
AS ASPM, Interdisciplinary

Long Description (Catalog Description)
Much attention has been given to the stress college students are under today. To address this, the course considers what it means to live a 'mindful' life today. What kind(s) of thinking and practice does such a life entail? How would it fit into a busy college student's life? This course will address these questions through both theory and practice. It will range from traditional Buddhist ideas to modern science, from classic liberal arts reflection to contemporary mindfulness exercises. We will consider how practice and reflection influence one another, and how we engage in personal relationships, society, and the natural world. After beginning most classes with a 10-minute meditation, we will discuss the day¿s assignment. We will then generally do another practice and end with a circle of discussion.

Career
Undergraduate

ADRN20900 - Ideas of Leadership

Department(s)
AS ASPM, Interdisciplinary

Long Description (Catalog Description)
An examination of the concept and practice of leadership and various ideals of leadership from various points of view in the humanities and social sciences. Models of the "good leader" from a variety of sources will be analyzed and compared. A number of famous historical leaders will be evaluated in terms of the models presented.

AEST20211 - Team and Leadership Fundamentals

Department(s)
Aerospace Studies

Long Description (Catalog Description)
Team and Leadership Fundamentals (AEST 20211 in the fall and 2022 in the spring): A survey course designed to provide a basic understanding of both leadership and team building fundamentals. In this course, students will apply learned leadership perspectives while completing team building activities and discussing various leadership topics (i.e., conflict management, motivation, ethical decision-making, etc.). Additionally, students will be introduced to, and practice, basic verbal and written communication skills to develop effective thinking, writing, and speaking proficiencies. Students are taught from the beginning that there are many layers to leadership, including aspects that are not typically associated with these topics. Such aspects include listening, self-assessment/self-reflection, being a good follower, and problem solving efficiently. As a whole, this course provides the student with a knowledge level understanding of the general elements of leader development and effective teamwork. Furthermore, students will continue to discuss the importance of the Air Force Core Values with the use of operational examples and historical Air Force leaders. Leadership Laboratory I000I complements this course by providing cadets with followership experiences.

ANTH30313 - Food and Culture

Department(s)
Sociology and Anthropology

Long Description (Catalog Description)
Food and Culture explores food production, distribution, and consumption for practical and symbolic objectives. The course focuses on the symbolism as an expression of ethics that shape people's individual and collective identities. Toward this end, the course addresses heritage foods and identities at risk due to a change from regional, cottage production to mass production for worldwide distribution. The course also looks at identity in relation to politics and gender. Students learn qualitative research skills, which they apply to a semester-long project in a food-related venue, discovering the ethical moorings of a food micro-culture. Students learn skills for understanding culture through food, applicable to careers and travel in domestic and foreign settings.

Course Typically Offered	Career
Every other fall	Undergraduate

ANTH30323 - Migration: Crossing Borders, Crossing Cultures

Department(s)
Sociology and Anthropology

ANTH30703 - Archaeology of Mexico and Peru

Department(s)
Sociology and Anthropology

Long Description (Catalog Description)
An archaeological survey of the ancient cultures of Mexico and Andean South America, from the first human migrations into the Americas to the Aztec and Inka empires. Anthropological perspectives on developmental sequences and achievements of major indigenous civilizations in both culture areas are discussed and compared.

Course Typically Offered	Career
Fall	Undergraduate

ANTH30713 - World Archaeology

Department(s)
Sociology and Anthropology

Long Description (Catalog Description)
Prerequisite: ANTH 20633 or consent of instructor. An in-depth treatment of basic techniques, methods and concepts of archaeology and a continued update in recent archaeological discoveries around the globe. Research using published site reports and professional journals. Site visitations to excavations in process will be initiated whenever applicable.

Course Typically Offered	Career
Rarely	Undergraduate

ANTH30723 - Ethnology of Selected Areas

Department(s)
Sociology and Anthropology

Long Description (Catalog Description)
Origin and distribution of the native populations of selected areas. The historical development and current perspectives of institutions, belief and value systems, and comparative organization of cultural areas. Possible areas to be examined include Native North Americans, peoples of South America, and peoples of Africa.

Course Typically Offered	Career
Rarely	Undergraduate

ANTH30733 - Globalization and Human Impacts: Economics, Development and Social Justice

Department(s)
Sociology and Anthropology

Long Description (Catalog Description)
Prerequisites: ANTH 20623 or instructor permission. The course explores globalization's human impacts as understood through the lenses of development, public policy, economics, trade, and migration (among others). The course defines ethics and explores steps toward their realization in three areas in particular: (1) resolutions to social problems, (2) advancement of social justice, and (3) students' career paths.

Course Typically Offered	Career
Every other fall	Undergraduate

ANTH30743 - Animals, Religion, and Culture

Department(s)
Sociology and Anthropology

Long Description (Catalog Description)
Comparative approach to exploring the roles of animals in world and indigenous religions, past and present, including Christianity, Hinduism, Islam, Judaism, and Native American traditions. Topics include who counts as a religious subject, or person; how focusing on animals can help us better understand religion in general; hunting and farming; animal sacrifice; pets; biotechnology; climate change; conservation; fear & awe; animal theology; and whether other animals themselves might be religious. Discussion-based, coupled with mini-lectures, video screenings, and experiential "meditations.:

Every other fall	Undergraduate

ANTH30763 - Archaeology of the Biblical World: Syria-Palestine and TransJordan, 1550-332 BCE

Department(s)
Sociology and Anthropology

Long Description (Catalog Description)
Prerequisites: Either one RELI or one ANTH course, or permission of instructor. This course studies the cultures of Syria-Palestine and TransJordan from approximately 1550-332 BCE by identifying and interpreting the relevant archaeological data and anthropological findings. It will explore various aspects of these ancient cultures, including the region's economic, political, environmental, and social relations, as well as its religious expressions and ethnic identities. Additionally, students will consider the significance of archaeological material and anthropological models for reconstructing and interpreting these cultures and for understanding the Hebrew Bible as a cultural and historical document.

Course Typically Offered	Career

Undergraduate

APHS20003 - Global Healthcare Systems

Department(s)
Applied Health Sciences

Long Description (Catalog Description)
This course provides an overview of the healthcare delivery system in the United States in comparison to different systems of countries around the globe. The course explores the drivers of change over time that shape the organization and delivery of healthcare services and opportunities for innovation and improvements in the cost, quality, and access dimensions of healthcare services in these different systems. The course considers the settings in which healthcare services are delivered and the relationships between the different providers of those services and the payers (i.e., insurance companies) of those services. Discussion and learning activities will also focus on the expense of the U.S. healthcare system compared to single-payer and other systems of care and how those expenses translate to outcomes in association with access, equity, and quality of services

Career
Undergraduate

APHS20103 - Introduction to Public Health

Department(s)
Applied Health Sciences

Long Description (Catalog Description)
This course introduces the history, philosophy, and core functions of public health. Students will explore how public health addresses population health disparities using determinants of health. Focus is

placed on the key role of data in public health practice, including data collection, analysis, and evidence-based decision-making.

Career
Undergraduate

APHS20203 - Epidemiology & Biostatistics

Department(s)
Applied Health Sciences

Long Description (Catalog Description)
Prerequisites: MATH 10043. This undergraduate course offers an engaging exploration into the captivating fields of Epidemiology and Biostatistics. Designedfor students pursuing health-related majors, this course demystifies complexities and provides students with a clear roadmap to comprehend health issues and outcomes in populations (Epidemiology) and apply statistical principles in assessing health-related data (Biostatistics). Emphasizing practical application, this course is structured to furnish students with essential knowledge and skills, empowering theirdecision-making in both health sciences practice and research.

Career
Undergraduate

APHS30003 - Interprofessional Leadership Teams in Healthcare

Department(s)
Applied Health Sciences

Long Description (Catalog Description)
Prerequisites: Junior Standing; APHS 10003. This course builds on the core principles of interprofessional education (IPE) and interprofessional collaborative practice (ICP) to prepare leaders who drive collaboration, quality, and safety across the continuum of patient care. The course is aligned with the World Health organization¿s framework of IPE in which students of two or more professions learnabout, from, and with each other. Students in the Allied Health fields of Harris Collegetogether will develop the knowledge and skills to be interprofessional leaders within and beyond their respective disciplines.

APHS30303 - Allied Health Communications: A Consumer Perspective

Department(s)
Applied Health Sciences

Long Description (Catalog Description)
Prerequisites: APHS 10003. This course provides a foundational understanding of health-related communications with a focus on discussions with patients, families and allied health professionals. Designed for students interested in health sciences, the course emphasizes terminology commonly used by health professionals and presents it from the perspective of consumers navigating the healthcare system.

Career
Undergraduate

APHS30323 - Consumer Health

Department(s)
Applied Health Sciences

Long Description (Catalog Description)
Prerequisites: HLTH 30203. This course is an exploration of the traditional healthcare field, including complementary and integrative healthcare treatments from a consumer and healthcare professional perspective. Students will learn to utilize methods of critical analysis to evaluate credible claims made in the marketplace and by government agencies. Consumer protection and rights, marketing, science, public agenda setting, and special interest groups are studied with the objective of developing critical consumers of healthcare.

Career
Undergraduate

APHS30333 - Global Health Abroad

Department(s)
Applied Health Sciences

Long Description (Catalog Description)
This course provides an overview of the health care delivery system in the United States in comparison to different systems of countries around the globe. The healthcare system will be the focus, with an emphasis on the country in which the course is being delivered. This course will explore the drivers of change over time that shape the organization and delivery of healthcare services in different systems. It will explore how services are delivered and the relationships between the different providers and payers (i.e., insurance companies, national health care). The program will have visits to various facilities in the country to allow for an overview of the facility, its services and the funding sources. Social and scientific factors related to health beliefs and practices will also be examined and discussed.

ARAB10153 - Beginning Arabic I

Department(s)
Modern Languages

Long Description (Catalog Description)
The course will introduce students to the Arabic language and develop the four skills or reading, writing, speaking and listening.

Course Typically Offered	Career
Fall	Undergraduate

ARAB10163 - Beginning Arabic II

Department(s)
Modern Languages

Long Description (Catalog Description)
Prerequisites: ARAB 10153 with a grade of C- or better, or permission of instructor. Continuation of ARAB 10153. This course is the second in a series which develops reading and writing skills in Modern Standard Arabic (MSA) with active speaking and listening skills in both formal Arabic and some exposure to the Levantine dialect, one of the major dialects of the Arabic language. In addition to increased vocabulary repertoire, students are expected to obtain a substantial amount of vocabulary and begin to deal with idiomatic language and more advanced syntax. Authentic materials from the Arabic media will be used in addition to text-related video and audio materials. The course also introduces students to aspects of Arabic culture and everyday life in the Middle East.

Course Typically Offered	Career
Spring	Undergraduate

ARAB20053 - Intermediate Arabic I

Department(s)
Modern Languages

Long Description (Catalog Description)
Prerequisites: ARAB 10163 with a grade of C- or better, or permission of instructor. This course is the third in a series, comprising both Modern Standard Arabic (MSA) and an exposure to the Levantine colloquial. Students will continue development of skills in conversation, listening comprehension, and culturally relevant activities around a serialized audio-visually enhanced story, set in an Arab environment. A greater emphasis will be placed on grammatical structures including reading and writing functional narratives.

Course Typically Offered	Career
Fall	Undergraduate

ARAB20063 - Intermediate Arabic II

Department(s)
Modern Languages

Long Description (Catalog Description)
Prerequisites: ARAB 20053 with a grade of C- or better, or permission of instructor. This course is the fourth in a series, build on language skills developed in Arabic I-III. It aims to advance students' reading, writing, listening and comprehension skills, enabling them to read and analyze a wider range of texts, including news articles and longer narrations. Students are expected to acquire extensive knowledge in grammar, syntax and vocabulary, with a stress on cultivating speaking skills. They will become more familiar with the Levantine colloquial and gain knowledge of the culturally diverse Arabic-speaking world.

Course Typically Offered	Career
Spring	Undergraduate

ARAB30053 - Intermediate Arabic III

Department(s)
Modern Languages

Long Description (Catalog Description)
Prerequisites: ARAB 20063 with a grade of C- or better, or permission of instructor. Intermediate Arabic III is the fifth course in the Arabic program. This course aims to bring students to the intermediate-high level of proficiency in Modern Standard with exposure to colloquial Arabic. Emphasis continues to be on expanding their analytical understanding of the structure of Arabic language while advancing their development of listening comprehension, speaking, reading and writing. This level is characterized by extensive readings of authentic texts and modern media articles, as well as discussions on a multitude of social, cultural, and literary topic of the Arab world.

ARGD30301 - Professional Recognition for Graphic Designers

Department(s)
Design

Long Description (Catalog Description)
Prerequisites: Successful completion of two semesters of ARGD 20301. Permission of the instructor. Earning adjudicated recognition for upper-division students in Graphic Design through an experiential process, including participation in designated events and entering work in designated design competitions. Course may be repeated for additional credit, up to a total of 4 credit hours.

Career
Undergraduate

ARGD30323 - Advanced Design Practices

Department(s)
Design

Long Description (Catalog Description)
Prerequisites: ARGD 20323, 20333 or permission of instructor. Continued exploration of design process with emphasis on visual perception and communication of information.

Course Typically Offered	Career
Fall	Undergraduate

ARGD30400 - Illustration

Department(s)
Design

Long Description (Catalog Description)
Prerequisites: ARST 10103 or permission of instructor. Introduction to and exploration of current, creative illustration techniques and media. 3-15 hours, 3 hours maximum per semester.

Course Typically Offered	Career
Fall and Spring	Undergraduate

ARGD30423 - Publication Design

Department(s)
Design

Long Description (Catalog Description)
Prerequisites: Completion of or concurrent enrollment in ARGD 30323 and permission of instructor. Complete range of design, layout, illustration, art preparation for book, magazine, news media publication.

Course Typically Offered	Career
Spring	Undergraduate

ARGD30433 - Package Design

Department(s)
Design

Long Description (Catalog Description)
Prerequisite: ARGD 30323. Exploration of package design, packaging graphics and on-site promotion.

Course Typically Offered	Career
Fall	Undergraduate

ARGD30443 - Corporate Identity

Department(s)
Design

Long Description (Catalog Description)
Prerequisites: Completion of or concurrent enrollment in ARGD 30323 and permission of instructor. An exploration of the theory and practice of corporate identity. This includes logosymbol and logotype design, and their application to various media which may include: stationery systems, signage, website, display and packaging.

Course Typically Offered	Career
Fall	Undergraduate

ARGD30453 - Computer Applications to Graphic Design

Department(s)
Design

Long Description (Catalog Description)
Prerequisite: ARGD 20323. A practical study of the most current applications of electronic technology in the field of graphic design that will provide the technical skills necessary to master the computer as an art and communication medium.

Course Typically Offered	Career
Fall	Undergraduate

ARGD30463 - Experience Design

Department(s)
Design

Long Description (Catalog Description)
Prerequisite: ARGD 20323 Typography or permission of instructor. A practical study of user interface/user experience design (UI/UX). Emphasis on using empathy and design thinking methodology in relation to solving system problems.

Career
Undergraduate

ARGD30473 - Advanced Computer Applications to Graphic Design

Department(s)
Design

Long Description (Catalog Description)
Prerequisite: ARGD 30453 or permission of instructor. Aesthetic exploration of advanced design and rendering software.

Course Typically Offered	Career
Spring	Undergraduate

ARGD30523 - Advertising Design

Department(s)
Design

Long Description (Catalog Description)
Prerequisite: ARGD 20333 or permission of instructor. Creative communication within the limitations of specific media.

ARLD10433 - Freshman Seminar in Architectural Lighting Design

Department(s)
Design

Long Description (Catalog Description)
Topics may vary each time it is offered.

Career
Undergraduate

ARLD20503 - Fundamentals of Lighting

Department(s)
Design

Long Description (Catalog Description)
Prerequisites: A grade of 'C' or better in DSGN 10133 Color and Light Theory. A series of lectures and laboratory experiments through which students will develop both technical and aesthetic understanding of architectural lighting. Special emphasis on the color metrics, luminaire typologies, photometric analysis, calculations, human centered design, and the lighting design process for both daylight and electrical lighting.

Course Typically Offered
Fall and Spring

Career
Undergraduate

ARLD20513 - Digital Media in Lighting

Department(s)
Design

Long Description (Catalog Description)
Prerequisites: A grade of 'C' or better in ARLD 20503. This course is focused upon industry-specific digital media used in architectural lighting. Students will learn how to utilize 2D, 3D, and Building Information Modeling (BIM) to create architectural lighting contract documentation, how to generate daylighting and electric lighting calculations, and how to craft renderings through a blending of by hand and digital techniques.

Career
Undergraduate

ARLD30003 - Honors Tutorial in Architectural Lighting Design

Department(s)
Design

Long Description (Catalog Description)
Prerequisite: Department major and enrollment in the Honors Program. An examination of a significant issue affecting design, merchandising and/or textiles. The specific topic and presentation format oral, written, graphic, model, garment prototype, computer simulation are determined by the student and faculty directing the study. ARLD 30003 is the first of two courses required for departmental honors. Arrangements for this directed study must be made the semester prior to enrollment in the course.

Career
Undergraduate

ARLD30503 - Lighting and the Human Experience

Department(s)
Design

Long Description (Catalog Description)
Prerequisite: A grade of 'C' or better in ARLD 20503 and 20513. Students will delve into the interdisciplinary factors of lighting and the human experience. The course will draw from anthropology, psychology, neurobiology and sociology to explore how lighting is perceived and experienced by groups and individuals. Students participate in field studies, writing assignments, research projects, and presentations.

Career
Undergraduate

ARLD30513 - Lighting Design I

Department(s)
Design

Long Description (Catalog Description)
Prerequisites: A grade of a 'C' or better in ARLD 20513 Digital Media in Lighting. This course will delve into lighting design for residential and hospitality project types. Students will conduct precedent studies to inform their understanding of daylighting and electric lighting design. The lighting design process will be explored through studio style projects including passive design and sustainable lighting strategies.

Undergraduate

ARLD40003 - Senior Honors Project in Architectural Lighting Design

Department(s)
Design

Long Description (Catalog Description)
Prerequisite: Departmental major, enrollment in the Honors Program and completion of ARLD 30003. The execution of a project or paper reflecting creative investigation or research. Supervision by a three-member faculty committee is required. ARLD 40003 must be completed prior to the student's final semester of undergraduate work. May be based on subject matter explored in ARLD 30003.

Career
Undergraduate

ARLD40503 - Lighting Design II

Department(s)
Design

Long Description (Catalog Description)
Prerequisites: A grade of 'C' or better in ARLD 20513. This course will delve into lighting design for retail and commercial project types. Students will conduct precedent studies to inform their understanding of luminaire design, daylighting, electric lighting design. The lighting design process will be explored through studio style projects.

Career
Undergraduate

ARLD40513 - Senior Thesis in Lighting

Department(s)
Design

Long Description (Catalog Description)
Prerequisites: A grade of 'C' or better in ARLD 20503 and 20513 is required. Students will conduct independent research and a design project with specific focus into a lighting topic associated with in the built and/or natural environment.

Career
Undergraduate

ARLD40523 - Lighting Design III

Department(s)
Design

Long Description (Catalog Description)
Prerequisites: ARLD 20513. This course will delve into lighting design for healthcare and exterior project types. Students will conduct precedent studies to inform their understanding of lighting design for interior and exterior environments. The lighting design process will be explored through studio style projects.

Career
Undergraduate

ARLD40970 - Special Problems

Department(s)
Design

Long Description (Catalog Description)
Prerequisites: Permission of Instructor. Hours to be arranged. Special problems requiring independent research and study within a related area, or field experience in design. (1-6 semester hours)

Course Typically Offered
Contact Department For Details

ARLE20103 - Introduction to Arts Leadership and Entrepreneurship

Department(s)
Fine Arts Interdisciplinary

Long Description (Catalog Description)
This is the prerequisite introductory course for all ARLE courses. This course introduces many aspects of arts leadership and entrepreneurship, including: mission, vision, and values, nonprofit/public organizational leadership and management, planning and evaluation, financial management, fundraising and development, managing staff and volunteers, audience development, community engagement, programming, marketing and public relations, arts entrepreneurship, and working in the arts sector. The course also introduces students to the nonprofit sector and the current issues and trends affecting arts organizations, such as diversity, multiculturalism, inclusion, and access to the arts.

Career
Undergraduate

ARLE30103 - Leadership, Dynamics and Planning in the Arts

Department(s)
Fine Arts Interdisciplinary

Long Description (Catalog Description)
Prerequisites: ARLE 20103. This course covers a number of essential
components of leading complex arts organizations, including organizational dynamics and systems, balancing multiple priorities, resources, facilities and functions, developing staff and volunteers, working with unions, and coordinating projects. This course explores effective leadership practices, strategic planning,
organizational change, development and learning, human resources management and effective teams. Students develop leadership competencies and skills.

Career
Undergraduate

ARLE30203 - Financial Management and Fundraising in Arts Organizations

Department(s)
Fine Arts Interdisciplinary

Long Description (Catalog Description)
Prerequisites: ARLE 20103. This course covers two important areas of leading a nonprofit arts organization or managing your own artistic career. Financial management includes establishing internal controls, risk management, accounting and financial information systems and professional standards, financial statements, budgets, endowments and restricted funds, earned income, and external reporting through audits and the 990, and tax laws for nonprofits arts organizations. Fundraising and development include trends and motivations of donors to arts organizations, the board's fundraising responsibility, fundraising campaigns, and support systems, planned giving programs, donor relationships, grant writing and management, and fundraising ethics and professional standards.

Career
Undergraduate

ARLE30303 - Audiences, Community, Programs and Marketing in Arts Organizations

Department(s)
Fine Arts Interdisciplinary

Long Description (Catalog Description)
Prerequisites: ARLE 20103. Arts organizations are increasing their focus on the public dimension of their operations to establish and maintain relevancy. This public service mandate means building and serving multiple audiences and moving towards civic engagement through addressing relevant needs, building partnerships and collaborations and becoming social entrepreneurs. Successful arts organizations understand audience learning, rights, and social needs, and they deliver exemplary customer service,. They utilize interpretive tools, narratives and story, and multiple perspectives as they develop, manage, and evaluate a menu of program offerings and events. The marketing and public relations section of the course covers marketing fundamentals (product, price, promotion, place), consumer behavior, marketing segmentation, branding, effective messaging and communication, and building relationships with media, businesses, government, and community.

Career
Undergraduate

ARLE30403 - The Creative Economy

Department(s)
Fine Arts Interdisciplinary

Long Description (Catalog Description)
Prerequisites: ARLE 20103. What opportunities are available to work in the Creative Economy? What knowledge and skills are required to thrive in a creative economy organization or create and successfully manage your own creative business? This course explores the economic, political, and social environment for the arts and the creative economy. More specifically, the course covers what entrepreneurship means in arts organizations, including the production and presentation of art, utilizing creative thinking and innovation practices to solve many types of problems, and the importance and potential of technology in the creative process. The course also explores entrepreneurship fundamentals and best practices, design thinking and group dynamics approaches, and the steps involved in creating an arts or creative venture.

Career
Undergraduate

ARLE40103 - Arts Leadership and Entrepreneurship Experience

Department(s)
Fine Arts Interdisciplinary

Long Description (Catalog Description)
Prerequisites: This course is the CAPSTONE course for the ARLE minor. Students should have completed the full sequence of their ARLE courses before taking this course. In this capstone course, students apply their cumulative knowledge and skills in arts leadership and entrepreneurship to a real arts organization project on the TCU campus or in a local arts organization, for example, a strategic plan, business plan, showcase, or thesis. Students interested in creative entrepreneurship would create a new venture or apply best practices to revitalizing an existing arts organization, on campus or in the community. Students learn to set goals and objectives, work effectively in teams, design project work to respond to client needs, manage budgets and resources, and meet competing deadlines in a fast-paced environment mirroring real life work as an arts entrepreneur or arts leader. They also utilize best practices in project evaluation as they assess the results of their course project(s) and their team processes.

Career
Undergraduate

ARLE40903 - Internship in Arts Leadership and Entrepreneurship

Department(s)
Fine Arts Interdisciplinary

Long Description (Catalog Description)
Students complete an internship in an arts organization on campus or in the local community, 10-12 hours per week for 15 weeks, totaling 150 hours. Students will also meet monthly with the ARLE program director.

ARST10013 - Creative Thinking and Making Stuff

Department(s)
School of Art

Long Description (Catalog Description)
This introductory course presents students with a range of studio art experiences that will develop their skills in creating, analyzing, and appreciating art. This class is designed to prepare students from all disciplines university-wide (including non-art majors) to solve problems creatively and to develop critical thinking skills that will act as a lens to understand diverse perspectives. While the specific art media will rotate each semester, this class consistently explores Material, Process, Ideation, and Time as core components in creative practice.

Career
Undergraduate

ARST10103 - Drawing I

Department(s)
School of Art

Long Description (Catalog Description)
Drawing as a primary art form offers a thorough exploration of the art elements: shape, value, line and texture and the spatial relationship of these art elements. Analytic drawing, perspective drawing as well as expressive approaches are employed. The keeping of a sketchbook is required.

Course Typically Offered	Career
Fall and Spring	Undergraduate

ARST10113 - Drawing II

Department(s)
School of Art

Long Description (Catalog Description)
Prerequisite: ARST 10103. Creative drawing based on visual experience and imagination. Assigned problems and experiments with a wide range of drawing materials, the use of mark-making tools and inventive exploration of media.

Course Typically Offered	Career
Fall and Spring	Undergraduate

ARST10123 - Design and Color

Department(s)
School of Art

Long Description (Catalog Description)
Study and application of basic principles of creative design.

Course Typically Offered	Career
Fall and Spring	Undergraduate

ARST10133 - Three Dimensional Design

Department(s)
School of Art

Long Description (Catalog Description)
Emphasis on use of three dimensional media, exploration of materials and introduction to some of the most widely used technical processes relative to contemporary 3-D artists.

Course Typically Offered	Career
Fall and Spring	Undergraduate

Fall	Undergraduate

ARST30180 - Advanced Printmaking (Screenprinting)

Department(s)
School of Art

Long Description (Catalog Description)
Prerequisites: ARST 20163 or 20173 or 20183, or permission of instructor. Applied and photomechanical stencil techniques used with emphasis on individual development of expression. (More than 3 hours per class requires permission of instructor. May be repeated up to 21 hours.)

Course Typically Offered	Career
Spring	Undergraduate

ARST30210 - Advanced Ceramics

Department(s)
School of Art

Long Description (Catalog Description)
Prerequisite: ARST 20213 or permission of instructor. Advanced ceramic technique; clay bodies, glazes, kiln operation, raku. (More than 3 hours per class requires permission of instructor. May be repeated up to 21 hours.)

Course Typically Offered	Career
Fall and Spring	Undergraduate

ARST30220 - Ceramic Sculpture

Department(s)
School of Art

Long Description (Catalog Description)
Prerequisite: ARST 20213 and/or permission of instructor. Use of ceramic materials on a greater scale as sculptural media. Problems of handling, glazing, firing; scale as sculptural media. (More than 3 hours per class requires permission of instructor. May be repeated up to 21 hours.

Career
Undergraduate

ARST30233 - Exploring Animal Imagery

Department(s)
School of Art

Long Description (Catalog Description)
This course gives students the opportunity to better understand animals and our relationships with them by producing hands-on animal imagery using a variety of media and artistic techniques, including drawing, ceramics, and sculpture.

Career
Undergraduate

ARST30240 - Advanced Sculpture

Department(s)
School of Art

Long Description (Catalog Description)
Prerequisites: ARST 10133 and 20243. Sculptural concepts, technical processes and translation of ideas into three dimensional situations. (More than 3 hours per class requires permission of instructor. May be repeated up to 21 hours.)

Course Typically Offered	Career
Fall and Spring	Undergraduate

ARST30303 - Into the Small: Little Animals in Art, Culture, and Museums

Department(s)
School of Art

Long Description (Catalog Description)
Why do many people love butterflies, but fear bats? In 'into the Small' we will explore questions like these using multiple senses and cross-cultural perspectives, and then produce artworks in the contexts of galleries and museum exhibits to share what we find out.

Career
Undergraduate

ARST30510 - 3D Modeling and 3D Printing: Advanced New Media

Department(s)
School of Art

Long Description (Catalog Description)
Prerequisites: ARST 20503 or permission of instructor. An advanced exploration of the concepts, tools and techniques of new media. This course will explore the creation of digital sculptures, virtual worlds, and experimental studies with fabrication technology.

Course Typically Offered	Career
Fall and Spring	Undergraduate

ARST30610 - Interactive Robotics and Kinetic Sculpture: Advanced New Media

Department(s)
School of Art

Long Description (Catalog Description)
Prerequisites: ARST 20503. An advanced exploration of the concepts, tools and techniques of new media. This course will explore the Arduino microcontroller and its ability to control our physical world. Students will learn how to control motors, read environmental sensors, and utilize fabrication technologies such as laser engraving and 3D printing.

Course Typically Offered	Career
Fall and Spring	Undergraduate

ARST30710 - Color Photography

Department(s)
School of Art

Long Description (Catalog Description)
Prerequisite: ARST 20743, or JOUR 30233, or permission of instructor. Color photographic principles, theory, processes and practice. (More than 3 hours per class requires permission of instructor. May be repeated up to 21 hours.)

Course Typically Offered	Career
Fall and Spring	Undergraduate

ARST30720 - Landscape Photography

Department(s)
School of Art

Long Description (Catalog Description)
Prerequisite: ARST 20743 or permission of instructor. Techniques, methods for producing photographs under outdoor and field conditions. Emphasis on history and practice of landscape photography, its role in the history of the American West and its position in

contemporary American Art Photography. (More than 3 hours per classes requires permission of instructor. May be repeated up to 21 hours.)

Course Typically Offered	Career
Summer	Undergraduate

ARST30730 - Zone System Photography

Department(s)
School of Art

Long Description (Catalog Description)
Prerequisite: ARST 20743 and 30710 or permission of instructor. Use of sensitometry to produce negatives using the zone system. Production of materials using non-silver as well as photo silver processes. (More than 3 hours per class requires permission of instructor. May be repeated up to 21 hours.)

Course Typically Offered	Career
Rarely	Undergraduate

ARST30743 - The Photographic Portrait

Department(s)
School of Art

Long Description (Catalog Description)
Prerequisite: ARST 20743 or permission of instructor. Portrait photography fundamentals including lighting, equipment, social and psychological aspects of human representation, and business aspects of professional photography.

Course Typically Offered	Career
Spring	Undergraduate

ARST30753 - Photographic Illustration

Department(s)
School of Art

Long Description (Catalog Description)
Prerequisite: ARST 20743 and 30710 or permission of instructor. Taking, printing, layout and presentation of photographic materials related to projects in commercial art.

Course Typically Offered	Career
Fall and Spring	Undergraduate

ARST30760 - Alternative, Non-Silver Photo Processes

Department(s)
School of Art

Long Description (Catalog Description)
Prerequisites: ARST 20743. This course will investigate an extensive range of non-silver, alternative, and post print manipulative processes. (More than 3 hours per class requires permission of instructor. May be repeated.)

Course Typically Offered	Career
Every other fall	Undergraduate

ARST30770 - Documentary Photography

Department(s)
School of Art

Long Description (Catalog Description)
Prerequisites: ARST 20743 and ARST 30710 or permission of instructor. An exploration of the concepts, tools, and techniques of documentary photography. (More than 3 hours per class requires permission of instructor. May be repeated up to 21 hours.)

Course Typically Offered	Career
Rarely	Undergraduate

ARST30780 - Stages, Fabricated and Directed Studio Photography

Department(s)
School of Art

Long Description (Catalog Description)
Prerequisites: ARST 20743 or permission of instructor. An exploration of the concepts, tools, and techniques of studio art photography. All photographs for this class will be staged, fabricated and directed. (More than 3 hours per class requires permission of instructor. May be repeated with permission of instructor up to 21 hours.)

Career
Undergraduate

ARST30790 - Interactive Media for Artists

Department(s)
School of Art

Long Description (Catalog Description)
Prerequisites: ARST 20743 and ARST 30710, or permission of instructor. An introduction to the concepts tools and techniques of interactive multimedia for artists. (More than 3 hours per class requires permission of instructor. May be repeated up to 21 hours.)

Course Typically Offered	Career
Rarely	Undergraduate

ARST30903 - Seminar in Art Professions

Department(s)
School of Art

Long Description (Catalog Description)
Prerequisite: Junior standing in Art. The seminar will address specific professional issues such as photography of fine art, compiling slide portfolios, resume formats, exhibition preparation, exhibition venues, the role of museums and galleries, financial concerns and graduate school.

Course Typically Offered	Career
Spring	Undergraduate

ARST30913 - Seminar in Art Criticism and Theory

Department(s)
School of Art

Long Description (Catalog Description)
Prerequisites: Junior standing in Art or instructor permission and successful completion of ENGL 10803 and 20803. An exploration of major approaches to art criticism and theory with emphasis on developments since 1900.

Career
Undergraduate

ARST30933 - Feminist Concepts and Strategies in Studio Art

Department(s)
School of Art

Long Description (Catalog Description)
This is a hybrid course that combines theory and practice in the study of feminism and visual art making. This course investigates the distinctive ways feminist ideas can be expressed through multiple visual art media. Through readings, class discussions, and hands-on art projects, students will study examples of feminist art, feminist theory and criticism, and art production. Experimentation with visual media is informed by a feminist perspective and critique.

BIOL10003 - Contemporary Issues in Biology

Department(s)
Biology

Long Description (Catalog Description)
Two hours lecture and one two-hour laboratory period per week. A study of biology spanning contemporary issues in the biological sciences from the cellular and molecular to the ecosystem and biosphere levels of biological organization. Laboratory experiences are conducted in the biology computer lab. Designed for non-science majors.

Course Typically Offered	Career
Fall and Spring	Undergraduate

Career
Undergraduate

BIOL10503 - The Unity of Life: Molecules to Cells

Department(s)
Biology

Long Description (Catalog Description)
Prerequisite: A senior high school course in Biology or Chemistry. This course is an introduction to the inner workings of cells, with the theme of examining the common biomolecular foundation of all living things. Topics include the basic principles of evolution, the molecular organization, structure, and function of cells, the cell cycle (including mitosis and meiosis), gene expression, metabolism, and Mendelian and molecular genetics. This course is designed for science majors.

Course Typically Offered
Fall

BIOL10511 - Introductory Biology Lab II

Department(s)
Biology

Long Description (Catalog Description)
One laboratory period per week. This is a laboratory introduction to the diversity, evolution, anatomy and physiology of eukaryotic organism (protists, fungi, plants, and animals.) Topics covered include the principles of evolution by natural selection , population genetics, speciation, anatomy, physiology, and taxonomy. This course is required for each student declaring a major in Biology and/or with an interest in pre-health programs.

Career
Undergraduate

BIOL10513 - The Diversity of Life: Organisms to Ecosystems

Department(s)
Biology

Long Description (Catalog Description)
Prerequisite: A senior high school course in Biology or Chemistry. This course is an introduction to the workings of organisms (prokaryotes, protists, fungi, plants, and animals), with the theme of exploring the variety of solutions that have arisen in living things in response to the challenges of life. Topics include the principles of evolution, population genetics, speciation,

biological systematics, reproduction, homeostasis, and physiology across various branches of life. This course is designed for science majors.

Biology

Long Description (Catalog Description)
Prerequisites: BIOL 30403 or ENSC 30133
Three hours lecture and one laboratory period per week. An Interdisciplinary exploration of the biology, chemistry, geology, physics, and human use of the ocean and its resources. This course is recommended for students with a major interest in the life and earth sciences. (Crosslisted as BIOL/ENSC 30324)

Career
Undergraduate

Cross Listed Courses
ENSC30324 Introduction to Marine Science

BIOL30331 - Biology Majors Assessment

Department(s)
Biology

Long Description (Catalog Description)
Prerequisites: BIOL 10504, 10514, 30403, and 30603. A required course for all students who have completed the first four semesters of the curriculum for biology majors. Students, typically in the first semester of their junior year, are required to take the Major Field Test in Biology produced by Educational Testing Services. This course provides the venue in which the test is taken. Results from this assessment will be used to provide students and their academic advisors insights into potential deficiencies that should be addressed during the last half of their undergraduate training. It will also be used by the department as an ongoing assessment of the fundamental curriculum. Transfer students should consult the Department Chairperson prior to enrollment.

Career
Undergraduate

BIOL30343 - Genetics

Department(s)
Biology

Career
Undergraduate

BIOL30353 - Pathophysiology

Department(s)
Biology

Long Description (Catalog Description)
Prerequisite: Concurrent enrollment in NURS 2714 and NURS 2783 or permission of instructor. Provides basic pathophysiological concepts as a foundation for nursing concepts.

Career
Undergraduate

BIOL30403 - Ecology and the Environment

Department(s)
Biology

Long Description (Catalog Description)
Prerequisites: BIOL 10503, and 10513. Three hours lecture per week. Principles and concepts of ecology and their application to environmental biology and conservation. Topics will include human impacts on the environment and current issues of importance to global sustainability.

Course Typically Offered	Career
Fall	Undergraduate

BIOL30404 - Comparative Vertebrate Anatomy

Department(s)
Biology

Long Description (Catalog Description)
Three hours lecture and one laboratory per week. This course focuses on the form and functional significance of anatomical structures in vertebrate animals. The objectives of the course are to introduce students to the anatomical evidence for evolution and to help students develop an understanding of vertebrate anatomy that will prepare them for graduate or medical gross anatomy courses.

Course Typically Offered	Career
Fall	Undergraduate

BIOL30414 - Human Anatomy

Department(s)
Biology

Long Description (Catalog Description)
Prerequisites: Biol 10513 and Biol 10511 or 10523. Three hours lecture and one laboratory period per week. Study of structure and functional significance of tissues, organs, and organ systems in the human body, with attention to selected disease processes. Students will develop an understanding of human anatomy that will prepare them for graduate or medical gross anatomy courses. Credit will not be given for both BIOL 30414 and either 20204 or 20214.

Career
Undergraduate

BIOL30463 - Introductory Neuroscience

Department(s)
Biology

Long Description (Catalog Description)
Three hours lecture per week. Prerequisite: PSYC 10213, 10514, 10524 or its equivalent. Study of the nervous system, action systems, and sensory systems as background for the physiological bases of discrimination, motivation, emotions, and learning. (Crosslisted as BIOL/PSYC 30463.)

Course Typically Offered	Career
Fall and Summer	Undergraduate

BIOL30504 - Plant Biology

Department(s)
Biology

Long Description (Catalog Description)
Three hours lecture and one laboratory period per week. Study of the morphology, life history, physiology, ecology, evolution and socio-economic aspects of plants. Coverage includes the cyanobacteria, fungi and algae.

Course Typically Offered	Career
Every other fall	Undergraduate

BIOL30553 - Biology Of Aging

Department(s)
Biology

Career
Undergraduate

BIOL30603 - Cellular, Molecular, and Developmental Biology

Department(s)
Biology

Long Description (Catalog Description)
Prerequisites: BIOL 10503, and 10513; CHEM 10113. Three hours lecture per week. Basic structure and function of plant and animal cells; molecular genetics of cells and organisms; mechanisms governing cell reproduction and differentiation.

Course Typically Offered	Career
Spring	Undergraduate

BIOL30613 - Natural History

Department(s)
Biology

Long Description (Catalog Description)
Two hours lecture and one laboratory per week. A survey of some of the diverse habitats and lifeforms on earth, with an emphasis on North American ecosystems. Arctic tundra, forests, swamps, aquatic habitats, deserts, and mountains are considered in light of the unique adaptations required for associated fauna and flora, and especially, some of the challenges they face in the modern world. The course is designed for students with broad interests in science, especially environmental science and education majors and is also suitable for non-science majors. This course cannot be applied toward the biology course requirements for a biology major.

Course Typically Offered	Career
Fall and Spring	Undergraduate

BIOL30703 - Plant Systematics

Department(s)
Biology

Long Description (Catalog Description)
Two hours lecture and one laboratory period per week. Characteristics of the major groups and families of flowering plants. Basic history and general principles of taxonomy and fundamental concepts of phylogeny and plant evolution. Identification of plants represented in the local flora.

Course Typically Offered	Career
Every other spring	Undergraduate

BIOL30713 - Marine Ecology

Department(s)
Biology

Career
Undergraduate

BIOL30803 - Human Parasitology

Department(s)
Biology

Long Description (Catalog Description)
Prerequisites: BIOL 10503 or 10513. In this course, human ecto- and endo-parasites will be discussed along with their associated diseases. Students will gain knowledge of parasite life cycle, molecular mechanisms of entry, mechanisms of immune evasion and current and potential therapies. Public health strategies for control and elimination of parasitic diseases will also be explored.

Career
Undergraduate

BIOL30803 - History of Biology

Department(s)
Biology

Long Description (Catalog Description)
The course traces the origin and historical development of basic concepts in biology, including the background and the work of persons who significantly contributed to the understanding and formulation of biological concepts.

Career
Undergraduate

BIOL30843 - Biomedical Imaging

Department(s)
Biology

Long Description (Catalog Description)
Prerequisites: PHYS 20484 or 20485 or 10164. An introduction to image formation for molecular and medical applications. This course covers the fundamentals of optic, x-ray and MRI, image creation, detectors, basics of image processing, quantitative

analysis and a variety of applications in biophysics and in medicine. Includes off-campus lab work. (Crosslisted as BIOL/PHYS 30843.)

BIOL40021 - Introduction to Biological Research

Department(s)
Biology

Long Description (Catalog Description)
Prerequisites: BIOL 10504, 10514, 30403 and 30603.One hour lecture per week acquainting students with the diversity of research approaches and techniques used in the field of biology. All students enrolled in the course will take the Major's Field Test in Biology. (This course is only offered P/NC.)

Course Typically Offered	Career
Fall	Undergraduate

BIOL40033 - Senior Honors Research in Biology

Department(s)
Biology

Long Description (Catalog Description)
This course is only for students in the Honors College. Field and laboratory research experiences for advanced students. Nine clock hours per week are required for a total of 135 hours. The results will be written in the form of a senior honors research thesis to be presented to the Honors College. A student may receive credit for this course only one time. Credit will not be given for both 40033 and 40803 for the same project. This course will count as one laboratory course towards the B.S. degree in biology.

Course Typically Offered	Career
Fall and Spring	Undergraduate

BIOL40100 - Senior Problems

Department(s)
Biology

Career
Undergraduate

BIOL40110 - Topics in Medicine

Department(s)
Biology

Long Description (Catalog Description)
Prerequisites: BIOL 30603. This 0.5-hour course focuses on a variety of topics relevant to students who are interested in careers in the health professions. The course may be repeated. At most one hour may be applied to the Biology major or minor.

Course Typically Offered	Career
Spring	Undergraduate

BIOL40123 - Genetics

Department(s)
Biology

Long Description (Catalog Description)
Prerequisites: BIOL 30603. Three hours lecture per week. Survey course in the study of mechanisms of inheritance with particular emphasis on molecular genetics.

Course Typically Offered	Career
Spring	Undergraduate

BIOL40131 - Molecular Biotechnology Laboratory Techniques

Department(s)
Biology

Long Description (Catalog Description)
Prerequisites: BIOL 30603. A one credit hour laboratory course (one laboratory period a week). After completion of the course the student will develop an understanding of concepts and techniques currently in use in molecular biology and biotech research laboratories and will learn how to use basic bioinformatics tools to analyze DNA sequences.

Career
Undergraduate

BIOL40133 - Molecular Basis of Human Disease

Department(s)
Biology

Long Description (Catalog Description)
Prerequisites: BIOL 30603; CHEM 30123 (or concurrent enrollment) or permission of instructor. A study of the molecular mechanisms of human disease with an emphasis on the role of intracellular signaling events on the manifestation of disease, gene expression/regulation, the structure and function of macromolecules, cell growth and differentiation, and biotechnology based solutions to treatment.

Course Typically Offered	Career
Spring	Undergraduate

BIOL40143 - Genetics Laboratory

Department(s)
Biology

Long Description (Catalog Description)
Two three-hour laboratories plus associated lectures each week. Prerequisites: BIOL 30603 and 40123. Experiments that illustrate the basic principles of transmission and molecular genetics.

Course Typically Offered	Career
Spring	Undergraduate

BIOL40153 - Conservation Genetics

Department(s)
Biology

Long Description (Catalog Description)
Prerequisites: BIOL 10501, 10503, 10511, 10513, 30403, and 30603. Genetics plays an important and diverse role in the preservation of biological diversity. This course consists of two one-hour lectures and one three-hour laboratory each week and covers genetic theory and methods that are utilized in modern conservation efforts. Laboratory exercises focus on 1) the practical aspects of DNA extraction methods, molecular markers, PCR, sequencing, and capillary electrophoresis, and 2) analyzing the resulting genetic data.

Course Typically Offered	Career
Every other spring	Undergraduate

BIOL40163 - Avian Biology

Department(s)
Biology

Long Description (Catalog Description)
Prerequisites: Six semester hours in Biology. This course consists of two one-hour lectures and one three-hour laboratory each week. Lectures cover the evolution, anatomy and physiology, life histories, behaviors, and conservation of birds. The laboratory portion of the course includes identifying birds with molecular methods and field trips to identify common species of Texas birds. Five Saturday morning field trips are required.

Course Typically Offered	Career
Every other spring	Undergraduate

BIOL40173 - Mammalogy

Department(s)
Biology

Long Description (Catalog Description)
Prerequisites: six semester hours in Biology. Two hour lectures and two hours of laboratory per week. This course introduces advanced undergraduate students to mammals. Lectures will examine the major topics of mammalian biology, including the evolutionary history, classification, adaptations, ecology, and natural history of mammals. Field techniques for the study of mammalian biodiversity and abundance will also be covered in this course. Field trips will be required. (Crosslisted as BIOL/ENSC 40173.)

Course Typically Offered	Career
Every other spring	Undergraduate

Cross Listed Courses
ENSC40173 Mammalogy

BIOL40183 - Examining Eugenics, Race, and Modern Biology

Department(s)
Biology

Long Description (Catalog Description)
Prerequisites: BIOL 30603 and BIOL 30403 OR Instructor Permission. This course critically engages the historical eugenics movement in the United States and its precursors in the broader Western scientific tradition with attention to current and future advancements in biology. Students will employ a combination of scientific and ethical analysis to interrogate social/political and biological claims about inherited traits and race that were dominant in the eighteenth and nineteenth centuries. Students will further analyze contemporary advancements in biology while applying ethical lessons from the past.

Career
Undergraduate

BIOL40203 - Histology

Department(s)
Biology

Long Description (Catalog Description)
Prerequisite: BIOL 30603 or permission of the instructor. Two hours lecture and one laboratory period per week. Study of basic tissues of the vertebrate body and how they differentiate.

Course Typically Offered	Career
Spring	Undergraduate

BIOL40224 - Developmental Biology

Department(s)
Biology

Long Description (Catalog Description)
Prerequisite: BIOL 30603 or permission of the instructor. Three hours lecture and one laboratory period per week. An introduction to developmental biology and embryology. Modern molecular and genetic techniques will be combined with classic anatomical embryology.

Course Typically Offered	Career
Fall	Undergraduate

BIOL40254 - Immunology

Department(s)
Biology

Long Description (Catalog Description)
Prerequisites: C- or better in BIOL 30603, or permission of instructor. Three hours lecture and one laboratory period per week. The immune system; characteristics of antigens; antibodies and their reactions; cellular and humoral aspects of immunity; immune disorders.

Course Typically Offered
Fall and Spring

Career
Undergraduate

BIOL40263 - Immunobiology of Disease

Department(s)
Biology

Long Description (Catalog Description)
Prerequisite: BIOL 30304 or BIOL 40254. This lecture-based course features current research in Immunology that focuses on how manipulations of the innate or adaptive immune system can modulate disease states. This includes how microbes overcome immune defenses, failures in immune system function and how the immune system can be therapeutically modified to treat disease.

Career
Undergraduate

BIOL40273 - Genomics

Department(s)
Biology

Long Description (Catalog Description)
Prerequisite: BIOL 40123. This class will consist of two hours of lecture and one laboratory per week. The course focuses on the ways in which information at the genome level has become integral to Biology. The labs are designed to give students hands on experience analyzing genomic data to ask and answer specific questions. Contemporary primary literature will be discussed.

Career
Undergraduate

BIOL40303 - Medical Microbiology

Department(s)
Biology

Long Description (Catalog Description)
Prerequisite: Permission of the instructor. This course focuses on advanced topics in medical microbiology including disease mechanisms of major human pathogens, the host response, and antibiotic development and resistance. Scientific approaches used to investigate these topics are emphasized through reading and discussion of the primary literature.

Course Typically Offered
Spring

Career
Undergraduate

BIOL40303 - Histogenesis

Department(s)
Biology

Long Description (Catalog Description)
Prerequisite: BIOL 30603. Three hours lecture per week on molecular mechanisms in stem-cell and tissue differentiation.

Career
Undergraduate

BIOL40310 - The Teaching of Biology

Department(s)
Biology

Long Description (Catalog Description)
Prerequisite: Written permission of the instructor of the course in which the student plans to serve. Students attend laboratory-staff meetings and serve as laboratory instructors of one section per week in various courses. For 1.5 semester hours credit.

Course Typically Offered
Fall and Spring

Career
Undergraduate

BIOL40313 - Biogeography

Department(s)
Biology

Long Description (Catalog Description)
Prerequisite: BIOL 30403 or permission of instructor. Three hours lecture per week. An ecological approach to the study of the distribution of plant and animal communities.

Course Typically Offered	Career
Every other spring	Undergraduate

BIOL40320 - Teaching of Introductory-Level Biology

Department(s)
Biology

Long Description (Catalog Description)
Prerequisite: Written permission of the instructor of the course in which the student plans to serve. Students serve as laboratory instructors of one section per week in introductory-level biology courses. Students receive 1 credit for serving as laboratory instructors for one section per week and one additional credit for each three hours of additional duties per week including laboratory staff meetings. May be repeated once.

Course Typically Offered	Career
Fall and Spring	Undergraduate

BIOL40323 - Developmental Biology

Biology

Long Description (Catalog Description)
Prerequisite: BIOL 30603. Three hours lecture per week on molecular mechanisms in embryonic development.

Career
Undergraduate

BIOL40330 - Teaching of Advanced Biology

Department(s)
Biology

Long Description (Catalog Description)
Prerequisite: Written permission of the instructor of the course in which the student plans to serve. Students receive one credit hour for serving as laboratory instructors of one section per week and one additional credit hour for each three hours of additional duties per week including laboratory staff meetings. This course is intended only for undergraduate Teaching Assistants in courses above the freshman level. Not to exceed six hours credit on the major and eight hours credit total.

Course Typically Offered	Career
Fall and Spring	Undergraduate

BIOL40353 - Wildlife Ecology and Management

Department(s)
Biology

Long Description (Catalog Description)
Prerequisite: Six semester hours in Biology. Two hour lectures and a three hour laboratory each week. This discussion-oriented course introduces advanced undergraduate students to the general principles of wildlife ecology and how those principles can be applied to wildlife management and conservation. The objectives of this course are 1) to provide an introduction to the major concepts of Wildlife Ecology and Management and 2) to allow you to learn the application of the scientific method to ecological problems. Laboratory exercises are required. (Crosslisted as BIOL/ENSC 40353)

Career
Undergraduate

BIOL40403 - Mammalian Physiology

Department(s)
Biology

Long Description (Catalog Description)
Prerequisites: BIOL 30603 with a C or better or permission of instructor. Basic functions of the major mammalian systems will be studied in terms of physical and chemical principles and system interactions.

Course Typically Offered	Career
Fall	Undergraduate

BIOL40443 - Environmental Biology

Department(s)
Biology

Long Description (Catalog Description)
Prerequisites: BIOL 30403 or approval of instructor. Introduction to contemporary issues in environmental biology such as the biological consequences of global climate change, extinction, contaminants in the environment, and overfishing. The course includes discussions of primary literature and students will complete a major writing assignment in the form of a literature review.

Course Typically Offered	Career
Every other spring	Undergraduate

BIOL40453 - Principles of Toxicology

Department(s)
Biology

Long Description (Catalog Description)
Prerequisites: BIOL 40403. This course focuses on the underlying principles of toxicology including dose-response curves, routes of contaminant exposure, contaminant fate in the environment and in organisms, and xenobiotic metabolism. Discussions of both historical and contemporary primary literature will be used to explore the specific effects of contaminants on various physiological systems.

Career
Undergraduate

BIOL40463 - Physiological Psychology

Department(s)
Biology

Career
Undergraduate

BIOL40473 - Vertebrate Endocrinology

Department(s)
Biology

Long Description (Catalog Description)
Prerequisite: BIOL 40403. Two hours of lecture and one laboratory period per week. The course will focus on the structure and function of hormone signaling systems in vertebrate organisms. Contemporary primary literature will be discussed and the laboratory will expose students to the experimental design and methods utilized in modern endocrinology research.

Course Typically Offered	Career
Spring	Undergraduate

BIOL40501 - Basic Biochemistry Laboratory

Department(s)
Biology

Long Description (Catalog Description)
See Chemistry Prerequisite: Prior completion or co-registration in BIOL 40503. One three-hour laboratory per week. Analysis of chemicals found in body fluids. Includes clinical methods and pathology.

Career
Undergraduate

BIOL40503 - Basic Biochemistry

Department(s)
Biology

Long Description (Catalog Description)
Prerequisite: CHEM 30123 or equivalent. Three hours lecture per week. Fundamental chemical properties, analysis techniques, metabolism and clinicopathology of proteins, lipids, carbohydrates, enzymes and hormones. Available for chemistry credit only to majors in Nutritional Sciences. (Crosslisted as BIOL/CHEM 40503.)

Course Typically Offered	Career
Fall	Undergraduate

BIOL40513 - Fundamentals of Biochemistry

Department(s)
Biology

Long Description (Catalog Description)
Prerequisites: CHEM 30123 and C- or better in BIOL 30603, or permission of instructor. Three hours of lecture per week. The structures, properties, and functions of biological molecules (proteins, nucleic acids, lipids, and carbohydrates), with emphasis on analysis techniques and relation to physiology.

Career
Undergraduate

BIOL40523 - Structural Biology of Drug Design

Department(s)
Biology

Long Description (Catalog Description)
Prerequisites: BIOL 40513 or BIOL/CHEM 50133 or equivalent course. Two hours of lecture and two hours of laboratory per week. Students will learn structural biology techniques important for designing pharmaceuticals and design a drug to their favorite protein target. Crosslisted as BIOL/CHEM 40523.

BIOL40703 - Natural History of the American Southwest

Department(s)
Biology

Long Description (Catalog Description)
Prerequisites: BIOL 10514 or BIOL 30613. The Natural History of the American Southwest course is a hands-on 3 week, 5000 mile experience that allows students to acquire a working knowledge of major ecosystems of this region. Instruction is focused on the botany, zoology, ecology, geology and anthropology of regions visited. Two written exams are administered, completion of a field journal is required, and a summary paper is expected that ties together the principles, structural, and functional properties of ecosystems studied. This is an upper-level field biology course.

Course Typically Offered	Career
Contact Department For Details	Undergraduate

BIOL40703 - Global Perspectives in Health

Department(s)
Biology

Long Description (Catalog Description)
Prerequisites: 6 credit hours of Biology or equivalent. The course examines selected cultures in an international setting. Social and scientific factors are related to health beliefs and practices and health care delivery systems of the country visited and examined. Critical analysis of selected topics will be accomplished. Usually taught in summer abroad program. (Cross-listed as BIOL 40703/NURS 30063/ENSC 40203)

BIOL50246 - Biodiversity

Department(s)
Biology

Long Description (Catalog Description)
Prerequisites: Two semesters of college-level biology courses. This course introduces skills to describe and study the diversity of life. It is immersion, field-intensive instruction. General concepts include patterns of global biodiversity, biogeography of the Southern Plains, conservation biology, pressures on biodiversity, and national/international biodiversity protection efforts and policies. Field skill instruction starts with context description, emphasizing vegetation structure, followed by plant community description. Subsequent modules focus on inventorying animal communities, starting with insects and continuing with freshwater invertebrates, fish, amphibians, reptiles, birds and mammals. The field skill component of the course concludes with a week-long exercise in habitats outside of north-central Texas. Biodiversity information management is learned by developing a relational database coupled with a local Geographic Information System.

BIOL50313 - Evolution, Disease, and Medicine

Department(s)
Biology

Long Description (Catalog Description)
Prerequisites: BIOL 30603 and 40123 with a C or better in each or permission of instructor. This course introduces the theory of evolution and its real-world applications to the practice of medicine. Concepts of survival and reproduction defining evolutionary fitness, co-evolution, competition, natural selection, bottleneck effects, adaptation and exaptation will be introduced and applied in the context of managing and treating infectious and non-infectious human and animal diseases. These concepts will be applied beyond individual-level medicine to population-level public health.

Career
Undergraduate

BIOL50324 - Techniques in Cell and Molecular Biology

Department(s)
Biology

Long Description (Catalog Description)
Three hours lecture and one 3-hour laboratory per week. Prerequisite: Concurrent enrollment in BIOL or CHEM 50133 or equivalent and permission of instructor. Survey of techniques central to molecular and cellular biology, including centrifugation, chromatography, electrophoresis, spectrophotometry and radioisotopes.

Career
Undergraduate

BIOL50401 - Neurobiology of Aging

Department(s)
Biology

Long Description (Catalog Description)
Prerequisites: permission of instructor. The current literature associated with the neurobiology of aging, modern research techniques and recent developments in neuroscience and aging research are discussed. This is a participation course in which advanced undergraduate and graduate students will present manuscripts, explain research hypotheses and methodologies and explain results. Open discussion of these papers will include faculty from Biology and Psychology. Topics presented will differ by semester. The course may be repeated three times (taken a maximum of four semesters in all.) (Crosslisted as BIOL/PSYC 50401.)

BRIT60003 - Introduction to Ministry Studies

Department(s)
Brite

Long Description (Catalog Description)
This course assists first year students in developing an understanding of the vocational and theological vision of the curriculum they are entering to prepare for ministerial leadership. The course initiates a process of integration of learning across the curriculum which is marked by increasing signs of competency in four areas: constructive theological analysis and capacities for articulating this analysis; knowledge and skills for engaging the social and religious diversity God created within the human family; knowledge and skills for effective, ethical, and wise ministerial leadership; and growing knowledge and skills for the work of advocacy for God's justice and love for all creation.

BRIT60013 - Thinking Theologically in Context

Department(s)
Brite

Long Description (Catalog Description)
Prerequisites: completion of 27 semester hours. Theological engagement with a concrete issue of public concern, including reflection on theories of justice, and an emphasis on embodied practice.

Career
Brite

BRIT60023 - Cosmopolitan Leadership

Department(s)
Brite

Long Description (Catalog Description)
The course takes leadership and cosmopolitanism as its substantial guiding concepts. Leadership is central to almost all collective social activity and therefore has been a topic for a variety of issues that has received attention in empirical studies and theoretical works offering more or less well-grounded recipes for effective leadership. The ethics of leadership is the responsibilities of leaders to promote justice, equality, peace and the conditions necessary for people to live well in communities. In this course, we will explore that constitutes cosmopolitan leadership that embodies and lives out cosmopolitan values and responsibilities in a complex and uneven world.

BRIT70003 - Cosmopolitan Leadership

Department(s)
Brite

Long Description (Catalog Description)
The course takes leadership and cosmopolitanism as its substantial guiding concepts. Leadership is central to almost all collective social activity and therefore has been a topic for a variety of issues that has received attention in empirical studies and theoretical works

offering more or less well-grounded recipes for effective leadership. The ethics of leadership is the responsibilities of leaders to promote justice, equality, peace and the conditions necessary for people to live well in communities. The ultimate aim of ethical action may be called the common good of all, regardless one's gender, race/ethnicity, class, sexuality, citizenship, religion, etc. The idea of the common good of all is, however, in serious trouble today. The pursuit of the cosmopolitan common good in cosmopolitan leadership has not only social, political, economic, intellectual dimensions, but also religious one as well. Cosmopolitan leader that this course pursuits is a leader who embodies and lives out cosmopolitan values and responsibilities in a complex and uneven world. Treating people as an end rather than a means is one of hallmarks of cosmopolitan leadership, governed by the ethics of singularity.

BRST40003 - Senior Seminar: British Colonial/Post-Colonial Study

Department(s)
AS ASPM, Interdisciplinary

Long Description (Catalog Description)
This is a capstone course for the minor, and includes readings in British and colonial/postcolonial studies and an independent project. The independent project is pursued in consultation with the program director, and aims to reflect on the student's work in the minor, to synthesize the skills developed through the student's coursework, and to consider how they might be applied after graduation. Projects may include: an original creative performance; a scientific investigation; a portfolio of critical writing; or a U.S.-based internship with an employer with substantial interests in Britain or the former colonies. All projects also require a journal documenting and reflecting on the student's progress.

BUSI10153 - Business in Society

Department(s)
Management

Long Description (Catalog Description)
Prerequisites: Must be a Pre-Business major.Business is an increasingly impactful participant in our lives. Business affects society and society affects business. This course is designed to provide business majors a broad perspective on what business is, how it fits into the rest of society, and how the study of business connects with the rest of their learning as a liberally educated student at TCU. In the practice of business, there are seldom right answers to important questions. The ability to identify alternative approaches and to find, explain, and defend the best one is a key skill for the study and practice of business. This course focuses on developing these critical thinking skills.

BUSI40843 - The Leadership Challenge

Department(s)
Management

Long Description (Catalog Description)
3 hours. Prerequisites: Enrolled in the BNSF Neeley Leadership Program, and MANA 40213 with at least a grade of C. This course is designed to help students learn what it takes to successfully lead change efforts and plan and implement projects that promote the common good. As such, it will cover topics such as overcoming complacency, creating and communicating new direction, developing support for initiatives, communicating effectively about an initiative, and dealing with resistance, among others. Students in this course are expected to use what they've learned in prior leadership courses to lead a field-based project to a successful completion. Class sessions will help students relate their field experience to topic coverage in this course as well as to other courses in the Neeley Leadership Program.

BUSI40853 - Leading in a Complex World

Department(s)
Management

Long Description (Catalog Description)
Prerequisite: BUSI 40843 with a grade of at least C for students in the BNSF Neeley Leadership Program. For others, any two of the following with a grade of at least C, BUSI 30833, BUSI 30843, MANA 40213, MANA 40343. This course is designed to help students understand the complexity of the contexts in which leadership occurs. Students will gain a better understanding of: 1) the nature of complexity in business and social systems, 2) the implications of complexity for how organizations must think differently about leadership and followership (e.g., regarding organization structure, culture, power and communication), and 3) how each student personally

needs to lead and follow in organizational contexts to be successful as they transition into and advance in their careers.

BUSI60050 - Global Environment of Business

Department(s)
Management

Long Description (Catalog Description)
1.5 credit hours. This course is designed to be an introduction to international business. As such, the student will be introduced to those strategic, managerial, organizational and/or legal implications of doing business overseas. In addition, the course will consider those international institutions and cultural differences that impact the conduct of the global firm.

Career
Graduate

BUSI60070 - Business Simulation

Department(s)
Marketing

Long Description (Catalog Description)
1.5 credit hours. This course helps students integrate concepts from the different business disciplines by involving them in a complex computer simulation of realistic business situations. Teams of students are required to make business decisions involving a diverse set of business functions and activities over a series of rounds in which conditions change. Through successive phases of the simulation, students must respond to the actions of competing company teams represented by their classmates and are exposed to the consequences of their previous decisions. The course, which is taught at the end of the required core courses, requires students to draw on the material from those courses in making their decisions. Student performance in the simulation is reflected in a balance scorecard of multiple metrics. At the end of the simulation, students present their rationales for their decisions.

BUSI60090 - Data Ethics and Privacy

Department(s)
Accounting

Long Description (Catalog Description)
Prerequisites: Admitted to Masters of Science in Business Analytics program. 1.5 credit hours. Data Ethics and Privacy addresses the ethics of the collection, management, and use of data by business organizations. Frameworks are introduced for addressing the governance of data at the level of individuals and organizations. Case studies are used to develop analytical skills and provide context.

Career
Graduate

BUSI60200 - Business Intelligence & Analytics

Department(s)
Accounting

Long Description (Catalog Description)
Prerequisites: Graduate standing. The key objectives of this course are two-fold: (1) to provide you with a theoretical and practical understanding of core data mining and analysis concepts and techniques; and (2) to provide you with hands on experience in applying these techniques to practical real-word business problems using commercial data mining and analysis software. As an applied course, the emphasis will be less on the inner working of each method and more on when and how to use each technique and how to interpret the results.

BUSI70173 - Introduction to Hedge Fund Strategies

Department(s)
Management

Long Description (Catalog Description)
Students will work in conjunction with a Texas-based asset manager to gain an understanding of hedge fund investment strategies. Students will use their critical thinking ability and knowledge of macroeconomics, security analysis, and portfolio management to formulate an analysis on the feasibility of an alternative investment portfolio. Such strategies may include long/short equity, relative value/capital structure arbitrage, event driven/merger arbitrage, and global macro trading. The result is an understanding of investment theory that goes beyond the conventional by-and-hold method prevalent in undergraduate and graduate investment course study. At the end of the semester, the team's analysis might be presented to a professional audience.

Career
Graduate

BUSI70200 - Business Intelligence & Accounting Analytics

Department(s)
Accounting

Long Description (Catalog Description)
Business Intelligence & Accounting Analytics combines financial and operational data with mining tools to improve the timeliness and quality of inputs to decision processes. It encompasses both top-town (confirmatory or hypothesis driven) analysis using traditional statistical techniques and bottom-up (exploratory) analysis using database and machine learning techniques to discover regularities, relations, or local structure/patterns that are at first unknown. The topics and related methods discussed include information retrieval and enterprise reporting, classification, predictive modeling, clustering, association rules mining, and social network analysis. The application of these methods are illustrated using modern software tools via examples, homework assignments and group term projects.

Fall	Undergraduate

CHDV40223 - Fundamentals of Child Life Practice

Department(s)
Psychology

Long Description (Catalog Description)
Prerequisites: NURS 10303 or PSYC 30313 or 40433. This child life course will focus on children in the healthcare environment. It will include study in the following areas pertaining to child life specialists; documentation; scope of practice; impact of illness, injury, and health care of patients and families; family-centered care; therapeutic play; and preparing children for healthcare encounters and life-changing events.

Course Typically Offered	Career
Spring	Undergraduate

CHDV40263 - Child Development Internship

Department(s)
Psychology

Long Description (Catalog Description)
Prerequisites: PSYC/CHDV 50433 and PSYC/CHDV 50443. This experiential course provides advanced opportunities to work with children through internship positions. Service environments will provide experiential learning through which the student will utilize their knowledge of child development. Students can obtain their own positions (e.g., women shelter volunteer; child life specialist practicum) or can take part in internships facilitated by the instructor.

Students complete 100 hours at the internship site. Students also attend a weekly one-hour seminar during the semester to discuss their experiences with peers and faculty and learn about working in helping professions.

Course Typically Offered
Summer

Long Description (Catalog Description)
Two hours lecture and two laboratory periods per week. Prerequisites: CHEM 10122-10123, or 10124 or permission of instructor. Theory and practice of volumetric and gravimetric analysis; introduction to instrumental analysis.

Career
Undergraduate

CHEM20123 - Quantitative Analysis (Honors)

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
Prerequisites: CHEM 10113, and prior or concurrent enrollment in CHEM 10123. One hour lecture and two laboratory periods per week. Exposure to techniques, theory, and laboratory practice of quantitative chemical analysis, focusing on gravimetric and volumetric analysis. Students will also gain an introductory understanding of instrumental methods of chemical analysis.

Course Typically Offered	Career
Spring	Undergraduate

CHEM20990 - International Residential Study

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
This course represents credit earned through a semester study abroad experience with an institution or program with which Texas Christian University has an official agreement to accept credit. The site and specific content will be identified on the official transcript. Courses appearing on a student's official transcript have been included in the student's grade point average.

Course Typically Offered	Career
Study Abroad Course	Undergraduate

CHEM30021 - Practical Application of Chem Lab Safety

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
Prerequisites: CHEM 10122 or 20123. This course aims to cultivate a robust safety culture, aligning with the accreditation standards set by the American

Chemical Society (ACS). As safety training becomes a cornerstone of ACS certification, this course empowers students with essential knowledge and skills to navigate laboratory environments safely and responsibly. Designed to be activities-based, the course utilizes hands-on experience to emphasize laboratory safety, allowing students to apply theoretical knowledge in practical settings. Participants will delve into the RAMP framework --Recognize, Assess, Minimize, and Prepare --drawing from the guidelines outlined in Laboratory Safety for Chemistry Students (Hill & Finster, 2010).

Career
Undergraduate

CHEM30121 - Organic Chemistry I Laboratory

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
One hour of lecture per week and seven 4-hour laboratory periods during the semester. Prerequisite: CHEM 10122 or 20123 with a grade of C- or better and prior or concurrent registration in CHEM 30123. Techniques of purification, characterization, and synthesis of organic compounds.

Course Typically Offered	Career
Fall	Undergraduate

CHEM30123 - Organic Chemistry I

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
Three hours lecture per week. Prerequisite: CHEM 10123 with a grade of C- or better. A survey of the classes of organic compounds with regard to nomenclature, structure, and reactions.

Course Typically Offered	Career
Fall	Undergraduate

CHEM30133 - Organic Chemistry II

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
Three hours lecture per week. Prerequisite: CHEM 30123 with a grade of C- or better. Stereochemistry, organic reaction mechanisms, and synthesis of organic compounds.

Course Typically Offered	Career
Spring	Undergraduate

CHEM30143 - Organic Qualitative Analysis

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
Two one-hour lectures and one 4-hour laboratory per week. Prerequisite: CHEM 30121 with a grade of C- or better and 30133 or concurrent registration. Chemical and instrumental means of identifying unknown organic substances.

Course Typically Offered	Career
Spring	Undergraduate

CHEM30990 - International Residential Study

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
This course represents credit earned through a semester study abroad experience with an institution or program with which Texas Christian University has an official agreement to accept credit. The site and specific content will be identified on the official transcript. Courses appearing on a student's official transcript have been included in the student's grade point average.

Course Typically Offered	Career
Study Abroad Course	Undergraduate

CHEM33990 - International Residential Study

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
This course represents credit earned through a semester study abroad experience with an institution or program with which Texas Christian University has an official agreement to accept credit. The site and specific content will be identified on the official transcript. Courses appearing on a student's official transcript have been included in the student's grade point average.

Course Typically Offered	Career
Study Abroad Course	Undergraduate

CHEM40001 - Senior Honors Res Paper

Department(s)
Chemistry and Biochemistry

Career
Undergraduate

CHEM40003 - Senior Honors Research Project

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
A project in chemical research carried out under the direction of a member of the chemistry faculty and designed to partially fulfill the requirements for Departmental Honors in Chemistry. Hours arranged.

Course Typically Offered	Career
Fall and Summer	Undergraduate

CHEM40013 - Senior Honors Research Paper

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
A project in chemical research carried out under the direction of a member of the chemistry faculty and designed to partially fulfill the requirements for Departmental Honors in Chemistry. Hours arranged.

Course Typically Offered	Career
Spring and Summer	Undergraduate

CHEM40091 - Senior Seminar

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
The chemical literature, modern research techniques and recent developments in chemistry are discussed. This is a capstone course to be taken by Chemistry and Biochemistry majors in the fall semester of their senior year.

Course Typically Offered	Career
Fall	Undergraduate

CHEM40113 - Physical Chemistry

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
Three hours lecture per week. Prerequisite: CHEM 10123 or 10124, PHYS 20483 and MATH 30224 or concurrent enrollment. A theoretical study and explanation of a number of the more important physical phenomena as applied to the field of chemistry.

Career
Undergraduate

CHEM40121 - Physical Chemistry I Lab

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
Prerequisite: Prior or concurrent enrollment in CHEM 40123. Alternating weeks of 1-hour laboratory lecture and 4-hour laboratory experiment. Laboratory experiments designed to convey fundamental principles of physical chemistry, with emphasis on chemical equilibrium in solution.

Course Typically Offered	Career
Fall	Undergraduate

CHEM40123 - Physical Chemistry I

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
Three hours lecture per week. Prerequisite: CHEM 10125 or 10122-10123 or 10123- 20123, prior or concurrent enrollment in MATH 10524. Studies of the fundamental physical principles relating to the field of chemistry, with an emphasis on thermodynamics and electrochemistry.

Course Typically Offered	Career
Fall	Undergraduate

CHEM40131 - Physical Chemistry II Lab

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
Prerequisites: Prior or concurrent enrollment in CHEM 40133. Alternating weeks of 1-hour laboratory lecture and 4-hour laboratory experiment. Laboratory experiments designed to convey fundamental principles of physical chemistry, with emphasis on polymers and computational methods.

Course Typically Offered	Career
Spring	Undergraduate

CHEM40132 - Physical Chemistry Laboratory

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
Two 4-hour laboratory periods per week. Prerequisite: CHEM 40123 or concurrent registration. Laboratory experiments designed to establish the principles of physical chemistry and methods of physical chemical measurements.

Career
Undergraduate

CHEM40133 - Physical Chemistry II

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
Three hours lecture per week. Prerequisites: CHEM 40123, MATH 20524, PHYS 20484 or PHYS 10164 (or concurrent enrollment). Continuation of studies of the fundamental physical principles relating to the field of chemistry, with an emphasis on quantum chemistry, spectroscopy, and kinetics.

Course Typically Offered	Career
Spring	Undergraduate

CHEM40164 - Introduction to Physical Chemistry

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
Three hours lecture and one 4-hour laboratory period per week. Prerequisite: CHEM 10123-10122 or 10124. An introduction to the basic concepts of physical chemistry with particular reference to those aspects important to the biological sciences.

Career
Undergraduate

CHEM40172 - Chemical Instrumentation

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
One hour lecture and one four-hour lab period per week. Prerequisite: CHEM 40123 and CHEM 40121. Theory and application of instrumental methods relevant to the analysis of small molecules and useful macromolecules. Includes electronic, vibrational, NMR, and mass spectroscopic techniques.

Course Typically Offered	Career
Spring	Undergraduate

CHEM40200 - Undergraduate Research

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
A project in chemical research carried out under the direction of a member of the chemistry faculty. The student must have permission from the supervising faculty member prior to registration. (1-3 semester hours).

Course Typically Offered	Career
All Sessions	Undergraduate

CHEM40501 - Basic Biochemistry Laboratory

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
Basic biochemistry lab.

Career
Undergraduate

CHEM40503 - Basic Biochemistry

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
Prerequisite: CHEM 30123 or equivalent. Three hours lecture per week. Fundamental chemical properties, analysis techniques, metabolism and clinicopathology of proteins, lipids, carbohydrates, enzymes and hormones. Available for chemistry credit only to majors in Nutritional Sciences.

Course Typically Offered	Career
Spring	Undergraduate

CHEM40523 - Structural Biology of Drug Design

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
Prerequisites: BIOL 40513 or BIOL/CHEM 50133 or equivalent course. Two hours of lecture and two hours of laboratory per week. Students will learn structural biology techniques important for designing pharmaceuticals and design a drug to their favorite protein target. Crosslisted as BIOL/CHEM 40523.

Career
Undergraduate

Cross Listed Courses
BIOL40523 Structural Bio of Drug Design

CHEM50001 - Laboratory Safety, Ethics & Professional Skills

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
This course deals with the safe handling of chemicals, the inventory and safe disposal of chemicals, safe handling of radioactive materials and lasers as well as

details of federal, state and city regulations that apply to safety in academic and industrial laboratories. Ethics in the chemistry and the use of databases and industry-specific software will also be discussed. (This course is only offered P/NC.)

Course Typically Offered	Career
Fall	Undergraduate

CHEM50111 - Laboratory Glassblowing

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
One 4-hour laboratory period per week. An introduction to the preparation of laboratory research equipment constructed of sodium and borosilicate glass.

Course Typically Offered	Career
Contact Department For Details	Undergraduate

CHEM50120 - Teaching of Chemistry

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
Prerequisite: Permission of instructor. Members of this class act as Chemistry laboratory assistants. Techniques of laboratory instruction are illustrated and the importance of laboratory safety is stressed. 0.5-3 semester hours.

Course Typically Offered	Career
Fall and Spring	Undergraduate

CHEM50133 - Biochemistry I

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
Prerequisite: CHEM 30133 and 40123 or permission of instructor. Three hours lecture per week. A general survey of structure and function of biologically important compounds with methods of analysis. (Crosslisted as BIOL/CHEM 50133.)

Course Typically Offered	Career
Fall	Undergraduate

Cross Listed Courses
BIOL50133 Biochemistry I

CHEM50143 - Biochemistry II

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
Prerequisite: BIOL/CHEM 50133. Biosynthesis, replication of DNA, synthesis and processing of RNA and proteins, and special topics e.g. brain and muscle functions, hormones and signal transduction, cancer, development, etc. (Crosslisted as BIOL/CHEM 50143.)

Course Typically Offered	Career
Spring	Undergraduate

Cross Listed Courses
BIOL50143 Biochemistry II

CHEM50153 - Medicinal Chemistry

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
Three hours lecture per week. Prerequisites: BIOL/CHEM 50143, or permission of instructor. Molecular mechanism of drug actions, and methods of drug design, discovery and development. (Crosslisted as BIOL/CHEM 50153.)

Course Typically Offered	Career
Fall	Undergraduate

Cross Listed Courses
BIOL50153 Medicinal Chemistry

CHEM50162 - Advanced Inorganic Chemistry Laboratory

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
One hour lecture and one 4-hour laboratory per week. Prerequisite: CHEM 50163 or concurrent registration. The laboratory emphasizes the synthesis, characterization and transformations of inorganic species.

Course Typically Offered	Career
Fall	Undergraduate

CHEM50163 - Advanced Inorganic Chemistry

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
Three hours lecture per week. Prerequisite: CHEM 40123 or permission of instructor. A survey of topics in modern inorganic chemistry with emphasis on synthesis, bonding and the mechanisms of reactions.

Course Typically Offered	Career
Fall	Undergraduate

CHEM50173 - Chemical Instrumentation

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
Two hours lecture and one 4-hour laboratory per week. Prerequisite: Prior or concurrent registration in Chemistry 40123. Modern instrumental techniques applied to both inorganic and organic systems. Ultraviolet, infrared and nuclear magnetic resonance spectroscopy, vapor phase chromatography, polarography and various electrochemical methods of analysis are covered.

Career
Undergraduate

CHEM50182 - Biophysical Chemistry Laboratory

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
Two 4-hour laboratory periods per week. Prerequisite: Prior or concurrent registration in CHEM 50183. Physical chemical principles applied to biochemical systems.

Course Typically Offered	Career
Contact Department For Details	Undergraduate

CHEM50183 - Biophysical Chemistry

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
Prerequisite: CHEM 40123, prior or concurrent registration in CHEM 50133 or permission of instructor. Biological systems are discussed from the viewpoint of physical chemical theories and methods.

Course Typically Offered	Career
Contact Department For Details	Undergraduate

CHEM50223 - Advanced Organic Chemistry

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
Three hours lecture per week. Prerequisite: CHEM 30143, 30133 or permission of instructor. A detailed study of stereochemistry, important organic reactions and mechanisms, organic syntheses and fundamentals of synthetic design.

Course Typically Offered
Fall

Career
Undergraduate

CHEM50230 - Special Problems in Chemistry

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
Advanced work in biochemistry, inorganic, organic and physical chemistry to be determined by the previous preparation and interests of the individual student.

Course Typically Offered
All Sessions

Career
Undergraduate

CHEM50231 - Special Problems In Chem

Department(s)
Chemistry and Biochemistry

Career

Undergraduate

CHEM50242 - How Chemists Win Wars

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
Prerequisites: CHEM 30123. This course will focus on the role that chemistry has played in historical times of conflict. The scientists who made the decisions and the personal and professional conflicts they faced will be presented. Student presentations and daily class discussions will be a significant component of the course grade.

Career
Undergraduate

CHEM50263 - Physical-Organic Chemistry

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
Three hours lecture per week. Prerequisite: CHEM 30133 and prior or concurrent registration in CHEM 40123. An introduction to modern structural theory and reaction mechanism. Includes a discussion of physical methods.

Course Typically Offered
Contact Department For Details

Career
Undergraduate

CHEM50273 - Inorganic Reactions

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
Three hours lecture per week. Prerequisite: CHEM 50163 or permission of the instructor. An advanced study of the preparative and derivative chemistry of important classes of transition metal and main group element compounds.

Course Typically Offered
Contact Department For Details

Career
Undergraduate

CHEM50282 - Advanced Physical Chemistry

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
Prerequisites: CHEM 40133. An introduction to Statistical Thermodynamics, Transport Phenomena and Physical Chemistry of Surfaces. Continuation of Chemistry 40123-40133.

Course Typically Offered
Spring

Career
Undergraduate

CHEM50290 - Chemical Thermodynamics

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
Prerequisite: CHEM 40133 or permission of instructor. Application of thermodynamics to the study of chemical reactions and phase transitions.

Course Typically Offered
Spring

Career
Undergraduate

CHEM50291 - Chem Thermodynamics

Department(s)
Chemistry and Biochemistry

Career
Undergraduate

CHEM50303 - Chemical Kinetics

Department(s)
Chemistry and Biochemistry

Long Description (Catalog Description)
Three lecture hours per week. Prerequisite: CHEM 40133. Phenomenological and theoretical aspects of the subject are stressed. Emphasis is placed on the study of rates of reaction as a means of elucidating reaction mechanisms. The study of specific gas phase and solution reactions is undertaken to illustrate basic theoretical principles as well as to distinguish molecular, ionic and free radical pathways, applications of isotope effects, activation parameters, medium effects and linear free-energy relationships are considered. Selected topics in conventional and enzyme catalysis are discussed.

Course Typically Offered

CHET60013 - Introduction to Theological Ethics

Department(s)
THET

Long Description (Catalog Description)
This course will survey the major methodological questions of theological ethics, its thematic subdivisions, and the schools of thought and individual authors who have shaped the discussion of ethical questions within the theological world.

Career
Brite

CHET60200 - General Transfer Credit

Department(s)
THET

Long Description (Catalog Description)
General Transfer Credit

Career
Brite

CHET65013 - History of Christian Ethics

Department(s)
THET

Long Description (Catalog Description)
Prerequisites: CHET 60013, CHTH 60003 or equivalent. An examination of some of the major themes within the history of Christian ethical thought and an introduction to some of the key theologians who addressed those themes from the beginnings of the Church through the 19th century.

Career
Brite

CHET65073 - Feminist Theology and Ethics

Department(s)
THET

Long Description (Catalog Description)
Prerequisite: CHET 60003, CHET 60023 or equivalent. Seminar examining the models of God, human nature, Christ, ethics, and spirituality offered by women of diverse backgrounds and perspectives.

Career
Brite

CHET70803 - Philosophical Background of Christian Ethics

Department(s)
THET

Long Description (Catalog Description)
An examination of issues in philosophical ethics, both historical and contemporary, with a view toward understanding their implications for Christian ethics.

Career
Brite

CHET70970 - Special Topics in Christian Ethics

Department(s)
THET

Long Description (Catalog Description)
May be repeated for credit under different topics. (1-3 semester hours)

Career
Brite

CHET75033 - Seminar: Contemporary Issues in Theological Ethics

Department(s)
THET

Long Description (Catalog Description)
Prerequisite: CHET 60013, CHET 65013, or equivalent. A critical examination of a contemporary social or political issue in light of theological, ethical and empirical insights. Representative topics: Relationships between Church and State, Human Sexuality, Medical Ethics. (May be repeated for credit under different topics for up to 9 credit hours.)

Career
Brite

CHET75043 - Seminar: Biblical Ethics

Department(s)
THET

Long Description (Catalog Description)
Prerequisite: CHET 60013, CHET 65013 or equivalent. A critical examination of the theological and ethical content of selected units of Biblical material, such as the creation stories in Genesis, the Ten Commandments, the prophets, the Sermon on the Mount, a Gospel or a New Testament epistle. (May be repeated for credit under different topics for up to 9 credit hours.)

Career
Brite

CHET75053 - Seminar: Major Figures in Christian Ethics

Department(s)
THET

Long Description (Catalog Description)
Prerequisite: CHET 60013, CHET 65013 or equivalent. A critical examination of the theology and ethics of major figures in Christian thought, such as Augustine, Luther, Calvin, Wesley, H.R. Niebuhr, Reinhold Niebuhr, Barth or Bonhoeffer. (May be repeated for credit under different topics for up to 9 credit hours.)

Career
Brite

CHET75063 - Seminar: Contemporary Themes in Theological Ethics

Department(s)
THET

Long Description (Catalog Description)
Prerequisite: CHET 60013, 65013 or equivalent. A critical examination of a current methodological issue in theological ethics, such as context vs. principles, liberation, love and justice. (May be repeated for credit under different topics for up to 9 credit hours.)

Career
Brite

CHET75901 - M.T.S. Final Exercise

Department(s)
THET

Long Description (Catalog Description)
Prerequisites: Admittance to the M.T.S. degree program. An independent research study course, taken in the final semester in program, that integrates material covered in earlier coursework, and produces a final paper, normally 20-30 pages in length.

Career
Brite

CHET75903 - M.T.S. Final Exercise

Department(s)
THET

Long Description (Catalog Description)
Prerequisite: Admittance to the M.T.S. degree program. An independent research study course, taken in the final semester in program, that integrates material covered in earlier coursework and produces a final paper, normally 20-30 pages in length.

Career

CHIN10033 - Business Chinese

Department(s)
Modern Languages

Long Description (Catalog Description)
Prerequisite: This course is designed for students with little or no previous knowledge of the Chinese language. It cultivates student cultural knowledge and language skills while communicating in Chinese business environments, tailoring all language training and cultural topics to that end. The language training helps students cultivate basic language skills to interact with the Chinese people. Cultural topics provide a framework for Western learners to develop and Eastern perspective, guiding learners to behave in a culturally appropriate manner when they communicate within Chinese business environments.

Course Typically Offered	Career
Spring	Undergraduate

CHIN10043 - Chinese Calligraphy

Department(s)
Modern Languages

Long Description (Catalog Description)
Chinese Calligraphy is designed for students who are interested in Chinese culture, philosophy, and art. Students will practice and acquire basic calligraphy strokes, radicals and characters by using traditional Chinese calligraphy brushes. Students will also learn

the meaning and philosophy behind each Chinese character. Prior knowledge in Chinese language and culture is not required.

Course Typically Offered	Career
Fall and Spring	Undergraduate

CHIN10153 - Beginning Chinese I

Department(s)
Modern Languages

Long Description (Catalog Description)
This is an introductory Chinese course for students with no or little prior experience in standard Mandarin. It provides students a solid training in all four skills -- listening, speaking, reading and writing, with emphasis on practicing pronunciations and building vocabulary, as well as acquiring fundamental grammatical structures. In addition, Chinese cultures will be briefly taught throughout the class. No prerequisite.

Course Typically Offered	Career
Fall	Undergraduate

CHIN10163 - Beginning Chinese II

Department(s)
Modern Languages

Long Description (Catalog Description)
Prerequisite: CHIN 10153 with a C- or better. This course continually covers basic Mandarin Chinese to students who have already taken a semester in Chinese. It continues strengthening integrated training in all four skills -- listening, speaking, reading and writing, but more efforts will be given to spoken and reading practicing. In addition, Chinese cultures will be briefly noted throughout the class.

Course Typically Offered	Career
Spring	Undergraduate

Masters prerequisite: CHET 60013, CHTH 60003, or equivalent. This course will review the historical development of the Black Theology movement. Through a close reading of early texts of the movement and a review of the social context within which it arose, the seminar participants will be invited to a full engagement with this theological tradition. It will be our purpose to identify not only the discrete contours of the movement, but also to identify its place in late twentieth century theological discourse.

CHTH70023 - Cosmopolitan Theology

Department(s)
Brite

Long Description (Catalog Description)
Cosmopolitan discourse has recently reemerged, especially in the areas of political and social philosophies, which seeks global justice and solidarities in an era of neo-empire, globalization, and identity politics. This course takes cosmopolitan ethos primarily from Greek philosophy, St. Paul, Immanuel Kant, Hannah Arendt, and Jacques Derrida as significant theological, philosophical grounds for global justice and human rights, and planetary hospitality and solidarity. This course thoroughly examines significant issues in cosmopolitan discourse such as its philosophical and theological grounds, major characteristics, various types and views, theopolitical implication and application, justice, hospitality, neighbor-love, and solidarity.

CHTH70033 - Derrida: Philosophical and Theological Issues

Department(s)
Brite

Long Description (Catalog Description)
Jacques Derrida (1930-2004) was one of the few thinkers, in the latter half of the twentieth century, who profoundly and radically transformed our understanding of writing, reading, con/texts and textuality. The scope of Derrida's thinking is incomprehensible. As a person of prayers and tears, Derrida was a prominent philosopher-theologian/ theologian-philosopher who never kept his political and ethical passion separate from the uninterrupted theological, philosophical reflections. Derrida audaciously fought against all form of apartheid and exclusion, wherever they took place; and passionately and consistently spoke out for justice, compassion, and hospitality. This curse examines several theopolitical issues in Derrida's thinking such as deconstruction, justice, religion, hospitality, cosmopolitanism, and forgiveness.

CHTH70053 - Love: Philosophical-Theological Issues

Department(s)
Brite

Long Description (Catalog Description)
Love in various forms is as old as humankind. However, love has never been as socially, politically, existentially, philosophically, and theologically decisive as it is in contemporary societies. Love becomes significant sources of the creative human power, and of the meaning of life. The increasing significance of love in various sectors of human life is a crucial theme for philosophical and theological reflections and for theorizations of contemporary societies. In this course, we will explore philosophical and theological approaches to love as discourse and practice.

Long Description (Catalog Description)
An exploration of Christian theology with special reference to the faith statements, confessions, and contemporary writings of Baptist traditions.

Career
Brite

CHTH70213 - Spiritual Themes in Literature

Department(s)
THET

Long Description (Catalog Description)
An investigation of spiritual themes in the literary works of such writers as C.S. Lewis, Nikos Kazantzakis or others. (May be repeated for credit under different topics for up to 9 credit hours.) See SPIR 70213.

Career
Brite

CHTH70253 - Postmodernism and Theology

Department(s)
Brite

Long Description (Catalog Description)
Postmodernism has been exerting considerable influence upon contemporary theology. The questions that this course will address are: How do we tell the Christian story in a postmodern, pluralistic world? How do we theologically address the postmodern world? How do we do postmodern theology? This course is for students to explore the philosophical and intellectual background of postmodernism, to articulate a critical perspective on postmodernism, and to examine the

ways in which theologians address issues of postmodernism and the theological issues in their thinking.

Course Typically Offered	Career
Spring	Undergraduate

CITE30153 - Interface Design and Scripting Fundamentals

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisites: COSC 20203. Fundamental principles of interface design and scripting languages. Topics include user interface evaluation and basic development, scripting language programming (e.g. Python), and the study of existing programs written in selected languages.

Course Typically Offered	Career
Fall	Undergraduate

CITE30333 - Database Administration

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisite: COSC 30603. Introduction to the database administration in both small and large-scale database operations. Course focuses on the setup, analysis and maintenance of relational databases used in modern applications.

Course Typically Offered	Career
Spring	Undergraduate

CITE30363 - Web Technologies

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisite: COSC 20803 with C- or better. This course will provide an overview of the current full stack web technologies. The students will learn both client-side and server-side technologies to create a functional dynamic web application. The course will include a detailed introduction to HTML, CSS, JavaScript, and HTTP followed by
in-depth coverage of server-side programming and database connectivity. Popular web frameworks will also be included. Projects will be required that demonstrate the student's understanding of these technologies.

Course Typically Offered	Career
Spring	Undergraduate

CITE30533 - Computers, Technology and Society

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisite: none. In addition to the benefits from the introduction of new technologies, the costs and risks of such changes should be considered. Building on an overview of informal logic, class discussions will examine the social, political, legal, and ethical aspects of technology, with an emphasis on computer technology. Experimental activities and selected readings will provide a basis for the discussion. Credit will not be given for both COSC 10433 and CITE 30533.

Course Typically Offered	Career
Rarely	Undergraduate

Computer Science

Long Description (Catalog Description)
Prerequisites: CITE 30153. This course provides students with a foundation in the history, theory, organization, technologies and instructional procedures used in distance education/training. Various delivery systems that pertain to distance learning will be investigated as will future trends in training/instructional applications.

Course Typically Offered	Career
Rarely	Undergraduate

CITE30990 - International Residential Study

Department(s)
Computer Science

Long Description (Catalog Description)
This course represents credit earned through a semester study abroad experience with an institution or program with which Texas Christian University has an official agreement to accept credit. The site and specific content will be identified on the official transcript. Courses appearing on a student's official transcript have been included in the student's grade point average.

Course Typically Offered	Career
Study Abroad Course	Undergraduate

CITE40133 - Operations Research I

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisites: MATH 10524 and a course in statistics (either MATH 10043 or MATH 30853 or MATH 30803) additionally either COSC 30603 or ENGR 20613 is required. The principles and practice of Operations Research Methods as a tool for decision-making are studied. In particular, the course focuses on deterministic mathematical programming techniques such as linear programming (the Simplex Method, concepts of duality and sensitivity analysis), network optimization (transportation and assignments problems), and dynamic, and integer programming.

Course Typically Offered	Career
Contact Department For Details	Undergraduate

CITE40353 - Computer Hardware Concepts

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisites: COSC 30203 and MATH 20123. Introduction to the design and operation of hardware systems that include embedded microcontrollers and/or microprocessors, and the programming techniques

required to control hardware systems. After providing an overview of analog and digital circuit theory, the course focuses on the design and operation of the interfaces between the controller(s)/processor(s) and the rest of the hardware.

Course Typically Offered	Career
Contact Department For Details	Undergraduate

CITE40450 - Computing Internship

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisites: At least four CITE or COSC courses counting toward a CITE or COSC major with ate least a 2.5 GPA in these courses and approval of the department chair. Students must spend at least 90 hours in approved practical work experience. This course may only be taken pass/no credit and is repeatable up to a total of 3 credit hours.

Course Typically Offered	Career
Fall and Spring	Undergraduate

CITE40643 - Issues in Project Management

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisites: Credit for, or concurrent enrollment in COSC 30603. This course presents an introduction to the issues involved in managing projects that are technology-based. Principles of project development, trade-off issues through the project life-cycle, and professional ethics will be covered. Team projects are included.

Course Typically Offered	Career
Rarely	Undergraduate

CITE40773 - Administering Computer Resources

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisites: CITE 30103. Tasks of the computer center manager are studied in the context of the role of administrative decision maker. Management processes, models for tradeoff decisions, behavior concepts, leadership, team dynamics, and infrastructures are covered. Both centralized and distributed models with multiple platforms and networked delivery are considered.

Course Typically Offered	Career
Rarely	Undergraduate

CITE40913 - Advanced Topics in Computer Information Technology

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisite: Permission of the instructor. Advanced topics of current interest. Students will study current literature. May be repeated for credit when the topic changes.

Course Typically Offered	Career
Contact Department For Details	Undergraduate

CITE40993 - Senior Development Project

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisite: CITE 40643. Senior computer information technology majors are required to demonstrate their mastery of several computer science and information technology topics and their ability to communicate the results of their efforts to others.

They are required to identify and analyze a computer development task, develop and implement a workable solution for its development, and then document the results of their efforts.

COMM30123 - Parliamentary Debate

Department(s)
Communication Studies

Long Description (Catalog Description)
Prerequisite: COMM majors/minors only, or permission of department. Students will investigate British origins of contemporary parliamentary debate and decision-making, will visit important sites such as the Houses of Parliament and Hyde Park Speaker's Corner, and will learn to conduct parliamentary debates and employ rules of parliamentary procedure in meetings.

Course Typically Offered	Career
Study Abroad Course	Undergraduate

COMM30133 - Group Communication

Department(s)
Communication Studies

Long Description (Catalog Description)
Prerequisites: COMM majors/minors only, or permission of department; COMM 20113. Participation in decision-making groups to develop skills related to effective group communication. Factors affecting group interactions are considered.

Course Typically Offered	Career
Fall and Spring	Undergraduate

COMM30143 - Mediation

Department(s)
Communication Studies

Long Description (Catalog Description)
Prerequisite: COMM majors/minors only, or permission of department. Students will develop knowledge and skills necessary to facilitate conflict conversations in interpersonal and organizational settings.

Course Typically Offered	Career
Summer	Undergraduate

COMM30153 - Interviewing

Department(s)
Communication Studies

Long Description (Catalog Description)
Prerequisite: COMM majors/minors only, or permission of department. COMM 10123 or 10163. Applies dyadic communication principles to specialized interviewing situations. Skills development is stressed.

Course Typically Offered	Career
Fall and Spring	Undergraduate

COMM30163 - Organizational Communication

Department(s)
Communication Studies

Long Description (Catalog Description)
Prerequisite: COMM majors/minors only, or permission of department; COMM 20113 with a C- or better; COMM 20223 with a C- or better. Communication channels and networks in organizations; analysis of barriers to effective communication; solving practical communication problems; communication and dynamics in work groups.

Course Typically Offered	Career
All Sessions	Undergraduate

COMM30173 - Messaging as a Content Creator

Department(s)
Communication Studies

Long Description (Catalog Description)
Prerequisite: COMM majors/minors only, or permission of department; COMM 10123 or 10133 or permission of instructor.Training in message and content development for public presentations in a variety of contexts. Students will develop strategic messaging and visual production skills. Theory and practical experience related to the formulation, presentation, and evaluation of public presentations.

Course Typically Offered	Career
Fall and Spring	Undergraduate

COMM30183 - Issues in Organizational Communication

Department(s)
Communication Studies

Long Description (Catalog Description)
Prerequisites: COMM majors/minors only, or permission of department; COMM 20223 and COMM 30163. Explores organizational communication within special contexts. Included theoretical concepts applicable to conflict, culture, media, etc. Repeatable for maximum of 6 hours.

Course Typically Offered	Career
Rarely	Undergraduate

COMM30193 - Listening

Department(s)
Communication Studies

Long Description (Catalog Description)
Prerequisites: COMM majors/minors only, or permission of department; COMM 20113 with a C- or better. Introduction to the reception and processing of information. Examines theory and research in areas such as attention, cognitive capacity, and attribution.

Examines the role of listening in a variety of contexts, including therapeutic communication, learning, and critical thinking.

Course Typically Offered	Career
Fall	Undergraduate

COMM30203 - Nonverbal Communication

Department(s)
Communication Studies

Long Description (Catalog Description)
Prerequisite: COMM majors/minors only, or permission of department; COMM 20113 with a C- or better. Introduction of the conceptual foundations of nonverbal communication. Theoretical perspectives, research methods, and applications of nonverbal communication are also explored in a variety of contexts.

Course Typically Offered	Career
FALLSPRING	Undergraduate

COMM30213 - Special Issues in Interpersonal Communication

Department(s)
Communication Studies

COMM60163 - Organizational Communication

Department(s)
Communication Studies

Long Description (Catalog Description)
Prerequisites: Communication Studies graduate student status or by permission of the instructor. Addresses advanced concepts, issues and research methodologies applicable to communication processes in contemporary organizations.

Career
Graduate

COMM60173 - Communication Research Methods

Department(s)
Communication Studies

Long Description (Catalog Description)
Prerequisites: Communication Studies graduate student status or by permission of the instructor. Introduction to philosophy of graduate research; study of inferential and descriptive analysis, as well as correlational and experimental methodology and design.

Career
Graduate

COMM60183 - Communication Theory

Department(s)
Communication Studies

Long Description (Catalog Description)
Prerequisites: Communication Studies graduate student status or by permission of the instructor. Examination and evaluation of social, psychological and linguistic theory applied to human communication behavior.

Career
Graduate

COMM60193 - Advanced Research Methods in Communication Studies

Department(s)
Communication Studies

Long Description (Catalog Description)
Prerequisites: Communication Studies graduate student status or by permission of the instructor. Application of communication principles to organizational practice and/or research projects.

Career
Graduate

COMM60203 - Family Communication

Department(s)
Communication Studies

Long Description (Catalog Description)
Prerequisites: Communication Studies graduate student status or by permission of the instructor. Examines current theoretical perspectives, concepts, and research methodologies applicable to communication processes in families.

Career
Graduate

COMM60213 - Social Networking Sites and Personal Relationships

Department(s)
Communication Studies

Long Description (Catalog Description)
Prerequisites: Communication Studies graduate student status or by permission of the instructor. Explores theory and research related to interpersonal uses of communication technology. Students will critically examine research and theory on both early and recent forms of mediated interpersonal communication.

Career
Graduate

COMM60223 - Comm & Coping

Department(s)
Communication Studies

Long Description (Catalog Description)
Prerequisites: Communication Studies graduate student status or by permission of the instructor. Examines interdisciplinary theories, concepts, and research methodologies relevant to communication in the context of coping and resilience.

Career
Graduate

COMM60293 - Communication and Social Cognition

Department(s)
Communication Studies

Long Description (Catalog Description)
Prerequisites: Communication Studies graduate student status or by permission of the instructor. Reviews theory and research related to the interaction between cognitive processes such as attention, perception and memory and the processing of verbal and nonverbal messages.

Career
Graduate

COMM60970 - Directed Study in Communication Studies

Department(s)
Communication Studies

Long Description (Catalog Description)
Prerequisites: Communication Studies graduate student status or by permission of the instructor. Opportunity for individual work in a specialized area of concentration within the Communication Studies discipline.

Career
Graduate

COMM70970 - Research Problems

Department(s)
Communication Studies

Long Description (Catalog Description)
Advanced research on special problems in Communication Studies. Content will vary according to the needs and interests of students and faculty.

Career
Graduate

COMM70980 - Thesis

Department(s)
Communication Studies

Long Description (Catalog Description)
Prerequisite: Permission of chair.

Career
Graduate

COMM70990 - Thesis

Department(s)
Communication Studies

Long Description (Catalog Description)
Thesis

Career

ENGR10052 Applied Programming

COSC10200 - General Transfer Credit

Department(s)
Computer Science

Long Description (Catalog Description)
General Transfer Credit

Course Typically Offered	Career
Administrative Use Only	Undergraduate

COSC10203 - Computer Literacy

Department(s)
Computer Science

Long Description (Catalog Description)
Two hours lecture and one and a half hours of laboratory per week. Introduction to the history of computers, computer organization, and principles of operation. Hands-on experience utilizing a variety of computer software tools including word processing, database management, graphics, spreadsheet, and Internet applications.

Course Typically Offered	Career
Rarely	Undergraduate

COSC10403 - Introduction to Programming

Department(s)
Computer Science

Long Description (Catalog Description)
Introduction to computers, problem solving, algorithm design, and programming techniques. Includes what a computer is and is not, problem organization, data representation, and how to utilize the computer to solve problems. Numerical and non-numerical problems are solved in a high-level programming language. Students are expected to have a mathematical background equivalent to college algebra or two years of high school algebra.

Course Typically Offered
Fall and Spring

Career
Undergraduate

COSC20803 - Data Structures

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisites: COSC 20203 with a C- or better. Basic concepts of data. Linear lists, strings, and arrays. Representation of trees and graphs. Storage systems and structures. Symbol tables and searching techniques, sorting techniques. Formal specification of data structures and data structures in programming languages.

Course Typically Offered
Fall

Career
Undergraduate

COSC20970 - Topical Studies in Computer Science

Department(s)
Computer Science

Long Description (Catalog Description)
Courses dealing with a particular area of investigation in computer science. The topics will be changed from semester to semester and the course may be repeated when the topic is different. (1 - 3 semester hours.)

Course Typically Offered
Fall and Spring

Career
Undergraduate

COSC20990 - International Residential Study

Department(s)
Computer Science

Long Description (Catalog Description)
This course represents credit earned through a semester study abroad experience with an institution or program with which Texas Christian University has an official agreement to accept credit. The site and specific content will be identified on the official transcript. Courses appearing on a student's official transcript have been included in the student's grade point average.

Course Typically Offered
Study Abroad Course

Career
Undergraduate

COSC30003 - Introduction to Computer Networks

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisites: CITE 30103 with a C- or better. Study of the technology, architecture, and software used by systems of network-connected computers. Topics include data transmission, local area network architectures, network protocols, internetworking, distributed systems, security, and network applications such as email, WWW, and FTP. Students will develop programs that run concurrently on multiple computers.

Career
Undergraduate

COSC30103 - Linear Systems

Department(s)
Computer Science

Career
Undergraduate

COSC30103 - Introduction to Data Science

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisites: COSC 20803 and MATH 20123 with a C- or better in both. Essential elements of the data science lifecycle from theory to practice. Introduces fundamental skills to prepare for advanced study in data science. Methodologies and several open source tools used in solving data science problems are studied. (Cross-listed as COSC/MATH 30103.)

COSC30203 - Computer System Fundamentals

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisite: CITE 30103 and COSC 20803 and MATH 20123; both with a C- or better. Topics include a review of machine representation of data, machine language, systems programming, memory hierarchy, linking, exceptional control flow, system-level I/O, network programming, and concurrent programming.

Course Typically Offered
Spring

Career
Undergraduate

COSC30253 - Computer Organization

Department(s)
Computer Science

Long Description (Catalog Description)
COSC Prerequisites: COSC 20803 and MATH 20123, or, ENGR prerequisites: ENGR 30444; all with a C- or better. Treatment of sequential and combinatorial circuits including flip-flops, multiplexers, decoders, adders, registers, counters. Design of functional components, of a computer including memory, ALU, control unit, busses. The tradeoffs of alternative architectural features such as word size, instruction sets, addressing modes. (Crosslisted as COSC 30253/ ENGR 30573.)

Course Typically Offered
Fall

Career
Undergraduate

Cross Listed Courses
ENGR30573 Computer Organization

COSC30403 - Programming Language Concepts

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisite: COSC 20803 and MATH 20123; both with C- or better. A study and comparison of the concepts and constructs of major programming language paradigms. Topics include programming language syntax, names, scopes, and bindings, semantic analysis, control flow, and data types. In addition, the course includes learning ANTLR to write parsers, and studying Scala, a functional programming language.

Course Typically Offered
Spring

Career
Undergraduate

COSC30453 - Computer Architecture

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisite: COSC 30253. The logical organization and functional behavior of digital computers are studied. Fundamental principles in the design of the CPU, memory, I/O devices, and bus structures are

presented. Performance enhancement topics such as caching, memory interleaving, interconnection schemes, pipelining, memory management, reduced instruction sets (RISC) and multiprocessing are discussed. (Crosslisted as COSC 30453/ENGR 30593.)

Course Typically Offered
Rarely

Undergraduate

Cross Listed Courses
ENGR30593 Computer Architecture

COSC30503 - Systems Programming

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisite: COSC 20203. An overview of the UNIX operating system focused on command-line and server interfaces. An introduction to the C/C++ programming language, UNIX commands, shell programming, process management, memory management, I/O, network communication, and systems programming in C/C++ with low-level kernel calls.

Course Typically Offered
Rarely

Career
Undergraduate

COSC30603 - Database Systems

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisite: COSC 20803, and MATH 20123. All prerequisites need to be C- or better. Introduction to the design, implementation, and use of relational database systems. Topics include entity-relationship modeling, relational algebra, normalization, SQL, external data structures, query optimization, non-relational models, and applications.

Course Typically Offered
Fall

Career
Undergraduate

COSC30703 - ADA Software Development and Programming

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisite: COSC 20803. Introduction to the problems associated with the development of large software systems and the features of the Ada programming language that can be used to attack many of these problems. Emphasis will be on those features of Ada that distinguish it from most other programming languages including the use of packages, formal specifications of interfaces, use of private types, operator overloading, tasking, representation clauses, exception handlers, and generics.

Course Typically Offered
Rarely

Career
Undergraduate

COSC30803 - Simulation Techniques

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisites: COSC 20803. Discrete event simulation programming and analysis techniques for simulation experiments. Includes experimental sampling and model development in a special purpose simulation language.

Course Typically Offered
Rarely

Career
Undergraduate

COSC30990 - International Residential Study

Department(s)
Computer Science

Long Description (Catalog Description)
This course represents credit earned through a semester study abroad experience with an institution or program with which Texas Christian University has

an official agreement to accept credit. The site and specific content will be identified on the official transcript. Courses appearing on a student's official transcript have been included in the student's grade point average.

Course Typically Offered	Career
Study Abroad Course	Undergraduate

COSC40003 - Data Communication and Computer Networking

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisite: COSC 30203 with a C- or better. Introduction to basic data communications concepts, including hardware and software aspects of protocols, asynchronous and synchronous communication, network configurations, and error detection. This course includes the study of both local area networks and long haul networks, the 7 layer ISO network model, the architecture of networks, and network communication protocols. Local and wide area networks including the internet and world wide web will be discussed.

Course Typically Offered	Career
Contact Department For Details	Undergraduate

COSC40023 - Machine Learning

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisites: COSC 20803, MATH 30224, and prerequisite MATH 10043 or corequisite MATH 30853; all with C- or better. Students will study the principles and practices of machine learning. Specifically, regression and classification will be studied to obtain and analyze patterns in datasets. To facilitate exploratory data analysis, students will also study data preprocessing techniques and data visualization practices.

Course Typically Offered	Career
Contact Department For Details	Undergraduate

COSC40033 - Wireless Networks and Security

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisites: COSC 30203 or CITE 30103; all with a C- or better. This course will cover the fundamental principles, architectures, and standards of modern wireless communications systems, as well as specific applications and uses of these systems.

Course Typically Offered	Career
Fall	Undergraduate

COSC40043 - Mobile App Development

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisites: COSC 30403 with a C- or better. The course introduces Android app development using Kotlin. This is a project-based course with the focus on developing simple to moderately complex Android apps. Along the way, students will learn the important concepts of Kotlin programming as well as how to implement key Android features.

Career
Undergraduate

COSC40053 - Introduction to Cybersecurity

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisites: MATH 20123, and COSC 30203 or CITE 30103; all with a C- or better. This course will cover the fundamental principles and techniques in computer systems and network security. Key topics include cryptographic systems, security standards, protocols, tools and applications.

Course Typically Offered	Career
Spring	Undergraduate

COSC40103 - Graphics

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisites: COSC 30253 and a knowledge of linear algebra MATH 30224. A basic course in graphics systems. Considers the equations of lines, planes, and surfaces; hidden line algorithms; rotations, scaling, and cutaway transformations; 3-D images and the use of shading and perspective; animation; and color graphics.

Course Typically Offered	Career
Contact Department For Details	Undergraduate

COSC40123 - Compiler Construction

Department(s)
Computer Science

Career
Undergraduate

COSC40203 - Operating Systems

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisites: COSC 30203 with a C- or better, COSC 30253 with a C- or better. Introduction to operating systems concepts, principles, and design. Topics include: processes and threads, CPU scheduling, mutual exclusion and synchronization, deadlock, memory management, file systems, security and protection, networking, and distributed systems. Selected existing operating systems are discussed, compared, and contrasted.

Course Typically Offered	Career
Spring	Undergraduate

COSC40233 - Cloud Computing

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisites: CITE 30103 with a C- or better and completed at least 18 hours in Major. An introductory course on Cloud Computing, with special emphasis on AWS Cloud Foundations curriculum. The course will provide a detailed overview and help students get an overall understanding of cloud computing concepts. More specifically, students will get hands-on exposure to the AWS cloud, including but not limited to the AWS core services, security, architecture, pricing, and support.

Career
Undergraduate

COSC40253 - Microprocessor Systems

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisite: COSC 30253. Introduction to the design of microprocessor based digital systems including the study of processor control signals, address decoding and memory interfacing, interfacing to serial and parallel ports, A/D conversion, and interrupt processing. Features of state-of-the-art microprocessors will be discussed. Both hardware and software assignments will be required. (Crosslisted as COSC 30353/ENGR 30583.)

Course Typically Offered
Spring

Career
Undergraduate

Cross Listed Courses
ENGR30583 Microprocessor Systems

COSC40303 - Image Processing Fundamentals

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisites: MATH 10524 and COSC 10403 or 10503, and either COSC 20803 or ENGR 40574. The study and practice of the principles, the algorithms and the techniques of image processing such as editing, analysis, segmentation, recognition and classification. Students will use Java to implement and test various image processing algorithms.

Career
Undergraduate

COSC40403 - Analysis of Algorithms

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisite: COSC 20803, Corequisite MATH 30123; all with C- or better, and a knowledge of probability and statistics. This course covers basic approaches for designing and analyzing for a variety of problems. Algorithm design techniques such as divide-and-conquer, greedy, dynamic programming will be covered. Other topics
include worst, best, and average case analysis, graph algorithms, string matching, and complexity.

Course Typically Offered
Contact Department For Details

Career
Undergraduate

COSC40453 - Object-Oriented Programming and Design Patterns

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisites: COSC 30403 with C- or better. This course teaches how to write code of high quality by providing an in-depth coverage of object-oriented programming principles and techniques. Topics include but not limited to fundamental object-oriented programming concepts, software design principles (SOLID), Gang of Four (GoF) design patterns, coding standards, refactoring. Each topic will be explained by using diagrammatic notations Unified Modeling Language (UML) and numerous real-world code demos.

Career
Undergraduate

COSC40503 - Artificial Intelligence

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisite: COSC 40403 and MATH 20123, all with grade C- or above. Introduction to knowledge representation and methods for intelligent search, planning, and learning. Fundamental topics include uninformed and informed search, adversarial search, constraint satisfaction problems, logical agents, knowledge representation, reinforcement learning, expert systems, and a bit of machine learning.

Course Typically Offered
Contact Department For Details

Career
Undergraduate

COSC40523 - Deep Learning

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisites: COSC/MATH 30103, MATH 30224, either MATH 10043 or 30853 or concurrent. All prerequisites need to be C- or better. Introduces fundamental knowledge of deep learning algorithms, practical skills to build, train and tune a deep artificial neural network with applications such as computer vision, natural language processing, and business analytics. Topics include but not limited to fully connected neural networks, convolutional networks, recurrent networks, generative adversarial networks.

Career
Undergraduate

COSC40603 - Compiler Theory

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisites: COSC 30203, COSC 30403, and MATH 30123. Formal description of algorithmic languages, such as Pascal, and the techniques used in writing compilers for such. Topics include syntax, semantics, storage allocation, code generation, error handling and diagnostics, code optimization, etc. Includes the definition and writing of a compiler for a simple programming language.

Course Typically Offered
Fall

Career
Undergraduate

COSC40703 - Programming Language Design

Department(s)
Computer Science

Career
Undergraduate

COSC40703 - Parallel Computing

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisites: COSC 40203. An introduction to hardware and software topics in high performance and parallel computing. Students will be introduced to a variety of high performance and parallel computing paradigms including message passing, threading models, and shared-memory programming techniques. Topics include motivation and history, parallel architectures, parallel algorithm design, and parallel performance analysis.

Course Typically Offered
Fall

Career
Undergraduate

COSC40803 - Advanced Topics in Computer Hardware

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisite: Permission of instructor. Advanced topics of current interest in computer hardware, such as computer design, computer networks, advanced computer graphics. Students will study current literature. May be repeated for credit when topic changes.

Course Typically Offered
Contact Department For Details

Career
Undergraduate

COSC40903 - Advanced Topics in Computer Software

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisite: Permission of instructor. Advanced topics of current interest in computer software, such as natural language programming, advanced operating systems, advanced compiler design, file structures, advanced database. Students will study current literature. May be repeated for credit when topic changes.

Course Typically Offered	Career
Contact Department For Details	Undergraduate

COSC40943 - Software Engineering

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisite: COSC 30603 or concurrent, senior standing in COSC or CITE or DASC (24 hours in the major.) All prerequisites need to be C- or better. Stages of the software development life cycle (requirements analysis, specification, design, implementation, testing), evolution, and quality assurance are covered. Classical and alternative process models are described. Project management issues, professional responsibilities, and ethics of the profession are discussed. This course includes team projects.

Course Typically Offered	Career
Fall	Undergraduate

COSC40993 - Senior Design Project

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisite: COSC 40943 with a C- or better. Senior computer science majors are required to demonstrate their mastery of several computer science topics and their ability to communicate the results of their efforts to others. They are required to identify and analyze a computer science problem, develop and implement a workable solution to the problem, and then document the results of their efforts.

Course Typically Offered	Career
Spring	Undergraduate

COSC50113 - Machine Logic

Department(s)
Computer Science

Career
Undergraduate

COSC50123 - Object-Oriented Design and Programming

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisite: COSC 30403 or permission of instructor. Introduction to object-oriented techniques including design methodologies and programming language support. Survey of new languages and extensions to existing languages which provide support for encapsulation, inheritance, and polymorphism.

Course Typically Offered	Career
Rarely	Undergraduate

COSC50133 - Formal Languages

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisites: COSC 40603. Languages and grammars which can be characterized in formal terms, for the purpose of constructing models for artificial (computer) languages. Topics will include finite automata, push down automata, Turing machines, solvable and unsolvable problems, etc.

Course Typically Offered	Career
Rarely	Undergraduate

COSC50143 - Intro To Software Engr

Department(s)
Computer Science

Career
Undergraduate

COSC50970 - Special Topics in Computer Science

Department(s)
Computer Science

Long Description (Catalog Description)
Prerequisite: Permission of instructor. (1-6 semester hours).

Course Typically Offered	Career
Contact Department For Details	Undergraduate

COSD10200 - COSD Generic Transfer Work

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Transfer work.

Course Typically Offered	Career
Administrative Use Only	Undergraduate

COSD10303 - Survey of Communication Disorders

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Survey of disorders of articulation, language, stuttering, voice and hearing.

Course Typically Offered	Career
Fall and Spring	Undergraduate

COSD10343 - Basic Sign Language

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
An introductory course in signing expressively and understanding basic sign language, receptively. Included is basic information on hearing loss and its effects on children and adults. Recommended for students majoring in special education and service-oriented fields as well as those who are interested in learning sign language.

Course Typically Offered	Career
Fall and Spring	Undergraduate

COSD20133 - Instructional Communication

Department(s)
Comm Science & Disorders

Career
Undergraduate

COSD20303 - Speech and Hearing Science

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
An introduction to acoustic and physiological aspects of the speech and hearing mechanisms.

Course Typically Offered	Career
Fall	Undergraduate

COSD20313 - Voice and Articulation Improvement

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Practical application of techniques for articulation, pronunciation, and efficient voice production for effective speech. Emphasis on acceptable standards of speech for students preparing for professional careers.

Course Typically Offered	Career
Rarely	Undergraduate

COSD20333 - Phonetics

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Required of all majors and elective to others. Emphasis on speech perception and sound discrimination. Intensive work in transcription using the International Phonetic Alphabet.

Course Typically Offered	Career
Fall	Undergraduate

COSD20343 - Intermediate Sign Language

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: COSD 10343 with a grade of C or higher or permission of instructor. Further development and refinement of receptive and expressive skills in Signed English and American Sign Language. Emphasis on vocabulary development for classroom use, ability to sign fluently, and the psycho-social aspects of deafness, including the sociolinguistics of sign language and Deaf Culture.

Course Typically Offered	Career
Spring	Undergraduate

COSD20363 - Evidence-Based Practice in Communication Sciences and Disorders

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: COSD 10303 with a grade of C or better. This course will focus on identifying the fundamental concepts related to scientific inquiry in communication sciences and disorders to allow students to become critical readers of peer-reviewed journal articles. The course will consider identification of research literature relevant to a specific topic or disorder, basic concepts involved in the formulation of research questions and methodology, and levels of research evidence available to audiologists and speech language pathologists.

Course Typically Offered	Career
Spring	Undergraduate

COSD20503 - Anatomy and Physiology of the Speech and Hearing Mechanisms

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: SPPA or DHHS major or minor, or permission of instructor. Structure and function of the normal mechanisms required for speech and hearing.

Course Typically Offered	Career
Fall and Spring	Undergraduate

COSD30003 - Junior Honors Seminar

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: Junior standing and membership in the Honors Program. Under the guidance and supervision of a faculty member, current issues in communication sciences and disorders are explored.

Course Typically Offered	Career
Fall and Spring	Undergraduate

COSD30203 - Language Development for Non Majors

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
An overview of normal acquisition and development of language in children from infancy through adolescence for non majors.

Career
Undergraduate

COSD30324 - Speech Sound Disorders

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisites: SPPA major, COSD 10303 and 20333, with a grade of C or higher in all COSD coursework, cumulative GPA of at least 3.00, and a cumulative 3.00 GPA in COSD courses or permission of instructor. Basic principles of diagnosis and treatment for individuals with developmental or functional speech sound disorders of articulation.

Course Typically Offered	Career
Spring	Undergraduate

COSD30334 - Language Development in Children

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: SPPA or DHHS major or permission of instructor. Normal acquisition and development of language in children from infancy through adolescence.

Course Typically Offered	Career
Fall and Spring	Undergraduate

COSD30343 - Aural Rehabilitation

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: COSD 30363 with a grade of C or higher in all COSD coursework, cumulative GPA of at least 3.00, and a cumulative 3.00 GPA in COSD courses. Overview of management and rehabilitation of persons with hearing loss. Focus on amplification, cochlear implants, assistive devices, speech training, speech reading, auditory training and language development.

Course Typically Offered	Career
Spring	Undergraduate

COSD30353 - Teaching Elementary School Subjects to DHH Children

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: Permission of instructor. Curriculum materials and teaching methods for meeting specialized needs of DHH children, in the learning of reading and developing concepts and relationships in arithmetic and science.

Course Typically Offered	Career
Fall	Undergraduate

COSD30363 - Audiology

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: COSD 20503 with a grade of C or higher. Basic audiometric techniques and interpretation of audiograms as related to problems of communication of persons with hearing loss.

Course Typically Offered	Career
Fall	Undergraduate

COSD30364 - Aural Rehabilitation

Department(s)
Comm Science & Disorders

Career
Undergraduate

COSD30373 - Language Disorders in Children

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: SPPA major or permission of instructor. COSD 30334 with a grade of C or higher in all COSD coursework, cumulative GPA of a least 3.00, and a cumulative 3.00 GPA in COSD courses. Introduction to the causes, characteristics, assessment and treatment of children with language disorders.

Course Typically Offered	Career
Spring	Undergraduate

COSD30383 - American Sign Language I

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: Basic Sign Language or permission of the instructor. Study of American Sign Language (ASL) including advanced study of grammatical structure and signing technique. Introduction to deaf culture associated with the use of ASL. Students will learn and demonstrate receptive and expressive signing skills through advanced experiential learning exercises.

Course Typically Offered	Career
Fall	Undergraduate

Cross Listed Courses
COSD55343 American Sign Language I

COSD30393 - Language Development of DHH

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: COSD 30334 with a grade of C or higher, or permission of instructor. This is the first of two courses devoted to the study of language development of Deaf/Hard of Hearing (DHH) students. It will address the early intervention needs of young DHH infants and their parents as well as DDH students in lower primary grades.

Course Typically Offered	Career
Spring	Undergraduate

COSD30524 - Clinical Methods in Speech-Language Pathology

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: COSD 10303, 20333, and 30334, with a grade of C or higher in all COSD coursework, cumulative GPA of at least 3.00, and a cumulative 3.00 GPA in COSD courses or permission of instructor. Principles and procedures in the assessment and treatment of communication disorders.

Course Typically Offered	Career
Spring	Undergraduate

COSD30970 - Independent Study

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: Permission of instructor. Independent study of specially designed topics not addressed in regular course offerings. 1-6 hours, 3 hours maximum per semester.

Course Typically Offered
Fall and Spring

Career
Undergraduate

COSD30990 - International Residential Study

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
This course represents credit earned through a semester study abroad experience with an institution or program with which Texas Christian University has an official agreement to accept credit. The site and specific content will be identified on the official transcript. Courses appearing on a student's official transcript have been included in the student's grade point average.

Course Typically Offered
Study Abroad Course

Career
Undergraduate

COSD40003 - Senior Honors Research Project

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: COSD 30003, with a grade of C or higher, senior standing, and membership in the Honors Program. The completion of a research project related to a current issue in normal and/or disordered communication.

Course Typically Offered
Fall and Spring

Career
Undergraduate

COSD40300 - Clinical Practicum in Speech-Language Pathology I

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: SPPA major. COSD 30524, 30324, 30373, all with a grade of C or higher, senior standing, a cumulative TCU GPA of 3.0 or higher, and a cumulative 3.00 or higher GPA in COSD courses, MATH 10043, one physical science course, one social/behavioral science course and biological sciences, and permission of instructor. One semester is required. Supervised clinical experiences in the management of speech and language disorders.

Course Typically Offered
All Sessions

Career
Undergraduate

COSD40303 - Cultural Responsiveness and Social Justice in Communication Sciences and Disorders

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: ENGL 10803, ENGL 20803 and SPPA or DHHS major with Junior or
Senior standing. This course explores critical perspectives in social justice in Communication Sciences and Disorders and multicultural considerations for children and adults with communication disorders

Career
Undergraduate

COSD40323 - Advanced Language Development for DHH

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: COSD 60233 with a grade of C or higher, or permission of instructor. Advanced study of language principles and language usage for intermediate and advanced levels with the deaf and hard of hearing.

Course Typically Offered	Career
Fall	Undergraduate

Cross Listed Courses
COSD60263 Adv Language Dev for DHH

COSD40333 - Teaching Spoken Language to Persons with Hearing Loss

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: COSD 30363 with a grade of C or higher or permission of instructor. Development of spoken languages, including articulation, prosody, and voice production for children and adults with hearing loss.

Course Typically Offered	Career
Spring	Undergraduate

COSD40340 - Clinical Lab in Teaching DHH Students I

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: COSD 30393 with a grade of C or higher in all COSD coursework, a cumulative TCU GPA of at least 2.75 or higher, cumulative COSD GPA of 2.75 or higher, and permission of instructor. A minimum of two semesters are required. Observation and supervised clinical teaching of DHH children and adults.

Course Typically Offered	Career
Fall and Spring	Undergraduate

COSD40350 - Clinical Practicum in Teaching DHH Students II

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: COSD 40340 with a grade of C or higher in all COSD courses, a cumulative COSD GPA of 2.75 or higher and TCU cumulative GPA of 2.75 or higher. Students must be recommended for enrollment by COSD faculty. Observation and teaching of DHH students in a public school setting.

Course Typically Offered	Career
Fall and Spring	Undergraduate

COSD40353 - Neurological Substrates of Communication and Swallowing

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: COSD 20503 with a grade of C or higher, SPPA or DHHS major or permission of instructor. This course will focus on the structure and function of the central and peripheral nervous systems in relation to normal and disordered communication and swallowing. Nervous system anatomy and physiology will be studied within the context of how structures, pathways, and systems support speech, language, cognition, hearing and swallowing.

Career
Undergraduate

COSD40363 - Evidence-Based Practice in Communication Sciences and Disorders

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: COSD 10303 with a grade of C or better. This course will focus on identifying the fundamental concepts related to scientific inquiry in communication sciences and disorders to allow students to become critical readers of peer-reviewed journal articles. The course will consider identification of research literature relevant to a specific topic or disorder, basic concepts involved in the formulation of research questions and methodology, and levels of research evidence available to audiologists and speech language pathologists.

Course Typically Offered	Career
Spring	Undergraduate

COSD40383 - American Sign Language II

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: COSD 30383 with a grade of C or higher, or permission of the instructor. This course is a continuation of the ASL I COSD 30383 with emphasis on deaf cultural aspects and the grammatical structure of ASL. This course utilizes extensive sign productions. Recommended for students in special education and service-related fields of study.

Course Typically Offered	Career
Spring	Undergraduate

COSD50300 - Clinical Practicum in Speech-Language Pathology II

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: COSD 40300 with a grade of C or higher, senior standing, and a cumulative TCU GPA of 3.0 or higher, and a cumulative 3.00 GPA or higher in COSD course, MATH 10043, one physical science course, one social/behavioral science course and biological sciences. Student must be recommended for enrollment by COSD faculty. A minimum of one semester required for undergraduate students. Supervised clinical experience in management of the most common speech and language disorders.

Course Typically Offered	Career
Fall and Spring	Undergraduate

COSD50303 - Neural Bases of Communication

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
1.) Prerequisite: Senior or graduate standing and 3303. The study of neuroanatomical and neurophysiological mechanisms related to speech, language and hearing. The structure and function of the human nervous system are examined and neurodiagnostic procedures are reviewed.
2.) Prerequisite: COSD 3303. The study of neuroanatomical and neurophysiological mechanisms related to speech, language, and hearing. The structure and function of the human nervous systems are examined and neurodiagnostic procedures are reviewed.

Career
Undergraduate

COSD50323 - Interaction Skills for Health Professionals

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: Senior or graduate standing. A combination of critical thinking, counseling, and leadership skills designed to prepare students to effectively communicate and work with clinical populations and their families. Appropriate strategies and techniques are explored with practical application experiences included.

Course Typically Offered
Summer

Career
Undergraduate

COSD50342 - Advanced Aural Rehabilitation

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: Senior standing and COSD 30343 and 30363, both with a grade of C or higher, or graduate standing, or permission of instructor. Theories of assessment and intervention in identification and aural rehabilitation of hearing-impaired and deaf children and adults. Includes methods of evaluation and training in the areas of audition, amplification, speech, language, speech-reading, assistive listening devices, cochlear implants, and communication modes and strategies.

Course Typically Offered
Fall

Career
Undergraduate

COSD50350 - Clinical Practicum in Audiology

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisites: COSD 30343 and COSD 30363, all with a grade of C or higher, junior standing, a cumulative TCU GPA of 3.0 or higher, and a cumulative 3.0 or higher GPA in COSD courses, MATH 10043, and one physical science course, one social/behavioral science course and biological sciences, and permission of instructor. Supervised clinical experiences in basic audiological testing techniques involving assessments and evaluation of the hearing function. 1-3 semester hours.

Course Typically Offered
Fall and Spring

Career
Undergraduate

COSD50353 - Psycholinguistics

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: Senior or graduate standing. Phonetics or permission of instructor. An introduction to the history, scope, problems, and present state of the psychology of language. Includes survey of theories and methods of investigation of several disciplines concerned with the scientific studies of language.

Career
Undergraduate

COSD50363 - Seminar on Stuttering

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: Senior (with permission of instructor) or graduate standing. A study of fluency development and breakdown in children and adults. Descriptions and development of speech fluency, onset and development of stuttering, characteristics of stuttering and people who stutter and theories of stuttering are reviewed.

Course Typically Offered
Spring

Career
Undergraduate

COSD50364 - Advanced Aural Rehab

Department(s)
Comm Science & Disorders

Career
Undergraduate

COSD50373 - Medical Aspects of Speech-Language Pathology

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: Senior or graduate level standing in speech-language pathology or permission of instructor. A study of the medical and biophysical bases of communication disorders and the relevant medical management of such issues as part of the total treatment program.

Career
Undergraduate

COSD50382 - Voice and Resonance

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: Graduate standing. A study of theories, classification systems and etiologies, with emphasis on respiration, phonation, resonance and articulation factors as they relate to disorders of voice, resonance and compensatory articulation.

Course Typically Offered	Career
Fall	Undergraduate

COSD50393 - Basic Evaluative Instruments for Language Disorders

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Theory, administration and interpretation of basic evaluative instruments and indications for therapy.

Career
Undergraduate

COSD50413 - Advanced Speech Sound Disorders

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: Graduate standing. A study of theories, diagnostic materials, etiologies, and intervention models with emphasis on the phonological productions of children with highly unintelligible speech, childhood apraxia or speech, and mild-moderate articulation errors.

Course Typically Offered	Career
Fall	Undergraduate

COSD50840 - Study Abroad:South America

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisites: Permission of instructor(s) and meeting criteria established by the TCU Center for International Studies. This course is an international interprofessional education experience focused on communication, culture, and healthcare. Graduate and undergraduate students will experience the language and culture of South America while developing familiarity with the role of health professionals in medical and educational settings serving individuals across the lifespan. Students will engage in a number of classroom-based and hands-on learning activities related to health care, visit academic universities training health professionals, and experience practice sites serving the local and regional populations.

Course Typically Offered	Career
Study Abroad Course	Undergraduate

COSD50850 - China: Global Perspectives on Communication Health

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: COSD 10303. This course will enhance students' global perspectives about communication health in a culture strikingly different from the US.

Specifically, students will increase their understanding of the nature and treatment of communication disorders in China. Students will be exposed to the unique delivery of speech language pathology services in a country where there are very few established degree granting programs in a country of 1.33 billion people (Liu, 2014).

Course Typically Offered	Career
Study Abroad Course	Undergraduate

COSD50860 - COSD Study Abroad - Scotland, England, & Ireland

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
The course will look at the practice of Speech-Language Pathology in Ireland, Scotland and Great Britain. Students will visit numerous sites throughout these countries and compare/contrast the practices at these facilities to the United States. Additionally, cultural and semantic differences will be observed and discussed..

Course Typically Offered	Career

COSD50860 - COSD Study Abroad - Scotland, England, and Ireland

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: COSD 10303. The course will look at the practice of Speech-Language Pathology in Ireland, Scotland and Great Britain. Students will visit numerous sites throughout these countries and compare/contrast the practices at these facilities to the United States. Additionally, cultural and semantic differences will be observed and discussed.

Course Typically Offered	Career
Study Abroad Course	Undergraduate

COSD50870 - COSD Study Abroad - Australia

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisites: permission of instructor(s) and meeting criteria, established by the TCU Center for International Studies. The purpose of this course is to increase students' knowledge of and skills in evidence-based clinical practice (EBP) in the field of speech-language pathology. Course content includes background learning in preparation for study abroad followed by travel to Sydney, Australia and Christchurch and Wellington, New Zealand. Students will visit universities and a variety of practice sites conducting and implementing EBP with children and adults with communication disorders. Students must meet the criteria established by the TCU Center for International Studies as well as departmental requirements.

Course Typically Offered	Career
Study Abroad Course	Undergraduate

COSD50970 - Directed Studies in Communication Disorders

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisites: Senior or graduate standing; permission of instructor. Directed study focusing on specialized topic in communication sciences and disorders. (1-6 semester hours.)

Course Typically Offered	Career
Summer	Undergraduate

COSD55343 - American Sign Language I

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: Basic Sign Language or permission of the instructor. Study of American Sign Language (ASL) including advanced study of grammatical structure and signing technique. Introduction to deaf culture associated with the use of ASL. Students will learn and demonstrate receptive and expressive signing skills through advanced experiential learning exercises.

Course Typically Offered	Career
Fall	Graduate

Cross Listed Courses
COSD30383 American Sign Language I

COSD55353 - American Sign Language II

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: COSD 50343 with a grade of C or higher, or permission of the instructor. This course is a continuation of the ASL I COSD 50353 with emphasis on advanced study of deaf cultural aspects and syntactic structure of ASL. This course utilizes extensive sign productions and requires the demonstration of mastery of expressive and receptive ASL signing skills.

Career
Graduate

COSD55423 - Diagnostics

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisites: Graduate standing in Deaf & Hard of Hearing Studies and consent of instructor. Study and administration of assessments used to determine appropriate educational needs and levels of children and adults who are deaf and hard of hearing. Course material includes study and application of formal and informal assessment approaches, and translation of assessment results to recommendations for instructional strategies for those with hearing impairments.

Career
Graduate

COSD60223 - Clinical Lab in Teaching DHH Students I

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: COSD 50373 and 60213, both with a grade of C or higher, or permission of instructor. Observation and supervised clinical teaching of DHH children and adults in an individual setting.

Course Typically Offered	Career
Fall and Spring	Graduate

COSD60253 - Clinical Lab 2 in Teaching DHH Students

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: COSD 60223 with a grade of C or higher. Students must be recommended for enrollment by COSD faculty. Observation and supervised clinical teaching of DHH students.

Career
Graduate

COSD60263 - Advanced Language Development for DHH

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)

COSD60300 - Practicum in Speech-Language Pathology

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisites: Graduate standing in speech-language pathology and permission of instructor. Advanced clinical practice and evaluation of speech and language disorders. One semester hour required for each semester a student performs clinical practice up to six hours.

Career
Graduate

COSD60311 - Orofacial Pathologies

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisites: Enrollment in the Graduate COSD program and successful completion of all previous courses with a grade of C or better. This course focuses on the pathology of the structure and function of the speech mechanism as related to cleft palate and other orofacial anomalies. Students will develop knowledge and skills in the diagnosis and treatment of communication and feeding impairments resulting from craniofacial anomalies. The course covers topics including anatomy and physiology, genetic influences on craniofacial development, speech resonance disorders, and surgical and behavioral interventions. Emphasis is placed on evidence-based practice and ethical considerations in clinical management for patients across the lifespan.

Career
Graduate

COSD60321 - Augmentative and Alternative Communication

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisites: Enrollment in the Graduate COSD program and successful completion of all previous courses with a grade of C or better. This course includes a study of the use of augmentative and alternative communication (AAC) technology for individuals with complex communication needs, both for language development and language loss. Students will explore AAC systems ranging from no-tech to high-tech options, considering the cognitive, motor, sensory, and perceptual abilities required to use these systems. The course prepares students to assess, select, and implement AAC interventions for individuals across

the lifespan in various clinical settings, emphasizing interprofessional collaboration and client-centered care.

Career
Graduate

COSD60322 - Advanced Counseling in Communication Sciences and Disorders

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisites: Completion of academic and clinical coursework in 1st year of SLP Master's degree program. This course teaches a framework for engaging in counseling with special populations and their families, with a focus on the communicatively impaired. Appropriate counseling strategies and tools are explored with practical application experiences included. Multicultural implications for counseling are also considered.

Career
Graduate

COSD60343 - Advanced Language Disorders in Children

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisites: Graduate standing in speech pathology and permission of instructor. Principles in the assessment and treatment of language disorders in infants, preschoolers, school-aged and adolescents.

Career
Graduate

COSD60363 - Orofacial Pathologies/AAC

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: COSD 30303 or permission of instructor. This two-part course includes study of the pathology of structure and function of the speech mechanism as related to cleft palate followed by a study of the use of augmentative and alternative technology for individuals with severe communication disorders.

Career
Graduate

COSD60383 - Advanced Study of Language and Language Development

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Intensive study and analysis of language in normal children at various developmental levels.

Career
Graduate

COSD60390 - Seminar on Communication Disorders

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
In depth study of a communication disorder. Seminar content may vary and may include such topics as dysphagia, organic disorders in children, assessment and treatment of voice disorders, and assessment and treatment of articulation disorders. Three hour maximum per semester.

Career
Graduate

COSD60392 - Professional Issues in Communication Sciences and Disorders

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisites: Enrollment in Graduate COSD program. This course is designed to provide graduate students with information about professional ethics, to review regulations and requirements for professional practice, and to provide an overview of healthcare insurance and medical coding/billing requirements.

Career
Graduate

COSD60413 - Adult Neurolinguistic Disorders

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
This course will assist students to understand the structure and function of central and peripheral nervous systems in relation to normal and disordered language and cognition.

Career
Graduate

COSD60423 - Dysphagia

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
This course will assist students in learning the theoretical and clinical bases for the differential diagnosis of neurologically based communication disorders in adults and assessment and treatment of dysphagia in adults and children. Case studies, videotaped analyses, and/or clinic stimulation exercises will be used in class and/or a required lab to facilitate application of knowledge to clinical practice.

Career
Graduate

COSD60433 - Motor Speech Disorders

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisites: COSD 60423 with a grade of C or higher or consent of instructor. This course will assist students in learning the theoretical and clinical bases for the assessment and treatment of neurologically motor based communication disorders in adults. Case studies, videotaped analyses, and/or clinic stimulation exercises will be used in class to facilitate application of knowledge to clinical practice. Supporting

Career
Graduate

COSD60443 - Culturally Responsive Practices and Social Justice in Speech-Language Pathology

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisites: Graduate standing in speech-language pathology and consent of instructor. Study of multicultural considerations for children and adults with communication disorders. Topics will include socio-cultural influences on speech and language development, educational considerations, non-biased assessment, and cultural and linguistic considerations in treatment planning. Issues of dialect, languages other than English, and bilingualism will be discussed.

Career
Graduate

COSD60453 - Speech, Language, and Cognition in Bilinguals

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisites: Graduate standing in speech-language pathology or consent of instructor. Study of research related to cross-linguistic and multilingual speech and language development, neurolinguistics, psycholinguistcs, and sociolinguistics. Includes current practices in the assessment and treatment of communication impairments in non-English speaking and bilingual adults and children.

Career
Graduate

COSD60463 - Early Intervention

Department(s)
Comm Science & Disorders

Long Description (Catalog Description)
Prerequisite: Graduate standing in speech-language pathology and consent of instructor. This course focuses on theoretical and practical preparation for the diagnosis and treatment of primary and secondary speech and language delays and disorders in infants and toddlers. The course will address markers of language delay/disorder in pre-verbal infants and early language learners, principals of intervention for families with an emphasis on Routines Based Intervention, and cost-benefit analyses of early intervention with language-disordered populations. Students will understand federal and state legislation related to the early intervention service provision and coordination.

Career
Graduate

COSD60970 - Directed Studies in Communication Disorders

Department(s)

CRES20003 - Critical Race Theory

Department(s)
Comparative Race and Ethnic St

Long Description (Catalog Description)
Prerequisites: CRES 10103 Engaging Difference and Diversity in America (recommended) OR any one (1) approved CRES-attribute course. This course will provide an intermediate survey of Comparative Race and Ethnic Studies, focusing on Critical Race Theory. Students will explore race as a social structure, a historical process, a mode of power, and a lived experience. While the idea of race as socially constructed has become common sense in the twenty-first century, we will go further by using Critical Race Theory to examine how scholars, artists, and activists have applied these methods across and beyond the university. Themed units will focus on intersectionality, whiteness, indigeneity, racial capitalism, and mass incarceration.

Course Typically Offered	Career
Fall and Spring	Undergraduate

CRES20103 - Introduction to Black Studies

Department(s)
Comparative Race and Ethnic St

Long Description (Catalog Description)
Introduction to Black Studies surveys global Black life and culture. Grounded in formative histories uniting Black people across the world - namely the Trans-Atlantic Slave trade, colonialism, contemporary migrations and cultural developments - this course is guided by these questions - How is blackness both a dynamic concept and one that has been constituted across time through various political events, rebellions, forced and voluntary migrations, and cultural forms? How has Black studies evolved in the academy and what are its futures? Through their engagement with various texts, writing, research and presentations, students will explore such questions and more.

CRES30003 - Community Based Research Methods

Department(s)
Comparative Race and Ethnic St

Long Description (Catalog Description)
Prerequisites: One approved CRES-attribute course or instructor permission. Students will have a firsthand experience learning about community-based research methods that address how to effectively advance research with community in mind. They will examine these topics through intersecting lenses of race, gender, and class. Students can use the research that is developed in this course as the first part of a Capstone project, Honors Thesis, McNair Scholar's research, writing sample for graduate/law school or other program of interest.

Course Typically Offered	Career
Spring	Undergraduate

CRES30203 - Social Justice Organizing & Activism

Department(s)
Comparative Race and Ethnic St

Long Description (Catalog Description)
Prerequisites: WGST 20003 or CRES 10103. This interdisciplinary course examines mass movements from an intersectional perspective, emphasizing how intersecting social identities (e.g. race, gender, sexuality, class, ability, citizenship status, etc.) influence how systemic oppressions are experienced and, thus, should shape the social economic, and political interventions employed in the name of social justice. The course incorporates empirically grounded and theoretical scholarship from multiple disciplines to consider diverse methods of mass movement organizing and mobilization on the local and/or global levels to shift power and privilege dynamics. Students will examine the philosophical, relational and logistical barriers to undertaking social justice organizing and activism, develop technical skills for building consensus across difference, and design their own organizing campaigns.

Course Typically Offered	Career
Fall	Undergraduate

Cross Listed Courses
WGST30203 SJ Organizing & Activism

CRES30263 - Environmental Justice

Department(s)
Comparative Race and Ethnic St

Long Description (Catalog Description)
Prerequisites: SOCI 20213 OR CRES 20003 OR CRES 20103 OR LTNX 20003 OR ANTH 20623. Black, Indigenous, other people of color, working class, immigrant, women, and other marginalized groups bear the brunt of environmental problems in the United States and across the world, facing disproportionate impacts from things like air and water pollution, toxic chemicals, climate change, industrialization, and biodiversity loss. Why are certain groups systematically exposed to greater environmental burdens and fewer environmental amenities while other groups have access to clean air and water? What effect does this have on people's health and well-being? Who benefits from these inequalities and who makes decisions about environmental policies? This course draws on the work of interdisciplinary scholars from the social sciences, biophysical sciences, public health, and humanities, to examine how social, political, and economic systems create environmental injustices and health disparities across intersections of race, ethnicity, class, and gender. In turn, we explore how people work to remedy

environmental problems. These lessons are applied to understanding, researching, and addressing contemporary environmental justice issues.

Career
Undergraduate

CRES30303 - Feminisms of Color

Department(s)
Comparative Race and Ethnic St

Long Description (Catalog Description)
Prerequisites: Any WGST-prefix or attribute course OR any CRES-prefix or primary attribute course. An interdisciplinary course exploring the feminist theories, traditions, activisms, discourses, and praxes of women of color in a US context. Using an intersectional approach, the course examines how race, class, gender, sexuality, citizenship status, ability, religion, and other markers of identity create complex systems of marginalization in the lives of women of color in the United States. Students will analyze the contributions US women of color have made to contemporary feminist thought and how these theories have influenced their activism.

Course Typically Offered
Spring

WGST30303 Feminisms of Color

CRES30313 - Reproductive Justice

Department(s)
Comparative Race and Ethnic St

Long Description (Catalog Description)
Prerequisites: CRES 20203 or WGST 20003. This course will introduce students to the central tenets of reproductive justice through engaging key voices, organizations, and various dynamics of this movement. This course is also concerned with what this movement means in larger historical contexts and alongside other social movements.

Career
Undergraduate

CRES30403 - Transnational Gender & Sexuality

Department(s)
Comparative Race and Ethnic St

Long Description (Catalog Description)
This interdisciplinary course considers the fundamental place of gender and sexuality in shaping a range of cultural narratives and examines how various movements related to gender and sexuality have been constructed, contextualized, and regulated in different parts of the world. The course analyzes the gendered dimensions of complex phenomenon such as colonialism, globalization, and capitalism and situates liberal Western feminism's history and contemporary articulation within global systems of power. Students will develop an analytical framework for examining the intersections of social justice, transnational identities, and feminism.

Course Typically Offered

CRES30503 - Crimmigration

Department(s)
Comparative Race and Ethnic St

Long Description (Catalog Description)
Prerequisites: One approved CRES-attribute course. This course will examine issues within crimmigration studies that raise questions about immigration, race/racism, crime/criminalization, policy, citizenship, and resistance and will explore how Latinas/os/xs and immigrants encounter the criminal justice system and immigration enforcement in the United States. Students will come to understand important questions regarding crimmigration, such as its origins in the United States, how policy has historically racialized and

excluded migrants, debunking myths surrounding immigrants and crime/jobs, and ways to counterprogram and resist crimmigration.

Undergraduate

CRES30543 - Black Women's Writing

Department(s)
Comparative Race and Ethnic St

Long Description (Catalog Description)
Prerequisites: ENGL 10803, 20803, and at least one additional 10000- or 20000-level ENGL/WRIT/CRWT course. This course will survey the work of Black women writers and the development of a Black feminist discourse across time and throughout the world. Students will use the lens of Black feminism to read these works as well as consider how the works themselves are theorizing Black feminism. This course covers multiple genres of Black women's writing, including novels, life-writing, drama and performance, and poetry, from the 19th through the 21st centuries.

Career
Undergraduate

CRES30803 - TCU Justice Journey

Department(s)
Comparative Race and Ethnic St

Long Description (Catalog Description)
An experiential-learning course focused on racial justice, intersectional activism, leadership development, and social change. Topics vary each offering, but they include the African American freedom struggle (civil rights movement), the Chicano/a Movement, Latino/a politics, immigrant rights, LGBT liberation, and mixtures of these subjects. The class centers on the TCU Justice Journey, a weeklong immersion trip related to the content, and also includes part-time internships or other community-engaged pedagogy. Course may be retaken on different topics for additional credit.

Prerequisite: CRJU 20413. An examination of the major value dilemmas confronting practitioners and professionals in the criminal justice system. Particular focus is on police conduct, courtroom conduct, and correctional professionals' conduct.

Course Typically Offered	Career
Rarely	Undergraduate

CRJU40963 - Internship in Criminal Justice

Department(s)
Criminology & Criminal Justice

Long Description (Catalog Description)
Prerequisite: Permission of Criminal Justice Internship Director. Students serve for a minimum of 125 hours per semester as participant-observers in a local criminal justice agency. Students submit weekly verified report on hours worked to the Internship Director, who regularly meets with all interns in a seminar discussion of internship problems and activities. Each student will submit a final written report and evaluation.

Course Typically Offered	Career
Fall and Spring	Undergraduate

CRJU40970 - Independent Study in Criminal Justice

Department(s)
Criminology & Criminal Justice

Long Description (Catalog Description)
A specific program of study that must be approved by the Chair of the Criminal Justice Department prior to enrollment in this course. Independent studies may be taken for credit ranging from 1 to 6 semester hours depending on the project undertaken.

Course Typically Offered	Career
Fall and Spring	Undergraduate

CRJU61113 - Introduction to Online Learning and Critical Thought

Department(s)
Criminology & Criminal Justice

Long Description (Catalog Description)
This introductory course orients students with the online environment and presents critical issues in criminal justice and criminology that serve as the basis for the online program. Students will learn practical as well as theoretical matters by navigating and interacting within the online environment, conduct in-depth literature reviews, learn program expectations, and analyze current empirical research that is fundamental to the discipline.

Career
Graduate

CRJU61123 - Criminal Justice Systems

Department(s)
Criminology & Criminal Justice

Long Description (Catalog Description)
An in-depth analysis of police, courts, and corrections highlights crucial issues affecting crime and policy. A holistic view is stressed, where students are expected to identify these issues, integrate independent research, and suggest crime control policies and strategies using empirical and theoretical support.

Career
Graduate

CRJU61133 - Advanced Social Science Research Methodology

Department(s)
Criminology & Criminal Justice

Long Description (Catalog Description)
Research methodologies and design in the social sciences are examined using three approaches: qualitative, quantitative, and mixed. Each methodology will begin with philosophical and theoretical assumptions before students engage in hands-on empirical research. Writing and presentation of methodologies tailored to each student's thesis will be heavily emphasized.

Career
Graduate

CRJU61143 - Social Science Statistics and Probability

Department(s)
Criminology & Criminal Justice

Long Description (Catalog Description)
This course gives students a fundamental understanding of statistics and probability in the social sciences. Students will learn and apply theoretical statistical models to calculate simple and more complex statistical models. This understanding will be used as a basis to run different tests of significance related to inferential statistics.

Career
Graduate

CRJU61183 - Advanced Criminological Theory

Department(s)
Criminology & Criminal Justice

Long Description (Catalog Description)
This course gives students in-depth understandings of criminological theories that serve as the basis for criminological research and scholarship. A variety of theoretical paradigms will be examined, critiqued, and applied towards empirical research. Each major theory will be analyzed, from its historic roots to its contemporary application in empirical research.

Career
Graduate

CRJU61193 - Applied Research and Policy 1

Department(s)
Criminology & Criminal Justice

Long Description (Catalog Description)
This course focuses on applied criminological concepts and theories to real-world problems. Students will deconstruct complex problems related to the criminal justice system, particularly policies and strategies dealing with prisons, prisoner reentry, and crime prevention.

Career
Graduate

CRJU61253 - Policing

Department(s)
Criminology & Criminal Justice

Long Description (Catalog Description)
This course takes an in-depth and comparative analysis of policing in the United States. Key issues and strategies in contemporary policing will be contextualized historically and internationally. The police subculture, in particular, will be discussed in detail and used to analyze key reforms which lead up to contemporary strategies such as broken windows and community policing.

Career
Graduate

CRJU61263 - Courts, Law, and Legal Procedure

Department(s)
Criminology & Criminal Justice

Long Description (Catalog Description)
This course deconstructs and analyzes the American legal system. Students will learn legal procedure, reasoning, and functions of the courts, laws and legal actors. Moreover, students will examine a range of court cases that highlight critical issues. Landmark U.S. Supreme Court cases, in particular, will be used as models in order to understand advanced legal reasoning, legal theory, and the decision-making process.

Career
Graduate

CRJU61273 - Corrections and Reentry

Department(s)
Criminology & Criminal Justice

Long Description (Catalog Description)
This course takes a critical look at the correctional system in the United States and how prisoners re-enter society. A historic look a the development of corrections and punishment is framed within the context of legal and political frameworks, paying particular attention to crime control policies and their ramifications, Students will assess current prison conditions and critical reentry issues, including parole, reentry services, and societal conditions.

Career
Graduate

CRJU61283 - Research Writing

Department(s)
Criminology & Criminal Justice

Long Description (Catalog Description)
This course is designed to help familiarize students with the publication process in the social sciences. Students will learn the components of research, the writing process, and procedures with publication. The purpose o the course is to produce a publishable manuscript.

Career
Graduate

CRJU61293 - White-Collar Crime

Department(s)
Criminology & Criminal Justice

Long Description (Catalog Description)
This course examines white-collar crime using a theoretical and practical approach. Difficulties defining, identifying, and enforcing white-collar crimes will be emphasized by drawing from empirical research. The law and society theoretical framework will be used to examine societal perceptions and responses to white-collar criminals, paying particular attention towards systemic treatment of race and class in the American criminal justice and legal systems as well as society.

Career
Graduate

CRJU61303 - Critical Issues in Law Enforcement

Department(s)
Criminology & Criminal Justice

Long Description (Catalog Description)
Prerequisites: Acceptance to graduate program or certificate program. This graduate-level policing seminar explores controversial issues in policing ranging from police misconduct to community-police relations. The course will be contextualized in contemporary research. Students will explore the underlying reasons and root causes of policing issues to inform policies, training, and practices. In addition, future directions in policing and policing policy will be explored.

Career
Graduate

CRJU61313 - Law Enforcement Management and Leadership

Department(s)
Criminology & Criminal Justice

Long Description (Catalog Description)
Prerequisites: Acceptance to graduate program or certificate program. This graduate-level policing seminar explores management and leadership issues in policing. The course will be contextualized in criminal justice management and leadership research. Various leadership issues that affect police operations will be explored, ranging from organizational communication to organizational change.

Career
Graduate

CRJU61323 - Legal Issues in Law Enforcement Management

Department(s)
Criminology & Criminal Justice

Long Description (Catalog Description)
Prerequisites: Acceptance to graduate program or certificate program. This graduate-level policing seminar explores legal issues in policing. This course will be contextualized in criminological and legal research. Various legal issues that affect police operations will be explored, ranging from use of force to issues of searches and seizures. Different legal topics will be explored weekly. Legal nuances will be discussed in depth, including specific state and federal statutes, as well as in the context of larger Constitutional frameworks, such as privacy and equal protection.

Career
Graduate

CRJU61333 - Law Enforcement Policy and Practice

Department(s)
Criminology & Criminal Justice

Long Description (Catalog Description)
Prerequisites: Acceptance to graduate program or certificate program. This graduate-level policing course applies course material learned in various courses and applies them to police policies and practice. The course will be contextualized in contemporary research. Students will tailor their policies with their home department/agency and present their own policy-related issues for the class discussion. Students will incorporate the criminological research as well as published data on crime, crime prevention, and police.

Career
Graduate

CRJU61393 - Applied Research and Policy 2

Department(s)
Criminology & Criminal Justice

Long Description (Catalog Description)
This course focuses on applied criminological concepts, theories, and research to real-world problems focused on the theme of an area of the instructor's expertise. Students will dissect complex and controversial issues in a timely criminal justice topic, focusing specifically on crime prevention and policy.

Career
Graduate

CRJU70980 - Thesis

AS ASPM, Interdisciplinary

Long Description (Catalog Description)
A directed study in Digital Culture and/or Data Analytics (DCDA). A variety of special or one-time topics in DCDA may be covered in this class. The format may vary by semester. 1-3 semester hours. This course may be repeated for credit.

Career
Undergraduate

DCDA30990 - International Residentl Study

Department(s)
AS ASPM, Interdisciplinary

Long Description (Catalog Description)
This course represents credit earned through a semester study abroad experience with an institution or program with which Texas Christian University has an official agreement to accept credit. The site and specific content will be identified on the official transcript. Courses appearing on a student's official transcript have been included in the student's grade point average.

Course Typically Offered	Career
Administrative Use Only	Undergraduate

DCDA40003 - Senior Honors Seminar

Department(s)
AS ASPM, Interdisciplinary

Long Description (Catalog Description)
Prerequisites: Department permission and DCDA 30003 with a grade of B or better. A directed-study course open to Honors students enrolled in the Digital Culture and Data Analytics (DCDA) minor for writing the honors thesis based on research conducted in DCDA 30003 (Junior Honors Seminar). The completed project must be approved by two faculty members affiliated with the DCDA program.

Career
Undergraduate

DCDA40273 - Digital Culture & Data Analytics Internship

Department(s)
AS ASPM, Interdisciplinary

Long Description (Catalog Description)
Prerequisites: 60 credit hours; major GPA of 3.0 or Cum GPA of 2.8 minimum; approval of the department. Students place themselves with companies, agencies,

or non-profit organizations for workplace experience. Duties -- varied to fit the needs and opportunities associated with the participating entity -- generally include students utilizing their proficiencies in digital content creation and/or data analysis. Course may be repeated once for credit.

Career
Undergraduate

DCDA40343 - AI Concepts and Large Language Model Applications

Department(s)
AS ASPM, Interdisciplinary

Long Description (Catalog Description)
This course provides an in-depth exploration of Artificial Intelligence (AI) with a focus on large language models (LLMs) and their applications in Geography. Students will gain foundational knowledge in AI and deep learning, develop skills in prompt engineering, and apply AI tools to solve real-world problems, particularly in geographic analysis and spatial data interpretation. The course emphasizes hands-on experience, ethical considerations, and culminates in a final project where students integrate AI concepts to design their own applications with a geographic focus.

Career
Undergraduate

DCDA40833 - Digital Culture and Data Analytics Capstone Course

Department(s)
AS ASPM, Interdisciplinary

Long Description (Catalog Description)
Prerequisites: Either MATH 10043 or INSC 20153. Also, one of the following: GEOG 30323, WRIT 20833, or COSC 10603. This course is designed as a capstone experience for students in the Digital Culture & Data Analytics (DCDA) program. Hence, the course is designed to give students the opportunity to develop a semester-long project that will allow them to practice, reflect upon, and publicly showcase their work as students in the DCDA program.

DOMI60200 - General Transfer Credit

Department(s)
Brite

Long Description (Catalog Description)
General Transfer Credit

Career
Brite

DOMI80010 - Research Methods and Writing Seminar

Department(s)
Brite

Long Description (Catalog Description)
Prerequisites: The course is required of all students in the Revised DMin Program that starts Fall 24. The course equips DMin students with the skills necessary to engage in original research and to compose a doctoral level project or thesis. The course will be offered in different terms by different Brite Divinity School faculty members.

Career
Brite

DOMI80013 - Theological Reflection for Ministry and Its Tasks

Department(s)
Brite

Long Description (Catalog Description)
Prerequisites: Acceptance to the D.Min. program. This common core D.Min. course examines developments in a particular area of theological study and their impact on Christian ministry.

Career
Brite

DOMI80023 - Directed/ Independent Study

Department(s)
Brite

Long Description (Catalog Description)
Prerequisite: Admittance to the D.Min. Program. May be repeated under different topics for up to twelve credit hours.

Career
Brite

DOMI80033 - Pastoral Identity

Department(s)
Brite

Long Description (Catalog Description)
This course assists students in developing a better understanding of their past-present-future Pastoral Identity within the broader context of their life and ministry.

Career
Brite

DOMI80043 - The Pastor in Context of Ministry

Department(s)
Brite

Long Description (Catalog Description)
This course assists students in enhancing their understanding of their social location as minister and how social and economic issues affect the experiences of believers within Christian communities.

Career
Brite

DOMI80053 - Transforming Practices:Spirituality, Leadership, and Justice

Department(s)
Brite

Long Description (Catalog Description)
This is the foundational seminar for Brite's Doctor of Ministry Program. The course will introduce students to Brite's ethos and to the core concepts of the program: spirituality, leadership, and justice. Students will explore models for integrating theology and practice, and for doing research and writing in ministry and theology.

Career
Brite

DOMI80063 - Methods and Models for Research and Project Development

Department(s)
Brite

Long Description (Catalog Description)
This course is one of three courses required in the Doctor of Ministry program. In this course, students will explore various methods and models for doing research and writing about theological reflection on ministry. This course provides the opportunity to develop a plan for formulating and completing the ministry project. Since the intent of the course is to assist with the development of a research proposal for the Doctor of Ministry project, the course is most helpful to participants after they have taken at least 1/3 of their course work.

Career
Brite

DOMI80073 - The Theological Disciplines and the Practice of Ministry

Department(s)
Brite

Long Description (Catalog Description)
Prerequisites: The course is required of all students in the Revised DMin Program that starts Fall 24. The course considers the practice of ministry in light of and in dialogue with advances in any particular academic theological discipline (e.g.Bible, Church History, Ethics, etc.). The course will be offered in different terms by different Brite Divinity School faculty members.

Career
Brite

DOMI80913 - Doctoral Project

Department(s)
Brite

Long Description (Catalog Description)
Prerequisite: Admittance to the D.Min. program and completion of 24 hours of course work. Implementation, writing, and oral defense of D.Min. project.

Career
Brite

DOMI80916 - Doctoral Project/Thesis Seminar

Department(s)
Brite

Long Description (Catalog Description)
Prerequisite: Admittance to the D.Min program and completion of 27 hours of course work. The design, writing, and oral defense of the DMin project/thesis.

Career
Brite

DOMI85010 - Project/Thesis Development Seminar

Department(s)
Brite

Long Description (Catalog Description)
Prerequisites: The course is required of all students in the Revised DMin Program that starts Fall 24. The course assists DMin students in developing a doctoral level project or thesis. The course will be offered in different terms by different Brite Divinity School faculty members.

ECON30463 - Latin American Economics

Department(s)
Economics

Long Description (Catalog Description)
Prerequisites: A 'C-' or better in any 3 or more semester hours ECON course. ECON 10233 is recommended, but not required. This course covers the influence of past economic policies on the current state of the economics of Latin America. The major policies to be considered are industrial policy, international trade policy, exchange rate policy, financing current account deficits, and macroeconomic policy.

Course Typically Offered	Career
Fall	Undergraduate

ECON30473 - Regional and Urban Economics

Department(s)
Economics

Long Description (Catalog Description)
Prerequisites: A 'C-' or better in ECON 10223 or 30223 or 31223. An introduction to, and overview of, regional and urban economic theory. Examination of location factors and costs including transportation rate structures, migration, firm location, structure of regions and urban areas, and urban problems.

Course Typically Offered	Career
Rarely	Undergraduate

ECON30483 - Financial History

Department(s)
Economics

Long Description (Catalog Description)
Prerequisites: A 'C-' or better in 6 hours of Economics. Examines important topics in the development of American and Western European monetary and financial systems. Historical perspectives on innovation, stabilization, and regulation within the major themes of monetary regimes, banking systems, and capital markets.

Course Typically Offered	Career
Every other fall	Undergraduate

ECON30493 - International Economic Studies

Department(s)
Economics

Long Description (Catalog Description)
Prerequisites: At least three 3 semester hours credit in economics with a grade of 'C-' or better. Detailed analysis of current problems in international economic relationships. The list of topics selected on the basis of their significance in policy design, policy analysis, or contemporary economic well-being.

Course Typically Offered	Career
Summer	Undergraduate

ECON30503 - Health Economics

Department(s)
Economics

Long Description (Catalog Description)
Prerequisites: A C- or better in any 3 or more semester-hour ECON course. Health Economics examines the determinants of health and health related behaviors, disease prevention and health promotion, health disparities and the impacts of health policy in bettering health outcomes. The course also examines the market for health insurance and health care services, focusing on the behaviors of consumers, providers of medical care, and the impact of policy on the price and quantity of health care services.

Course Typically Offered	Career
Fall and Spring	Undergraduate

ECON30523 - Resource and Energy Economics

Department(s)
Economics

Long Description (Catalog Description)
Prerequisites: ECON 30223 or 31223 for economics majors; ECON 10223 for all others. This course examines issues regarding the use and management of natural resources from the perspective of economics. Topics include the valuation of natural resources, efficient extraction models for non-renewable resources, efficient allocation of water and land, and sustainable development of fishery. This course will also explore issues in energy economics, including the market structure of oil and natural gas, the environmental impacts of energy use, and the transition to renewable energy sources.

Course Typically Offered	Career
Spring	Undergraduate

ECON30543 - Environmental Economics and Policy

Department(s)
Economics

Long Description (Catalog Description)
Prerequisites: ECON 30223 or 31223 for economics majors; ECON 10223 for all others. This course examines modern environmental issues from an economic perspective. Topics include economic causes of environmental degradation, efficiency in environmental protection, benefit-cost analysis, non-market valuation, environmental policy and special topic on global climate change. Emphasis is on the role of economics in the formation of environmental policy.

Course Typically Offered	Career
Rarely	Undergraduate

ECON30723 - European Economic History I

Department(s)
Economics

Long Description (Catalog Description)
Prerequisites: A 'C-' or better in any 3 or more semester hours ECON course, or instructor permission. This course examines the transformation of Western Europe from a pre-modern and medieval world, to a society on the verge of industrialization. Students investigate the technological, social and especially economic, changes that took place during this period and their effects.

Course Typically Offered	Career
Summer	Undergraduate

ECON30733 - European Economic History II

Department(s)
Economics

Long Description (Catalog Description)
Prerequisites: A 'C-' or better in any 3 or more semester hours ECON course, or instructor permission. This course examines the transformation of Western Europe from a pre-industrial society to the world's first highly industrialized economy from an economic perspective. The later relative (not absolute) decline of Western Europe is also examined. The focus is on the years from roughly 1700 to 1950. Students investigate the technological, social, and especially economic changes that took place during this period, as well as their importance.

Course Typically Offered	Career
Spring	Undergraduate

ECON30763 - Economic Geography

Department(s)
Economics

Long Description (Catalog Description)
Prerequisite: A C- or better in ECON 10223 or ECON 10233. Economic Geography is the study of how elements within the economy are spatially arranged, as well as the ways that space, place and spatial scales shape economic activities in different parts of the world. Through a series of readings, discussions, and research assignments, this course examines the distribution economic activities on the earth's surface; market resource and transportation factors in location theory, and the role of state, market and civil society's agents in management of the economy. Students are further introduced to Geographic Information Systems (GIS) through content-focused lab assignments, though no previous experience with GIS is required for this course.

Course Typically Offered	Career
Rarely	Undergraduate

ECON30773 - Public Choice

Department(s)
Economics

Long Description (Catalog Description)
Prerequisites: 3 hours of any economics course. Public choice theory is the application of economic theory to non-market decision-making, specifically in the political sphere. It assumes the same principles that economists use to analyze actions in the marketplace - people are primarily driven by self-interest - and applies them to analyze choices made collectively (such as the outcomes of elections or how to govern common pool resources).

ECON40123 - Game Theory

Department(s)
Economics

Long Description (Catalog Description)
Prerequisites: ECON 10223 or ECON 10233, INSC 20153 or MATH 10043.
Game theory, also known as multi-person decision theory, analyzes situations in which payoffs to players depend on the behavior of other players as well as the player herself. The purpose of this course is to introduce the basics of game theory to undergraduate students in various disciplines. It focuses on fundamentals of game theory including basic concepts and techniques, various ways of describing and solving games, and various applications in economics, political sciences, and business. It will help students sharpen their understanding of strategic behavior in different situations involving many individuals. The students will learn how to recognize and model strategic situations, to predict when and how their action will have an influence on others, and to exploit strategic situations for the benefit of their own.

Emphasis is on the transition from a pre-industrial economy to an industrial economy with modern financial and governmental institutions.

Course Typically Offered	Career
Spring	Undergraduate

ECON40433 - Law and Economics

Department(s)
Economics

Long Description (Catalog Description)
Prerequisites: ECON 30243. Law and Economics asks students to consider economics as a justification for legal decision making. Different perspectives regarding the nature of law are juxtaposed against different perspectives regarding the nature of economics. Students develop their own synthesis by examining landmark legal cases from various perspectives.

Course Typically Offered	Career
Spring	Undergraduate

ECON40443 - Economics of Race, Ethnicity, and Gender

Department(s)
Economics

Long Description (Catalog Description)
Prerequisites: A 'C-' or better in ECON 30243. This course examines the nature and causes of differences in economic welfare correlated with race, ethnicity, and gender. Basic background concepts such as implicit bias and the social construction of race, ethnicity, and gender are introduced along with rival economic theories purporting to explain the observed patterns. These theories will vary from those attributing differences to personal characteristics and choices to those arguing that systemic factors, privilege, and oppression play the decisive role.

Department(s)
Economics

Long Description (Catalog Description)
Prerequisites: 18 hours in economics, an overall GPA of 3.25, a GPA in Economics of 3.5, and senior standing. The course will consist of supervised reading, research, and preparation of a substantial paper. The course content cannot duplicate an already existing TCU economics course. Students must receive preliminary approval from the department chair before developing a course plan with a faculty member.

Course Typically Offered	Career
Rarely	Undergraduate

ECON40990 - Economics Internship

Department(s)
Economics

Long Description (Catalog Description)
Prerequisites: Must be an Economics major with a TCU cumulative GPA of at least 3.0. Must have completed a minimum of 12 hours in Economics, including either ECON 30223 or ECON 30233 with a grade of C- or better. The purpose of this course is to supplement the internship experience of economics majors through written reflection, periodic conversation with a supervising professor, and exploration of connections between academic economics and economics as understood and practiced in the workplace. Must work 90 hours for each semester hour of credit. May be taken a maximum of two times to earn up 6 total credit hours. A maximum of 3 credit hours can be applied towards the Economics major. P/NC only.

EDEC20013 - Science for Elementary Teachers

Department(s)
DTLS

Long Description (Catalog Description)
This course is designed to build the content knowledge and skills needed by Pre-Kindergarten through sixth grade teachers. The science content emphasized in this course aligns with the Next Generation Science Standards (NGSS) as well as the content mandated by the State of Texas. The course will model inquiry teaching, engage students in constructivist science inquiry, and provide students with the materials needed to successfully teach science. It will build student understanding of science concepts through active learning experiences. This course is required for acceptance into the EC-6 program in the college of Education.

EDEC30013 - Creative Thinking and Problem Solving: Science

Department(s)
DTLS

Long Description (Catalog Description)
Prerequisites: Admission to the Teacher Education Program. Concurrent enrollment in Junior 1 courses. This course builds on EDEC 20013, Science for Elementary Teachers. It will use the Texas Essential Knowledge and Skills (TEKS) as a framework to help students examine content methodology, skills, and materials used to teach science to children in elementary classrooms. Students will engage in hands-on investigations, class discussions, readings and field placements with emphasis on developmentally appropriate practices in science instruction. Procedures for planning, implementing, and reflecting on science instruction are learned in a school setting. Topics from life, earth/space and physical science will be covered.

Course Typically Offered	Career
Fall	Undergraduate

EDEC30020 - Scientific and Mathematical Thinking through Play and Creativity

Department(s)
Education

Long Description (Catalog Description)
Prerequisite: Admission to the Teacher Education Program or written permission of the Dean, School of Education. The Scientific & Mathematical Thinking through Play and Creativity block meets at an elementary school where you will observe and teach in classrooms at different grade levels, as well as participate in class lectures and activities. This block is designed to prepare you for the challenges of teaching in a child-centered environment that supports creative development and scientific and mathematical learning through play.

Career
Undergraduate

EDEC30023 - Creative Thinking and Problem Solving: Mathematics I

Department(s)
DTLS

Long Description (Catalog Description)
Prerequisites: Admission to the Teacher Education Program. This is a required course in the ECE Junior 1 Block. Using the guidelines set forth by the National Council of Texas of Mathematics and the State of Texas for mathematics instruction, the students will develop pedagogical content knowledge related to the development of conceptual understanding of geometry and measurement.

Course Typically Offered	Career
Fall	Undergraduate

EDEC30033 - Creative Thinking and Problem Solving: Play and Creativity

Department(s)
DTLS

Long Description (Catalog Description)
Prerequisites: Admission to the Teacher Education Program. This is a required course in the ECE Junior 1 Block. With its theoretical and research-based framework, this course is designed to prepare students to support development, health, and learning through play. Students learn developmentally appropriate strategies for promoting creative thinking, inquiry, and self-expression in core content areas and the fine arts.

Course Typically Offered	Career
Fall	Undergraduate

EDEC30073 - Critical Literacy and Children's Literature

Department(s)
DTLS

Long Description (Catalog Description)
This course offers an introduction to the analytical study of children's literature with a focus on children's books that focus on complex societal topics. We will explore books that address topics such as poverty, immigration, race, sexuality, war, and the Holocaust. We will study novels, picture books, and film. This course will enhance student understanding of people and cultures throughout the world.

Course Typically Offered	Career
Fall and Spring	Undergraduate

EDEC30103 - Introduction to Early Childhood Education

Department(s)
DTLS

Long Description (Catalog Description)
Directed toward affecting prospective early childhood teachers' insights with regard to current issues and trends in early childhood education; curricula and assessment appropriate for a range of early childhood settings; and developmentally appropriate practice for young children ages birth to age 8. Classroom practicum is required.

Course Typically Offered	Career
Fall	Undergraduate

EDGU70233 - International Practices of Counseling

Department(s)
Counseling, Societal Chng, Inq

Long Description (Catalog Description)
Prerequisites: Graduate status and permission from instructor. This course involves a cultural immersion experience designed to provide students with an understanding of the role culture plays in the practice of counseling, with a focus on counseling in another country. Students will participate in a faculty-led trip abroad, short term (not semester). Emphasis will be placed on personal reflection regarding multiculturalism in counseling and examination of how mental health service delivery in that country relates to clinical practices in the United States, as well as in relation to the larger global community.

Career
Graduate

EDGU70303 - Internship

Department(s)
Counseling, Societal Chng, Inq

Long Description (Catalog Description)
Prerequisites: EDGU 70103. Internship is designed to meet the CACREP accreditation standards and is based on seminar-style class discussion, the presentation and discussion of cases, clinical group supervision principles, and didactic instruction. The course requires students to complete a supervised counseling internship of 300 clock hours, with a minimum of 120 hours per semester of direct counseling service with clients, which is to be fulfilled in an academic semester. Students should consider selecting internship sites that offer opportunities to engage in both individual counseling and group work. The internship provides an opportunity for the student to perform, under clinical supervision, a variety of professional counseling activities that a regularly employed staff member in the setting would be expected to perform. (3 credit hours - may be repeated for total of 6 credit hours)

Career
Graduate

EDGU70323 - Advanced Group Leadership

Department(s)
Counseling, Societal Chng, Inq

Long Description (Catalog Description)
Application of advanced methods in group leadership integrating current theoretical knowledge with parallel experiences in intervention and techniques. Use of creative processes to facilitate group exploration in small group dynamics class for counselor trainees.

Department(s)
Education

Long Description (Catalog Description)
Prerequisites: Admission to the graduate school. Effective educational administrators must have an in-dept understanding of the diverse institutional types represented in American higher education. This course is designed to provide an overview of Minority-Serving institutions, particularly including Tribal Colleges and Universities, Hispanic Serving Institutions, Historically Black Colleges and Universities, and Asian American and Pacific Islander Serving Institutions. Leadership practices within each institutional type are addressed.

Career
Graduate

EDHE69223 - Advocacy and Activism in Higher Education

Department(s)
Education

Long Description (Catalog Description)
Prerequisites: Admission into the TCU College of Education higher education graduate program. In this course, students will be provided an overview of various social and political movements that have impacted higher education throughout the 20th and early 21st centuries. Through academic articles, essays, books, news media, television, and film, students will study various movements (e.g., Civil Rights Movement, Chicano Movement, Ethnic Studies Movement) and be challenged to think critically about how advocacy and activism intersect with higher education policies, practices, and structures. Intersectionality, solidarity, resistance, power (e.g., social, political, economic), and minoritization will be examined throughout the course. Going beyond simply naming and critiquing issues, students will engage in an act of advocacy and/or activism on campus or in the community. Through individual and collaborative assignments, self-reflection, various activities, and respectful dialogue and inquiry, students will gain practice identifying systemic issues in higher education, working with stakeholders, anticipating resistance, formulating messaging, and advocating for specific solutions.

Prerequisites: Admission to Graduate School; Higher education has become a global industry. Effective leadership will require an understanding of the impact of educational policies and practices worldwide. This course will have a study abroad option as part of the course of study. While the course will focus on higher education worldwide, it will focus on the country or region that will be visited. This course has a required study abroad component.

Career
Graduate

EDHE70253 - Assessment and Accreditation in Post-Secondary Education

Department(s)
Educ Leadership and Higher Ed

Long Description (Catalog Description)
This course focuses on issues related to assessment of learning and program evaluation in colleges and universities. With increasingly difficult, diverse, and complex decision-making circumstances, it is essential that those in higher education examine assessment methodologies and how these approaches may be best used to improve and enhance learning for students in post-secondary education. Colleges and universities must use solid and meaningful evidence for planning curriculum, evaluating and assessing program results, and improving practices based on evaluation data.

Career
Graduate

EDHE70263 - Finance in Higher Education

Department(s)
Educ Leadership and Higher Ed

Long Description (Catalog Description)
Prerequisites: Admission to the Higher Ed doctoral program or permission of the instructor. This is a graduate level course designed to show the complexity of finance in higher education. The course will focus on the economics and finance of higher education. The perspective of the course will be from the point of view of senior administrators who would typically have responsibility for finance or some financial functions in an institution but would not be a senior financial officer, i.e. dean, provost, etc. The plan of this course is to develop new understandings of the nature of higher education finance by exploring financial challenges, what can be done to negotiate them, and how financial decisions impact educational quality, equity, accountability, and sustainability. The course will explore topics of financial policy, government support of higher education, financial aid, and economics of higher education, human capital theory, and privatization in higher education.

Career

It is strongly advisable that students have a keen interest in leadership and in particular, an interest in pursuing the principal ship or other significant role as an educational leader. This course will serve to develop insight into what constitutes an effective leader and the distinctions between management and leadership. Participants will explore the major aspects of leadership and school organizations. Opportunities to read about and interact with exceptional leaders will increase understanding of those personal qualities and the professional skill set required to mobilize people and move organizations through times of stability and change.

EDHE60013 Leadership:Theory & Practice

EDLE60023 - Seminar: Trends in Teaching, Learning, and Leadership

Department(s)
Educ Leadership and Higher Ed

Long Description (Catalog Description)
Prerequisites: Admission to a TCU College of Education Graduate Program. If not admitted to a graduate program in the College of Education, students must obtain permission of the Associate Dean for Graduate Studies in the College of Education and of the instructor prior to enrolling. A series of classes that explore a contemporary issue and/or trend in teaching, learning, and educational leadership and the scholars who have contributed to our current understanding of the selected topic. Each class in the seminar series will explore particular issues related to the topic, (e.g. historical underpinnings, researchers and writers, and contemporary expressions and issues.) Specific offerings will target critical current themes such as: information literacy in the role of contemporary education, the cognitive neuroscience of learning, and the like and will be listed as, for example, EDLE 70023: The evolving role of technologies in the PK12 classroom-- what it means for students, teachers, and leaders. Course may be repeated for credit once with a different topic/emphasis.

EDLE60033 - Community Engagement and Culturally Responsive Practice

Department(s)
Educ Leadership and Higher Ed

Long Description (Catalog Description)
Prerequisites: Admission to a TCU College of Education Graduate Program. If not admitted to a graduate program in the College of Education, student must obtain permission of the Associate Dean for Graduate Studies in the College of Education and of the instructor prior to enrolling. This course is recommended for all students who desire to be an education or community leader. It will enable leaders to interface with a variety of community members and organizations. Moreover, this course will address working with classrooms, schools, and the broader community in ways that align with culturally responsive practice. Schools exist as part of the very heartbeat of a community, interfacing with not only the students and families whom they serve, but virtually all other critical agencies and entities on a daily basis: businesses & business organizations, neighborhood associations, community organizations, charitable foundations, child service providers, city/governmental and public service/safety organization, and faith-based organizations. The increasing and evolving complexities imposed by economic need and social challenges/demands make the cohesive planning and collaboration of school and community leaders one of the 21st Century imperatives.

EDLE60043 - Instructional Leadership: Curriculum, Instruction, & Assessment

Department(s)
Educ Leadership and Higher Ed

Long Description (Catalog Description)
Prerequisite: Admission to a graduate program within the College of Education or admission to a graduate program outside of the College of Education and permission of the instructor. This course focuses on theories of learning derived from philosophy, psychology, cognitive neuroscience, and educational research to inform the relationship of school curricula, pedagogy/instruction, and assessment practices. Students explore facets of instructional leadership as they intersect with curriculum, instruction, and

assessment, and how students will be expected to enact instructional leadership in concert with models for teacher and principal assessment and evaluation.

Graduate

EDLE60053 - Instructional Leadership: Supervision, Coaching, & Evaluation

Department(s)
Educ Leadership and Higher Ed

Long Description (Catalog Description)
Prerequisite: Admission to a graduate program within the College of Education or admission to a graduate program outside of the College of Education and permission of the instructor. This course engages students in the study and practice of instructional leadership as embodied in approaches to supervision, coaching, and evaluation (both formal and informal), and how these concepts connect to the complex relationships among teacher growth and development, professional development, and school and instructional improvement.

EDLE60063 - Law and Ethics in Educational Leadership

Department(s)
Educ Leadership and Higher Ed

Long Description (Catalog Description)
Prerequisites: Admission to a TCU College of Education Graduate Program. If not admitted to a grade program in the College of Education, students must obtain permission of the Associate Dean for Graduate Studies in the College of Education and of the instructor prior to enrolling. Prior to enrolling in this or Tier II courses, students must have completed 15 hours of Tier I courses. This course will explore various aspects of legal and ethical demands and impacts on educational systems, primarily from a school-level leadership perspective. We will focus on establishing a foundational understanding of legal and ethical standards and decision-making processes in the context of issues involving the application of these understandings, primarily in school-level leadership actions.

EDLE70083 - Issues and Trends in the Superintendency

Department(s)
Educ Leadership and Higher Ed

Long Description (Catalog Description)
Prerequisites: Admission to the superintendent certification program (separate from or in conjunction with a degree program in Educational Leadership), admission to a doctoral program (PhD or EdD) in educational leadership, or written permission of the instructor and of the Chair of the Department of Educational Leadership and Higher Education, College of Education. Due to the nature and focus of the course, it is strongly recommended students be currently serving in a responsible leadership role and/or have significant leadership experience. Permission of the instructor is required if status is otherwise, even for graduate students who have been admitted to the doctoral program in Educational Leadership. School systems are among the most complex of all organizations demanding highly skilled and exceptionally well-prepared dynamic leadership in a rapidly changing world. This course is required for all students who desire to pursue Texas Superintendent Certification and is recommended for all students who plan to work in key leadership roles in PK-12 central administration. The course will examine the role of the superintendent and senior level leadership in light of all aspects of schools and school systems including: organizational theory, climate and culture, change management, board governance, leadership & ethical considerations, instructional programs & practices, law and policy, finance and facilities, human capital development, communication & media relations and community involvement.

EDLE70090 - Superintendent Practice in Educational Leadership

Department(s)
Educ Leadership and Higher Ed

Long Description (Catalog Description)
Prerequisites: Be admitted to the College of Education Graduate Program in Educational Leadership; hold a valid Principal certificate (or the equivalent issued by another state), and have permission of instructor; have successfully completed EDLE 70083 or be concurrently enrolled in EDLE 70083 at the time of initial enrollment in EDLE 70093. The superintendent practicum is an intensive opportunity for the graduate student seeking certification as a superintendent to apply skills and knowledge learned in the classroom and in other professional experiences to real world, field-based tasks under the guidance of a practicing on-site administrator and a TCU supervisor. Students electing 3 credit hours must complete 80 clock hours of sheltered practice in the sheltered practice of district-level school leadership under the guidance of a certified on-site administrator performing collaboratively agreed upon tasks outlined in the practicum proposal and tied to the ten competencies outlined for superintendents by the state of Texas. Students electing 6 credit hours must complete 160 clock hours. Students may enroll in two concurrent semesters (3 credit hours per semester) or may opt for a summer-long intensive program (6 credit hours for the summer session). Any student seeking superintendent certification must complete the full practicum (160 clock hours), whether the student elects to do so in two consecutive semesters (3 credit hours per semester) or one summer-long, 6-credit hour experience.

EDSC60333 - Theory and Pedagogy of Science Instruction

Department(s)
DTLS

Long Description (Catalog Description)
This course considers the application of theories of teaching to the learning of science in school classrooms. As such, it utilizes a confluence of theory and evidence about how people learn science and how environments are best constructed to promote

learning. This course examines current theories of science teaching in light of their assumptions and related empirical evidence.

EDSC70033 - Scientific Inquiry and the Nature of Science

Department(s)
DTLS

Long Description (Catalog Description)
The Nature of Science is a hybrid arena consisting of aspects of the philosophy, history and sociology of science along with elements of the psychology of scientific observations all targeting the complete understanding of how science actually functions. This course is designed for individuals who are interested in learning more about the methods and goals of science, the role of scientists and the place of science in society science and how philosophical issues can and should be reflected in science teaching and learning. We will read and discuss selections from the works of major philosophers of science and commentaries on science education from a philosophical perspective. Throughout this course we will explore the content of the nature of science and use that knowledge as a guide in improving science instruction and developing philosophically appropriate science curricula.

EDSC70053 - History and Philosophy of Science

Department(s)
DTLS

Long Description (Catalog Description)
Prerequisite: Admission into a graduate program at TCU. Those interested in the philosophy of science may consider enrolling in this class. Philosophy of science examines questions and issues arising from the methods and results of science; questions and issues that are not themselves answerable by scientific methods. This course focuses on the nature of explanation in the sciences and the reason that scientific claims enjoy a special epistemic status. As a seminar course, the main class format will be discussion and debates over the nature of explanation, problems with accounts of explanation, competing criteria for good explanation, and difference between scientific explanation and other types of explanation.

EDSP60333 - Academic Achievement and Evaluation

Department(s)
DTLS

Long Description (Catalog Description)
Prerequisites: Successful completion of EDSP 30603 Study of the Exceptional Student or equivalent and acceptance into the TCU graduate school of education. This course focuses on individual achievement as measured through classroom-based evaluations and individualized achievement tests. The course includes instruction and clinical experience in the administration and interpretation of individual standardized achievement tests. Students will gain knowledge in selecting, administering, and interpreting standardized tests for individuals referred for special education services. Students will make relevant connections between standardization, validity, reliability, and the individual student. Students will also learn how to locate curriculum-based measures, administer these measures, and interpret results in order to plan instructional interventions for students who are referred to special education.

EDUC30333 - The University: From Scotland to Fort Worth

Department(s)
Counseling, Societal Chng, Inq

Long Description (Catalog Description)
The Scottish Enlightenment was an extraordinary outburst of intellectual activity that took place in Scotland in the eighteenth century. Daiches (1996) notes that liveliness of mind was an essential condition for the progress envisioned by the enlightened Scots concerned to put their new knowledge to work for the benefit of Man. At the heart of this great period in Scottish history were the great universities which not only nurtured this unprecedented outbreak of scholarship, but also formed many of the Scots teachers in American colonies. While the founders of TCU were not Scottish (their ancestors were Irish, though, so still Gaelic), in many ways they embody the same enlightenment spirit. This course will investigate the university in the Scottish Enlightenment and in TCU on the American frontier.

Education

Long Description (Catalog Description)
Prerequisites: Students must be Education pre-majors, majors or minors who are working towards a degree in Youth Advocacy and Educational Studies or graduate students in the College of Education. Students working towards related degrees (e.g., social work, child development, All-levels certification in Music Education, Middle and Secondary education, etc.) may enroll in the course with instructor permission. The focus of this course is on positive youth development (PYD) theory and advocacy strategies. Positive youth development is a theoretical perspective and tool of practice that focuses on the strengths and assets of youth in order to support them and advocate for them

on their paths to well-being and contribution in their communities. Students in the course will also be introduced to critical positive youth development theory and youth participatory action research (YPAR), both of which aim to lift up youth power and voice as tools to create their own thriving and support the health of their communities. Students will engage in field work as a component of this seminar course. This course is designed for Youth Advocacy and Educational Studies majors and College of Education graduate students, especially, but will be of interest to anyone who wants to support youth on their path to thriving.

EDUC60833 - Curriculum History in the United States

Department(s)
Counseling, Societal Chng, Inq

Long Description (Catalog Description)
This is graduate level course, which explores how curriculum is defined, debated, and applied to classrooms in the United States and the world. Furthermore, students will examine the various philosophical, cultural, sociological, political, and economic variables that affect issues of curriculum and the lived experience of schools. The research component of this course is intended for each student to explore an issue related to curriculum that is of interest to their further study and professional practice. It is important to note that this course is intended to be a threaded exposure to curriculum history, curriculum theory, and application to contemporary schools and will therefore require diligent attention to the texts and classroom

conversation. It is hoped that you, as a learner, will engage with the concepts and questions raised by this course in thoughtful and critical ways that may or may not be resolved by the end of the semester. EDUC 60843: Contemporary Curriculum Theorizing is a companion course to EDUC 60833

Career
Graduate

EDUC60843 - Contemporary Curriculum Theory

Department(s)
Counseling, Societal Chng, Inq

Long Description (Catalog Description)
Contemporary Curriculum Theory explores the curriculum studies field through key readings that shape(d) and chronicle the development of the field as in interdisciplinary intellectual diaspora. The course start with the Reconceptualization in the 1970s that transformed understandings of curriculum, considers Turns to the cultural and intellectual influences on the field (e.g. hermeneutic, postmodern, interpretive, narrative, critical turns), and attends to emerging approaches to curriculum. Because Curriculum Studies is an interdisciplinary field, the course is open to masters and doctoral students across the academy. EDUC 60833: Curriculum History in the United States is a companion course to EDUC 60843.

Career

EMER81202 - LIC Clinical Emergency Medicine

Department(s)
Medical School Acad Dept

Long Description (Catalog Description)
Students on the Emergency Medicine Longitudinal Integrated Clerkship will learn to care for undifferentiated and critically ill patients in local emergency departments. They will perform history and physicals, procedures, and generate differential diagnoses and plans under the supervision of an emergency medicine physician. During this clerkship, students will learn essential concepts in patient triage, acute resuscitation, outpatient vs. inpatient management, health care disparity and non-compliance. Additionally, the student will begin to develop a framework to make decisions based on limited information, which can lead to life-saving interventions in acutely ill patients. Students also will learn about common procedures encountered in the emergency department to include airway interventions, intravenous access, wound management, and effective interpersonal and inter-professional communication skills.

ENGL30323 - Comparative Linguistics

Department(s)
English

Long Description (Catalog Description)
Prerequisites: ENGL 10803 or 10833, ENGL 20803 and at least one 10000- or 20000-level ENGL course. Language is an integral part of life, and disputes over language are often very divisive. These disputes typically involve comparison of one form of language with another and are usually accompanied by value judgments. In this course we examine the nature of the differences among language varieties. In the process, we will explore the ways in which language is shaped by how people use and view it and the ways in which it affects those who use it.

ENGL40743 - The Long Novel

Department(s)
English

Long Description (Catalog Description)
Prerequisites: ENGL 10803, ENGL 20803, and at least one 10000- or 20000-level ENGL/WRIT/CRWT course. An intensive study of the pleasures and difficulties of long novels, which represent a unique genre of literature. Each semester focuses on three or four novels generally regarded as works of tremendous influence, but which may be too involved for study in survey courses. The novels will be selected from different periods, cultures, and languages.

ENGL40831 - Senior Seminar

Department(s)
English

Long Description (Catalog Description)
Prerequisites: English majors or Writing majors only; students must have senior standing and must have completed 21 hours in English courses beyond 10803/10833 and 20803/20833. This seminar is intended as a capstone course for all English majors. Students will discuss and examine the practical and professional aspects of the English major while attempting to synthesize and integrate their various learning experiences in literature and writing. Students will also attend special workshops and seminars intended to inform them about various areas of professional activity (and as well meet professionals active in these areas.) Students will prepare and submit a final writing portfolio, representing their work as an English major.

ENGL50253 - Classical Rhetoric

Department(s)
English

Long Description (Catalog Description)
Prerequisite: Junior or senior standing, permission of instructor. This course examines the emergence of rhetoric in Antiquity and traces the impact of classical rhetoric up to the Middle Ages. A substantial amount of the course is devoted to learning about the relationship between oral and written discourse, the impact of literacy, and the adaptability of systems of communication to technology and society. The implications of such phenomena are examined in different periods in an effort to develop an historical perspective about the relationship between cognition and expression within cultural conditions. Student cannot receive credit for WRIT 55273 and ENGL 50253.

Seminar in British literature of the eighteenth century. Student cannot receive credit for ENGL 55243 and ENGL 80433.

Career
Graduate

Cross Listed Courses
ENGL55243 Sem Lit of the 18th Century

ENGL80443 - Seminar in British Literature of the Romantic Period

Department(s)
English

Long Description (Catalog Description)
Seminar in British literature of the romantic period. Variable emphasis each semester.

Career
Graduate

ENGL80453 - Seminar in British Literature of the Victorian Period

Department(s)
English

Long Description (Catalog Description)
Variable emphasis each semester. (Past offerings have included The Brownings' Circle.) Student cannot receive credit for ENGL 55223 and ENGL 80453.

Career
Graduate

Cross Listed Courses
ENGL55233 Brit Lit Victorian Per

ENGL80463 - Seminar in Modern British Literature

Department(s)
English

Long Description (Catalog Description)
Seminar in modern British literature.

Career
Graduate

ENGL80463 - Postcolonial Literature

Department(s)
English

Long Description (Catalog Description)
Seminar in the cultural politics of countries formerly colonized by Great Britain. Topics vary: recent offerings have focused on India, Ireland, South Africa, Kenya, and Zimbabwe. Student cannot receive credit for ENGL 55203 and 80463.

Career
Graduate

Cross Listed Courses
ENGL55203 Postcolonial Literature

ENGL80473 - Renaissance Bodies

Department(s)
English

Long Description (Catalog Description)
Advanced graduate seminar in dramatic literature of the English Renaissance with a focus on the religious, political, aesthetic, and medical history of the body.

Career
Graduate

ENGL80503 - Seminar in American Literature before 1900

Department(s)
English

Long Description (Catalog Description)
Topics vary; recent offerings have included "Emerson and His Circle" and "The American Renaissance."

Career
Graduate

ENGL80513 - Seminar in American Literature since 1900

Department(s)
English

Long Description (Catalog Description)
Seminar in American literature since 1900. Student cannot receive credit for ENGL 55213 and 80513.

Career
Graduate

Cross Listed Courses
ENGL55213 Sem: Amer Lit After 1900

ENGL80523 - Race and Gender in American Literature

Department(s)
English

Long Description (Catalog Description)
Examination of race and gender in American literature in relation to recent developments in fields such as women's studies, gender studies, critical race studies, Native American studies, and/or African American studies. Themes will vary by semester. Student cannot receive credit for ENGL 55763 and 80523.

Career
Graduate

Cross Listed Courses
ENGL55763 Race & Gender in Amer Lit

ENGL80533 - Literature of Latinx Diaspora

Department(s)
English

Long Description (Catalog Description)
Examination of significant works of literature in multiple genres by U.S. Latinx authors. Particular emphasis will be put on a comparative approach, exploring the literature of Puerto Rican, Cuban, Chicana/o, Mexican, Dominican, and/or Nicaraguan Americans. Texts vary by semester. Student cannot receive credit for ENGL 55533 and ENGL 80533.

Career
Graduate

Cross Listed Courses
ENGL55533 Lit of Latinx Diaspora

ENGL80583 - Seminar in Contemporary African-American Literature

Department(s)
English

Long Description (Catalog Description)
This seminar provides graduate students with the opportunity to research and present theoretical approaches to representative contemporary fiction by African-Americans. Continuities will be established between theories shaped by the Black Arts Movement of the sixties and those shaped by post-modernist thinking. Representative writers may include Alice Walker, Toni Cade Bambara, Charles Johnson, Toni Morrison and Ernest Gaines. Student cannot receive credit for ENGL 55583 and ENGL 80583.

Career
Graduate

Cross Listed Courses
ENGL55583 Contemp African-Amer Lit

ENGL80603 - Seminar in Kenneth Burke

Department(s)
English

Long Description (Catalog Description)
A study of the rhetorical theory and critical methods of Kenneth Burke. This course will include a careful consideration of Burke's major theoretical and literary work with particular emphasis on the ways in which his rhetorical/literary theory grew out of his own literary

practice and his engagement in modernist conversations about the function of art (and language, more generally) in culture.

Career
Graduate

ENGL80613 - Women's Rhetorics

Department(s)
English

Long Description (Catalog Description)
This course examines the histories, theories, and practices of women's rhetorics from the classical era through the present. Students will examine primary texts of women rhetors - essays, ordinary writing such as letters and autobiographies, and speeches, to name only a few - as well as secondary sources of those texts, paying particular attention to the ways gender, race, class, religion, place, sexual orientation, and politics shape sense of audiences, methods of invention, arrangement, choices of style, form, tone, and genre. Student cannot receive credit for WRIT 55613 and ENGL 80613.

Career
Graduate

Cross Listed Courses
WRIT55613 Women's Rhetorics

ENGL80623 - Intersections of Literacies, Pedagogies, and Black Feminisms

Department(s)
English

Long Description (Catalog Description)
Prerequisites: Admission to the graduate program in English. Offering a theoretical foundation in Black feminist thought alongside current literacy and educational texts related to race, gender, and sexuality, the course centers the unique contributions of Black Feminist thought and its transformative potential for classrooms, schools, and communities. Student cannot receive credit for WRIT 55173 and ENGL 80623.

Career
Graduate

Cross Listed Courses
WRIT55173 Black Feminist Pedagogies

ENGL80703 - Seminar in Rhetoric

Department(s)
English

Long Description (Catalog Description)
A study of selected major figures and issues in the history of rhetoric. Student cannot receive credit for WRIT 55243 and ENGL 80703.

Career
Graduate

Cross Listed Courses
WRIT55243 Seminar in Rhetoric

ENGL80713 - Seminar in Literacy

Department(s)
English

Long Description (Catalog Description)
Exploration of major issues in literacy history, theory, and research. Topics may vary. Student cannot receive credit for WRIT 55783 and ENGL 80713.

Career
Graduate

Cross Listed Courses
WRIT55783 Seminar in Literacy

ENGL80723 - Seminar in Composition

Department(s)
English

Long Description (Catalog Description)
A study of issues in composition research, practice, or theory. Topics may vary. Student cannot receive credit for WRIT 55793 and ENGL 80723.

Career
Graduate

Cross Listed Courses
ENGL55793 Seminar in Composition

ENGL80733 - Poststructural Rhetoric

Department(s)
English

Long Description (Catalog Description)
Prerequisites: ENGL 60123 or 60713 or 70703. An advanced, intensive study of those rhetorical and theoretical positions that often inform contemporary scholarship in composition studies, rhetoric, literature, and cultural studies. Reading will focus on those anglophone and European theorists most often of use to and in discussion with the whole of modern rhetoric and literary theory.

Career
Graduate

ENGL80743 - Genre Theory

Department(s)
English

Long Description (Catalog Description)
A study of genre theory, with emphasis on the history, methods, and major theories of genre studies in rhetorical theory and literary studies.

Career
Graduate

ENGL80753 - Anti-Racist Pedagogies in Writing Studies and Rhetorical Education

Department(s)
English

Long Description (Catalog Description)
Prerequisites: Admission to the graduate program in English. Drawing from scholarship that centers Black studies, critical composition/literacy studies, decolonization, queer of color critique, and feminisms of color, students will examine theories and examples of intersecting anti-racist pedagogies across multiple spaces in critical university settings. Student cannot receive credit for WRIT 55483 and ENGL 80753.

Career
Graduate

Cross Listed Courses
WRIT55483 Anti-Racist Pedagogies

ENGL80813 - Rhetorics and Poetics of 1930s America

Department(s)
English

Long Description (Catalog Description)
A study of the 1930s American literacy and cultural debates that led to the establishment of New Criticism as the dominant critical theory in English studies and to the birth of modern rhetorical theory.

Career
Graduate

ENGL80823 - Social Movement Rhetorics

Department(s)
English

Long Description (Catalog Description)
This course prepares graduate students for research and teaching related to protest and social movement rhetorics, tracing the emergence and development of work in this area from the 1960s to the present.

Career
Graduate

ENGL80833 - Cultural Rhetorics

Department(s)
English

Long Description (Catalog Description)
An investigation into the connections between rhetoric, culture, and power in order to engage theories of race, class, ethnicity, gender, sexuality, disability, etc. The course will ask students to also practice sociocultural research methods such as, but not limited to ethnography.

Career
Graduate

ENGL90980 - Dissertation

Undergraduate

ENGR20404 - Circuit Analysis and Design II

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisite: ENGR 10402, Math 20524. Corequisite: Math 30613. Terminal characteristics of passive devices and energy sources. Steady-state response of networks containing these elements. Transient response of first- and second-order networks. Use of computer-aided analysis and design tools. Emphasis on the proper use of basic electrical laboratory instrumentation.

Course Typically Offered
Fall

Career
Undergraduate

ENGR20413 - Circuit Analysis and Design III

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisite: ENGR 20404. Complex frequency response. Frequency domain analysis using Laplace and Fourier transforms. Two-port networks analysis and applications. Computer-aided analysis and design tools.

Course Typically Offered	Career
Spring	Undergraduate

ENGR20603 - Solid Mechanics I

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisites: ENGR 10032, MATH 10524. Fundamental topics in static structural analysis, concepts of stress and strain, and stress-strain-temperature relations. Stresses and deformations due to axial, torsional, and bending loads. Transverse shear. Combined loadings.

Course Typically Offered	Career
Fall	Undergraduate

ENGR20613 - Dynamics and Vibrations I

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisites: ENGR 10032, PHYS 20473/20474, and credit for, or concurrent enrollment in MATH 30613 and one of COSC 10403, COSC 10503, COSC 10603, ENGR 10573. Kinematics and kinetics of a particle. Work-energy and impulse-momentum methods for particles. Planar kinematics and kinetics of a rigid body. Work-energy and impulse-momentum methods for rigid bodies. Free and forced response of damped single-degree-of-freedom systems.

Course Typically Offered	Career
Spring	Undergraduate

ENGR20623 - Solid Mechanics II

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisites: ENGR 20603, PHYS 20473/20474: credit for or concurrent enrollment in MATH 30613. Curved beams. Thick-walled cylinders and spinning disks. Torsion of noncircular shafts. Energy methods. Theories of failure. Introduction to finite element analysis.

Course Typically Offered	Career
Spring	Undergraduate

ENGR20990 - International Residential Study

Department(s)
Engineering

Long Description (Catalog Description)
This course represents credit earned through a semester study abroad experience with an institution or program with which Texas Christian University has an official agreement to accept credit. The site and specific content will be identified on the official transcript. Courses appearing on a student's official transcript have been included in the student's grade point average.

Course Typically Offered	Career
Study Abroad Course	Undergraduate

ENGR30003 - Honors Tutorial

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisite: Junior standing and membership in the Honors Program. An examination of an important topic in mechanical or electrical engineering determined in consultation with an instructor. This course is offered on a directed study basis and must be arranged prior to the semester enrolled.

Course Typically Offered	Career
Fall and Spring	Undergraduate

ENGR30014 - Materials Science

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisite: CHEM 10013 or 10113. Introduction to the physical, chemical, mechanical, electrical, and optical properties of metals, semiconductors, ceramics, and polymers. Emphasis on the relationship between these properties and how performance is influenced by microstructure and processing. Atomic bonding. Crystal structure. Phase equilibria. Deformation and fracture. Composite materials. Electronic, magnetic, dielectric and optical properties. Laboratory methods for characterizing materials emphasized. (Crosslisted as ENGR/PHYS 30014.)

Course Typically Offered	Career
Spring	Undergraduate

Cross Listed Courses
PHYS30014 Materials Science

ENGR30113 - Energy in Society

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisites: junior standing or permission of instructor. This course is designed for any major at TCU who wants to develop a better understanding of how energy is produced, transported and marketed in the metroplex and across the country. Industry professionals will also visit to discuss current and developing technologies they are using to provide energy for the future. This course does not count toward the major requirements in engineering.

Course Typically Offered	Career
Spring	Undergraduate

ENGR30444 - Electronics I

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisite: ENGR 20404. Fundamentals of solid-state, discrete-component microelectronic devices, including the pn-junction diode, bipolar junction transistor, and field-effect transistors. Utilization of pn-junction diodes and transistors as electronic switches for digital logic applications is stressed. Computer-aided analysis and design tools. Laboratory applications.

Course Typically Offered	Career
Fall	Undergraduate

ENGR30454 - Electronics II

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisite: ENGR 30444. Differential amplifiers. Frequency response of amplifiers with an emphasis on design for wideband operation. Negative feedback with practical circuit applications. Amplifier output stages. Analog integrated circuits including op-amps. Basic analog filter design. Sinusoidal oscillators. Laboratory applications.

Course Typically Offered	Career
Spring	Undergraduate

ENGR30503 - Signals and Systems

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisite: ENGR 20413 or instructor approval. Signal and system representations. Convolution. Fourier series and transforms and applications. Laplace transforms and applications. Z-transforms and applications.

Course Typically Offered	Career
Fall	Undergraduate

ENGR30543 - Engineering Electromagnetics

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisites: ENGR 20404, MATH 30524, MATH 30613. Vector fields and operators. Electrostatic fields. Coulomb, Gauss, Joule, and Continuity Laws. Solution of boundary-value problems. Magnetostatic fields. Vector magnetic potential. Biot-Savart Law. Time-varying fields. Faraday's Law. Maxwell's equations. Plane waves. Transmission lines. The use of computer-aided calculation and visualization tools.

Course Typically Offered	Career
Spring	Undergraduate

ENGR30573 - Computer Organization

Department(s)
Engineering

Long Description (Catalog Description)
COSC Prerequisites: COSC 20803 and MATH 20123, or, ENGR prerequisites: ENGR 30444; all with a C- or better. Treatment of sequential and combinatorial circuits including flip-flops, multiplexers, decoders, adders, registers, counters. Design of functional components, of a computer including memory, ALU, control unit, busses. The tradeoffs of alternative architectural features such as word size, instruction sets, addressing modes. (Crosslisted as COSC 30253/ENGR 30573.)

Course Typically Offered	Career
Fall	Undergraduate

Cross Listed Courses
COSC30253 Computer Organization

ENGR30583 - Microprocessor Systems

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisite: COSC 30253. Introduction to the design of microprocessor based digital systems including the study of processor control signals, address decoding and memory interfacing, interfacing to serial and parallel ports, A/D conversion, and interrupt processing. Features of state-of-the-art microprocessors will be discussed. Both hardware and software assignments will be required. (Crosslisted as COSC 30353/ENGR 30583.)

Course Typically Offered	Career
Spring	Undergraduate

Cross Listed Courses
COSC40253 Microprocessor Systems

ENGR30593 - Computer Architecture

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisite: COSC 30253. The logical organization and functional behavior of digital computers are studied. Fundamental principles in the design of the CPU, memory, I/O devices, and bus structures are presented. Performance enhancement topics such as caching, memory interleaving, interconnection schemes, pipelining, memory management, reduced instruction sets (RISC) and multiprocessing are discussed. (Crosslisted as COSC 30453/ENGR 30593.)

Course Typically Offered	Career
Rarely	Undergraduate

COSC30453 Computer Architecture

ENGR30603 - Solid Mechanics II

Department(s)
Engineering

Career
Undergraduate

ENGR30613 - Dynamics and Vibrations II

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisites: ENGR 20613, MATH 30613. Moving reference frames. Kinematics and kinetics of typical machines. Lagrange's equations. Rotating machinery and balancing. Free and forced response of damped multi-degree-of-freedom systems. Modal analysis.

Course Typically Offered	Career
Fall	Undergraduate

ENGR30623 - Control Systems I

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisites: ENGR 20613, 20404, MATH 30613. Analysis and design of feedback control systems. Laplace transforms and transfer functions. Transient and steady-state response. Root locus method. Nyquist diagrams. Bode plots. Control system simulation software. Introduction to state-space analysis and design.

Course Typically Offered	Career
Fall	Undergraduate

ENGR30634 - Manufacturing I

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisite: ENGR 20623. Manufacturing processes and engineering materials emphasizing metals, polymers, ceramics, and composites. Material selection. Product design for optimum manufacturability and quality control. Computer integrated manufacturing and process engineering.

Course Typically Offered	Career
Spring	Undergraduate

ENGR30704 - Thermal Sciences I

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisites: MATH 10524, CHEM 10013 or 10113, PHYS 20473 or 20474. An introduction to thermodynamics, fluid mechanics and heat transfer. System and control volume concepts in analysis. First and second laws in thermodynamics. Thermodynamics cycles. Fluid statics and steady flow of fluids. Introduction to topics in conduction, convection, and radiation heat transfer.

Course Typically Offered	Career
Fall	Undergraduate

ENGR30714 - Thermal Sciences II

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisite: ENGR 30704. Continuation of ENGR 30704. Further topics in thermodynamics and fluid mechanics. Applications of the first and second laws to power and refrigeration cycle analysis, psychrometrics, and reacting mixtures. Conservation equations. Inviscid and viscous incompressible flow. Introduction to compressible flow.

Course Typically Offered	Career
Spring	Undergraduate

ENGR30861 - Mechanical Systems Lab

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisite: ENGR 20603. Experimental, computational and analytical studies of phenomena in solid mechanics, dynamics and vibrations. Data acquisition, transmission, and analysis.

Course Typically Offered	Career
Spring	Undergraduate

ENGR30871 - Thermal Systems Lab I

Department(s)
Engineering

Long Description (Catalog Description)
Corequisite: ENGR 30704. Experimental, computational and analytical studies of phenomena in fluid flow, heat transfer, thermodynamics, refrigeration, and mechanical power systems. Data acquisition, transmission, and analysis.

Course Typically Offered	Career
Fall	Undergraduate

ENGR30903 - Issues in Engineering Design

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisite: Junior Standing. Examination of various issues inherent in engineering design. A review of the engineering method. Ethical issues of engineering design such as: product liability, risk assessment, intellectual property, competitive bidding, and the environmental and social impacts of design decisions. Project management, topics in engineering economy, and probabilistic concepts in design.

Course Typically Offered	Career
Spring	Undergraduate

ENGR30990 - International Residential Study

Department(s)
Engineering

Long Description (Catalog Description)
This course represents credit earned through a semester study abroad experience with an institution or program with which Texas Christian University has an official agreement to accept credit. The site and specific content will be identified on the official transcript. Courses appearing on a student's official transcript have been included in the student's grade point average.

Course Typically Offered	Career
Study Abroad Course	Undergraduate

ENGR40003 - Senior Honors Research Paper

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisite: ENGR 30003. A supervised research experience culminating in the writing of a research paper based on the subject matter studied in ENGR 3003 Honors Tutorial. The course is offered on a directed study basis and must be arranged prior to the semester enrolled.

Course Typically Offered	Career
Fall and Spring	Undergraduate

ENGR40103 - Technical Entrepreneurship

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisites: Junior or senior standing. Begins with a focus on creativity and innovation, then turns to the lean startup methodology as a conceptual framework for creating, testing, and growing a new technology startup. Students will learn to develop and explore new, unique ideas and to translate these ideas into scalable businesses that can grow quickly to address a large market opportunity. The course culminates in a practice investment pitch for funding to launch the startup.

Career
Undergraduate

ENGR40203 - Engineering Economic Analysis

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisites: MATH 10524 or MATH 10283. Development and use of time value of money interest relationships. Comparison alternatives including present worth, annual worth, rate of return and payout period methods. Decision making among independent, dependent, capital-constrained, and unequal-lived projects. Replacement, break-even, and minimum cost analyses. Depreciation and depletion methods and their effect on corporate income taxes, leading t after-tax cash flow analysis.

Course Typically Offered	Career
Fall	Undergraduate

ENGR40213 - Sustainable Energy

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisites: PHYS 20484, MATH 30524 or 30613, and ENGR 30704. This course introduces concepts that are needed to understand a range of diverse energy initiatives, and discusses resources available to supply energy to both developed and developing nations. Energy sources of interest include geothermal, fossil fuels (coal, oil, gas), nuclear, wind, solar, hydropower, biofuels, conservation, hybrid energy systems, etc. The broad perspective helps the student develop an expanded knowledge base, and become a steward of the earth's natural resources.

Course Typically Offered	Career
Spring	Undergraduate

ENGR40223 - Petroleum Reservoir Management

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisites: PHYS 20484 and MATH 30524 or 30853 or 30613. Modern petroleum reservoir management relies on teams of people from a variety of scientific and engineering disciplines. This course will introduce concepts and terminology for topics that are often encountered by members of petroleum reservoir management teams. Topics from geology, geophysics, petrophysics, and petroleum engineering are discussed. A case study is used to integrate the material in the course.

Course Typically Offered	Career
Fall	Undergraduate

ENGR40233 - Applied Reservoir Simulation

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisites: ENGR 40223 or GEOL 40423. Oil and gas are essential sources of energy in the modern world. They are found in subsurface reservoirs in many challenging environments. Modern reservoir simulators are computer programs that are designed to model fluid flow in reservoirs. Applied reservoir

simulation is the use of computer programs to help understand and forecast the performance of oil and gas problems. (Crosslisted as ENGR 40223/GEOL 40443.)

Course Typically Offered	Career
Spring	Undergraduate

Cross Listed Courses
GEOL40443 Applied Reservoir Simulation

ENGR40303 - Petroleum Industry Overview

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisites: ECON 10223, ENGR 40203, MATH 10524 or MATH 10283, or permission of instructor. This course will cover the upstream side of the petroleum industry. It will start with geology, the formation of oil and gas, and the geophysical characteristics which characterize the location of oil and gas. Next, the drilling process for both exploration and production will be considered. Finally, the actual production of oil and gas from the reservoir will be developed. Economic considerations will be developed throughout the process.

Course Typically Offered	Career
Rarely	Undergraduate

ENGR40313 - Energy from Fluids in Motion

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisite: ENGR 40213. Science and engineering concepts that are needed to harvest energy from moving fluids are discussed. Energy sources include wind energy, hydroelectric energy, tidal energy and wave energy.

Course Typically Offered	Career
Rarely	Undergraduate

ENGR40323 - Solar and Nuclear Energy

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisites: ENGR 40213. Science and engineering concepts that are needed to develop solar and nuclear energy resources are discussed. Energy resources include solar thermal energy, solar electric energy, nuclear fission and nuclear fusion.

Course Typically Offered	Career
Rarely	Undergraduate

ENGR40433 - Introduction to Microelectromechanical System (MEMS)

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisites: ENGR 20404 and ENGR 20603. Micro Electro Mechanical Systems (MEMS) are miniature devices that are widely used in industrial and consumer products such as accelerometers, used in cars to activate the airbags and in smart phones to flip images and play video games. This course will cover the fundamentals of MEMS including the design and modeling, fabrication, actuation and sensing, packaging, testing and characterization as well as reliability. The applications and challenges of existing MEMS devices will be discussed.

Course Typically Offered	Career
Every other fall	Undergraduate

ENGR40444 - Mechatronics

Department(s)
Engineering

Long Description (Catalog Description)
Corequisites: ENGR30444. Fundamentals of microcontroller-based mechatronics systems, as well as control and characterization of a variety of

transducers. An Arduino microcontroller platform is used. Design, prototype,and characterization of various mechatronic systems conducted in lab.

Career
Undergraduate

ENGR40454 - Semiconductor Device Electronics

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisite: ENGR 30454. Semiconductor materials and solid-state physics principles. Charge carrier transport phenomena. PN-junction analysis. Bipolar junction transistor physics. Metal-oxide-semiconductor MOS physics. MOS transistor principles. Computer-aided analysis and design tools will be used. Individual research laboratory project.

Course Typically Offered	Career
Fall	Undergraduate

ENGR40464 - Theory and Fabrication of Microelectronic Devices

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisites: ENGR 30444. This course provides a theoretical background and a practical laboratory experience in modern microelectronic device fabrication technologies and processes. The students will learn the theory of the nested set of microelectronic processing techniques used to manufacture microelectronic devices. Each student will actively participate in a laboratory whose focus is to fabricate and test the performance of silicon-based microelectronic devices, including: metalized and diffused resistors, pn-junction diodes, metal-oxide-semiconductor (MOS) capacitors, and MOS field-effect transistors (MOSFETs).

Course Typically Offered	Career
Rarely	Undergraduate

ENGR40484 - Electromechanics

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisites: ENGR 20404, and PHYS 20483/20481 or PHYS 20284. Electromechanical energy conversion principles. Magnetic circuits. Balanced three-phase system analysis. Development and applications of the circuit models for transformers, induction machines, synchronous machines, and DC machines. Laboratory exercises emphasize measurement of machine model parameters and comparison of predicted and observed steady-state performance.

Course Typically Offered	Career
Fall	Undergraduate

ENGR40493 - Power Systems Analysis

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisites: ENGR 20404, and corequisite: ENGR 40484. Phasors, three phase power, power transmission-line parameters, transformer modeling, power flow analysis, short circuit analysis, basic concepts of generation, transmission, distribution, smart grids and renewable energy in power systems will be covered.

Course Typically Offered	Career
Rarely	Undergraduate

ENGR40514 - Communication Systems

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisite: ENGR 30503. Introduction to analog and digital communication systems and concepts. Sampling theorem. Amplitude modulation. Frequency modulation. Pulse-code modulation. Time-division and frequency-division multiplexing. Analog and digital noise analysis.

Course Typically Offered	Career
Rarely	Undergraduate

ENGR40544 - Optical Fiber Communications

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisite: ENGR 30543 or PHYS 40653. Waveguiding and signal transmission properties of optical fibers. Optical sources. Power launching and coupling. Photodetectors. Optical receivers. Optical fiber transmission systems. Laboratory exercises emphasize the measurement of waveguiding characteristics.

Course Typically Offered	Career
Rarely	Undergraduate

ENGR40554 - Introduction to Digital Design

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisites: ENGR 30444. Introduction to digital electronics and digital design principles. Topics include: Boolean algebra; combinational logic; sequential logic; finite state machines; transistor-level implementations; and computer arithmetic. A hardware description language (HDL) will be used to construct digital circuits using a field-programmable gate array (FPGA). Building finite state machines in hardware, and hands-on learning and design will be emphasized.

Career
Undergraduate

ENGR40574 - Digital Signal Processing

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisite: ENGR 30503. Sampling and quantization effects. Digital filter design. Structures for realizing discrete time systems. Discrete Fourier transform and fast Fourier transform. Laboratory exercises emphasize digital signal processing techniques to applications in audio signal processing and telecommunications.

Course Typically Offered	Career
Rarely	Undergraduate

ENGR40613 - Machine Component Design

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisites: ENGR 20613, 20623. The design and selection of mechanical components. Lubrication. Antifriction and journal bearings. The design of screws, fasteners, and joints. Mechanical springs. Gears and gearing systems. Clutches, brakes and couplings. Flexible mechanical elements. Flywheels and power units. Miscellaneous topics.

Course Typically Offered	Career
Rarely	Undergraduate

ENGR40623 - Control Systems II

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisite: ENGR 30623. Design of control systems. Stability. System sensitivity. Nyquist, root locus and Bode design. Nichols chart analysis and design. Controllability and observability. Introduction to nonlinear control systems. Phase plane methods.

Course Typically Offered	Career
Rarely	Undergraduate

ENGR40633 - Manufacturing II

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisite: ENGR 30634. A continuation of ENGR 30634.

Course Typically Offered	Career
Rarely	Undergraduate

ENGR40723 - Heat Transfer

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisite: ENGR 30704. Thermal conductivity. Steady and unsteady conduction. Free and forced convection. Boundary layer concepts. Heat exchangers. Thermal radiation. Numerical procedures.

Course Typically Offered	Career
Rarely	Undergraduate

ENGR40733 - Fluid Mechanics

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisite: ENGR 30704. Fluid statics. Conservation equations. Incompressible inviscid and viscous flow. Boundary layers. Dimensional analysis and similitude. Compressible flow.

Course Typically Offered	Career
Rarely	Undergraduate

ENGR40743 - Thermal Systems Design

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisite: ENGR 30704. Design and analysis of thermal systems. Selection and evaluation of fluid flow equipment. Heat exchangers. Vapor power and refrigeration cycles. Fluid flow circuits. Preliminary cost estimations and economic evaluation. Availability analysis and optimization techniques.

Course Typically Offered	Career
Rarely	Undergraduate

ENGR40753 - Advanced Engineering Dynamics

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisites: ENGR 20613, MATH 30613. Kinematics and kinetics of three dimensional motion. Gyroscopic systems, Energy and momentum methods. Generalized coordinates and Lagrange's equations. Special topics.

Course Typically Offered	Career
Rarely	Undergraduate

ENGR40763 - Introduction to Structural Dynamics

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisites: ENGR 20613, MATH 30613. Structural excitation and response of vibratory systems including single and multiple degrees of freedom as well as continuous systems. Focuses on understanding and controlling to protect from failure the undesired response of structures (buildings, automobiles, aircraft, machine tools, and more) to the dynamic environments they encounter in actual operations.

Course Typically Offered	Career
Fall	Undergraduate

ENGR40861 - Mechanical Systems Lab II

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisite: ENGR 30623. Experimental, computational and analytical studies of phenomena in solid mechanics, dynamics and vibrations. Data acquisition, transmission, and analysis.

Course Typically Offered	Career
Spring	Undergraduate

ENGR40862 - Structural Systems Lab

Department(s)
Engineering

Career
Undergraduate

ENGR40871 - Thermal Systems Lab II

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisites: ENGR 30714. Experimental, computational and analytical studies of phenomena in fluid flow, heat transfer, thermodynamics, refrigeration, and mechanical power systems. Data acquisition, transmission, and analysis.

Course Typically Offered	Career
Fall	Undergraduate

ENGR40872 - Thermal Systems Lab

Department(s)
Engineering

Career
Undergraduate

ENGR40903 - Systems Design I

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisite: ENGR 30903. Two-semester interdisciplinary team projects. Application of analysis and design principles and techniques to the synthesis, modeling, optimization, fabrication, and testing of electrical, mechanical and electromechanical systems. Individual and team oral and written reports.

Course Typically Offered	Career
Fall	Undergraduate

ENGR40913 - Systems Design II

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisite: ENGR 40903. Continuation of ENGR 40903

Course Typically Offered	Career
Spring	Undergraduate

ENGR40920 - Senior Design Projects

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisite: Instructor approval. Individual design and development projects in fundamental or applied aspects of electrical or mechanical engineering 1-4 hours.

Course Typically Offered	Career
Fall and Spring	Undergraduate

ENGR40950 - Engineering Internship

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisites: 2.5 GPA in major, completion of two years course work and advisor's approval. Practical experience in engineering. Must include a minimum of 260 work hours in an approved practical experience situation for three semester hours of credit. Credit may be prorated. A weekly work journal and term paper are required for this course. (This course is only offered P/NC.) Course may be repeated but limited to a total of 3 credit hours.

Course Typically Offered	Career
Summer	Undergraduate

ENGR40970 - Special Topics in Engineering

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisite: Instructor approval. 1-6 hours.

Course Typically Offered	Career
Fall and Spring	Undergraduate

ENGR50723 - Water and Wastewater Technology

Department(s)
Engineering

Long Description (Catalog Description)
Prerequisite: Must be a Science & Engineering major, grad student or have permission of instructor. This course is designed to teach the basics of water and wastewater treatment technology, including regulations, for students seeking a career in environmental consulting. At the completion of the course, students will understand the basics of water and wastewater treatment, the regulations affecting water and wastewater treatment and pretreatment programs. Students will have the opportunity to apply the knowledge they gain to real-life situations throughout the class.

Undergraduate

ENSC10000 - General Transfer Credit-NSC

Department(s)
Environmental Science

Long Description (Catalog Description)
General Transfer Credit-NSC credit.

Course Typically Offered	Career
Administrative Use Only	Undergraduate

ENSC10143 - Contemporary Environmental Issues

Department(s)
Environmental Science

Long Description (Catalog Description)
Two hours lecture and two hours of laboratory per week. This course introduces students to the major environmental/resource problems that confront humanity in the 21st century. The course seeks to both develop a fundamental scientific knowledge and understanding of the concepts and principles that underlie current environmental problems, as well as to engage in critical and reflective thinking about our resources, the environment and our place within it. Field trip required.

Course Typically Offered	Career
All Sessions	Undergraduate

General Transfer Credit

Course Typically Offered	Career
Administrative Use Only	Undergraduate

ENSC10243 - Environmental Disasters

Department(s)
Environmental Science

Long Description (Catalog Description)
This course provides an introduction to environmental disasters of the 20th and 21st centuries, including industrial accidents that released hazardous and toxic substances resulting in severe environmental impairments and human injuries and deaths. The course explores the impact of environmental disasters on human and
environmental health by focusing on the types of pollutants released and their effects on various populations as well as terrestrial and aquatic ecosystems. The course also considers the role of local, state, national, and international agencies in responding to and preventing these disasters. Students will examine numerous environmental disasters from an environmental science perspective and consider their cultural, social, and economic impacts. The class combines lecture and
laboratory to provide the most complete experience for students.

Course Typically Offered	Career
Spring	Undergraduate

ENSC10433 - A Sense of Place: TCU's Environment

Department(s)
Environmental Science

Long Description (Catalog Description)
This first-year seminar offers an introduction to field observation, personal journaling, and the domain of Environmental Studies, which includes earth sciences, ecology, environmental history, and environmental literature. Assignments are designed to promote awareness about how an environment is shaped by interaction among cultural and natural processes. The course is centered upon five all-day field trips in the vicinity of Fort Worth. Trips include presentations and exercises conducted by various experts, designed both to showcase individual enthusiasms and to explore how disciplinary knowledge can be integrated into a richer understanding of the local environment. Whenever possible, people with differing expertise, and readings from both scientific and literary sources are used to interpret the same landscape. Students practice describing environments in different modes, in order to cultivate the breadth of perspective required for environmental literacy. Each trip is preceded by a 2-hour evening session to discuss assigned readings, insights from the previous trip, and relevant concepts for the next trip.

Course Typically Offered	Career
Fall	Undergraduate

ENSC20003 - Astrobiology: Hunting for Habitable Worlds

Department(s)
Environmental Science

Long Description (Catalog Description)
Prerequisites: Permission of the Instructor. This course will introduce students to some of the big topics and questions in Astrobiology. This course will explore what makes Earth so habitable, how life might originate on other planetary bodies, and how we are actively looking for life on other planetary bodies in our Solar System and beyond. Finally, students will be asked to examine what it means to be an intelligent life-form and what responsibilities, if any, might come wit that intelligence.

ENSC30113 - Weather and Climate

Department(s)
Environmental Science

Long Description (Catalog Description)
Three hours lecture per week. Introduction to the basic concepts and principles of atmospheric science in a descriptive format; emphasizes the physics responsible for changes in weather and climate complemented with popular treatment. (Crosslisted as ENSC/GEOL 30113)

Career
Undergraduate

Cross Listed Courses
GEOL30113 Weather and Climate

ENSC30123 - History of Women in Science

Department(s)
Environmental Science

Long Description (Catalog Description)
Prerequisites: Sophomore in standing, or WGST 20003 Introduction to Women and Gender Studies, or permission of the instructor. Two hours of lecture and two hours of laboratory a week. This course will examine the reasons behind the gender-related differences in STEM today and review the societal and cultural reasons behind the historical exclusion and erasure of the contributions of women to the STEM fields. We will explore and evaluate the contributions of women to the advancement of science throughout history.

Career
Undergraduate

ENSC30133 - Concepts in Environmental Science

Department(s)
Environmental Science

Long Description (Catalog Description)
This course provides students with the basic scientific principles underlying major environmental/resource problems that confront the global community. The course will help develop the scientific knowledge and understanding of the major environmental problems associated with the air, water, land, and biota, as well as issues associated with population, biodiversity, energy, sustainability, and urbanization.

Undergraduate

ENSC30143 - Introduction to Sustainability Science

Department(s)
Environmental Science

Long Description (Catalog Description)
Prerequisites: ENSC 10143. This course offers an introduction to the science of sustainability and emphasizes multi- and trans-disciplinary approaches to solving the world¿s most pressing environmental, social, and economic challenges. In this course, we explore the science behind sustainability through a complex systems perspective and examine strategies used by governmental institutions as well as nonprofit and for-profit entities to develop and implement sustainability. Themes discussed include climate, water, food systems, energy and materials management, green space and biodiversity, pollution, environmental justice, cities, green building design, and transportation.

ENSC30313 - Sustainable Development in Costa Rica

Department(s)
Environmental Science

Long Description (Catalog Description)
This program examines how Costa Rica has managed their natural resources to conserve biodiversity, including ecosystem service payments, the social value placed on conservation and the political history that has allowed Costa Rica to emerge as the only stable political regime and economy in Central America and the second-most famous ecotourism destination in the world. Their emerging economy creates unique challenges to balance development with conservation and creates a unique opportunity for students to observe sustainable development first-hand, engage in critical and reflective thinking about resource consumption, and evaluate the social implications of sustainability.

ENSC30493 - The Water Planet

Department(s)
Environmental Science

Long Description (Catalog Description)
Prerequisites: ENSC 10143 or GEOL 10113 or Junior standing. Two hours of lecture and two hours of laboratory per week. This course provides students with a comprehensive understanding of the multi-faceted dimensions of water on Earth. Course topics include the basics of water at a micro-scale (e.g., properties, form, and behavior), local and regional-scale water issues (e.g., water distribution, supply-demand, pollution, and management), and global-scale processes (e.g.,
hydrological cycle). Course topics are presented within an interdisciplinary framework through an examination of several water-related case studies from around the world. In this course, students will learn important terminologies, key
concepts, and issues in water science.

ENSC40030 - Research in Applied WIldlife Ecology

Department(s)
Environmental Science

Long Description (Catalog Description)
Prerequisites: Junior standing and instructor permission. Field and laboratory problems for advanced students. One to three clock hours per week of laboratory and/or field work are required for each semester hour of credit, for up to three semester hours any given semester. For a maximum total of six semester hours of independent research, this course can be repeated. Note that 1 credit hour equates to 50 hours in the field or lab.

Career
Undergraduate

ENSC40040 - Water Resources Research

Department(s)
Environmental Science

Long Description (Catalog Description)
Prerequisites: Junior standing and instructor permission. Field laboratory, and computational modeling problems in water resources for undergraduate students. Fifty clock hours of laboratory, computational, and fieldwork for each semester hour credit. 1-6 semester hours.

Career
Undergraduate

ENSC40173 - Mammalogy

Department(s)
Environmental Science

Long Description (Catalog Description)
Prerequisites: six semester hours in Biology. Two hour lectures and two hours of laboratory per week. This course introduces advanced undergraduate students to mammals. Lectures will examine the major topics of mammalian biology, including the evolutionary history, classification, adaptations, ecology, and natural history of mammals. Field techniques for the study of mammalian biodiversity and abundance will also be covered in this course. Field trips will be required. (Crosslisted as BIOL/ENSC 40173.)

Career
Undergraduate

Cross Listed Courses
BIOL40173 Mammalogy

ENSC40193 - Environmental Stewardship Seminar

Department(s)
Environmental Science

Long Description (Catalog Description)
Three hours lecture per week. This course examines the case environmental stewardship, defined as the need to make informed and responsible decisions with regard to the planet. Students meet in a seminar-type format and cover broad, integrating themes that then serve as a foundation for topics that address more specific environmental problems, such as global warming, deforestation, sustainable development, and energy depletion. The course exposes students to the foundations necessary to enable them to develop their own environmental ethic.

Course Typically Offered
Fall and Spring

Career
Undergraduate

ENSC40343 - Service Learning in Environmental Science and Sustainability

Department(s)
Environmental Science

Long Description (Catalog Description)
Prerequisites: Junior standing and instructor permission. This course engages students in hands-on, community-based projects in the environmental and sustainability sciences. Students will collaborate with a community group to design, implement, and assess sustainable solutions to environmental challenges, fostering an understanding of environmental principles and community engagement. Through real-world applications, students will cultivate essential skills and knowledge to become proactive stewards of our planet.

Career
Undergraduate

ENSC40353 - Wildlife Ecology and Management

Department(s)
Environmental Science

Long Description (Catalog Description)
Prerequisites: Six semester hours in Biology. Two hour lectures and a three hour laboratory each week. This discussion-oriented course introduces advanced undergraduate students to the general principles of wildlife ecology and how those principles can be applied to wildlife management and conservation. The objectives of this course are 1) to provide an introduction to the major concepts of Wildlife Ecology and Management, and 2) to allow you to learn the application of the scientific method to ecological problems. Laboratory exercises are required. (Crosslisted as BIOL/ENSC 40353)

Course Typically Offered
Every other spring

ENSC50003 - Applied Projects Partnership Program

Department(s)
Environmental Science

Long Description (Catalog Description)
Prerequisites: Must have C or better in at least 9 hours of approved courses in the minor or degree, plus permission of instructor and program advisor. ENSC faculty will identify opportunities for students to partner with local businesses, industry and consulting firms to solve real-world problems and create professional deliverables. Students will be matched with the positions that are available, based on observed talents and the type of experience they seek. This is a student-lead project. ENSC faculty provide oversight and guidance but will NOT manage the project or direct the team.

Course Typically Offered	Career
Spring	Undergraduate

ENSC50203 - Riparian and Wetland Diversity

Department(s)
Environmental Science

Long Description (Catalog Description)
Prerequisites: Six hours of biology, geology, or environmental science courses. Note: students who enroll in this course may not enroll in ENSC 50246 for credit. This field-intensive course introduces skills to study the diversity of riparian and wetland habitats of North Central Texas. The curriculum introduces methods of sampling a site in terms of its macroinvertebrates, flora, vegetation, soils, and hydrologically relevant landforms. The filed modules are macroinvertebrates, plant zonation, and description of substrates, topography, and landscape context. Some exercises may be done in conjunction with the Wetland Delineation class. The field trips run Thursday evening through Sunday, and are required for all students.

Course Typically Offered	Career
Fall	Undergraduate

ENSC50213 - Terrestrial Envirodiversity

Department(s)
Environmental Science

Long Description (Catalog Description)
Prerequisites: Six hours in biology, geology, or environmental science. Note: students who enroll in this course may not enroll in ENSC 50246 for credit. This field-intensive course introduces skills to describe the diversity of terrestrial life and landscapes. The curriculum introduces methods of sampling a site in terms of its macroinvertebrates, flora, vegetation, rocks, soils, and landforms. Collections of invertebrates and plants are required. Field skill instruction includes context description, emphasizing vegetation structure correlated with soils, geology, and landforms. The three field modules are terrestrial invertebrates, plant communities, and geology-landforms-soils description. These field trips run Thursday evening through Sunday, and are required for all students.

Course Typically Offered	Career
Spring	Undergraduate

ENSC50213 - Environmental Geology

Department(s)
Environmental Science

Long Description (Catalog Description)

Long Description (Catalog Description)
Prerequisites: one semester of biology and junior or higher standing standing. Through readings, discussions, lectures and two required Saturday field trips, students will gain an appreciation for urban wildlife habitat in its many forms by providing a foundation of knowledge regarding wildlife ecology and natural habitats and the ability to relate this knowledge to the urban environment.

Course Typically Offered
Spring

Undergraduate

ENSC50246 - Biodiversity

Department(s)
Environmental Science

Long Description (Catalog Description)
Prerequisites: Two semesters of college-level biology courses. This course introduces skills to describe and study the diversity of life. It is immersion, field-intensive instruction. General concepts include patterns of global biodiversity, biogeography of the Southern Plains, conservation biology, pressures on biodiversity, and national/international biodiversity protection efforts and policies. Field skill instruction starts with context description, emphasizing vegetation structure, followed by plant community description. Subsequent modules focus on inventorying animal communities, starting with insects and continuing with freshwater invertebrates, fish, amphibians, reptiles, birds and mammals. The field skill component of the course concludes with a week-long exercise in habitats outside of north-central Texas. Biodiversity information management is learned by developing a relational database coupled with a local Geographic Information System.

ENSC50333 - Energy Development and Wildlife Conservation

Department(s)
Environmental Science

Long Description (Catalog Description)
Prerequisites: Three semester hours of biology. The quest for energy can cause problems for wildlife, but through effective use of Best Management Practices (BMPs), the impact of energy development and distribution on wildlife can be limited. From site selection through production to reclamation, practical means exist to promote wildlife-friendly energy development. This course will feature BMPs that allow energy development and wildlife conservation to coexist.

ENSC50403 - Rivers in the Landscape

Department(s)
Environmental Science

Long Description (Catalog Description)
Prerequisites: Junior Senior, or graduate standing. In this course , students analyze modern principles of river processes and forms within a geographical perspective. The course examines the fundamental

mechanics of fluvial channels with an emphasis placed on both qualitative and quantitative geographic and geologic evaluation of river processes and their products. The course emphasizes natural scientific perspectives and includes linkages to ecology, engineering, natural resources, and resources management/policy.

Career
Undergraduate

ENSC50433 - Sustainability in the Built Environment

Department(s)
Environmental Science

Long Description (Catalog Description)
Prerequisites: Minimum of 60 hours of completed coursework. Sustainability in the Built Environment is a look at policies, programs, projects, and operations of communities, buildings, and homes. This course delves into the history surrounding the green building movement, practical and business cases for sustainable design and implementation, the relatively recent rise and practice of corporate sustainability and the future of sustainability in the communities and facilities we occupy. Energy, water, waste, green purchasing, indoor air quality, and sites are topics that will be covered.

ENSC50503 - Wetlands Delineation and Management

Department(s)
Environmental Science

Long Description (Catalog Description)
Prerequisites: Major field of study within the College of Science & Engineering, graduate enrollment, or permission of instructor. To develop a working understanding of the wetland delineation process using the 1987 U.S. Army Corps of Engineers Wetland Delineation Manual and regional supplements. Students will be taught how to measure the three parameters required for a jurisdictional wetlands. In addition, students will learn a basic understanding of wetland ecology. At the end of the course students will be able to use the manual to assist in delineating wetlands.

Course Typically Offered
Fall

Career
Undergraduate

ENSC50513 - Wetlands Restoration

Department(s)
Environmental Science

Long Description (Catalog Description)
Prerequisites: Major field of study within the College of Science and Engineering, graduate enrollment or permission of instructor. To develop a working understanding of stream and wetland riparian ecology, methods to evaluate and categorize streams and wetlands, and methods to restore, enhance and create streams and wetlands. Students will be taught the various methods of stream/wetland evaluations and categorization and will apply these methods on an actual stream and wetland. Students will evaluate and

develop a working plan for stream and wetland restoration. In addition, students will visit various restoration projects in the region.

ENSC50693 - Natural Resources Compliance

Department(s)
Environmental Science

Long Description (Catalog Description)
Prerequisites: Major field of study within the College of Science & Engineering. This course is designed to teach the basics of natural resources compliance for students seeking a career in either environmental consulting or environmental compliance for industry. At the completion of the course, students will understand the basics of the natural resources regulatory framework, how natural resources regulations interrelate, federal versus state or local regulatory agency authority, basic permitting processes, and the fundamentals of compliance. Students will have the opportunity to apply the knowledge they gain t real-life situations throughout the class.

Course Typically Offered	Career
Every other fall	Undergraduate

ENSC50703 - Environmental Compliance

Department(s)
Environmental Science

Long Description (Catalog Description)
Prerequisites: Major field of study within the College of Science & Engineering with 60 hours of coursework completed; or graduate enrollment in SCEE; or permission of instructor. This course is designed to teach the basics of environmental compliance for students seeking a career in either environmental consulting or environmental compliance for industry. At the completion of the course, students will understand the basics of environmental regulatory framework, how environmental regulations interrelate, federal versus state or local regulatory agency authority, basic permitting processes, and the fundamentals of compliance auditing. Students will have the opportunity to apply the knowledge they gain to re-life situations throughout the class.

Course Typically Offered	Career
Fall	Undergraduate

ENSC50713 - Phase I and Phase II Environmental Site Assessment

Department(s)
Environmental Science

Long Description (Catalog Description)
Prerequisites: Major in College of Science & Engineering, with 60 earned hours or graduate enrollment in SGEE. This course is designed to teach the basics of Phase I and Phase II Environmental Site Assessments for students seeking a career in environmental consulting. At the completion of the course, students will understand the basics of performing environmental site assessments, the environmental regulatory framework, and the fundaments of site investigation. Students will have the opportunity to apply the knowledge they gain to real-life situations throughout the class.

Course Typically Offered	Career
Every other spring	Undergraduate

ENSC50723 - Water and Wastewater Technology

Department(s)
Environmental Science

Long Description (Catalog Description)
Prerequisites: Major in College of Science & Engineering, with 60 earned hours or graduate enrollment in SGEE. This course is designed to teach the basics of water and wastewater treatment technology, including regulations, for students seeking a career in environmental consulting. At the completion of the course, students will understand the basics of water and wastewater treatment, the regulations affecting water and wastewater treatment and pretreatment programs. Students will have the opportunity to apply the knowledge they gain to real-life situations throughout the class.

Course Typically Offered	Career
Every other spring	Undergraduate

ENSC50733 - Environmental, Health & Safety

Department(s)
Environmental Science

Long Description (Catalog Description)
Prerequisites: Must be a Science & Engineering major, graduate student, or have permission of instructor. This course is designed to teach the basics of worker protection for those who will work with hazardous substances during cleanup operations and emergency response. At the completion of the course, students will understand the basics of hazardous materials/ substances, routes of exposure, personal protective equipment, and permissible exposure limits.

Course Typically Offered	Career
Every other fall	Undergraduate

ENSC50743 - Environmental Impact Statements

Department(s)
Environmental Science

Long Description (Catalog Description)
Prerequisites: Major in College of Science & Engineering, with 60 earned hours or graduate enrollment in SGEE. This course is designed to teach the basics of Environmental Impact Statements and the NEPA process for students seeking a career in environmental consulting. At the completion of the course, students will understand the basics of evaluating federally-funded development projects for impacts to the environment. Students will be able to evaluate if the project qualifies for a categorical exclusion, and perform environmental assessment (EA) and environmental impact state (IES). Students will have the opportunity to apply the knowledge they gain to real-life situations throughout the class.

Course Typically Offered	Career
Every other spring	Undergraduate

ENSC50753 - Sustainability Reporting

Department(s)
Environmental Science

Long Description (Catalog Description)
Prerequisites: ENSC 50703, and 60 hours of coursework completed; or graduate enrollment; or permission of instructor. This capstone course provides an examination of sustainability reporting frameworks and practices that organizations use to measure, manage, and communicate their environmental, social, and governance (ESG) performance. Students will develop expertise in current sustainability reporting standards, data collection methods, materiality assessment, and stakeholder engagement. The course emphasizes practical applications through case studies and hands-on experience with sustainability reporting tools that meet the needs of private sector, public sector, and nonprofit organizations. .

Course Typically Offered	Career
Every other spring	Undergraduate

ENSC50763 - Groundwater Hydrology

Department(s)
Environmental Science

Long Description (Catalog Description)
Prerequisites: GEOL 30443 and major field of study within the College of Science & Engineering with 60 earned hours, or graduate enrollment, or permission of instructor. This course is designed to teach the basics of groundwater hydrogeology including hydrologic cycle, aquifers, groundwater flow, groundwater recharge, water chemistry and groundwater contamination. At the end of this course, students will be able to understand the relationship between surface water and groundwater, groundwater protection, field methods, and groundwater development. (Crosslisted as ENSC/GEOL 50763.)

Course Typically Offered	Career
Every other fall	Undergraduate

Cross Listed Courses

ENSC50873 - Environmental Remote Sensing

Department(s)
Environmental Science

Long Description (Catalog Description)
Prerequisites: Seniors and graduate students who have taken any of the following courses: GEOL(ENSC) 30363, GEOL 50731, 50523, 50863, 50883, 50713 or permission of instructor. This course introduces students to fundamental principles and concepts of remote sensing and explores the applications of remote sensing datasets and techniques in geological and environmental sciences. Hands-on exercises on the applications of remote sensing techniques in geological and environmental sciences are key components of the course. The hands-on exercises are mainly based on data from local or international case studies or collected by students in the field (e.g. using Unmanned Aerial Systems (UAS)). Digital image processing techniques/software including ENVI as well as Synthetic Aperture Radar (SAR) processing software such as SNAP will be used for data analysis and interpretation. Crosslisted as GEOL/ENSC 50873.

ENSC60001 - Environmental Presentations

Department(s)
Environmental Science

Long Description (Catalog Description)
The goal of this course is to acquaint the student with the organization, preparation and effective delivery of scientific seminars. Full-time students should register for this course during their second semester. Part-time students should register for this course with permission from the graduate advisor.

Course Typically Offered	Career
Fall and Spring	Graduate

ENSC60011 - Literacy of Science Review

Department(s)
Environmental Science

Long Description (Catalog Description)
Prerequisites: Candidacy for a Masters Degree in Environmental Science. The goal of this course is to acquaint the student with the demands of real-world projects and deadlines. The student will be given a topic within the realm of their environmental education, and will be tasked with writing a 2000-word research paper within 48-hours on the topic.

Course Typically Offered	Career
Fall	Graduate

ENSC60021 - Oral Examination

Department(s)
Environmental Science

Long Description (Catalog Description)
Prerequisites: Candidacy for a Masters Degree in Environmental Science and completion of ENSC 60011 and ENSC 60203. The oral exam is the capstone of the Masters program and must be taken by all students during the final full semester. Oral exams test the student's knowledge in three areas: 1) coursework, 2) selected readings, and 3) general environmental issues and global concerns.

Course Typically Offered	Career
All Sessions	Graduate

ENSC60173 - Mammalogy

Department(s)
Environmental Science

Long Description (Catalog Description)
Prerequisites: Six semester hours in Biology. Two hours of lecture and two hours of laboratory per week. This course introduces graduate students to mammals. Lectures will examine the major topics of mammalian biologyk including the evolutionary history, classification, adaptations, ecology, and natural history of mammals. Field techniques for the study of mammalian biodiversity and abundance will also be covered in this course. Field trips will be required. (Crosslisted as BIOL/ENSC 60173.)

ENSC60313 - Sustainable Development in Costa Rica

Department(s)
Environmental Science

Long Description (Catalog Description)
This program examines how Costa Rica has managed their natural resources to conserve biodiversity, including ecosystem service payments, the social value placed on conservation, the educational system's approach to conservation, and the political history that has allowed Costa Rica to emerge as the only stable political regime and economy in Central America and the second-most famous ecotourism destination in the world. Their emerging economy creates unique challenges to balance development with conservation and creates a unique opportunity for students to observe sustainable development first-hand, engage in critical and reflective thinking about resource consumption, and evaluate the social implications of sustainability.

Career
Graduate

ENSC60343 - Service Learning in Environmental Science and Sustainability

Department(s)
Environmental Science

Long Description (Catalog Description)
This course engages students in hands-on, community-based projects in the environmental and sustainability sciences. Students will collaborate with a community group to design,implement, and assess sustainable solutions to environmental challenges, fostering an understanding of environmental principles and community engagement. Through real-world applications, students will cultivate essential skills and knowledge to become proactive stewards of our planet.

Career
Graduate

ENSC60353 - Wildlife Ecology and Management

Department(s)
Environmental Science

Long Description (Catalog Description)
Prerequisites: Six semester hours in Biology. Two hours of lecture and a three-hour laboratory each week. This discussion-oriented course introduces graduate students to the general principles of wildlife ecology and how those principles can be applied to wildlife management and conservation. The objectives of this course are 1) to provide an introduction to the major concepts of Wildlife Ecology and Management and 2) to apply the scientific method to ecological problems. Laboratory exercises are required. (Crosslisted as BIOL/ENSC 60353)

Career
Graduate

ENSC60503 - Environmental Methods and Statistics

Department(s)
Environmental Science

Long Description (Catalog Description)
This course is a laboratory and field-based course that presents essential general science and specific environmental methods, techniques, and theory. Students are exposed to the basic tools of environmental science - observation and notation, data gathering, using statistics, sampling, lab and field techniques, surveying, and safety. Specific environmental methodologies relating to soil, water, and ecological systems are explained. The course presents a wide cross-disciplinary range of techniques and information.

ENSC60603 - South African Biodiversity and Human Development

Department(s)
Environmental Science

Long Description (Catalog Description)
This course aims to give students an immersive experience into South Africa's rapidly developing human population while the country simultaneously strives to preserve and conserve its natural heritage and biodiversity for future generations. The course will address the geopolitical and socio-economic aspects of South Africa's human development by visiting Soweto, the Apartheid museum, Voortrekker Monument and Isipho HIV/AIDS project. To experience firsthand wildlife preservation and conservation in practice, students will spend time in the Amakhala Game Reserve, Addo Elephant National Park, local nature reserves and villages. Here students will earn about current local, regional and international education programs, wildlife protection, active and passive management, eco-tourism and ongoing scientific research.

ENTR20153 - Entrepreneurial and Business Regulatory Environment

Department(s)
Entrepreneurship

Long Description (Catalog Description)
Prerequisite: Sophomore standing and must be a business major or student for whom the course is required by their major/minor. Legal and social aspects of business. New and established ventures must operate within complex legal and social environments. This course is designed to assist the future entrepreneur or manager in working within these regulatory environments, considering laws, policies, regulations and norms at all stages of a venture.

Course Typically Offered
Fall and Spring

Career
Undergraduate

ENTR20263 - Entrepreneurship and Innovation

Department(s)
Entrepreneurship

Long Description (Catalog Description)
This course explores the dynamic world of entrepreneurship and innovation, emphasizing the multifaceted societal role of entrepreneurs as problem solvers, innovators, and leaders. Through engaging lectures, lively discussions, and analysis of real-world case studies, participants will gain valuable insights into the crucial interplay between entrepreneurship and innovation. The curriculum is designed to equip students with the skills and knowledge necessary to navigate diverse environments and industries effectively. By exploring how to identify opportunities and cultivate innovative thinking, students will be prepared to chart their own path toward entrepreneurial success across any field, leveraging their newfound abilities to make significant contributions to society and the economy.

Career
Undergraduate

Emerging technologies provide new platforms and mediums for innovation, offering entrepreneurs ever greater opportunities to create

value in society. This course will
provide hands-on experience with the latest tools
entrepreneurs are using to develop
new products.

Career
Undergraduate

ENTR30303 - Entrepreneurial Leadership

Department(s)
Entrepreneurship

Long Description (Catalog Description)
Prerequisites: Must be a declared business major or ENTR minor. This course cannot be taken for credit by students admitted to or enrolled in the BNSF Neeley Leadership Program. This course is designed to give students an understanding of leadership processes that underlie the survival, effective functioning and self-determination of new and growing businesses. To this end, we will examine a number of topics that reflect key individual- and organizational-issues, and critical leadership competencies for entrepreneurs.

Course Typically Offered	Career
Fall and Spring	Undergraduate

ENTR30533 - Entrepreneurial Opportunity Recognition

Department(s)
Entrepreneurship

Long Description (Catalog Description)
Prerequisites: Must be a business major or ENTR Minor. Students may not receive credit for both ENTR 30533 (Entrepreneurial Opportunity Recognition) and ENTM 30773 (Entrepreneurship and Energy). The course provides an in-depth overview of the challenges involved in identifying and systematically evaluating opportunities for creating new ventures across a wide range of contexts, including startups, social enterprises, and large, established corporations.

Course Typically Offered	Career
Fall and Spring	Undergraduate

ENTR30543 - Entrepreneurial Innovation & Creativity

Department(s)
Entrepreneurship

Long Description (Catalog Description)
Prerequisites: ENTR 30533, must be a declared business major or ENTR minor. The field of entrepreneurship involves the study of sources of opportunities; the processes of discovery, evaluation, and exploitation of opportunities; and the set of individuals who discover, evaluate, and exploit them. As such, being creative is about solving problems or approaching opportunities in new and valuable ways. Creativity and innovation is of vital importance to entrepreneurship, so this course is designed to help students harness their creative confidence and focus on the discovery, evaluation and exploitation of entrepreneurial opportunities. This course focused on creativity as the driver of organizational innovation--from nonprofits and social enterprises, to start ups to family businesses to existing corporations. Using a variety of theories, frameworks and models, students will learn how to apply them to create, refine and test new ideas within entrepreneurial domains.

Course Typically Offered	Career

Course Typically Offered	Career
Spring	Undergraduate

ENTR40123 - Small Business Management

Department(s)
Entrepreneurship

Long Description (Catalog Description)
Prerequisites: ENTR 30533 and 40143, with a grade of at least a C-, and must be a declared Business major or ENTR minor. Includes coverage of aspects involved in operating a small business including accounting, financial controls, management and human resource practices, marketing and customer development, production, service level quality, and legal issues.

Course Typically Offered	Career
Rarely	Undergraduate

ENTR40143 - New Venture Development

Department(s)
Entrepreneurship

Long Description (Catalog Description)
Prerequisites: ENTR 30533 with a grade of C or better and must be a declared business major or ENTR minor. The focus is on strategic assessment and preparing plans capable of attracting necessary financing for new entrepreneurial ventures. Successful implementation and the preparation and use of pro forma financial statements as a management tool are emphasized. Students will work through the process of developing a business plan for an entrepreneurial venture.

Course Typically Offered	Career
Fall and Spring	Undergraduate

ENTR40163 - Ventures in Transition

Department(s)
Entrepreneurship

Long Description (Catalog Description)
Prerequisites: A declared business major or ENTR minor and ENTR 30533 with at least a grade of C. This course examines the changes likely to affect an entrepreneurial venture as it matures. The focus of the course is on how to effectively manage the growth of an entrepreneurial venture. Other implications of growth will also be discussed, such as changes in the strategy of the venture, performance downturns, sale or liquidation of the business, acquisition of another business, and initial public stock offerings.

Course Typically Offered	Career
Fall and Spring	Undergraduate

ENTR40233 - Family Business

Department(s)
Entrepreneurship

Long Description (Catalog Description)
Prerequisites: Must be a declared business major or ENTR minor. Entrepreneurial ventures often evolve into a family business. This course will explore the characteristics, unique strengths and specific challenges of family business. This includes issues of the next generation leaders, the legacy family members, the non-family employees, external service providers and governance of the family business itself.

Course Typically Offered	Career
Spring	Undergraduate

ENTR40243 - Raising Entrepreneurial Capital

Department(s)
Entrepreneurship

Long Description (Catalog Description)
Prerequisites: ENTR 30533 and 40143, must be a declared business major or ENTR minor. Many new ventures and innovations fail due to inadequate funding. This course will focus on understanding the financial operating model for new venture as it launches and grows and then consider the potential sources of funding once the staged financial requirements are identified. Major sources of funding for new ventures are reviewed and evaluated, including 'bootstrap' financing, crowdfunding, equity finding (angel investment and venture capital), debt financing, grant funding and digital currencies.

Course Typically Offered	Career
Fall and Spring	Undergraduate

ENTR40313 - Social Entrepreneurship

Department(s)
Entrepreneurship

Long Description (Catalog Description)
Prerequisites: Must be a declared business major or ENTR minor. Sustainable values-centered enterprises aim to address a vast array of economic and social problems, or leverage beneficial opportunities for relevant stakeholders, in an entrepreneurial fashion. This course is designed to introduce students to social and values-centered enterprises and provide them with the tools to contribute to the field through the generation of real-world solutions to socioeconomic problems or opportunities. The course will draw on some of the most accomplished practitioners of sustainable enterprising, as well as on historical and contemporary models to explore the unique range of issues and challenges facing a values-centered enterprise.

Course Typically Offered	Career
Fall	Undergraduate

ENTR40333 - Corporate Entrepreneurship

Department(s)
Entrepreneurship

Long Description (Catalog Description)
Prerequisites: ENTR 30533 with a grade of at least C-, and must be a declared business major or ENTR minor. Corporate entrepreneurship refers to entrepreneurship within existing for-profit or not-for-profit organizations. It is the practice of seeking innovative uses, markets, or owners of the organization's existing products, services, and technologies. It draws the creativity of the organization's personnel to new business possibilities that go beyond the current business model of the organization. It engages the entrepreneurial spirit in spawning a new vision from within the organization. By imparting proven, useful, and effective techniques for managing innovation and entrepreneurship within corporations, this course will position students to participate in the economic renewal of their companies, and potentially, their cities, states, and nations. Students will further learn to recognize organizational challenges; create innovative, value oriented solutions; and sell those solutions to management.

Course Typically Offered	Career
Spring	Undergraduate

ENTR40653 - Survey of Entrepreneurship

Department(s)
Entrepreneurship

Long Description (Catalog Description)
3 hours. Prerequisites: A minimum grade of C- in ACCT 20653 and must be a Business minor. This course introduces the student to the field of entrepreneurship. Students will learn about the individual entrepreneur, the importance of new venture creation, business plan development, and the different aspects of the creation, maintenance, and growth of a new venture over time. Students will learn about these components through a combination of assigned readings, in-class exercises, and individual and team projects.

Course Typically Offered	Career
Fall and Spring	Undergraduate

ENTR40970 - Special Problems in Entrepreneurship and Innovation

Department(s)
Entrepreneurship

Prerequisites: Must be a declared business major or ENTR minor. This course may be repeated for credit. (1-6 semester hours)

Course Typically Offered	Career
Fall and Spring	Undergraduate

ENTR60230 - Regulatory Environment for Entrepreneurs and Managers

Department(s)
Entrepreneurship

Long Description (Catalog Description)
1.5 credit hours. The primary focus of this course will be to examine the laws, policies, regulations, and norms that influence decision making for entrepreneurs and managers. Specifically, the course will examine the legal environments of new and established businesses including contract law, intellectual property law, and employment discrimination law.

Career
Graduate

ENTR60250 - Innovation & Entrepreneurship

Department(s)
Entrepreneurship

Long Description (Catalog Description)
A rigorous exploration of entrepreneurship and innovation as transformative forces for societal and economic impact. Emphasizing both theoretical frameworks and real-world applications, students will examine the multifaceted roles of entrepreneurs as innovators, change agents, and strategic leaders across diverse settings. Students will explore and use advanced technology to deepen their understanding of opportunity identification, designing disruptive solutions, and the challenges of achieving market validation.

Career
Graduate

ENTR65023 - Regulatory Environment for Entrepreneurs and Executives

Department(s)
Entrepreneurship

Long Description (Catalog Description)
Prerequisite: Must be an EMBA candidate. The primary focus of this course will be to examine the laws, policies, regulations, and norms that influence decision making for executives. Specifically, the course will examine business, contract law, agency law, intellectual property law and employment discrimination law. Additionally, the course highlights aspects of the international legal environment of business.

Course Typically Offered	Career
Summer	Graduate

ENTR70353 - Private Equity

Department(s)
Entrepreneurship

Long Description (Catalog Description)
Prerequisites: Open to MBA and MAc students; this elective course provides the theoretical background and practical application of private equity in the United States and the world. The principle focus of the course will be early stage venture capital. However, other elements of private equity such as leveraged buyouts and corporate venturing will also be reviewed. To ensure that a realistic perspective of private equity occurs in the class, cases and projects provided by active private equity professionals will be employed to illustrate material.

Career
Graduate

ENTR70513 - Venture Ideas

Department(s)
Entrepreneurship

Long Description (Catalog Description)
The course provides an in-depth overview of the challenges involved in identifying and systematically evaluating opportunities for creating new ventures across a wide range of contexts, including startups, social enterprises, and large, established corporations. As such, the focus of the course is centered on what should be done before writing a business plan and embarking on the development and launch of a new venture.

Course Typically Offered	Career
Spring	Graduate

ENTR70523 - New Venture Planning

Department(s)
Entrepreneurship

Long Description (Catalog Description)
The course focuses on providing practical experience associated with the business start-up process. Specifically, students working in teams will take an identified business opportunity and develop a proposed new business centered on a product or service. Additionally, discussions centered on the challenges and opportunities associated with new venture creation will be conducted. The overarching goal of the course is to provide students with an

Course Typically Offered

Course typically offered entrepreneurial process, and the implications of entrepreneurial management for business leaders.

ENTR70533 - Funding Entrepreneurial Ventures

Department(s)
Entrepreneurship

Long Description (Catalog Description)
The course focuses on helping students develop the skills needed to successfully execute a capital raise or financing for an early-stage venture. Major sources of funding for new ventures are reviewed and evaluated, including 'bootstrap' financing, crowdfunding, equity finding (angel investment and venture capital), debt financing, grant funding and digital currencies. Pro forma financial models will be taught as a means to communicate a comprehensive understanding of a business opportunity to capital providers.

Career
Graduate

ENTR70543 - Corporate Venturing

Department(s)
Entrepreneurship

Long Description (Catalog Description)
The course focuses on seeking innovative uses, markets, or owners of the organization's existing products, services, and technologies. It draws the creativity of the organization's personnel to new business possibilities that go beyond the current business model of the organization. It engages the entrepreneurial spirit in spawning a new vision from within the organization. By imparting proven, useful, and effective techniques for managing innovation and entrepreneurship within corporations, this course will position students to participate in the economic renewal of their companies, and potentially, their cities, states, and nations. Leaders in this course will further

Career
Graduate

learn to recognize organizational challenges; create innovative, value oriented solutions; and sell those solutions to management.

ENTR70630 - Data Analytics Capstone for Entrepreneurial Decision Making

Department(s)
Entrepreneurship

Long Description (Catalog Description)
Prerequisites: Admitted to Master of Science in Business Analytics program. This course is designed to prepare students to recognize challenges faced by organizations and to create innovative, value-oriented solutions using analytical methods. Students engage with business professional to define a business issue, identify the necessary data and resources needed to provide solutions, and ultimately communicate those solutions to management.

ENTR75980 - Entrepreneurship

Department(s)
Entrepreneurship

Long Description (Catalog Description)
1.5 Credit Hours. Prerequisite: Must be an EMBA candidate. This course focuses on the pursuit of opportunity, which considers the difference between an
idea and an opportunity. It addresses the skills and

know-how required to recognize, assess and exploit an opportunity. Students will apply a strategic tool to determine the difference between an idea and an opportunity, conduct an opportunity assessment, and present their assessment to a team of outside judges. This course will utilize a range of techniques, methods and approaches to address the learning styles of everyone in the class. In the process, students will improve their analytical capabilities, strengthen their ability to execute by understanding and applying elements in the entrepreneurial process, and enhance their skill in pitching their concepts.

Course Typically Offered	Career
Spring	Graduate

ENTR75990 - Innovation

Department(s)
Entrepreneurship

Long Description (Catalog Description)
Prerequisites: Must be an enrolled EMBA student. Creativity and innovation are key drivers for economic activity and wealth generation, as well as for individual and community well-being. Entrepreneurs in growing businesses, large firms, the social sector and government are upsetting the status quo, altering accepted ways of doing things, transforming industries and finding meaning for themselves and those with whom they work. This course focuses on two key themes. One is creativity and innovation and the other is the pursuit of opportunity, which considers the skills and know-how required to exploit opportunity and create social and economic value. Students will learn to recognize their own creative talents, apply creative problem-solving techniques to tasks and challenges, (3) recognize and remove blocks to innovation, and (4) understand and apply the elements in the entrepreneurial process.

FINA60003 - Economic Environment of Business

Department(s)
Finance

Long Description (Catalog Description)
A contemporary, real-world course focusing on the economic environment within which today's businesses operate taught from the perspective of the practicing manager. Content is both national and international in flavor. Highlights include study of the general economy, market structure and public policy, economic analysis of industries and business cycles, and economics of the firm. International comparative

advantage is stressed. The course is taught through the use of materials, tools, and databases readily available to the manager.

Course Typically Offered	Career
All Sessions	Graduate

FINA60010 - Financial Management I

Department(s)
Finance

Long Description (Catalog Description)
1.5 credit hours. Prerequisites: ACCT 60010, and must be an MBA or MAc student. Financial Management I is the core MBA course in finance. It is the first part of a two-course introduction to financial decision making. The fundamental question in finance is how to determine value. To answer this question, in this course we will focus on how financial managers identify projects that create value to the firm (investment decisions.) The course topics will include cash flow valuation, bond and stock valuation, capital budgeting and project evaluation, and a brief introduction to the concepts of cost of capital.

Career
Graduate

FINA60011 - Finance Fundamentals

Department(s)
Finance

Long Description (Catalog Description)
The course is designed to help bridge the gap between an undergraduate experience in Finance and a graduate level course. As such, there is less emphasis on memorization of terminology and much greater emphasis on critical thinking, analytics, and decision-making. This course will review some of the basic concepts, but a major emphasis will be placed on identifying and describing practical applications of key concepts by means of case studies and projects, with emphasis on the ambiguities and nuances occurring in applying theory to empirical projects. This is also supplemented by developing students' critical thinking skills through in-depth analysis of financial decisions from a managerial perspective. This course will help students better understand the key issues that managers face when they make investment decisions, including technical issues, such as knowledge of cash flows, time-value of money, valuation principles, but also big picture issues, examining what the sources of value creation are, how to deal with managerial biases and estimation uncertainty, and how investment decisions must fit with the strategic vision of the firm.

Career
Graduate

FINA60013 - Management of Financial Resources

Department(s)
Finance

Long Description (Catalog Description)
Prerequisite: ACCT 60010, or concurrent enrollment in ACCT 60010. Cannot receive credit for FINA 60013 if credit has been received for FINA 60010, FINA 60011 or FINA 70010. A study of the acquisition and management of the financial resources of the firm. The emphasis is on developing and understanding decision making concepts related to such topics as valuation, cost of capital, capital budgeting, dividend policy, debt policy, and corporate control. The interaction between investment and financing decisions in the marketplace is emphasized in the context of risk-return considerations, and the obligation of management to security holders is considered. Where appropriate, the global environment of decisions is stressed.

Course Typically Offered	Career
Fall and Spring	Graduate

FINA60020 - Managerial Economics

Department(s)
Finance

Long Description (Catalog Description)
1.5 credit hours. Price and output determination in free markets is covered first. Then the relationship between the firm's production function and its cost structure is described. Costs and industry market structure and its importance to pricing strategies are discussed in detail. Public policy, such as anti-trust legislation and government price supports that affect firm/industry behavior are covered throughout the course. Actual business examples will be used to illustrate application of theory.

Career
Graduate

FINA60110 - Finance and Analytics

Department(s)
Finance

Long Description (Catalog Description)
Prerequisites: Admitted to Master of Science in Business Analytics program. This course examines a range of finance topics with an emphasis on critical thinking, data driven decision-making, and complex analytics and modeling.

Career
Graduate

FINA65000 - Economic Environment of Business

FINA70610 - Energy Macroeconomics

Department(s)
Finance

Long Description (Catalog Description)
1.5 credit hours. This course focuses on the fundamentals of global supply and demand for primary fuels - oil, coal, natural gas, hydroelectricity, nuclear and alternatives. The electric power generation industry and the transportation fuel industry is examined to determine the impact of newly discovered natural gas resources in the United States. The case for a long term US national energy policy is studied in detail. Finally, the impact of technology on improved energy efficiency and new energy supply is discussed.

FMLY81205 - LIC Clinical Family Medicine

Department(s)
Medical School Acad Dept

Long Description (Catalog Description)
The Family Medicine clerkship is centered on the long-lasting and caring relationship between physician-patient and family relationship. The clerkship highlights the importance of comprehensive, ongoing care for patients of all ages and genders as well as the benefits of integrating the biological, clinical and behavioral sciences to patients and the health care system. Students will understand the role of serving as patient¿s or family¿s advocate in all health-related matters in a variety of clinical settings. The clinical experience will focus on outpatient primary care but will allow students the opportunity to also see the full depth and breadth of family medicine in other clinical environments. This clerkship will provide opportunities for each student to acquire knowledge of community resources available for patients and families. A solid understanding of the social determinants of health is a main goal of the clerkship as students work with health care teams to eliminate barriers to access and care.

FNRT20203 - Dance and Music: Living Art, Living Culture

Department(s)
Fine Arts Interdisciplinary

Long Description (Catalog Description)
Students in this course will travel to Budapest, Prague and Vienna and gain information from direct experiences in the artistic disciplines of dance and music, through a lens of history and culture. This study abroad experience will introduce students to performance, creation, observation, and the development of the critical language of dance and music as they explore a range of perspectives that define the cultural and historical forces that impact the development of national identity. With this ability to integrate, they will situate themselves inside of these societies: living art, living culture.

FNRT20903 - Children, Creativity and the Fine Arts

Department(s)
Fine Arts Interdisciplinary

Long Description (Catalog Description)
Prerequisite: Enrollment is restricted to majors and minors in the College of Education, the College of Fine Arts, Harris College of Nursing and Health Sciences, Child Development, and Psychology. Others may be admitted by the instructor on a case-by-case basis. This multidisciplinary course will provide TCU students with the experiences and tools to design meaningful arts learning experiences for children. Students will spend five weeks in each art content area: visual art, music, and dance. Students will develop their creative capacities in each of these disciplines by examining and critiquing art, creating art and designing elementary art curricula.

FTDM10000 - General Transfer Credit-FAR

Department(s)
Film,Television&Digital Media

Long Description (Catalog Description)
General Transfer Credit-FAR credit.

Course Typically Offered	Career
Administrative Use Only	Undergraduate

FTDM10013 - TV Studies for Non-Majors

Department(s)
Film,Television&Digital Media

Long Description (Catalog Description)
Lecture and viewing sessions. An introduction to the field of television studies, including an examination of various approaches to the study of television history and the television industry within appropriate social and cultural contexts. Viewing of significant programming in television history. Designed for non-majors.

Course Typically Offered	Career
Summer	Undergraduate

FTDM10053 - Survey of Film

Department(s)
Film,Television&Digital Media

Long Description (Catalog Description)
Lecture and viewing sessions. Includes examination of the development of film structure and aesthetics within appropriate social and cultural contexts. Viewing of significant films in cinema history. Designed for non-majors. FTDM majors may not use this course to fulfill major requirements or Fine Arts requirement.

Course Typically Offered	Career
Rarely	Undergraduate

FTDM10073 - Media Adaptations

Department(s)
Film,Television&Digital Media

Long Description (Catalog Description)
Examination of film/television adaptations from literature, with emphasis on the discussion of style, structure, and characterization, and on the cultural factors which affect adaptations (financial expectations of different media, censorship and self-regulation of content, etc.) Topics may include film/television programs adapted from plays, short fiction, or novels; the course may also address novelizations of stories which first appeared as films or television programs, musical adaptations of non-musical films, and remakes.

Course Typically Offered	Career
Rarely	Undergraduate

FTDM10113 - History of Broadcasting

Department(s)
Film,Television&Digital Media

Long Description (Catalog Description)
Lecture and viewing sessions. An intensive overview of the history of radio, television and related electronic media from 1900 to the present. Topics include the rise of the network system, programming and the evolution of broadcast technology. This course is designed for majors; the minimum acceptable grade is a 2.0 "C".

Course Typically Offered	Career
Fall and Spring	Undergraduate

FTDM10123 - History of Film

Department(s)
Film,Television&Digital Media

Long Description (Catalog Description)
Lecture and viewing sessions. An intensive history of film from 1890 to the present. Includes examination of the development of film structure within social and cultural contexts, the Hollywood studio system, and

selected international cinema systems. This course is designed for majors; the minimum acceptable grade is a 2.0 "C". FTDM 10053 may not substitute for this course.

Course Typically Offered	Career
Fall and Spring	Undergraduate

FTDM10143 - The Art of Film and TV

Department(s)
Film,Television&Digital Media

Long Description (Catalog Description)
An overview of how films and television programs can be read and analyzed in terms of artistic and narrative form. The course is designed to complement and provide a framework for all other FTDM courses. This course is designed for majors and minors; the minimum acceptable grade is a 2.0 C.

Course Typically Offered	Career
FALLSPRING	Undergraduate

FTDM10153 - Media Milestones (Film and TV)

Department(s)
Film,Television&Digital Media

Long Description (Catalog Description)
An intensive overview of significant milestones in the development of entertainment media with a primary focus on film and television. Examines significant historical contexts (industrial, cultural, technological) in which media have been produced in the United States and elsewhere. This course is designed for majors; the minimum acceptable grade is a 2.0 "C".

Course Typically Offered	Career

FTDM20083 - Television Film and Religion

Department(s)
Film,Television&Digital Media

Long Description (Catalog Description)
Lecture and viewing sessions. This course explores how television and film have used religious characters and themes to address political and social issues. Topics addressed might include subjects such as the Cold War and cultural diversity. Media theories such as agenda setting and cultivation are used to interpret selected television and film narratives.

Course Typically Offered	Career
Spring	Undergraduate

FTDM20113 - Pre-Production

Department(s)
Film,Television&Digital Media

Long Description (Catalog Description)
Prerequisites: FTDM 10143. This course is designed to give students an overview of the production process, with the focus on pre-production planning. Students will learn how to acquire and develop a property, the basics of production financing, budgeting, scheduling, production and set management. Students will learn the role and responsibilities of jobs relating to film and television production, and the basic skills needed to perform those functions.

Career
Undergraduate

FTDM20203 - Audio Production I

Department(s)
Film,Television&Digital Media

Long Description (Catalog Description)
Prerequisites: A 2.0 "C" grade in FTDM 10123; FTDM majors only. Fundamentals of audio production. Lecture and laboratory projects designed to acquaint students with audio production requirements and responsibilities.

Course Typically Offered	Career
Every other spring	Undergraduate

FTDM20213 - Basic Video Production

Department(s)
Film,Television&Digital Media

Long Description (Catalog Description)
Prerequisites: A 2.0 C grade or higher in FTDM 10123 or FTDM 21713; FTDM and Sports Broadcasting majors only. Students will learn the basics of video production, including principles of camera work, shot composition, audio techniques, and basic lighting concepts, through a series of lectures and labs. This class provides students with a foundation for advanced production classes.

Course Typically Offered	Career
Fall and Spring	Undergraduate

FTDM20243 - Lighting and Design

Department(s)
Film,Television&Digital Media

Long Description (Catalog Description)
Prerequisites: A 2.0 "C" grade or higher in FTDM 10123; FTDM majors only. Lecture and laboratory. Theory and practice of lighting and production design for film and video.

Course Typically Offered	Career
Rarely	Undergraduate

FTDM20313 - Production

Department(s)
Film,Television&Digital Media

Long Description (Catalog Description)
Prerequisites: A 2.0 C grade or higher in FTDM 20113; FTDM majors only. This course will build upon the skills learned in the pre-production course, introducing students to the practical skillset required to produce professional content relevant in today's industry. Students will explore multiple examples of production including narrative film and television, non-fiction film and digital marketing content. Students will also be introduced to the principles of post-production, in preparation for the next course in the production sequence. Students will shoot and edit individual and collaborative projects, working to create professional material to include in their portfolio.

Career
Undergraduate

FTDM20510 - Radio Broadcasting on KTCU

Department(s)
Film,Television&Digital Media

Long Description (Catalog Description)
Prerequisites: FTDM majors only: a 2.0 C grade or higher in FTDM 10153 or permission of the department. Maximum 3 semester hours; 1-3 semester hours per semester. Students will study basic radio station operations, including announcing, writing for radio, basic audio production, programming fundamentals, and promotions. The class includes 9 hours of on-air lab work, per weeks, at KTCU FM 88.7 (this could include some nights and weekends). Hours of lab TBD.

Course Typically Offered	Career
RARELY	Undergraduate

FTDM20523 - Business of Media

Department(s)
Film,Television&Digital Media

Long Description (Catalog Description)
Prerequisites: A 2.0 C grade or higher in FTDM 10153; FTDM majors and Sports Broadcasting majors only. This course provides an intensive overview of radio, TV, and film business practices, including the structure of media companies; how media conceptualize and measure their audience; strategies (i.e., promotion, advertising) media companies use to attract an audience, and regulatory structures that govern the radio, TV, and film industries.

FTDM30463 - Media Decades

Department(s)
Film,Television&Digital Media

Long Description (Catalog Description)
Prerequisites: A 2.0 C or higher in FTDM 20583 or FTDM 30103 . This course examines media texts in their historical and cultural contexts, considering how

film, TV shows, and other media both reflect and affect the time and place in which they are made. Each decade can only be taken once. (6 semester hours maximum; 3 hours per semester.) May be repeated for credit under different decades.

Course Typically Offered	Career
Contact Department For Details	Undergraduate

FTDM30473 - History in the Movies

Department(s)
Film,Television&Digital Media

Long Description (Catalog Description)
Films about historical events may inspire us to learn more about history; however, they may also present us with inaccurate information, and they are always subjective. This course examines how specific historical events and the lives of historical figures have been depicted in Hollywood films. The course will examine the typical structures and themes of these "based-on-a-true-story" movies and how changing cultural attitudes affect the depiction of specific events from the past.

Course Typically Offered	Career
Rarely	Undergraduate

FTDM30483 - Media Authorship

Department(s)
Film,Television&Digital Media

Long Description (Catalog Description)
Prerequisites: A 2.0 C or higher in FTDM 20583 or FTDM 30103. In this course, students will study the concept of authorship in media production, which is always in essence a collaborative endeavor. In this course, students will identify individual creative vision by viewing film and/or TV texts and how authorship has been seen historically in the media industries and by audiences.

Course Typically Offered	Career
Contact Department For Details	Undergraduate

FTDM30493 - Sinatra and Popular Culture

Department(s)
Film,Television&Digital Media

Long Description (Catalog Description)
Prerequisites: A 2.0 "C" grade or higher in FTDM 20583; FTDM majors only. An examination of the career of Frank Sinatra and his significance in 20th Century American popular culture. Sinatra's career will provide insight into: developments in recorded music from single '78 records to theme LP albums; Hollywood's shift from the 1940s-era studio system to the independent filmmaking of the 1960s; the uses of celebrity to endorse political policies and candidates; the establishment of Las Vegas as an entertainment destination.

Course Typically Offered	Career

Geography

Long Description (Catalog Description)
This course is an introduction to Geographic Information Systems (GIS), with a focus on the use of GIS for applications that are important for real estate professionals. No prior knowledge of GIS is assumed for this course, although students should have some facility with basic mathematics, statistics, and spreadsheet programs. Students will develop familiarity with leading GIS software programs and build experience managing property-related databases, conductinglocational analysis, site-suitability analyses, mapping market trends, risk-assessment, and utilizing GIS to navigate permitting, zoning, and other regulatory processes.

Career
Undergraduate

GEOG30503 - Topics in Regional Geography

Department(s)
Geography

Long Description (Catalog Description)
An analysis of the human and physical geography of a specific region. Examples of regions include Texas, Sub-Saharan Africa, and Eastern Europe. Regional characteristics investigated may include economic, political, historical, and cultural components as well as topography, climate, and natural resources. May be repeated for credit provided the specified region changes.

Course Typically Offered	Career
Rarely	Undergraduate

GEOG30513 - Geography of the United States

Department(s)
Geography

Long Description (Catalog Description)
An exploration of the human and physical geography of the United States. Areas of the country, such as the Pacific Northwest and New England, will be surveyed, analyzing the physical, historic, cultural, and economic characteristics that embody their unique regional identities.

Course Typically Offered	Career
Every other spring	Undergraduate

GEOG30523 - Geography of Latin America

Department(s)
Geography

Long Description (Catalog Description)
An exploration of the human and physical geography of Latin America. This course analyzes Latin America from a geographical perspective and addresses topics such as landforms, climate, environmental hazards, indigenous peoples, culture, ethnicity, religion, agriculture, political geography, population, cities, and economic production.

Course Typically Offered	Career
Fall	Undergraduate

GEOG30533 - Geography of Western Europe

Department(s)
Geography

Long Description (Catalog Description)
An exploration of the human and physical geography of Western Europe. Countries and regions of the realm will be surveyed, analyzing their economic, political, language and religious characteristics as well as topography, climate, and natural resources. Themes may include the impact of population trends, environmental problems, trade and economic development, interactions between ethnic groups, and geopolitical change.

Course Typically Offered	Career
Every other spring	Undergraduate

GEOG30703 - Topics in Systematic Geography

Department(s)
Geography

Long Description (Catalog Description)
Concepts, principles, patterns, and processes associated with a specific subdiscipline in geography. Examples of topics include Economic Geography, Geopolitics, Medical Geography, and Physical Geography. May be repeated for credit provided the specified subdiscipline changes.

Course Typically Offered	Career
Rarely	Undergraduate

GEOG30713 - Urban Geography

Department(s)
Geography

Long Description (Catalog Description)
Urban Geography is the geographical study of cities. Examples of topics include: urban ecosystems; the role of physical geography in the origins and growth of cities; theoretical models of urban size, location, and land use structure; the internal geography of urban economic and social activity; and international and historical variation in the form, functions, and degree of urbanization.

Course Typically Offered	Career
Every other fall	Undergraduate

GEOG30723 - Cultural Geography

Department(s)
Geography

Long Description (Catalog Description)
Cultural Geography is the study of human culture from the perspectives of its five geographic themes: culture region, diffusion and migration, cultural ecology, cultural landscape, and cultural integration. Each theme is applied to a variety of topics, which may include religion, language, cultural conflict, folk culture, popular culture, and demography.

Course Typically Offered	Career
Spring	Undergraduate

GEOG30733 - Geography of Religion

Department(s)
Geography

Long Description (Catalog Description)
The Geography of Religion is the study of religion from the spatial perspective, utilizing the five themes of cultural geography: region, diffusion, culture-environment interaction, landscapes, and integration. Our most important topics cover the relationship between physical geography and religion, and from this context we will analyze religions, past and present.

Course Typically Offered	Career
Every other fall	Undergraduate

GEOG30743 - Applied Geography

Department(s)
Geography

Long Description (Catalog Description)
Problem-solving by application of geographic concepts, methodologies, and techniques. Examples are drawn from physical and human geography.

Course Typically Offered	Career
Rarely	Undergraduate

GEOG30753 - Population Geography

Department(s)
Geography

Long Description (Catalog Description)
In this course, students engage with contemporary debates around world population growth and change. Course topics include demographic data and methods; the history and future of world population growth; fertility and population control in the developing world; aging in the developed world; global trends in mortality and disease; internal migration and immigration; and population, climate change, and environmental sustainability.

Course Typically Offered	Career
Rarely	Undergraduate

GEOG30763 - Economic Geography

Department(s)
Geography

Long Description (Catalog Description)
Economic Geography is the study of how elements within the economy are spatially arranged, as well as the ways that space, place and spatial scales shape economic activities in different parts of the world. Through a series of readings, discussions, and research assignments, this course examines the distribution of economic activities on the earth's surface; market resource and transportation factors in location theory, and the role of state, market and civil society's agents in management of the economy. Students are further introduced to Geographic Information Systems (GIS) through content-focused lab assignments, though no previous experience with GIS is required for this course.

Course Typically Offered	Career
Fall	Undergraduate

GEOG30773 - Geography of Beer and Wine

Department(s)
Geography

Long Description (Catalog Description)
This course uses beer (and wine) as a lens to examine the intersections of historical, environmental, cultural, legal, and economic geography. Students are introduced to the major systematic fields of Geographic inquiry: Historical Geography, Cultural Geography, Economic Geography, etc through focused lessons examining the role of beer production in the establishment of historical civilizations, how climate change affects barley and hop production, and the locational characteristics required for a brewery or brewpub to be successful.

Course Typically Offered	Career
Spring	Undergraduate

GEOG30783 - Geography of Tourism

Department(s)
Geography

Long Description (Catalog Description)
Since mass tourism's emergence in the late 19th century, tourism has played an increasingly significant role in shaping and reshaping the geographies of places around the world. This course pays specific attention to the ways in which places develop into tourist

destinations, as well as the social, environmental, economic, and political ramifications of that development.

Career
Undergraduate

GEOG30793 - Sports, Geography, & Society

Department(s)
Geography

Long Description (Catalog Description)
This course covers the study of sport through the lens of social science. It introduces students to social scientific theory and analytic methods in the context of historical and contemporary sports topics. Course topics include sports and cultural geography; sports and nationalism; race, gender, politics, and sports; sports business and economics; and sports analytics.

Course Typically Offered	Career
Summer	Undergraduate

GEOG30803 - Topics in Environmental Geography

Department(s)
Geography

Long Description (Catalog Description)
This course number will be used for trial runs of upper-division environmentally-focused Geography courses. All the classes will develop student's understanding of Environmental Geography and Human-Environment Interactions. May be repeated for credit as course topic changes.

Career
Undergraduate

GEOG30813 - Environment and Society

Department(s)
Geography

Long Description (Catalog Description)
This course examines relationships between people and the environment from multiple perspectives, providing a context for thinking about the causes and consequences of environmental change and their spatial patterns around the world. Of particular interest are the cultural, ethical, economic, technological, and population considerations that make humans want to use, protect, destroy, or adapt to environmental systems and their components. This course will also address the function of specific environmental systems themselves, including how they influence and respond to human actions.

Course Typically Offered	Career
Every other spring	Undergraduate

GEOG30823 - Nuclear Geographies

Department(s)
Geography

Long Description (Catalog Description)
In this course, we will examine the spatial dimensions of highly contentious issues surrounding nuclear technologies, including power generation, weapons, and medicine. We will approach each of these issues through the perspectives offered by several subdisciplines within Geography, especially Environmental, Economic, Political, and Cultural Geography.

Career
Undergraduate

GEOG30903 - Urban Economic Development

Department(s)
Geography

Long Description (Catalog Description)
This course introduces students to urban economic development (UED) policy and strategy in the United States. In particular, students are encouraged to respectfully and thoughtfully address the assumptions

and biases embedded in urban economic development policy. For example, final papers will examine the presence or lack thereof of equity and sustainability aims in economic development initiatives, and analyze UED projects that respond to the specific challenges of rising inequality and climate change that threaten UED activity in the US and worldwide.

Career
Undergraduate

GEOG30970 - Topical Studies in Geography

Department(s)
Geography

Long Description (Catalog Description)
Topical studies in Geography.

Course Typically Offered	Career
Rarely	Undergraduate

GEOG30990 - International Residential Study

Department(s)
Geography

Long Description (Catalog Description)
This course represents credit earned through a semester study abroad experience with an institution or program with which Texas Christian University has an official agreement to accept credit. The site and specific content will be identified on the official transcript. Courses appearing on a student's official transcript have been included in the student's grade point average.

Course Typically Offered	Career
Study Abroad Course	Undergraduate

GEOG40003 - Senior Honors in Geography

Department(s)
Geography

Long Description (Catalog Description)
Prerequisites: GEOG 30003 or permission of instructor. A senior Honors Thesis research paper or equivalent creative project, under faculty direction, in a selected area of geography.

Course Typically Offered	Career
Contact Department For Details	Undergraduate

GEOG40010 - Field Studies in Geography

Department(s)
Geography

Long Description (Catalog Description)
An intensive field study in the regional and systematic geography of a selected area. Examples include France, Central America, and the American West. May be repeated for credit provided the selected area changes.

Course Typically Offered	Career
Rarely	Undergraduate

GEOG40020 - Geography Internship

Department(s)
Geography

Long Description (Catalog Description)
Prerequisites: GEOG 30313 or equivalent training with instructor's approval.
This course is only open to Geography majors. The purpose of this course is to supplement the internship experience of geography majors through written reflection, periodic conversation with a supervising professor, and exploration of connections between concepts in GIS and practices of GIS in different disciplines. Students may take this course a maximum of two times to earn up to 6 total credit hours. A maximum of 3 credit hours can be applied towards the Geography major. The remaining credit hours can be applied to the student's overall degree as general elective credits.

Career

History

Career
Undergraduate

GEOG40273 - Geog Of Soviet Union

Department(s)
History

Career
Undergraduate

GEOG40303 - Topics in Geospatial Technology

Department(s)
Geography

Long Description (Catalog Description)
Prerequisites: GEOG 30313 or with instructor permission. This course number will be used for trial runs of upper-division technically-focused Geography courses. All the classes will develop student's technical mapping and analysis skills using Geographic Information Systems software and/or statistical programs such as R or Python. May be repeated for credit provided the technical and/or topical focus changes.

Career
Undergraduate

GEOG40313 - Advanced Geographic Information Systems

Department(s)
Geography

Long Description (Catalog Description)
Prerequisites: GEOG 30313, or instructor consent. In this course, students gain experience with advanced applications of Geographic Information Systems (GIS) software. Topics covered include GIS modeling; web GIS applications and distributed GIS services; open-source GIS; developing geoprocessing scripts using the Python programming language; and the current state of the GIS profession. Students will also complete a semester-long course project in which they apply GIS techniques to a topic of their interest.

Course Typically Offered
Every other spring

Career
Undergraduate

GEOG40323 - Urban and Business Applications of Geographic Information Systems

Department(s)
Geography

Long Description (Catalog Description)
Prerequisites: GEOG 30313; another introductory GIS course; or instructor consent. This advanced GIS course gives students experience applying GIS to solve real-world urban and business problems. Topics covered include demographic analysis; remote sensing of urban areas; network analysis; 3D urban modeling; spatial statistics; time and GIS; geodemographic classification; market area analysis; and web GIS services. Students will also complete a semester-long group project that applies GIS to assist an organization or business in the Fort Worth area.

Course Typically Offered
Every other spring

Career
Undergraduate

GEOG40333 - Digital Cartography

Department(s)
Geography

Long Description (Catalog Description)
Prerequisites: GEOG 30313 or with instructor permission. Cartography refers to the art and science of map-making. Contemporary cartography is primarily accomplished using digital technologies including Geographic Information
Systems (GIS). Mapping is crucial to exploring and understanding distributions of
geographic phenomena. It is also an important phase of many database-intensive analyses, because a map is often the best way to visualize results and show them to others. Our emphases in this course will be on designing and producing both thematic and reference maps at multiple scales using symbols and visual hierarchies that allow the content of the maps to be effectively communicated and presented in aesthetically-pleasing and/or engaging ways. Topics covered include: significant eras in cartographic design, key historical and contemporary cartographers, map projections, symbolizing quantitative data, use of space, layout, compilation, verbal content, and the use of computer technology
in the design and production of maps.

Career
Undergraduate

GEOG40343 - AI Concepts and Large Language Model Applications

Department(s)
Geography

Long Description (Catalog Description)
This course provides an in-depth exploration of Artificial Intelligence (AI) with a focus on large language models (LLMs) and their applications in Geography. Students will gain foundational knowledge in AI and deep learning, develop skills in prompt engineering, and apply AI tools to solve real-world problems, particularly in geographic analysis and spatial data interpretation. The course emphasizes hands-on experience, ethical considerations, and culminates in a final project where students integrate AI concepts to design their own applications with a geographic focus.

GEOL30103 - Science and Society

Department(s)
Geology

Long Description (Catalog Description)
This three-credit hour lecture course will examine the connections between science and modern society. This will be accomplished by investing the role of science (particularly geoscience) in education and communication, and how scientific misconceptions

influence public perception and understanding of modern socioscientific issues such as dwindling freshwater resources and climate change.

Course Typically Offered
Spring

Career
Undergraduate

GEOL30112 - Geoscience Education Communication

Department(s)
Geology

Long Description (Catalog Description)
Prerequisites: 'C-' or better in GEOL 10113 and GEOL 20113. This 2.0 credit hour course is designed to introduce students to the field of geoscience education. This course will cover the nature of geoscience education, and the need for geoscience education specialists. Specifically, students will define geoscience education within the context of other science disciplines, examine how geoscientists think about learning, how students learn in geoscience classrooms, and investigate the role of geoscience education toward addressing modern socioscientific issues.

Career
Undergraduate

GEOL30113 - Weather and Climate

Department(s)
Geology

Long Description (Catalog Description)
Three hours lecture per week. Introduction to the basic concepts and principles of atmospheric science in a descriptive format; emphasizes the physics responsible for changes in weather and climate complemented with popular treatment. (Crosslisted as ENSC/GEOL 30113)

Course Typically Offered
Fall

Career
Undergraduate

GEOL30123 - Dinosaurs and Their World

Department(s)
Geology

Long Description (Catalog Description)
Three hours lecture per week. Prerequisite: GEOL 10113 or consent of instructor. A broad-based inquiry into dinosaurs, the biological and geological aspects of their world and those who study them. We will approach dinosaurs from many different fields of science in an attempt to reconstruct their world. The course is intended for science and non-science students.

Course Typically Offered
Fall and Spring

Career
Undergraduate

GEOL30123 - Beaches, Costs and Oceans

Department(s)
Geology

Long Description (Catalog Description)
Three hours of lecture per week. Fundamental principles that govern the evolution and nature of coastal environments. Examines the impact of natural oceanographic processes and the role of humans on the coastal environment. Survey of United States and world's beaches.

Career
Undergraduate

GEOL30133 - Historical Geology I

Department(s)
Geology

Long Description (Catalog Description)
Prerequisite: GEOL 10113 or equivalent. This first semester of a two semester lab/lecture introduces students to the general principles of earth history. Lab exercises and field trips introduce students to the practical aspects of earth history. Microscope work and field trips are mandatory.

Course Typically Offered	Career
Fall	Undergraduate

GEOL30143 - Historical Geology II

Department(s)
Geology

Long Description (Catalog Description)
Prerequisite GEOL 30133 or equivalent. This second semester of a two semester lab/lecture course continues with an in depth look at the details of the geological history of North America and the history of life on earth. Lectures focus on historical detail, while lab exercises and field trips focus on major groups of fossils in the lab and field. Microscope work and field trips are mandatory.

Course Typically Offered	Career
Spring	Undergraduate

GEOL30153 - Geology of National Parks

Department(s)
Geology

Long Description (Catalog Description)
Prerequisites: GEOL 10113, or permission of instructor. Study of dynamic geologic systems and the geology of the North American continent through the study of National Parks and Monuments in the United States. The three hours of lecture per week are designed for science majors and interested non-science majors, who wish to gain in-depth knowledge of processes that actively sculpt and have sculpted our continent through time. Particular emphasis is given to interpretation of visual features of the parks through visual aids. Discussions are encouraged and facilitated by the small class size.

Course Typically Offered	Career
Fall	Undergraduate

GEOL30163 - Evolution and Exploration of the Solar System

Department(s)
Geology

Long Description (Catalog Description)
Prerequisites: GEOL 10113, or any one of PHYS 10164/10263/10273, or permission of instructor. Three hours of lectures per week. This course will launch you into space with past and present spacecraft missions and bring you back to Earth with meteorite research. Throughout the semester, this course will examine the geology and geologic processes occurring on and within planetary bodies throughout the Solar System. This course is intended for science and non-science majors. (Crosslisted as GEOL/PHYS 30163.)

Course Typically Offered	Career
Fall	Undergraduate

Geology

Long Description (Catalog Description)
Prerequisite: permission of the instructor. The student is required to do independent research on a geologic problem, submit a paper and give an oral presentation of the findings. A faculty supervisor will be appointed for each research problem.

Course Typically Offered	Career
All Sessions	Undergraduate

GEOL40113 - Microclimatology

Department(s)
Geology

Career
Undergraduate

GEOL40113 - Structural Geomechanics

Department(s)
Geology

Long Description (Catalog Description)
Prerequisites: GEOL 30423. Designed for science majors who wish to gain in-depth knowledge of advanced structural geology processes by understanding the response of rocks to stress. The course focuses on geomechanical principles such as rock failure/behavior, rock strength, 3D stress and stress polygon, in situ stress, role of pore pressure, stress resolution on planes and reactivation of preexisting mechanical discontinuities. Particular emphasis is given to the determination of rock strength using micro mechanical tools and derivation of various petrophysical constraints from geophysical well logs.

Course Typically Offered	Career
Every other spring	Undergraduate

GEOL40223 - Sedimentology

Department(s)
Geology

Career
Undergraduate

GEOL40313 - Invertebrate Paleontology

Department(s)
Geology

Long Description (Catalog Description)
Prerequisite: permission of the instructor. Two hours lecture and one three hour laboratory period per week. Major groups of invertebrate fossils, their morphology, classification, paleoecology, geologic distribution and phylogeny. Field trips required.

Career
Undergraduate

GEOL40331 - Basic Seismics

Department(s)
Geology

Long Description (Catalog Description)
Prerequisites: GEOL 30143, 30223, 30423. Three hours lecture per week for five weeks. An introduction to techniques of gathering, processing and interpreting seismic data.

Course Typically Offered	Career
Fall	Undergraduate

GEOL40351 - Seismic Stratigraphy

Department(s)
Geology

Long Description (Catalog Description)
Prerequisites: GEOL 40331 or equivalent. Three hours lecture per week for five weeks. An introduction to the principles of seismic stratigraphy and their application in oil and gas exploration.

Course Typically Offered	Career
Fall	Undergraduate

GEOL40361 - Basic Well Log Interpretation

Department(s)
Geology

Long Description (Catalog Description)
Prerequisite: GEOL 30243. Three hours lecture per week for five weeks. An introduction to the use of borehole geophysical logs in formation evaluation, correlation and subsurface facies analysis.

Course Typically Offered	Career
Fall	Undergraduate

GEOL40393 - Soils in the Environment

Department(s)
Geology

Long Description (Catalog Description)
Prerequisite: one year of chemistry, ENSC 10143, or permission of the instructor. Two hours lecture and one three hour laboratory period per week. This course covers the formation, distribution, and classification of soils: major soil properties; field evaluation of soils; the use of soil survey information; and soil hydrology. The emphasis is on the study of soils as products of biophysical processes, and on soil properties of interest to geoscientists and natural resource managers.

Course Typically Offered	Career
Spring	Undergraduate

GEOL40413 - Map Interpretation

Department(s)
Geology

Long Description (Catalog Description)
Prerequisite: permission of the instructor. Two hours lecture and one three hour laboratory period per week. The construction and interpretation of geological maps.

Course Typically Offered	Career
Fall	Undergraduate

GEOL40423 - Petroleum Engineering

Department(s)
Geology

Long Description (Catalog Description)
Prerequisite: GEOL 50423. Petroleum engineering concepts and technology that are needed to find and produce oil and gas are discussed. This course focuses on drilling and production operations for non-engineers. Industry professionals will visit to discuss current technologies for producing hydrocarbon fluids.

Course Typically Offered	Career
Spring	Undergraduate

GEOL40433 - Siliciclastic Sequence Stratigraphy

Department(s)
Geology

Long Description (Catalog Description)
Prerequisites: GEOL 30243. This course introduces sequence stratigraphy within the context of all stratigraphy and overviews the history of sequence stratigraphy. It includes an overview of sequence stratigraphy principles and reviews basic fundamental concepts of surface- and facies-based physical stratigraphy. Included are reviews of architectural element analysis, sequence stratigraphy in seismic, borehole expression of sequences and overview of subsurface stratigraphic techniques.

Course Typically Offered	Career
Fall	Undergraduate

GEOL40443 - Applied Reservoir Simulation

Department(s)
Geology

Long Description (Catalog Description)
Prerequisites: ENGR 40223 or GEOL 40423. Oil and gas are essential sources of energy in the modern world. They are found in subsurface reservoirs in many challenging environments. Modern reservoir simulators are computer programs that are designed to model fluid flow in reservoirs. Applied reservoir simulation is the use of computer programs to help understand and forecast the performance of oil and gas problems. (Crosslisted as ENGR 40223/GEOL 40443.)

Career
Undergraduate

Cross Listed Courses
ENGR40233 Applied Reservoir Simulation

GEOL40453 - Fundamentals of Subsurface Geology

Department(s)
Geology

Long Description (Catalog Description)
Prerequisites: GEOL 10113, 30243 or 30423. Two hours lecture and one two-hour laboratory period per week. This course covers fundamental aspects of subsurface geology, including: 1) principles of the geophysical well logging and seismology, 2) common geophysical data processing and interpretation, and 3) different exploration methods of subsurface geology. Some common software packages used in the Environmental and Energy industries will be introduced and used over the semester.

Career
Undergraduate

GEOL40493 - Geomorphology

Department(s)
Geology

Long Description (Catalog Description)
Prerequisite: permission of the instructor. Two hours lecture and one two hour laboratory per week. Endogenic and exogenic processes and land forms; geologic control; short-term, long term and human-imposed landscape development; morphometric analysis and study of recent movements; environmental geomorphology. (Crosslisted as ENSC/GEOL 40493)

Course Typically Offered
Spring

Career
Undergraduate

Cross Listed Courses
ENSC40493 Geomorphology

GEOL40516 - Summer Field Course in Geology

Department(s)
Geology

Long Description (Catalog Description)
Prerequisite: permission of the instructor. Field investigations and mapping. Those planning to enroll should contact the Department of Geology by March 1 of the year in which enrollment is contemplated. Field work in rough and robust terrain required; a high degree of physical fitness recommended.

Course Typically Offered
Rarely

Career
Undergraduate

GEOL40623 - Advanced Historical Geol

Department(s)
Geology

Career

Every other spring

Career
Undergraduate

GEOL50433 - Coastal Processes

Department(s)
Geology

Long Description (Catalog Description)
Two hours of lecture and one two-hour laboratory per week. Advanced study of waves, winds, water levels, tides and currents and their interaction with shores, beaches, inlets, inner continental shelves and coastal structure. Other topics include tectonic, physical, climatic controls on coastline development, storms, and sediment transport in the coastal zone. Involves computer modeling. Required field trip to the Texas barrier islands.

Career
Undergraduate

GEOL50443 - Natural Hazards and Disasters

Department(s)
Geology

Long Description (Catalog Description)
Prerequisites: permission of the instructor. This course offers an in-depth exploration of natural hazards and disasters, including earthquakes, tsunamis, volcanic eruptions, floods, landslides, hurricanes, tornadoes, and wildfires. Students will examine the dynamic Earth system processes, including atmospheric, surface, and subsurface processes, that drive these phenomena while critically analyzing how human activities contribute to their frequency and severity. Through an interdisciplinary and global perspective, the course investigates how interconnected systems, such as climate change, tectonic activity, socio-economic factors, and anthropogenic influences, shape disaster occurrence, response, and long-term recovery. Emphasis is placed on global variations in risk perception, preparedness, response, and mitigation efforts, highlighting how various factors influence resilience and vulnerability across different regions. Lab exercises incorporate geospatial technology tools to assess risk, model disaster scenarios, and analyze the cascading effects of hazards on populations, infrastructure, and ecosystems.

GEOL50543 - Sedimentary Environments and Facies

Department(s)
Geology

Long Description (Catalog Description)
Prerequisite: Permission of instructor. Three hours lecture per week. Facies analysis and facies models applied to the problem of interpreting stratigraphic sequences and reconstructing paleogeography.

Course Typically Offered	Career
Every other spring	Undergraduate

GEOL50553 - Integrating and Interpreting Subsurface Geological Data

Department(s)
Geology

Long Description (Catalog Description)
Prerequisites: GEOL 50331 and 50361, or permission of instructor. A workstation-based practicum on managing and integrating geologic data. Students will become familiar with one or more widely-used software packages for handling multiple data sets used in oil and gas exploration and field development.

Course Typically Offered	Career
Every other spring	Undergraduate

GEOL50563 - Energy and Natural Resources

Department(s)
Geology

Long Description (Catalog Description)
Prerequisite: GEOL 10113 or equivalent. A broad overview of the natural resources utilized for energy, and the geologic, engineering and business sides of the energy industry. The course will acquaint students with all the steps in the production of oil and gas from developing a prospect to delivering a product, including how geologists decide where to drill, the study of drilling and completion operations, the technology required to produce oil and gas, and carbon sequestration. Students will also be acquainted with the natural resources and environmental issues associated with the generation of electricity, including coal, geothermal, biomass, uranium, tidal, hydroelectricity, and the rare earth elements required for renewable energy.

Course Typically Offered
Fall

GEOL50603 - Introduction to Geochemistry

Department(s)
Geology

Long Description (Catalog Description)
Prerequisite: CHEM 10114 and 10124 or permission of instructor. Three hours lecture per week. Application of basic chemical principles to understanding the origin, distribution and migration of chemical elements in the earth's lithosphere, hydrosphere, atmosphere and biosphere.

Course Typically Offered	Career
Every other spring	Undergraduate

GEOL50613 - Igneous and Metamorphic Petrology

Department(s)
Geology

Long Description (Catalog Description)
Prerequisite: GEOL 50233, or permission of instructor. Two hours lecture and one three hour laboratory period per week. Petrogenesis of igneous and metamorphic rocks based on field, petrographic, chemical and isotopic data. Inferences on the evolution and dynamics of the crust and mantle. Involves use of microscope.

Course Typically Offered	Career
Every other spring	Undergraduate

GEOL50623 - Volcanology

Department(s)
Geology

Long Description (Catalog Description)
Prerequisite: GEOL 50233, or permission of instructor. Two hours lecture and one three hour laboratory period per week. Types and processes of volcanic eruptions; characteristics of modern volcanic products; recognition and significance of ancient volcanic deposits in the stratigraphic record. Involves use of microscope. Field trip required.

Course Typically Offered	Career
Every other fall	Undergraduate

GEOL50633 - Geochemical Analysis

Department(s)
Geology

Long Description (Catalog Description)
Prerequisite: CHEM 10113 or equivalent. Project-based, integrated laboratory course covering instrumentation, data acquisition, data analysis and data presentation techniques used in the chemical investigations of geological and related systems including rocks, aquifers, streams and soils. (Crosslisted as ENSC/GEOL 50633)

Rarely	Undergraduate

GEOL50762 - Advanced Geographic Information Systems

Department(s)
Geology

Long Description (Catalog Description)
Prerequisite: GEOL 50721. Hands-on computer use to demonstrate advanced computer techniques for mapping. Introduction to Mapfactory, ERDAS and ArcView software programs to conduct raster and vector database layering projects for geological and environmental map production.

Career
Undergraduate

GEOL50763 - Groundwater Hydrology

Department(s)
Geology

Long Description (Catalog Description)
Prerequisites: GEOL 30443 and major field of study within the College of Science & Engineering with 60 earned hours, or graduate enrollment, or permission of instructor. This course is designed to teach the basics of groundwater hydrogeology including hydrologic cycle, aquifers, groundwater flow, groundwater recharge, water chemistry and groundwater contamination. At the end of this course, students will be able to understand the relationship between surface water and groundwater, groundwater protection, field methods, and groundwater development. (Crosslisted as ENSC/GEOL 50763.)

Career
Undergraduate

Cross Listed Courses
ENSC50763 Groundwater Hydrology

GEOL50773 - Introduction to Environmental Law

Department(s)
Geology

Long Description (Catalog Description)
Prerequisites: Major field of study within the College of Science & Engineering with 60 earned hours; or graduate enrollment. Students will be introduced to and will analyze selected federal statutes governing environmental remediation, discharge of pollution, and management of wastes, including the Comprehensive Environmental Response Compensation and Liability Act, the Resource Conservation and Recovery Act, the Clean Water Act, the Clean Air Act, the Endangered Species Act, and others, including the common law (nuisance, trespass, negligence.) Students will be introduced to the American legal system and the role of experts in lawsuits. Students will read and discuss in class statutes, case law, and related materials. (Crosslisted as ENSC/GEOL 50773.)

GEOL60423 - Overview of Petroleum Engineering

Department(s)
Geology

Long Description (Catalog Description)
Prerequisite: GEOL 50423. Petroleum engineering concepts and technology that are needed to find and produce oil and gas are discussed. This course focuses on drilling and production operations for non-engineers. Industry professionals will visit to discuss current technologies for producing hydrocarbon fluids. Graduate students will be expected to prepare and present a case study using current literature.

Career
Graduate

GEOL60433 - Siliciclastic Sequence Stratigraphy

Department(s)
Geology

Long Description (Catalog Description)
Prerequisite: Permission of instructor. This course introduces sequence stratigraphy within the context of all stratigraphy and overviews the history of sequence stratigraphy. It includes an overview of sequence stratigraphy principles and reviews basic fundamental concepts of surface- and facies-based physical stratigraphy. Included are review of architectural element analysis, sequence stratigraphy in seismic, borehole expression of sequences and overview of subsurface stratigraphic techniques.

GEOL60443 - Applied Reservoir Simulation

Department(s)
Geology

Long Description (Catalog Description)
Prerequisites: ENGR 40223 or GEOL 40423 or 60423. Oil and gas are essential sources of energy in the modern world. They are found in subsurface reservoirs in many challenging environments. Modern reservoir simulators are computer programs that are designed to model fluid flow in reservoirs. Applied reservoir simulation is the use of computer programs to help understand and forecast the performance of oil and gas reservoirs. Students will learn how to apply a reservoir simulator to a variety of realistic oil and gas problems. Graduate students will be expected to prepare and present a case study using current literature.

Graduate

GEOL60493 - Hydrology

Department(s)
Geology

Long Description (Catalog Description)
Prerequisite: GEOL 50493 or permission of instructor. Two hours of lecture and two hours of laboratory per week. Principles of groundwater flow, aquifer analysis, chemical and physical properties of groundwater. Modeling of groundwater flow and contaminant transport.

Career
Graduate

GEOL60513 - Carbonate Petrology

Department(s)
Geology

Long Description (Catalog Description)
Two hours lecture and one laboratory period per week. An examination of the chemical sedimentary rocks: limestones, dolomites, evaporites, chert, ironstones and phosphates, including their classification, genesis and diagenesis. The course has a large component of microscope study and fieldwork.

Course Typically Offered	Career
Spring	Graduate

GEOL60523 - Sandstone Petrology

Department(s)
Geology

Long Description (Catalog Description)
Two hours lecture and one laboratory period per week. Study of provenance, diagenesis and classification of sandstone using the petrographic microscope; consideration of the relationship between tectonics and sedimentation, especially sandstone composition.

Career
Graduate

GEOL60603 - Conventional Exploration: IBA

Department(s)
Geology

Long Description (Catalog Description)
Prerequisites: Permission of the instructor; graduate student in Geology. This course is an overview of methods used in exploration for conventional accumulations of oil and gas. We will focus on petroleum systems and mapping techniques, including basin analysis, the use of petrophysical data to determine reservoir characteristics, and mapping with logs and seismic utilizing industry software. The course will include an intensive eight-week, hands-on analysis of an actual industry dataset as a team and then presenting at the Imperial Barrel Award (IBA) competition (at no cost to the participant).

HCHS20003 - Global Healthcare Systems

Department(s)
Health And Human Science Gen

Long Description (Catalog Description)
This course provides an overview of the healthcare delivery system in the United States in comparison to different systems of countries around the globe. The course explores the drivers of change over time that shape the organization and delivery of healthcare services and opportunities for innovation and improvements in the cost, quality, and access

dimensions of healthcare services in these different systems. The course considers the settings in which healthcare services are delivered and the relationships between the different providers of those services and the payers (i.e., insurance companies) of those services. Discussion and learning activities will also focus on the expense of the U.S. healthcare system compared to single-payer and other systems of care and how those expenses translate to outcomes in association with access, equity, and quality of services

Career

HCHS20203 - Epidemiology & Biostatistics

Department(s)
Health And Human Science Gen

Long Description (Catalog Description)
Prerequisites: MATH 10043. This undergraduate course offers an engaging exploration into the captivating fields of Epidemiology and Biostatistics. Designedfor students pursuing health-related majors, this course demystifies complexities and provides students with a clear roadmap to comprehend health issues and outcomes in populations (Epidemiology) and apply statistical principles in assessing health-related data (Biostatistics). Emphasizing practical application, this course is structured to furnish students with essential knowledge and skills, empowering theirdecision-making in both health sciences practice and research.

Career
Undergraduate

HCHS30003 - Interprofessional Leadership Teams in Healthcare

Department(s)
Health And Human Science Gen

Long Description (Catalog Description)
Prerequisites: Junior Standing; HCHS 10003. This course builds on the core principles of interprofessional education (IPE) and interprofessional collaborative practice (ICP) to prepare leaders who drive collaboration, quality, and safety across the continuum of patient care. The course is aligned with the World Health organization¿s framework of IPE in which students of two or more professions learn about, from, and with each other. Students in the Allied Health fields of Harris College
together will develop the knowledge and skills to be interprofessional leaders within and beyond their respective disciplines.

Career
Undergraduate

HCHS30333 - Global Health Abroad

Department(s)
Health And Human Science Gen

Long Description (Catalog Description)
This course provides an overview of the health care delivery system in the United States in comparison to different systems of countries around the globe. The healthcare system will be the focus, with an emphasis on the country in which the course is being delivered. This course will explore the drivers of change over time that shape the organization and delivery of healthcare services in different systems. It will explore how services are delivered and the relationships between the different providers and payers (i.e., insurance companies, national health care). The program will have visits to various facilities in the country to allow for an overview of the facility, its services and the funding sources. Social and scientific factors related to health beliefs and practices will also be examined and discussed.

Career
Undergraduate

HCHS30653 - Introduction to Aging: Growing Old in an Aging Society

Department(s)
Health And Human Science Gen

Long Description (Catalog Description)
This interprofessional course is an introduction to aging and/or an overview of the field of gerontology. Major concepts, theories and principles of gerontology will be introduced. Students will explore ageism, current demographic trends in our society, and old age as a stage of lifespan development, health and healthcare concerns of older persons, issues of work, retirement, housing and economics, family relationships and social support, quality of life, and political issues of an aging society.

Career
Undergraduate

HCHS30783 - Families, Caregivers, and People Living with Dementia

Department(s)

Graduate

HCHS70112 - Philosophy of Science

Department(s)
Health And Human Science Gen

Long Description (Catalog Description)
Prerequisites: Admission to PhD in Health Sciences program. This course provides a critical analysis of historical and current views of knowledge development as philosophies of science. Diverse approaches to knowledge development and their influence in the health sciences will be emphasized.

Career
Graduate

HCHS70233 - Scientific & Grant Writing in the Health Sciences

Department(s)
Health & Human Sciences

Long Description (Catalog Description)
Prerequisites: HCHS 70112. This course is crafted to provide students with a comprehensive understanding of the essential aspects of scientific research grant proposal development, including planning, writing, and submission processes. Students will explore various

funding environments and familiarize themselves with the tools and resources necessary for successful grant acquisition. This project-oriented course guides students through the entire lifecycle of grant proposal development.

Career
Graduate

HCHS70913 - Qualitative Methods and Designs

Department(s)
Health And Human Science Gen

Long Description (Catalog Description)
This course is designed to introduce the student to principles of qualitative research methodology including purpose, designs, samplings, coding, analysis, and dissemination.

Career
Graduate

HCHS80100 - Special Topics in Health Sciences

Department(s)
Health And Human Science Gen

Long Description (Catalog Description)
Prerequisites: HCHS 70112. This course is designed to expose doctoral students to current and emerging topics across domains of health sciences, including but not limited to communication sciences & disorders, kinesiology, nursing, nurse anesthesia, and/or social work. Students will be exposed to different special topics related to either the physical health sciences track (eg., immunology, genetics) or social health sciences track (eg., public health policy, children, pain management). May be taken for 1-3 credit hours, depending on the topic.

Career
Graduate

HCHS80213 - Quantitative/ Qualitative Methods

Department(s)
Health And Human Science Gen

Long Description (Catalog Description)
Prerequisites: HCHS 70112; or permission of instructor. The purpose of this course is to familiarize students with research methodologies used within various fields of Health Science. Emphasis is on research design (including quantitative, qualitative, and mixed-methods approaches), critical analysis of published and proposed research, and development of research proposals.

Career
Graduate

HCHS80223 - Intermediate Statistics

Department(s)
Health And Human Science Gen

Long Description (Catalog Description)
Prerequisites: HCHS 80213; or permission of instructor. This course provides an introduction to the fundamental theories and practical applications of statistical techniques, with a focus on bivariate analysis. It is designed to accommodate students from all backgrounds of statistical experience, aiming to empower them to effectively utilize these techniques. Students will learn to interpret results and make informed decisions based on their data analysis. The course prioritizes practical understanding over deep mathematical or theoretical biostatistics, making it accessible and applicable for a broad range of academic and professional interests.

Career
Graduate

HCHS80233 - Advanced Statistics

Department(s)
Health And Human Science Gen

Long Description (Catalog Description)
Prerequisites: HCHS 80223; or permission of instructor. This course is designed to further knowledge and skills developed in the intermediate statistics course and to move you, as Ph.D. students, toward the frontier of empirical techniques as used in academic journals and research projects. It aims to help you to develop skills with a range of advanced statistical procedures and programs for multivariate data analysis. The focus will be on practical issues such as preparing data for analysis, selecting the appropriate analysis, menu-driven and syntax programming, interpreting output, and presenting results of a complex nature.

Career
Graduate

HCHS80243 - Measurement

Department(s)
Health And Human Science Gen

Long Description (Catalog Description)
Prerequisites: HCHS 60021 and 70112. This course is designed to advance knowledge and skill in measurement as a foundational necessity for scientificresearch. It covers a range of concepts and methods that can be used to analyze instruments utilized in published research, draft methodological research, and perform procedures.

Career
Graduate

HCHS80253 - Multilevel Modeling

Department(s)
Health And Human Science Gen

Long Description (Catalog Description)
Prerequisites: HCHS 80233 or permission of instructor. This course explores advanced statistical modeling techniques, with a focus on Multilevel Regression Models, Growth Curve Modeling, and Structural Equation Modeling, tailored specifically for health sciences research. Through a combination of lectures, hands-on exercises, and real-world examples, students will develop the skills necessary to conduct complex statistical analyses. The course places a strong emphasis on practical applications, critical evaluation of results, and the effective communication of findings in both written and oral formats.

Career
Graduate

HCHS80533 - Scoping Review Methodology

Department(s)
Health And Human Science Gen

Long Description (Catalog Description)
This course is designed to expose doctoral students to scoping review methodology, useful for systematically identifying what is known and not known around a topic of research interest. Students will identify a research question, develop a scoping review protocol, and conduct a systematized scoping review resulting in a manuscript suitable for publication submission.

Career
Graduate

HCHS80543 - Systematic Review & Meta-analysis

Department(s)
Health And Human Science Gen

Long Description (Catalog Description)
This course is designed to expose students to systematic review and meta-analysis methodology, useful for comparing two or more evidence-based interventions on a focused research interest. Students will identify a research question, develop a systematic

review protocol, and conduct a systematic review resulting in a manuscript suitable for publication submission.

Career
Graduate

HCHS90980 - Dissertation

Department(s)
Health And Human Science Gen

Long Description (Catalog Description)
Prerequisites: Admission to Ph.D. candidacy and permission of instructor. A minimum of 6 hours of HCHS 90980 Dissertation is required.

Career
Graduate

HCHS90990 - Dissertation

Department(s)
Health And Human Science Gen

Long Description (Catalog Description)
Prerequisites: Six hours of HCHS 90980 and permission of instructor. A minimum of 6 hours of HCHS 90990 Dissertation is required.

Career
Graduate

HCOL40000 - Experimental Course

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. For new Honors colloquia not yet proposed as permanent courses. Different course subtitles with different content may be repeated for credit.

Career
Undergraduate

HCOL40013 - Nature of the Universe

Department(s)
Honors College

Long Description (Catalog Description)
An examination of interdisciplinary aspects of physical and natural science; the submicroscopic world and the cosmos; cosmology; developments in modern biological and genetic research; mathematics and logic; the nature of scientific inquiry and our understanding of the physical world.

Career
Undergraduate

HCOL40023 - On Human Nature

Department(s)
Honors College

Long Description (Catalog Description)
An examination of the development of our self-understanding, the origins of human culture and the study of contemporary culture as it affects the individual.

Career
Undergraduate

HCOL40033 - Nature of Values

Department(s)
Honors College

Long Description (Catalog Description)
An examination of contemporary value systems through the study of certain intrinsic values as revealed in a variety of readings, thought patterns and human creations.

Career
Undergraduate

HCOL40043 - Nature of Society

Department(s)
Honors College

Long Description (Catalog Description)
An examination of the structure, functions, and processes of our social, political, and economic institutions.

Career
Undergraduate

HCOL40053 - Origins

Department(s)
Honors College

Long Description (Catalog Description)
An interdisciplinary course addressing the origins of time, order, change, the universe, earth, man, and human cultures.

Career
Undergraduate

HCOL41013 - Disease, Disorder, and Disability

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. In this discussion-centered course, we explore a series of unsettled questions in biology, psychology, medicine, and philosophy: What is disease? Are diseases purely biological conditions or is the very definition of disease shaped by society? What does it mean to be healthy or normal? Are psychiatric disorders real? Are disabilities medical conditions or social ones? No previous background in philosophy, science, or medicine is required.

Career
Undergraduate

HCOL41023 - Empathy

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. In this discussion-centered course, students explore and experience empathy in its individual, interpersonal, and civic modalities by way of readings in literature, psychology, sociology, and philosophy.

Career
Undergraduate

HCOL41033 - Sports, Society, and Culture

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. In this discussion-centered course, students employ tools of rhetoric, anthropology, sociology, and history to gain new perspectives on the games we watch and play, exploring the intimate links between sports, politics, religion, business, education, race, and gender.

Career
Undergraduate

HCOL41043 - Creativity, Imagination and Innovation

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. This course explores the use of creativity principles to create innovative solutions to cultural and business problems.

Career
Undergraduate

HCOL41053 - Life Online

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. This course explores the experiential and social dimensions of the Internet, social media and technology.

Career
Undergraduate

HCOL41063 - Outlaws

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. This course explores the causes of crime and the behavior of criminal organizations from the Civil War to the present, using concepts and readings from journalism, sociology, and literature to explore the social contexts and legends of infamous figures.

Career
Undergraduate

HCOL41073 - Race at the Movies

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. This course examines pervasive and persistent patterns of racial imagery in mainstream U.S. cinema.

Career
Undergraduate

HCOL41083 - A Secular Age?

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. This course examines the nature and significance of secular society through the lenses of multiple academic disciplines. Topics include the historical forces that gave rise to secular society and the diverse forms of secularization throughout the world.

Career
Undergraduate

HCOL41093 - Art and Activism

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. This course empowers students to engage with activist art as critics, consumers, and creators, to challenge themselves and each other by interacting vigorously with a wide range of art works created with the goal of influencing thought and action.

Career
Undergraduate

HCOL41103 - Cops and Controversies

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. This colloquium explores the social contexts and impacts of current controversies in policing ranging from police misconduct and racial profiling to community policing and media relations.

Career
Undergraduate

HCOL41113 - Mind and Matter

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. This colloquium examines topics in the philosophy of mind and cognitive science, including the mind-body problem, the hard problem of consciousness, the Sapir-Whorf hypothesis, artificial intelligence, and conceptual disputes in contemporary cognitive science.

Career
Undergraduate

HCOL41123 - Callings

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. This colloquium provides a humanistic exploration of what economists call specialization: the discovery and cultivation of one's unique talents, passions, and duties, not only in the realm of paid employment but in all parts of life.

Career
Undergraduate

HCOL41133 - Transcultural Dialogues

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. This uniquely experiential course examines a range of social issues through the lenses of different cultural perspectives.

Career
Undergraduate

HCOL41143 - Asian Cultures on the Go

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. This course examines, using the board game Go as a focal point and an exemplar, various aspects of East Asian cultures. The relation between Asian culture and Western culture and the boundary between culture and natural science are also explored.

Career
Undergraduate

HCOL41153 - The Beauty of Black Music

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. This course examines the social, economic and political power that Black music has held in "fine tuning" a culture that has not always accepted the individuals who created it.

Career
Undergraduate

HCOL41163 - Giving and Philanthropy

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. This course explores the philanthropic sector and challenges students to work as a philanthropic foundation that gives funds to local non-profit organizations and as such must investigate, assess, and debate the relative merits of alternative funding targets.

Career
Undergraduate

HCOL41173 - Darwinian Explorations

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. This course examines the ramifications of the theory of evolution for our understanding of culture and the world including the role of genetics, the example of great apes, religious interpretations of human origins, ecological interdependence, and gender.

Career
Undergraduate

HCOL41183 - Mind, Consciousness, Self

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. This course offers an interdisciplinary exploration of several Western and Eastern conceptions of mind, consciousness, and self through philosophical discussion as well as experiential exercise and exploration.

Career
Undergraduate

HCOL41193 - Journalism and Moral Courage

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. Students use historical research methods and concepts from media studies to examine the meaning of journalistic truth, the role of moral courage in pursuit of journalistic truth, and role of journalism as a bulwark of freedom and human rights.

Career
Undergraduate

HCOL41203 - Society through Multimedia

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. This course examines the cycle of influence between media and society through critical examination of film, television, online video, video games and other forms of digital media.

Career
Undergraduate

HCOL41213 - Sex, Evolution, and the Brain

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. Using research from psychology, evolutionary biology, nutrition, and neuroscience, students explore what research says about how we can be healthier, happier, and better connected to others.

Career
Undergraduate

HCOL41223 - Design for Social Impact

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. Students use the frameworks of design thinking and systems thinking to develop innovative, impactful solutions to complex social problems.

Career
Undergraduate

HCOL41233 - Citizenship

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. Through exploration of religious, political, historical, and fictional texts, students examine and evaluate contending responses to the enduring question of what it means to be a good citizen.

Career
Undergraduate

HCOL41243 - Gender

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. Through readings, film, discussion, and writing, students explore critical questions about gender and sexuality in society.

Career
Undergraduate

HCOL41253 - Islam and Politics

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. Students analyze the pervasive role of Islam in the cultural and political life of the Muslim World via exploration of topics such as Islam and terrorism, Islam and human rights, Islam and the Arab Spring, and the prospects for relations between the Muslim World and the West in an age of globalization and interdependence.

Career
Undergraduate

HCOL41263 - Democracy in the Workplace

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. Students examine issues of democracy, dissent, and debate in 21st century workplaces, exploring the nature, value, and scope of these ideals in a postmodern, corporatized society.

Career
Undergraduate

HCOL41273 - The Other Texas

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. Students examine the history and culture of Texas, drawing on popular song, literature and film as well as social science to hear the voices of many prominent Texans, particularly those of diverse and under-represented communities.

Career
Undergraduate

HCOL41283 - The European Union

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. Students explore the historical, economic, political, and legal roots of the EU and the crises that threaten it today.

Career
Undergraduate

HCOL41293 - Deconstructing Disney

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. Students examine the impact of the Walt Disney Company (including but not limited to its movies, merchandise, theme parks, and television programming) on a range of cultural, economic, and societal issues.

Career
Undergraduate

HCOL41303 - Frankenstein, Then and Now

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. Students explore the enduring fascination with Mary Shelley¿s Frankenstein, analyzing the contexts and ideas that influenced Shelley herself and the diverse legacies of Frankenstein in contemporary literature and film.

Career
Undergraduate

HCOL41313 - Musical Theater and American Politics

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. Students trace political and social movements in the United States from the 1920s to the present through the lens of musical theater, exploring how issues of class, gender/sexuality, race, and national identity play out on the stage and screen.

Career
Undergraduate

HCOL41323 - Mindfulness and Modern Life

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. Students explore what it means to live a mindful life in the 21st century and the kinds of thinking and practices that such a life entails.

Career
Undergraduate

HCOL41333 - Games and Learning

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. Students examine the nature, value, and challenges of game-based learning in a variety of fields, exploring the work/play divide, gamification, and participatory culture.

Career
Undergraduate

HCOL41343 - History of the Scientific Endeavor

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. Students gain insight into a range of social and personal issues, from the climate change debate to medical advice from physicians, by examining key texts and ideas from the history of
science.

Career
Undergraduate

HCOL41353 - Literature, Care, and the Anthropocene

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. Students draw upon the medical humanities, memoir, and science fiction to explore what caregiving and care ethics look like in a time when our own planet is facing a health crisis.

Career
Undergraduate

HCOL41363 - The End of the American Century?

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. Students examine the future of American leadership in a rapidly changing global context.

Career
Undergraduate

HCOL41373 - Beyoncé and Intersectionality

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. Informed by the intersectional framework of Kimberlé Crenshaw, students in this course utilize the artistry, musicianship, and feminism of Beyoncé to explore societal issues of patriarchy, racism, classism, and sexism.

Career
Undergraduate

HCOL41383 - Scary Parents in Film, Literature, and Medical History

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. Students critically and comparatively explore the depiction of monstrous parents (particularly mothers) in film, literature, and medical history.

Career
Undergraduate

HCOL41393 - The World in the News

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. Through comparative examination of English-language newspapers and news sites in over 100 countries, students identify cultural differences and similarities across nations and explore the tensions between globalization and cultural identity.

Career
Undergraduate

HCOL41403 - Presidential Leadership

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. Through first-hand exposure to speeches and texts by former presidents and prime ministers across the Americas, students examine elements of executive

leadership and advantages and disadvantages of presidential and prime ministerial systems.

Career
Undergraduate

HCOL41413 - Resilience

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. Using learning materials and perspectives from multiple disciplines and cultural contexts, students examine the internal and external resiliencies that allow humans to endure and thrive in the most difficult of circumstances.

Career
Undergraduate

HCOL41423 - Reproductive Justice and Narrative

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. Students study the narratives of pregnant people, using the methods of Narrative Medicine to understand how the power of story and how legal, political, medical, and cultural circumstances shape personal experiences of pregnancy and decisions around pregnancy care.

Career
Undergraduate

HCOL41433 - Underworlds: Deconstructing the Normal in Literature and Film

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. Students reflect upon cultural standards and norms embedded in contemporary novels and films, by means of which certain characters are rendered despicable, marginal, or lesser.

Career
Undergraduate

HCOL41443 - City as Text

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. Students in this site-based course learn to read the spaces around them as vibrant, evolving, historical texts.

Career
Undergraduate

HCOL41453 - The Worldliness of Virtual Worlds

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. Students examine the worldly nature and significance of games and gaming communities, in part by learning to play and reflect upon well-known video games.

Career
Undergraduate

HCOL41463 - Technological Dystopias

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College.. Students examine popular dystopic depictions of the future (via games, films, and literature), seeking to understand how technology changes our perceptions of reality and humanity.

Career
Undergraduate

HCOL41473 - Superheroes and Culture

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College and declared pursuit of University Honors. Students examine hero myths across multiple cultural contexts to explore how they reflect and/or critique their cultural contexts while simultaneously shaping readers¿ cultural identities.

Career
Undergraduate

HCOL41483 - Counting on Sustainability

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College and declared pursuit of University Honors. Students understand the nature and significance of sustainability, climate change, and the tradeoffs facing us, individually and globally, in the 21st century.

Career
Undergraduate

HCOL41493 - Capitalism and Socialism

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College and declared pursuit of University Honors. Students explore theories and forms of capitalism and socialism, past and present, seeking to understand their promises and failures to generate freedom, fairness, and prosperity for all.

Career
Undergraduate

HCOL41503 - Modernity and After

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College and declared pursuit of University Honors. Students seek to understand the present age by asking what is new about it compared to the era of modernity (1450-1918).

Career
Undergraduate

HCOL41513 - Freedom in the Western World

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College and declared pursuit of University Honors. Students comparatively analyze how freedom is defined and achieved across various Western nations.

Career
Undergraduate

HCOL41523 - Reckoning with Racial Reconciliation

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College and declared pursuit of University Honors. Students study the goals and practices of Universities Studying Slavery, reflect on their own campus culture through this comparative lens, and consider additional ways to create a more inclusive and equitable campus community.

Career
Undergraduate

HCOL41543 - Spellbound: Witches, Witchcraft and Witch Hunts

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College. This course explores the cultural phenomena of witches, witchcraft and witch hunts with a special focus on the 1692 Salem witch hysteria. The course includes examining primary and secondary sources, case studies, popular literature and movies to gain a greater understanding of the role that that witches and witchcraft play in contemporary society.

Career
Undergraduate

HCOL41553 - Punishing Spaces, Sanctified Places

Department(s)
Honors College

Long Description (Catalog Description)
Prerequisites: Acceptance into the Honors College.This course helps students develop a deeper understanding of the ideals, principles, and beliefs that guide their behavior and how they experience the world around them. Students will grapple with questions around sites of tragedy, monuments, and gentrification of communities. Through an interdisciplinary lens, students interrogate how place and space form our understanding of the world and ourselves.

Career
Undergraduate

HCOM10313 - Foundations of Health Communication

Department(s)
Communication Non-Depart Prog

Long Description (Catalog Description)
This class aims to provide you with an overview of the field of health communication and enhance your understanding about it. Specifically, you will learn most studied major topical areas in healthcare and health communication, theories and methods used to guide health communication research and intervention, and design and evaluations of health campaigns. Students may not receive credit for both HCOM 10313 and COMM 30313.

Course Typically Offered
Contact Department For Details

Career
Undergraduate

HCOM20303 - Health, Communication & Media

Department(s)
Communication Non-Depart Prog

Long Description (Catalog Description)
A beginning look at issues and opportunities in the areas of health, communication and media. This class is designed to help students examine social and media forces of health communication that impact diverse groups. Topics will include health promotion campaigns, media health edutainment, interpersonal health communication and media advocacy and outreach.

Course Typically Offered
Contact Department For Details

Career
Undergraduate

HCOM20313 - Interpersonal Health Communication

Department(s)
Communication Non-Depart Prog

Long Description (Catalog Description)
The quality of relational communication is fundamentally tied to human health. This course aims to better understand how interpersonal communication affects people's physiological well-being by studying the health outcomes associated with relational processes like emotional expression, disclosure, affection, and conflict.

Course Typically Offered	Career
Contact Department For Details	Undergraduate

HCOM30313 - Health Communication in the 21st Century

Department(s)
Communication Non-Depart Prog

Long Description (Catalog Description)
Prerequisites: HCOM 10313 or 20303. Globalization, technological advancement, and new media have been revolutionized and complicated issues in health communication and healthcare. This class is designed to help students examine social and media forces of health communication that impact diverse groups in the 21st century. We will take a close examination of the latest issues and opportunities in the areas of health, communication and media. Topics will include e-health, m-health, telemedicine, health campaigns, culture and diversity in healthcare.

Course Typically Offered	Career
Contact Department For Details	Undergraduate

HCOM40933 - Health Communication Campaigns

Department(s)
Communication Non-Depart Prog

Long Description (Catalog Description)
Prerequisites: HCOM 10313 and 20303. Learn how a health communication campaign is created and executed. Students will utilize their accumulated knowledge from their minor courses to analyze health campaign case studies, then create and execute a health communication campaign as a team.

Course Typically Offered	Career
Contact Department For Details	Undergraduate

HCOM40970 - Health Communication Special Topics

Department(s)
Communication Non-Depart Prog

Long Description (Catalog Description)
Prerequisite: HCOM 10313 or 20303. Specific topics requiring independent or small group research and study in health communication.

Course Typically Offered	Career
Contact Department For Details	Undergraduate

HEBI60003 - Interpreting the Hebrew Bible in Context

Department(s)
BIBL

Long Description (Catalog Description)
This course is a graduate level introduction to critical interpretation of the Hebrew Bible and Apocryphal/ Deuterocanonical books focusing on content and context. It will include a selective survey of the history, literature and religion of ancient Israel exploring in part the Torah (Pentateuch), Prophets (Former and Latter) and, Writings (Hebrew and Greek narrative, poetic and wisdom books).

Career
Brite

HEBI60200 - General Transfer Credit

Department(s)
BIBL

Long Description (Catalog Description)
General Transfer Credit

Career
Brite

HEBI65013 - Exegesis in the Hebrew Bible

Department(s)
BIBL

Long Description (Catalog Description)
Prerequisite: HEBI 60003 or equivalent. Methods and resources in critical study of selected passages or book in the Hebrew Bible, with attention to literary, historical, and theological considerations. May be repeated for credit under different topics.

Career
Brite

HEBI65023 - Exegesis in Apocryphal/Deuterocanoncial Books and Pseudepigrapha

Department(s)
BIBL

Long Description (Catalog Description)
Prerequisite: HEBI 60003 or equivalent. Method and practice in exegesis of selected literature in the Apocryphal/Deuterocanonical Books and Pseudepigrapha. Literary, historical, and theological considerations. May be repeated for credit under different topics.

Career
Brite

HEBI70013 - Biblical Hebrew I

Department(s)
BIBL

Long Description (Catalog Description)
Grammar and exercises.

Career
Brite

HEBI75033 - Biblical Hebrew II

Department(s)
BIBL

Long Description (Catalog Description)
Prerequisite: HEBI 70013 or its equivalent. Continuation of grammar, syntax, and reading of selected Hebrew Bible passages.

Career
Brite

HEBI75043 - Readings in Biblical Hebrew

Department(s)
BIBL

Long Description (Catalog Description)
Prerequisite: HEBI 75033 or its equivalent. Practice in reading selections from the Hebrew Bible, with emphasis on syntax and text criticism. May be repeated for credit under different topics.

Career
Brite

HEBI75053 - The Interpretation of the Major Prophets

Department(s)
BIBL

Long Description (Catalog Description)
Prerequisite: HEBI 60003 or equivalent. The Interpretation of the Major Prophets (First Isaiah, Jeremiah, and Exekiel). The course focuses on the

historical background, literary structure, sociocultural features, and religious themes of each of these prophets.

Career
Brite

HEBI75063 - The Interpretation of the Minor Prophets

Department(s)
BIBL

Long Description (Catalog Description)
Prerequisite: HEBI 60003 or equivalent. The interpretation of one or more of the Minor Prophets. Methods and resources in the critical study of the Minor Prophets with attention to literary, historical, and theological considerations.

Career

Explores themes and topics in world history from the origins of civilization to 1500.

Course Typically Offered	Career
Fall and Spring	Undergraduate

HIST10113 - World History since 1500

Department(s)
History

Long Description (Catalog Description)
This is a lower-division, lecture course covering global development from around 1500 CE to the 21st century. It covers the main political, social, and cultural trends in a variety of societies while at the same time stressing the global perspective. Thus, the first goal is learning the specific histories and cultures within a comparative global context. The rise and fall of civilizations, empires, and
states will be studied within the conceptual frameworks including modernity, nation states, imperialism, and colonialism. A second goal of the course is to develop the critical and analytical skills of students. In addition to learning historical content, students will also be engaged in the analysis of writing history through discussing a wide range of primary sources including museum objects and archival documents.

HIST10223 - Modernization and its Discontents: Europe 1789 to the Present

Department(s)
History

Long Description (Catalog Description)
This course examines the history of Europe in the nineteenth and twentieth centuries, and will identify, explore, and define the developments of modern European history. The course will focus on the common heritage and themes that make it possible to speak of 'European' history, while at the same time developing an appreciation for regional and cultural variations. (EU)

Course Typically Offered	Career
Fall and Spring	Undergraduate

HIST10313 - Introduction to Modern Africa

Department(s)
History

Long Description (Catalog Description)
This is a lower-division lecture course covering major transformations in Africa from the 1800 to the 21st century. Readings are carefully sampled thematically and geographically, introducing students to questions of statecraft, class, gender, ethnicity, violence, environment, and decolonization in precolonial, colonial, and postcolonial African contexts. This course analyzes variegated impact of the Atlantic slave trade, abolition, and the "legitimate" commerce on societies, states, and peoples.

HIST10803 - Introduction to Islamic Civilization

Department(s)
History

Long Description (Catalog Description)
This course surveys the history of the Middle East from the rise of Islam to the end of the sixteenth century. Students will be introduced to basic aspects of the political, social, and cultural dimensions of Islamic civilization from Spain to Iran as they changed over time. Central themes include the emergence of Sunni and Shi'i identities, the relationship of Muslims and non-Muslims, and the unique material and intellectual contribution of Islamic civilization to world history and other societies. (ME)

Course Typically Offered	Career
Fall	Undergraduate

HIST10813 - Introduction to the Modern Middle East

Department(s)
History

Long Description (Catalog Description)
This survey course is an introduction to the history, politics, culture and societies of the modern Middle East. To understand how and why the Middle East changed from a relatively peaceful region into a radicalized environment, we will study the Middle Eastern experiences with European imperialism, authoritarian rule, the challenges of the social and economic development, the rise of political Islam, the Arab-Israeli conflict, the oil, and the role of the United States in the region. (ME)

Course Typically Offered	Career
Spring	Undergraduate

HIST10833 - History of Islamic Slavery

Department(s)
History

Long Description (Catalog Description)
This survey course covers the practice of slavery in the Islamic world from the time of Prophet Muhammad to the 20th century. Students will learn about not only the diverse histories of different Islamic societies from Southeast Asia to North Africa and Americas, they will also study the similarities and differences of slavery as an institution in these societies. The themes covered in the course include concubinage, slave dynasties, elite and military slavery, race and slavery, slave trade, manumission, and abolition of slavery.

Career
Undergraduate

HIST10843 - Pirates of the Mediterranean

Department(s)
History

Long Description (Catalog Description)
This lecture course covers the history of corsairs and pirates in the Mediterranean in the early modern period, i.e. the 16th to early 19th centuries. The main goal of the course is providing a historical context for the 'external war' between the Christendom and Islamic world in the Mediterranean. Through our weekly discussions, students will acquire the analytical skills to problematize the geographic, religious, and ethnic divisions between Europe, Asia, Africa, and America as well as those between Islam and Christianity.

HIST20003 - Honors Western Civilization to 1500

Department(s)
History

Long Description (Catalog Description)
* Prerequisite: Membership in the Honors Program. In the first semester of the western civilization track, students examine a) the cultural frameworks and development of ideas about human nature; b) the political structures; c) the social and economic patterns as they evolved in the first civilizations of the near east and the creation of civilization in Europe. As the same issues are examined in the Greco-Roman world, in the Middle Ages and in the Renaissance, students analyze the development of a world-view that is peculiar to the West and its Judeo-Christian heritage. Extensive analysis through discussion and writing.

HIST30383 - Experiences and Encounters: Paris and Madrid, 1880-1940

Department(s)
History

Long Description (Catalog Description)
This study-abroad course has as its focus the historical trajectories of Paris and Madrid in the late nineteenth and early twentieth centuries, and is taught in conjunction with ENGL 40553, Studies in Nineteenth-Century American Literature: American Writers in Paris and Madrid. The two courses together will explore the experience of travel to Europe for Americans in this period, the narratives they wrote about their travel, and the historical context of these experiences. With the cities of Paris and Madrid as a kind of traveling classroom to showcase the factual and physical context of these narratives, students in HIST 30383 will gain a familiarity with the principal historical developments surrounding Paris and Madrid in the nineteenth and twentieth centuries, the perceived and real differences between the two cities, and how this historical context shaped the experiences of the writers featured in the English course. This

course will use historical sources alongside the literary texts of the English course as catalysts for studying the history and culture of their two cities. (EU)
